The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the sections “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 51, 57 and 120 respectively. The industry-related information disclosed in this section has been derived from publicly available documents from various sources believed to be reliable, but their accuracy and completeness are not guaranteed and their reliability cannot be assured. Neither our Company, nor any other person connected with the Issue, has independently verified the information in the industry report or other publicly available information cited in this section.

This Draft Letter of Offer also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and, in the section titled “Forward-Looking Statements” on page 14.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Unless the context requires otherwise, the financial information of our Company has been derived from the Restated Financial Information, prepared in accordance with Ind AS and the Companies Act and restated in accordance with the SEBI ICDR Regulations.

Materiality:

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively; and*
- *Some events may not be material at present but may have a material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Draft Letter of Offer, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

INTERNAL RISK FACTORS

- 1. We, as an NBFC have to adhere to several regulatory norms prescribed by RBI from time to time. Any non-compliance with such norms or any adverse change in the norms could negatively affect our Company’s operations, business, financial condition and the trading price of Equity Shares.**

NBFCs in India are subject to strict regulation and supervision by the RBI. We require certain approvals, licenses, registrations and permissions for operating our business. Such approvals, licenses, registrations and permissions

must be maintained / renewed over time and we may have to comply with certain conditions in relation to these approvals. Moreover, the applicable requirements may change from time. We are required to obtain and maintain a license for carrying on business as an NBFC. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. RBI has the authority to change these norms/ criteria as and when required. Inability to meet the prescribed norms/ criteria, can adversely affect the operations and profitability of our Company.

2. Any disruption in our sources of funding or increase in costs of funding could adversely affect our liquidity and financial condition.

The liquidity and profitability of our business majorly depend on our timely access to, and the costs associated with, raising funds. Our business thus depends and will continue to depend on our ability to access a variety of funding sources. Further, our ability to compete effectively will depend, in part, on our ability to maintain or increase our margins. Our margins are affected in part by our ability to continue to secure low-cost funding at rates lower than the interest rates at which we lend to our customers. Our ability to raise funds on acceptable terms and at competitive rates depends on various factors including our current and future results of operations and financial condition, global and local macroeconomic conditions and the effect of events such as a pandemic, our risk management policies, the shareholding of Promoter in our Company, our credit ratings, our brand equity, the regulatory environment and policy initiatives in India and developments in the international markets affecting the Indian economy. If we are unable to access funds at an effective cost that is comparable to or lower than that of our competitors, our net interest margins, income, and market share may be adversely affected.

Certain regulatory developments including the restrictions imposed on NBFCs by the RBI through a Master Circular – Bank Finance to Non- Banking Financial Companies dated July 1, 2015 (the “Master Circular”) may restrict our ability to obtain bank financing for specific activities. Pursuant to the Master Circular, the RBI has imposed certain restrictions on banks providing financing to NBFCs. Under this Master Circular, certain activities by NBFCs are ineligible for financing by banks, including certain types of discounting and rediscounting of bills, current and long term investments in shares, debentures, loans and advances by NBFCs to their subsidiaries and group companies, lending by NBFCs to individuals for subscribing to public offerings and purchasing shares from the secondary market, unsecured loans, inter-corporate deposits provided by NBFCs, and subscription to shares or debentures by NBFCs. In addition, the Master Circular prohibits:

- banks from granting bridge loans of any nature, provide interim finance against capital or debenture issues or in the form of loans of a temporary nature pending the raising of long-term funds from the market by way of capital, deposits, or other means to any category of NBFCs;
- banks from accepting shares and debentures as collateral for secured loans granted to NBFCs; and
- banks from executing guarantees covering inter-Company deposits or loans that guarantee refund of deposits or loans accepted by NBFCs. The Master Circular also requires that guarantees not be issued by banks for the purpose of indirectly enabling the placement of deposits with NBFCs.

Changes in economic, regulatory and financial conditions or any lack of liquidity in the market could adversely affect our ability to access funds at competitive rates, or at all, which could adversely affect our liquidity and financial condition.

3. We are affected by volatility in interest rates for both our lending and fund raisings operations, which could cause our net interest income to decline and adversely affect our results of operations and profitability.

A significant component of our revenue is the interest on term loans and other financing activity (net of reversal) we receive from the loans we disburse as given below:

Particulars	Unaudited, reviewed	Restated		
	June 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Total Income (In ₹ Lakhs)	129.64	131.98	115.36	204.52
Interest Income (In ₹ Lakhs)	58.68	131.25	110.04	204.52
Percentage of Total Income (in %)	45.26	99.45	95.38	100.00

Our net interest margins are affected by any volatility in interest rates in our lending operations. Interest rates are highly sensitive to many factors beyond our control, including competition from other banks and NBFCs, the

monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions and other factors, which have historically generated a relatively high degree of volatility in interest rates in India. Persistently high inflation in India may discourage the Government from implementing policies that would cause interest rates to decrease. Moreover, if there is an increase in the interest rates, we pay on our borrowings that we are unable to pass to our customers, we may find it difficult to compete with our competitors, who may have access to funds at a lower cost or lower cost deposits. To the extent our borrowings are linked to market interest rates, we may have to pay interest at a higher rate than lenders that borrow only at fixed interest rates. Further, our ability to pass on any increase in interest rates to borrowers may also be constrained by regulations implemented by the Government or the RBI. In a declining interest rate environment, if our cost of funds does not decline simultaneously or to the same extent as the yield on our interest-earning assets, it could lead to a reduction in our net interest income and net interest margin.

- 4. Any inability on our part to effectively utilize the Issue Proceeds could adversely affect our financial results. The objects of the Issue are based on the internal estimates of our management and have not been appraised by any bank or financial institution.**

The objects of the Issue are based on management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financial results. Utilization of Issue proceeds would be disclosed to our Company's shareholders in the manner required under the SEBI LODR Regulations. For further details, please see to the section titled "Objects of the Issue" on page 44 of this Draft Letter of Offer.

- 7. Our success depends largely on our senior management and our ability to attract and retain our key personnel. Any significant changes in the key managerial personnel, may affect the performance of our Company.**

Our success depends on the continued services and performance of the members of the senior management team and other key employees. Competition for senior and experienced personnel in the industry is intense at present. The loss of the services of senior management or other key personnel could seriously impair our ability to continue to manage and expand our business, which may adversely affect our financial condition.

