Operations

During the year under review your Company registered total revenue of Rs.17,217.84 lac as compared to previous year's revenue of Rs.18,344.11 lac a de-growth of 6.14% over the previous year. The Net Profit is at Rs.536.54 lac as compared to Rs.614.61 lac in the previous year, a decrease of 12.70% from previous year.

Packaging business

The decrease in profit is mainly due to decrease in volume in Pet Preforms. Few bottlers (our customers) have initiated backward integration by starting their own Pre form manufacturing set up. Over all, sales (including Job work) in PET Performs were down by 17.76% against last year. The sales of crowns have grown by 7.51% against last year. The Closures have grown at 13.44% higher than last year.

Real Estate Business

The company through its related company, AMD Estates & Developers Private Limited is developing a Commercial Complex at Sector-114, Gurgaon, Haryana in collaboration with VSR Infratech Private Limited, New Delhi. Since growth in the real estate market of the country has been stagnant, the development of this project has slowed down considerably. During the year under review, the company has received revenue of Rs.41.11 lac from this project.

Expansion

The company is exploring opportunities to expand its business in other geographies of the country.

MANAGEMENT DISCUSSION AND ANALYSIS

Industry Structure & Developments

Packaging

The global plastics industry is observing a continuous shift of production bases to low-cost Asian countries. With increasing foreign investment and rise in the number of new manufacturing establishments in the region, Asia has become the largest and the fastest growing market for plastics in the world. In particular, China and India offer enormous growth opportunities due to expanding production activities in the countries. Packaging sector is the largest application sector for the plastic industry. Plastic is the most common form of packaging being used in recent times because of its unique benefits that are as yet unmatched by other forms of packaging. Accelerated growth in the food and beverage sector, along with rise in demand witnessed within the FMCG sector, pharmaceutical industry, paint and lubricant industry together comprise some of the key factors propelling the plastic packaging sector.

Among the vast family of plastics, Polyethylene Terephthalate, popularly known as PET, is expected to grow the fastest at 11.0% annually. Majority of the PET available in India is utilized in the production of bottles. In the recent years, PET bottles have inundated the Indian market, with annual growth rate in consumption exceeding 20.0%. PET is constantly replacing conventional bottle raw materials such as glass and metal. The dominance of the organized and unorganized sector in the Indian PET preforms market varies in all end user applications of preforms. The dominance of the organized and unorganized sector in the Indian PET preforms market varies in all end user applications of preforms.

World demand for caps and closures is expected to exceed \$55 billion in 2019. In unit terms, global demand is expected to exceed two trillion annually. Beverages will continue to account for well over half of overall demand in units. Although the carbonated soft drink market will continue to grow in many areas, particularly in developing countries, it is in decline in the US and Western Europe. Beer production is expected to continue to grow, but cans have increased their market presence in many countries, restricting growth for metal crowns and other closures used for beer bottles.

Real Estate

The real estate sector has been showing sluggish growth. The development of commercial complex by Company's related company AMD Estates & Developers Private Limited at Sector 114, Gurgaon, Haryana is progressing slowly.

Segment-wise or product-wise performance

Your Company manufactures Crown Caps which are mainly used as metallic closures for various edible items packed in glass bottles e.g. Carbonated Soft Drinks, Fruit Juices, Milk products, Beer etc. The use of glass bottles has been seen steady or little bit de-growth whereby the use of Returnable Glass Bottle (RGB) has been seen in reducing trends. However company's crown volumes have gone up 1.94% this year comparing to last year. Your company remained one of the dominant players in the crown caps market.

The plastic closure market has been continuously getting its momentum due to increased usage of PET Bottles. The sales of Closures were almost flat during the year against last year.

During the year under review, some of our customers have started their own Pre form manufacturing set up due to which the demand of Pre form were down during the year. However, Job work in perform has been increased marginally. Overall the perform sales was down against the last year.

Outlook, Opportunities & Threats, Risk and Concerns

The Overall Beverage Packaging Industry is growing at over 12% per annum. The continued trend of shifting customer base from glass bottles to PET Bottles is being seen in a positive note.

Beverages industry like Beer and Wine did not prefer plastic bottles due to limited ultraviolet protection and high gas permeability. However, advancement in technology makes it possible to produce high-quality PET bottles that extend the shelf-life of beverages.

With the National Green Tribunal mulling ban on plastic packaging of products, including PET bottles, a study industry body Ficci and Strategy& highlighted that the ban is likely to hit 13 lakh jobs and sales of whopping Rs.53,000 crore. The study recommended that the prudent way forward is not an outright ban on plastic packaging but rather finding solutions to the problem of plastic waste management. The study highlighted that plastics are the material of choice in packaging products across categories globally.

While appreciating the concerns related to environment it needs to be noted that restrictions or ban on plastics packaging would impact the growth of several industries like FMCG, Food Processing, Plastics Packaging and allied industries.

If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, except in case of revalued assets.

Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.