- 8. Our Company has been reporting losses in the recent past and continuation of the same could have an adverse material impact on our business, financial condition and results of operation.**

Net Cash Flow from / (used in) Financing Activities	-	-	-

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

- 10. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.**

We have not paid any dividend during the last 3 years. Our Company may retain all our future earnings, if any, for use in the operations, and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate.

11. Our Company is subject to periodic inspections by the RBI. Non-compliance with observations made during any such inspections could result in penalties and fines on our Company and could adversely affect the reputation of the business of our Company.

Our Company is subject to periodic inspections by the RBI of our Company's books of accounts and other records for the purpose of verifying the correctness or completeness of any statement, information or particulars furnished to the RBI or for obtaining any information, which our Company have failed to furnish when called upon to do so. The RBI conducts an annual inspection of our Company's books of accounts and other records relating to our financial position every year under Section 45N of the RBI Act. RBI inspections are a regular exercise and are carried out periodically by RBI for banks, financial institutions and NBFCs. Any major failure to meet the RBI's directions could materially and adversely affect our Company's pending applications or requests with the RBI and our Company's ability to obtain the regulatory permits and approvals required to expand our business or result in the interruption of all or some of our Company's operations, which could have a material adverse effect on our Company's business, financial condition and results of operations.

12. Any regulatory actions and penalties for any past or future non-compliance may adversely affect our business or reputation, or both.

We have to comply with numerous regulatory filings, maintenance of record etc under the Companies Act, 2013, Securities Exchange Board of India (Listing Obligations and Disclosure Requirements), Regulations 2015 ("SEBI Listing Regulation"), Securities Exchange Board of India (Substantial Acquisition of Shares and Takeover) Regulation, 2011 and any other laws and regulation as applicable. While we have been generally compliant and there have been no penalties in the form of fines or other punitive action in the past, any non-compliance of the applicable laws they may impose the penalty on the Company. Such penalty may impact the profitability of the Company.

13. The deployment of funds is entirely at our discretion and as per the details mentioned in the section titled 'Objects of the Issue'.

As the Issue size is not more than ₹10,000 lakhs, under Regulation 82 of the SEBI (ICDR) Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue.

14. Internal or external fraud, dishonesty, or misconduct by our personnel could have a negative impact on our reputation and financial results.

Misconduct by our employees could bind us for transactions that exceed authorised limits or present unacceptable risks, and our employees could conceal unauthorised or unlawful activities from us. Employee misconduct could also involve front running in securities markets or the improper use or disclosure of confidential information or non-compliance with insider trading rules, which could result in regulatory sanctions and serious reputational or financial harm. It is not always possible to deter fraud or misconduct by employees, and the precautions we have taken and the systems we have put in place to prevent and deter such activities may not be effective in all cases. Any instances of fraud or misconduct could adversely affect our reputation, business, results of operations and financial condition.

15. *The Company does not own the premises on which its registered office or corporate office is situated. Any failure on the part of the lessee to renew the lease agreement or any disruption of our rights as a lessee or termination of the agreements with the lessors would adversely impact our business.*

The premises on which the Registered Office and the Corporate Office of the Company is situated is not owned by us. The Company has entered into a formal lease agreement with Owner of the premises and pay rent at a regular interval. The owners may demand that we vacate the premises at any point and in that event, the Company would need to arrange for the Registered office and / or Corporate Office on an urgent basis at such rent as may be applicable as per the market rate applicable upon happening of such event which may adversely affect our profitability as additional expenditure would need to be incurred for the same.

There is no assurance that our Company will be able to enter into the fresh lease agreements in a timely manner and in favourable terms or at all. Further, there is no assurance that we will not face any disruption in our activities which could adversely affect our business operations.

16. *We have in the past entered into related party transactions and we may continue to do so in the future.*

We have entered into certain related party transactions as on the date of this Draft Letter of Offer. While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. For further details, please refer to the chapter titled — "*Financial Information-Related Party Transactions*" at page 112.

17. *We operate in a competitive industry and our failure to successfully compete may adversely affect our business, financial condition and results of operations, and prospects.*

The NBFC Sector is highly competitive. We compete against various domestic companies and some of our competitors may have larger financial resources or access to lower cost funds. They may also benefit from greater economies of scale and operating efficiencies. Whilst we have sufficient track record and experience if we are unable to compete effectively with competitors, we may be unable to sustain or increase our volume of order intake. This Competition may result in reduced revenues, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

18. *Your holdings may be diluted by additional issuances of equity by us, which may adversely affect the market price of our Equity Shares.*

Any future issuance of our Equity Shares may dilute the holdings of investors in our Equity Shares, which could adversely affect the market price of our Equity Shares. Additionally, sales of a large number of our Equity Shares by our principal shareholder could adversely affect the market price of our Equity Shares. The perception that any such sale may occur could also adversely affect the market price of our Equity Shares.

19. *We are subject to cyber security risks and security breaches and may incur increasing costs in an effort to minimize those risks and to respond to cyber incidents.*

A number of other companies have disclosed cyber-attacks and security breaches, some of which have involved intentional attacks. Attacks may be targeted at us, our customers, or both. Although we devote significant resources to maintain and regularly upgrade our systems and processes that are designed to protect the security of our computer systems, software, networks and other technology assets and the confidentiality, integrity and availability of information belonging to us and our customers, our security measures may not provide absolute security. Despite our efforts to ensure the integrity of our systems, it is possible that we may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently or are not recognized until launched, and because cyber-attacks can originate from a wide variety of sources, including third parties outside the Company such as persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments. A successful penetration or circumvention of the security of our systems could cause serious negative consequences, including significant disruption of our operations, misappropriation of our confidential information or that of our customers, or damage to our computers or systems

or those of our customers and counterparties, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss of confidence in our security measures, customer dissatisfaction, significant litigation exposure, and affect to our reputation, all of which could have a material adverse effect on us.

Our servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches. Security breaches, including any breach of our systems or by persons with whom we have commercial relationships that result in the unauthorized release of customers' or businesses' personal information, could damage our reputation and expose us to a risk of loss or litigation and possible liability.

20. Security breaches of customers' confidential information that we store may harm our reputation and expose us to liability.

We store customers' bank information, credit information and other sensitive data. Any accidental or wilful security breaches or other unauthorized access could cause the theft and criminal use of this data. Security breaches or unauthorized access to confidential information could also expose us to liability related to the loss of the information, time-consuming and expensive litigation and negative publicity. If security measures are breached because of third party action, employee error, malfeasance or otherwise, or if design flaws in our software are exposed and exploited, and, as a result, a third party obtains unauthorized access to customer data, our relationships with customers will be severely damaged, and we could incur significant liability. Further, we engage with certain third-party service providers, and although our contracts with them restrict the usage of client data and impose protective precautions, there can be no assurance that they will abide by such contractual terms or that the contracts will be found to be in compliance with data protection laws.

21. We rely on the accuracy and completeness of information concerning borrowers and counterparties for credit evaluation and risk management. Any misrepresentation, inaccuracies, or omissions in such material could have a negative impact on our business and financial results.

We rely on information provided to us by or on behalf of borrowers when evaluating whether to provide credit or engage in other transactions with clients (including in relation to their financial transactions and past credit history). We may also depend on borrowers' assurances about the accuracy and completeness of the information. For ascertaining the creditworthiness and encumbrances on collateral, we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given may affect our judgment of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, prospects, results of operations and financial condition. We may receive inaccurate or incomplete information as a result of negligence or fraudulent misrepresentation on the part of our customers or employees. In addition, customers may misrepresent information in the loan application forms including in relation to the intended end use of the loans and may apply the loans disbursed for end uses different from those mentioned in the loan application form. Our risk management measures may not be adequate to prevent or deter such activities in all cases, which may adversely affect our business prospects, financial condition and results of operations.

There may be relatively less financial and credit information available on retail and rural individual borrowers, micro, small and medium enterprises and in relation to the possibility of double-financing obtained by any such clients, than may have been available in a more developed economy, and the availability of such financial and credit information in India may be considered to suffer from an absence of competitive pressure at present.

22. Our inability to completely detect money laundering and other illicit actions or detect the same in a timely manner or at all may expose us to extra responsibility and affect our business and reputation.

In India, we must follow all applicable anti-money laundering ("AML") and anti-terrorism laws and regulations. We bear the risk of failing to follow the statutory know your customer ("KYC") requirements, as well as fraud and money laundering by dishonest customers, in the ordinary course of our business. Despite having internal rules, processes, and controls in place to prevent and identify any AML activity and maintain KYC compliance, we cannot guarantee that we will be able to entirely manage instances of any possible or attempted violation. Any failure or ineffectiveness of our control system to detect such activities completely and immediately may subject us to regulatory action, including fines and penalties, and have a negative impact on our business and reputation.

23. *As we expand our lending business, we may encounter asset-liability mismatches, which might negatively impact our cash flows, financial condition, and results of operations.*

As we expand our lending operations, we may encounter liquidity concerns due to mismatches in the maturity of our assets and obligations. If we are unable to obtain additional borrowings or renew our existing credit facilities in a timely and cost-effective manner, or at all, for matching tenures of our loan portfolio, it may result in mismatches between our assets and liabilities, which could harm our cash flows, financial condition, and results of operations.

24. *Failure to stay up to date with technological changes, as well as the uses and regulation of the internet, might be detrimental to our Company.*

The industry of delivering finance products and services via a mobile app or the internet is dynamic and fresh. We must keep up with changing technical breakthroughs, customer and small company usage habits, internet security threats, system failure or inadequacy hazards, and governmental regulation and taxation, all of which could have a negative influence on our Company.

If we are unable to adequately react to such developments, decreased demand for loans as a result of higher savings or income could result in a loss of revenues or a fall in profitability. The demand for loan products in the markets we serve could fall as a result of a variety of factors, including regulatory restrictions that limit customer access to specific products, the availability of competing or alternative products, or changes in customers' financial circumstances, such as increases in income or savings. A shift in focus from borrowing to saving would also lessen demand. Our revenues could be severely reduced if we fail to adjust to a significant change in our clients' desire for, or access to, our financing products. Customers may refuse or reject products whose changes make them less appealing or less available, even if we make adjustments or launch new products to meet customer demand.

25. *We have not commissioned an industry report for the disclosures made in the section titled 'Industry Overview' and made disclosures based on the data available on the internet and such third-party data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the section titled "Industry Overview" on page 51 of this Draft Letter of Offer. We have made disclosures in the said section based on the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such third-party data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

26. *The outbreak of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several containment measures such as travel bans and restrictions, quarantines and shutdowns. These measures may have an impact on the workforce and our operations and the operations of our customers. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may further cause significant economic disruption across India. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian economy in general.

The COVID – 19 outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical

participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees and customers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak. The extent to which COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken to contain the coronavirus or treat its impact, among others. The degree to which COVID-19 may impact our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or the ability to treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, loss of life, injuries and impact the wellbeing of our people.

EXTERNAL RISK FACTORS

27. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and IFRS, which investors may be more familiar with and consider material to their assessment of our financial condition.

Our audited summary statements of assets and liabilities as at March 31, 2023, March 31, 2022 and March 31, 2021 and audited summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Financial Year 2023, 2022 and 2021 have been prepared in accordance with the Ind AS, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

28. Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

29. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by

factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

30. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

31. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers,

whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

32. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

33. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

34. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions including wars amongst nations like the current Russia Ukraine conflict could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

ISSUE SPECIFIC RISKS

35. *Our Company will not distribute the Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch the Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the "**Offering Materials**") to such Shareholders who have provided an address in India for the

service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

36. *SEBI has by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, October 01, 2021 and May 19, 2022 streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.*

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, October 01, 2021 and May 19, 2022 and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “Terms of the Issue” on page 147 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

37. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncee(s) may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncee(s) prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

38. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if STT was paid on the sale transaction and, additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on long-term capital gains arising from sale of equity shares. However, where specified conditions are met, such long-term capital gains are only taxed to the extent they exceed Rs. 100,000.00 and unrealized capital gains earned up to January 31, 2018, continue to be exempt. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the

equity shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity Shares.

Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

39. You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

40. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchange until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

41. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, 2013, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

42. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

43. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

44. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

Indian Economy

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022-23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. (Source : <https://www.ibef.org/economy/indian-economy-overview>)

Introduction to the Financial Services Industry

India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial services firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operatives, pension funds, mutual funds and other smaller financial entities. The banking regulator has allowed new entities such as payment banks to be created recently, thereby adding to the type of entities operating in the sector. However, the financial sector in India is predominantly a banking sector with commercial banks accounting for more than 64% of the total assets held by the financial system.

The Government of India has introduced several reforms to liberalise, regulate and enhance this industry. The Government and Reserve Bank of India (RBI) have taken various measures to facilitate easy access to finance for Micro, Small and Medium Enterprises (MSMEs). These measures include launching Credit Guarantee Fund Scheme for MSMEs, issuing guidelines to banks regarding collateral requirements and setting up a Micro Units Development and Refinance Agency (MUDRA). With a combined push by Government and private sector, India is undoubtedly one of the world's most vibrant capital markets.

Evolution

Over the years, NBFCs have evolved given the extensive changes in the regulatory framework for NBFCs in India which have moved from simplified regulations to stringent and extensive regulations as well as towards rationalisation per the currently revised NBFC regulatory framework. Given these high levels of regulation, NBFCs have also emerged as preferred options to meet credit needs since the low cost of operations has provided these NBFCs an edge over banks.

Financial Access and Supportive Government Schemes

Additionally, NBFCs have gradually become important mechanisms to fuel growth and entrepreneurship due to the launch of government-backed schemes including Pradhan Mantri Jan-Dhan Yojana which has contributed to a significant increase in the number of bank accounts.

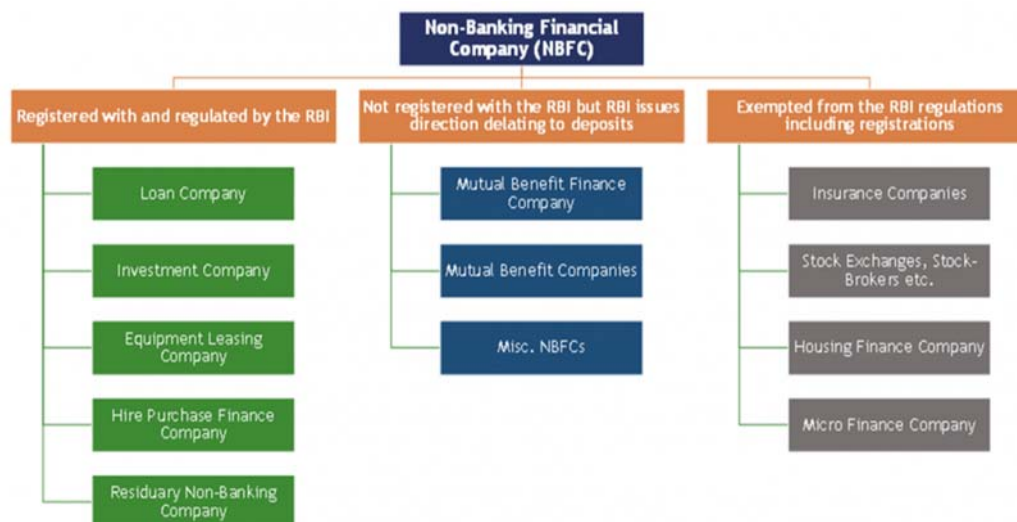

These NBFCs have also been key in being able to mitigate and manage the spread of risks during times of financial duress and have increasingly become recognized as complementary services to banks.

NBFCs have become integral for all business services, including loans and credit facilities, retirement planning, money markets, underwriting and merger activities. As such these companies play an important role in providing credit to the unorganized sector and for small borrowers at local level. Additionally, hire purchase finance is also the largest activity of NBFCs and the rapid growth of NBFCs has gradually blurred the lines between banks and NBFCs although commercial banks have retained importance. These NBFCs facilitate long term investment and financing, which is challenging for banking sector, and the growth of NBFCs widens range of products available for individuals/institutions with resources to invest.

Opportunities for NBFCs

Ongoing stress in public sector banks (PSUs) because of increasing bad debt, lending in rural areas deterioration has provided NBFCs with the opportunity to increase presence. The success of these NBFCs vs. PSUs can be attributed to product lines, lower cost, wider and effective reach, strong risk management capabilities to check and control bad debts, and a better understanding of customer segments versus banks. NBFCs have witnessed success in the passenger and commercial vehicle finance segments as well as growing AUM in personal loan and housing finance sector. Additionally, improving macro-economic conditions, higher credit penetrations, consumption themes and disruptive digital trends have influenced NBFC credit growth. Stress in public sector units (PSUs), underlying credit demand, digital disruption for MSMEs and SMEs as well as increased consumption and distribution access and sectors where traditional banks do not lend are major reasons for the switch from traditional banks to NBFCs.

Present NBFC Classifications and Industry Structure

Source: RBI; Pradhan Mantri Jan Dhan Yojana; Indian Banks' Association - Indian Banking Sector 2020

As of May 31, 2023, there were 9,404 NBFCs registered with the RBI categorized as Asset Finance Companies, Loan Companies, Infrastructure Finance Companies (IFCs), Systematically Important Core Investment Company (NBFC – CIC – ND – SI), Infrastructure Debt Fund (NBFC – IDF) and Micro Finance Institutions (NBFC – MFIs).

NBFC Engines of Growth as Growth Drivers

NBFCs have also been an integral cornerstone of key financing to MSMEs, and been driven by significant growth in rural, small scale and unbanked sectors. Structural catalysts include a large vibrant start-up and entrepreneurial ecosystem which has created NBFC demand and government policy initiatives such as Pradhan Mantri Yojana and National Rural Financial plan further augmenting the industry. These include diversified financial needs of Indian economy driven by growth in lending, credit, and vehicle financing. As a result of these growth drivers, we see that NBFCs have seen bigger balance sheets & increasing public funds. Improved profitability ratios of NBFCs has been observed for NBFC-ND-SIs across metrics for ROA, ROE and NIMs with impressive returns Y-o-Y returns between 2019-2020. For NBFC-Ds the ROA has been relatively flat, ROE has declined while NIMs improved Y-o-Y for 2019-2020.

Challenges in NBFC sector:

- Business is highly regulated, and it may be adversely affected by future regulatory changes.
- Financial performance is vulnerable to interest rate risk, as most of the funding is from banking channels.
- Greater competition from NBFCs/banks/fintech could impact growth in AUM and profits.

The Road Ahead

NBFC segments provides huge growth opportunities particularly after the development of last few years. We have witnessed reasonable degree of consolidation in the NBFC sector. Liability side stress in the sector has largely reduced in last couple of years led by focussed efforts from the regulators side. With the passing of the second COVID wave, the outlook is brightening. During the year under review, the balance sheet of NBFCs expanded at a faster rate than a year ago, driven essentially by growth in credit and investments of NBFCs-ND-SI.

Judgements:

Information about judgements made in applying accounting policies that have a most significant effect on the amount recognised in the Restated financial statements is included following Notes:

- classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding.

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment is included in the following Notes:

Note (10) - useful life of property, plant, equipment and intangibles.

Note (9) - recognition of deferred tax assets: availability of future taxable profit against which carry forward deferred tax asset can be setoff

Note (28) - determination of the fair value of financial instruments with significant unobservable inputs.

v. Recognition of interest income

Interest consists of consideration for (i) the time value of money; (ii) for the credit risk associated with the principal amount outstanding; (iii) for other basic lending risks and costs; and (iv) profit margin. a) if fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that uses only data from observable markets, then the difference is recognised in profit or loss on initial recognition (i.e. day 1 profit or loss); Interest income and expense are recognised using the effective interest method. The effective interest rate (EIR) is the rate that exactly discounts estimated future cash flows through the expected life of the financial instrument to the gross carrying amount of the financial asset or amortised cost of the financial liability.

The calculation of the EIR includes all fees paid or received that are incremental and directly attributable to the acquisition or issue of a financial asset or liability.

The interest income is calculated by applying the EIR to the gross carrying amount of noncredit impaired financial assets (i.e. at the amortised cost of the financial asset before adjusting for any expected credit loss allowance). For credit-impaired financial assets the interest income is calculated by applying the EIR to the amortised cost of the credit impaired financial assets (i.e. at the amortised cost of the financial asset after adjusting for any expected credit loss allowance (ECLs)). The Company assesses the collectability of the interest on credit impaired assets at each reporting date. Based on the outcome of such assessment, the interest income accrued on credit impaired financial assets are either accounted for as income or written off as per the write off policy of the Company.

The interest cost is calculated by applying the EIR to the amortised cost of the financial liability. The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance. The 'gross carrying amount of a financial asset' is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

vi. Dividend income

Dividend income is recognised when the Company's right to receive the payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.

vii. Syndication, advisory & other fees

Syndication, advisory & other fees are recognized as income when the performance obligation as per the contract with customer is fulfilled and when the right to receive the payment against the services has been established.

viii. Origination fees

Origination fees, which the Company has received/recovered at time of granting of a loan, is considered as a component for computation of the effective rate of interest (EIR) for the purpose of computing interest income, except when it is not an integral part of loan.

ix. Net gain/(loss) on Fair value changes

Any differences between the fair values of financial assets classified as fair value through the profit or loss, held by the Company on the balance sheet date is recognised as an unrealised gain or loss as a gain or expense respectively.

Similarly, any realised gain or loss on sale of financial instruments measured at FVTPL and debt instruments measured at FVOCI is recognised in net gain / loss on fair value changes.

x. Recoveries of Financial assets written off

The company recognizes income on recoveries of financial assets written off on realization or when the right to receive the same without any uncertainties of recovery is established.

xi. Leases

Leases are classified as operating lease where significant portion of risks and reward of ownership of assets acquired under lease is retained by the lessor. Leases of assets under which substantially all the risks and rewards of ownership are effectively retained by the lessee are classified as finance lease.

Asset given on lease:

Assets given under finance lease are recognised as a receivable at an amount equal to the net investment in the lease. Lease rentals are apportioned between principal and interest on the internal rate of return. The principal amount received reduces the net investment in the lease and interest is recognised as revenue. Under operating leases (excluding amount for services such as insurance and maintenance), lease rentals are recognised on a straight-line basis over the lease term, except for increase in line with expected inflationary cost increases.

Asset taken on lease:

The Company's assets taken on lease primarily consist of leases for properties.

As a lessee, the Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred substantially all the risks and rewards of ownership. Under Ind AS 116, the Company recognises right-of-use assets and lease liabilities for certain type of its leases.

The Company presents right-of-use assets and lease liabilities separately on the face of the Balance sheet. Lease payments (including interest) have been classified as financing cashflows.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located.

The right-of-use asset is subsequently measured at cost less any accumulated depreciation and accumulated impairment loss, if any, and adjusted for certain re-measurements of the lease liability.

The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset.

The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognized in the statement of profit and loss.

When a right-of-use asset meets the definition of investment property, it is presented in investment property.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate.

The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payment made. The carrying amount of lease liability is remeasured to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. A change in the estimate of the amount expected to be payable under a residual value guarantee, or as appropriate, changes in the assessment of whether a purchase or extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised.

The Company has applied judgement to determine the lease term for some lease contracts in which it is a lessee that include renewal options. The assessment of whether the Company is reasonably certain to exercise such options impacts the lease term, which significantly affects the amount of lease liabilities and right of use assets recognised. The discounted rate is generally based on incremental borrowing rate specific to the lease being evaluated.

xii. Finance Costs

The Company recognises interest expense on the borrowings as per EIR methodology which is calculated by considering any ancillary costs incurred and any premium payable on its maturity.

Interest expense includes origination costs that are initially recognised as part of the carrying value of the financial liability and amortized over the expected life using the EIR. It also includes expenses related to borrowing which are not part of effective interest as not directly related to loan origination.

xiii. Financial Instruments

Financial assets and financial liabilities are recognised in the Company's balance sheet on trade date when the Company becomes a party to the contractual provisions of the instrument. A loan is recorded upon remittance of the funds to the counterparty/obligor. Recognised financial assets and financial liabilities are initially measured at fair value. Transaction costs and revenues that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at Fair Value Through Profit and Loss ("FVTPL")) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs and revenues directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in the statement of profit or loss.

If the transaction price differs from fair value at initial recognition, the Company will account for such difference as follows:

- a) if fair value is evidenced by a quoted price in an active market for an identical asset or liability or based on a valuation technique that uses only data from observable markets, then the difference is recognised in profit or loss on initial recognition (i.e. day 1 profit or loss);
- b) in all other cases, the fair value will be adjusted to bring it in line with the transaction price (i.e. day 1 profit or loss will be deferred by including it in the initial carrying amount of the asset or liability). After initial recognition, the deferred gain or loss will be released to profit or loss on a rational basis, only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability.

Financial assets

Classification

On initial recognition, depending on the Company's business model for managing the financial assets and its contractual cash flow characteristics, a financial asset is classified as measured at:

- 1) amortised cost;
- 2) fair value through other comprehensive income (FVTOCI); or
- 3) fair value through profit and loss (FVTPL).

Initial recognition and measurement

A financial asset is recognised on trade date initially at cost of acquisition net of transaction cost and income that is attributable to the acquisition of the financial asset. Cost equates the fair value on acquisition. A financial asset measured at amortised cost and a financial asset measured at fair value through other comprehensive income is presented at gross carrying value in the Restated Financial Statements. Unamortised transaction cost and incomes and impairment allowance on financial asset is shown separately under the heading "Other non-financial asset", "Other non-financial liability" and "Provisions" respectively.

Assessment of Business model

An assessment of the applicable business model for managing financial assets is fundamental to the classification of a financial asset. The Company determines the business models at a level that reflects how financial assets are managed together to achieve a particular business objective. The Company's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by instrument basis. The Company could have more than one business model for managing its financial instruments which reflect how the Company manages its financial assets in order to generate cash flows. The Company's business models determine whether cashflows will result from collecting contractual cash flows, selling financial assets or both. The Company considers all relevant information available when making the business model assessment. The Company takes into account all relevant evidence available such as:

- 1) how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel and board of directors;
- 2) the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed; and
- 3) how managers of the business are compensated (e.g. whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- 4) At initial recognition of a financial asset, the Company determines whether newly recognised financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The Company reassesses its business models at each reporting period to determine whether the business model/(s) have changed since the preceding period. For the current and prior reporting period the Company has not identified a change in its business model.

Based on the assessment of the business models, the Company has identified the three following choices of classification of financial assets:

- a) Financial assets that are held within a business model whose objective is to collect the contractual cash flows ("Asset held to collect contractual cash-flows"), and that have contractual cash flows that are solely payments of principal and interest on then principal amount outstanding (SPPI), are measured at amortised cost;
- b) Financial assets that are held within a business model whose objective is both to collect the contractual cash flows and to sell the assets, ("Contractual cash flows of Asset collected through hold and sell model") and that have contractual cash flows that are SPPI, are subsequently measured at FVTOCI.
- c) c) All other financial assets (e.g. managed on a fair value basis, or held for sale and equity investments are subsequently measured at FVTPL.

Financial asset at amortised cost

Amortised cost of financial asset is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. For the purpose of testing SPPI, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal). Contractual cash flows that do not introduce exposure to risks or volatility in the contractual cash flows on account of changes such as equity prices or commodity prices and are related to a basic lending arrangement, do give rise to SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form. The EIR amortisation is included in finance income in the profit and loss statement. The losses arising from impairment are recognised in the profit and loss statement

Financial asset at Fair Value through Other Comprehensive Income (FVTOCI)

Loans & Advances:

After initial measurement, basis assessment of the business model as “Contractual cash flows of asset collected through hold and sell model and SPPI”, & equity instruments such financial assets are classified to be measured at FVTOCI. Contractual cash flows that do introduce exposure to risks or volatility in the contractual cash flows due to changes such as equity prices or commodity prices and are unrelated to a basic lending arrangement, do not give rise to SPPI. The EIR amortisation is included in finance income in the profit and loss statement. The losses arising from impairment are recognised in the profit and loss statement. The carrying value of the financial asset is fair valued by discounting the contractual cash flows over contractual tenure basis the internal rate of return of a new similar asset originated in the month of reporting and such unrealised gain/loss is recorded in other comprehensive income (OCI). Where such a similar product is not originated in the month of reporting, the closest product origination is used as a proxy. Upon sale of the financial asset, actual gain/loss realised is recorded in the profit and loss statement and the unrealised gain/ loss recorded in OCI are recycled to the statement of profit and loss.

Investments in equity instruments:

At initial recognition an entity at its sole option may irrevocably designate an investment in an equity instrument as FVOCI, unless the asset is:

- Held for trading, or
- Contingent consideration in a business combination.

Dividends are recognized when the entity’s right to receive payment is established, it is probable the economic benefits will flow to the entity and the amount can be measured reliably. Dividends are recognized in profit and loss unless they clearly represent recovery of a part of the cost of the investment, in which case they are included in OCI. Changes in fair value are recognized in OCI and are never recycled to profit and loss, even if the asset is sold or impaired.

Financial asset at fair value through profit and loss (FVTPL)

Financial asset, which does not meet the criteria for categorization at amortized cost or FVTOCI, is classified as FVTPL. In addition, the Company may elect to classify a financial asset, which otherwise meets amortized cost or FVTOCI criteria, as FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as ‘accounting mismatch’). Financial assets included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

Investment in security receipt, mutual fund, non-cumulative redeemable preference shares and cumulative compulsorily convertible preference shares

Investment in security receipt, mutual fund, non-cumulative redeemable preference shares and cumulative compulsorily convertible preference shares are classified as FVTPL and measured at fair value with all changes recognised in the statement of profit and loss. Upon initial recognition, the Company, on an instrument-by-instrument basis, may elect to classify equity instruments other than held for trading either as FVTOCI or FVTPL. Such election is subsequently irrevocable. If FVTOCI is elected, all fair value

changes on the instrument, excluding dividends, are recognized in OCI. There is no recycling of the gains or losses from OCI to the statement of profit and loss, even upon sale of investment. However, the Company may transfer the cumulative gain or loss within other equity upon realisation.

Reclassifications within classes of financial assets

A change in the business model would lead to a prospective re-classification of the financial asset and accordingly the measurement principles applicable to the new classification will be applied. During the current financial year and previous accounting period there was no change in the business model under which the Company holds financial assets and therefore no reclassifications were made.

Impairment of Financial Assets:

The Company is required to recognise Expected Credit Losses (ECLs) based on forward looking information for all financial assets at amortised cost, lease receivables, debt financial assets at fair value through other comprehensive income, loan commitments and financial guarantee contracts. No impairment loss is applicable on equity investments.

At the reporting date, an allowance (or provision for loan commitments and financial guarantees) is required on stage 1 assets at 12 month ECLs. If the credit risk has significantly increased since initial recognition (Stage 1), an allowance (or provision) should be recognised for the lifetime ECLs for financial instruments for which the credit risk has increased significantly since initial recognition (Stage 2) or which are credit impaired (Stage 3)

The Company applies a three-stage approach to measure ECL on financial assets accounted for at amortised cost and FVOCI. Assets migrate through the following three stages based on the change in credit quality since initial recognition.

Undrawn loan commitments

Undrawn loan commitments are commitments under which, over the duration of the commitment, the Company is required to provide a loan with pre-specified terms to the customer. Undrawn loan commitments are in the scope of the ECL requirements.

Financial guarantee contract:

A financial guarantee contract requires the Company to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL and not arising from a transfer of a financial asset, are subsequently measured at the higher of:

- the amount of the loss allowance determined in accordance with Ind AS 109; and
- the amount initially recognised less, where appropriate, cumulative amount of income recognised in accordance with the Company's revenue recognition policies.

The company has not designated any financial guarantee contracts as FVTPL.

Company's ECL for financial guarantee is estimated based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs. The shortfalls are discounted by the interest rate relevant to the exposure.

The Measurement of ECLs

The mechanics of the ECL calculations are outlined below and the key elements are as follows:

Exposure-At-Default (EAD): The Exposure at Default is the amount the Company is entitled to receive as on reporting date including repayments due for principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities.

Probability of Default (PD): The Probability of Default is an estimate of the likelihood of default of the exposure over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio.

Loss Given Default (LGD): The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral.

The ECL allowance is applied on the financial instruments depending upon the classification of the financial instruments as per the credit risk involved. ECL allowance is computed on the below mentioned basis:

12-month ECL: 12-month ECL is the portion of Lifetime ECL that represents the ECL that results from default events on a financial instrument that are possible within the 12 months after the reporting date. 12-month ECL is applied on stage 1 assets.

Lifetime ECL: Lifetime ECL for credit losses expected to arise over the life of the asset in cases of credit impaired loans and in case of financial instruments where there has been significant increase in credit risk since origination. Lifetime ECL is the expected credit loss resulting from all possible default events over the expected life of a financial instrument. Lifetime ECL is applied on stage 2 and stage 3 assets.

The Company computes the ECL allowance either on individual basis or on collective basis, depending on the nature of the underlying portfolio of financial instruments.

For Financial assets as required under applicable RBI Directions for its credit portfolio/Loans are impaired as per the directions (Non-Systemically Important Non Deposit taking Company (Reserve Bank) Directions, 2016). The Company has grouped its loan portfolio into corporate loans, SME loans and Commercial vehicle loans.

Impairment of Trade receivables

Impairment allowance on trade receivables is made on the basis of lifetime credit loss method, in addition to specific provisions considering the uncertainty of recoverability of certain receivables.

Write-off

Impaired loans and receivables are written off, against the related allowance for loan impairment on completion of the Company's internal processes and when the Company concludes that there is no longer any realistic prospect of recovery of part or all the loan. For loans that are individually assessed for impairment, the timing of write off is determined on a case by case basis. A write-off constitutes a de-recognition event. The Company has a right to apply enforcement activities to recover such written off financial assets. Subsequent recoveries of amounts previously written off are credited to the statement of profit and loss.

Modification and De-recognition of financial assets

Modification of financial assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. The Company renegotiates loans to customers in financial difficulty to maximise collection and minimise the risk of default. A to pay under the original contractual terms, there is a high risk of default or default has already happened and the borrower is expected to be able to meet the revised terms. The revised terms in most of the cases include an extension of the maturity of the loan, changes to the timing of the cash flows of the loan (principal and interest repayment), reduction in the

amount of cash flows due (principal and interest forgiveness). Such accounts are classified as Stage 3 immediately upon such modification in the terms of the contract.

Not all changes in terms of loans are considered as renegotiation and changes in terms of a class of obligors that are not overdue is not considered as a renegotiation and is not subjected to deterioration in staging.

De-recognition of financial assets

A financial asset or a part of financial asset is derecognised when the rights to receive cash flows from the financial asset have expired. The Company also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Company has transferred the financial asset if, and only if, either:

- The Company has transferred its contractual rights to receive cash flows from the financial asset; or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows.

A transfer only qualifies for derecognition if either:

- The Company has transferred substantially all the risks and rewards of the asset; or
- The Company has neither transferred nor retained substantially all the Risks and rewards of the asset, but has transferred control of the asset.

The Company considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Company has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Company's continuing involvement, in which case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Off-setting of financial instruments

Financial assets and liabilities are offset and the net amount is reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously backed by past practice.

Financial Liabilities & Equity

Classification as debt or equity

Financial liabilities and equity instruments issued are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

Equity Instruments

An Equity Instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in the statement of Profit and Loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial Liabilities

The Company classifies all financial liabilities as subsequently measured at amortised cost, except for financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.

Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL. Financial liabilities are classified as held for trading, if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109 - "Financial Instruments".

Financial liabilities measured at amortised cost

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the EIR method except for those designated in an effective hedging relationship.

Amortised cost is calculated by taking into account any discount or premium and fee or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in the statement of Profit and Loss. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the EIR method.

Derecognition of financial Liabilities in following circumstances:

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

xiv. Cash and cash equivalents

Cash, Cash equivalents and bank balances include fixed deposits (with an original maturity of three months or less from the date of placement), margin money deposits, and earmarked balances with banks which are carried at amortised cost. Short term and liquid investments which are not subject to more than insignificant risk of change in value, are included as part of cash and cash equivalents.

xv. Property plant and equipment (PPE)

PPE

Recognition and measurement

Property, Plant and Equipment (PPE) are stated at cost less accumulated depreciation and impairment losses, if any. Estimated cost of dismantling and removing the item and restoring the site on which its located does not arise for owned assets. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Borrowing costs relating to acquisition of assets which takes substantial period of time to get ready for its intended use are also included to the extent they relate to the year till such assets are ready to be put to use. Any trade discounts and rebates are deducted in arriving at the purchase price. Gains or losses arising from derecognition of such assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit and Loss when the asset is derecognized.

Subsequent expenditure

Subsequent costs are included in the assets carrying amount or recognized as a separate asset, as appropriate only if it is probable that the future economic benefits associated with the item will flow to the Company and that the cost of the item can be reliably measured. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repair and maintenance are charged to the Statement of Profit and Loss during the reporting period in which they are incurred.

Depreciation

Depreciation commences when the assets are ready for their intended use. It is recognised to write down the cost of assets less their residual values over their useful lives, using the straight-line method basis. The

estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

The Company has adopted the useful life as specified in Schedule II to the Companies Act, 2013.

Depreciation on assets purchased / sold during the period is recognised on a pro-rata basis to the Statement of Profit and Loss till the date of sale.

Purchased software / licenses are amortised over the estimated useful life during which the benefits are expected to accrue. The method of amortisation and useful life are reviewed at the end of each accounting year with the effect of any changes in the estimate being accounted for on a prospective basis. Amortisation on impaired assets is provided by adjusting the amortisation charge in the remaining periods so as to allocate the asset's revised carrying amount over its remaining useful life.

Intangible assets

a) Recognition and Measurement

An intangible asset is recognised only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Company. Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation. Expenses on software support and maintenance are charged to the Statement of Profit and Loss during the year in which such costs are incurred. The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition.

b) Intangible assets under development

Intangible assets not ready for the intended use on the date of Balance Sheet are disclosed as "Intangible assets under development".

c) Amortisation

Intangible assets are amortised using the straight line method over a period of 10 years, which is the management's estimate of its useful life. The amortisation period and the amortisation method are reviewed at least as at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortisation period is changed accordingly. Gains or losses arising from the retirement or disposal of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognised as income or expense in the Statement of Profit and Loss.

Capital work-in-progress

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress" and carried at cost, comprising direct cost, related incidental expenses and attributable interest.

Investment Property

Properties held to earn rentals and/or capital appreciation are classified as Investment properties and are reported at cost, including transaction costs. Subsequent to initial recognition it's measured at cost less accumulated depreciation and accumulated impairment losses, if any. When the use of an existing property changes from owner -occupied to investment property, the property is reclassified as investment property at its carrying amount on the date of reclassification.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on the de-recognition of property is recognised in the Statement of Profit and Loss in the same period.

Impairment of Assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible, intangible assets & Investment property to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the statement of Profit and Loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the statement of Profit and Loss.

De-recognition of property, plant and equipment and intangible asset

An item of property, plant, and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of PPE is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the Statement of Profit and Loss. An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in the Statement of Profit and Loss.

Right of Use

Under Ind AS 116, the company recognises right-of-use assets and lease liabilities for certain types of leases.

The Company presents right-of-use assets and lease liabilities separately on the face of the Balance sheet. The Company recognises a right-of-use asset & a lease liability at the leases commence date. The right-of-use assets is initially measured at cost and subsequently at cost less any accumulated depreciation and accumulated impairment loss, if any, and adjusted for certain re-measurement of the lease liability. When a right-of-use asset meets the definition of Investment property, it is presented in investment property. The right-of-use asset is initially measured at cost and subsequently measured at fair value, in accordance with the Company's accounting policies.

xvi. Non-Current Assets held for sale

Non-current assets are classified as held for sale if their carrying amount is intended to be recovered principally through a sale (rather than through continuing use) when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sale of such asset and the sale is highly probable and is expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell.

Once classified as Held for sale, the assets are no longer amortised or depreciated.

xvii. Retirement and other employee benefits

Defined Contribution Plans

Contribution as per the Employees Provident Funds and Miscellaneous Provisions Act, 1952 towards Provident Fund and Pension Fund is not applicable to the company. Hence no provision made for this and other employee benefits.

Defined Benefit Plans:

Gratuity in respect of all the employees are accounted for on cash basis.

Short-term employee benefits:

A liability is recognised for benefits accruing to employees in respect of salaries in the period in which related service is rendered.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

xviii. Provisions, Contingent Liabilities and Contingent Assets

Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

A provision for onerous contracts is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

In case of litigations, provision is recognised once it has been established that the Company has a present obligation based on information available up to the date on which the Company's Restated financial statements are finalised and may in some cases entail seeking expert advice in making the determination on whether there is a present obligation.

Contingent Liabilities

Contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. Company does not recognise contingent liability but discloses its existence in the Restated financial statements.

Contingent Assets

Contingent assets are not recognised in the Restated financial statements, but are disclosed where an inflow of economic benefits is probable.

xix. Commitments

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- a) estimated amount of contracts remaining to be executed on capital account and not provided for;
- b) uncalled liability on shares and other investments partly paid;
- c) funding related commitment to subsidiaries / associate;
- d) other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.
- e) other commitments related to sales/procurements made in the normal course of business are not disclosed to avoid excessive details.

xx. Taxation

Income tax expense comprises current and deferred taxes. Income tax expense is recognized in the Statement of Profit and Loss, other comprehensive income, or directly in equity when they relate to items that are recognized in the respective line items.

Current tax

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from, or paid to, the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, by the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

xxi. Statement of Cash Flows

Statement of Cash Flows is prepared segregating the cash flows into operating, investing, and financing activities. Cash flow from operating activities is reported using an indirect method adjusting the net profit for the effects of:

- a) Change during the period in operating receivables and payables transactions of a non-cash nature;
- b) non-cash items such as depreciation, impairment, deferred taxes, unrealised foreign currency gains and losses, and undistributed profits of associates and joint ventures; and
- c) all other items for which the cash effects are investing or financing cash flows.

xxii. Segment Reporting

The Company is predominantly engaged in a single reportable segment of 'Investment and Credit Company (ICC) as per Ind AS 108 - Segment Reporting.

xxiii. Earnings per Share ('EPS')

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings per share. Basic EPS is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. In computing the dilutive earnings per share, only potential equity shares that are dilutive and that either reduces the earnings per share or increases loss per share are included.

xxiv. Recent accounting pronouncements

The Ministry of Corporate Affairs (MCA) on 31st March 2023 through Companies (Indian Accounting Standards) Amendment Rules, 2023 has notified the following amendments to IND AS which are applicable for the annual periods beginning on or after 1st April, 2023.

- a) IND AS 1 - Presentation of Restated Financial Statements - This amendment requires the Company to disclose its material accounting policies rather than their significant accounting policies.

The Company will carry out a detailed review of accounting policies to determine material accounting policy information to be disclosed going forward.

The Company does not expect this amendment to have any material impact in its Restated financial statements.

- b) IND AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors –This amendment has changed the definition of a “change in accounting estimates” to a definition of “accounting estimates”. The amendment clarifies how companies should distinguish changes in accounting policies from changes in accounting estimates.

The Company does not expect this amendment to have any material impact in its Restated financial statements.

- c) IND AS 12 - Income Taxes - This amendment has done away with the recognition exemption on initial recognition of assets and liabilities that give rise to equal and offsetting temporary differences.

The Company does not expect this amendment to have any material impact in its Restated financial statements.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the- counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will not be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs through the FDI Circular 2020 (defined below).

The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Circular 2020**”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as at October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under the FEMA Rules will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“OCBs”) have been derecognised as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and FEMA Rules. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors.
