INTERNAL RISK FACTORS

1. ***Our Company is engaged into developing a real estate projects and trading of building and construction materials. However,our future success largely depends on our ability to develop our upcoming real estate projects. Our inability to effectively develop our upcoming projects would affect our business model.***

We are engaged in the business of real estate development and trading of building and construction materials specifically TMT Bars, HR Sheets of different sizes. We have real estate development project in and around Ahmedabad City in Gujarat. Currently, our business focuses on residential apartments developments. Our residential apartment portfolio consists of various types of accommodation of varying sizes. Our residential projects are primarily designed for middle income and high income group. Our residential buildings are designed with a variety of amenities such as security systems, sports and recreational facilities, play areas and electricity back-up. Our operations span all

aspects of real estate development, from the identification and acquisition of land, the planning, execution and marketing of our projects, through to the maintenance and management of our completed developments. We cannot assure you that our Company will successfully develop our upcoming real estate projects. Any such delay or inability to develop our upcoming projects could adversely affect our business model.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page [•] of this Draft Letter of Offer.

2. We may not be able to successfully acquire land or development rights for our projects, which may affect our business and growth prospects.

Our ability to acquire land for development is a vital element of growing our business and involves certain risks, including identifying and acquisition of land with clean title and at locations that are preferred by our target customers. We do internal assessment and evaluation for land selection and acquisition, which includes a due diligence exercise to assess the title of the land and its suitability for development and marketability. Our internal assessment process is based on information that is available or accessible to us. We cannot assure you that such information is accurate, complete or current, and any decision based on inaccurate, incomplete or outdated information may result in certain risks and liabilities associated with the acquisition of such land, which could adversely affect our business and growth prospects.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

3. Our Company require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate business, and the failure to obtain, retain and renew such approvals and licenses in timely manner or comply with such rules and regulations or at all may adversely affect our operations and financials.

Our Company require several statutory and regulatory permits, licenses and approvals to operate business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. In addition, our Company has not applied for registration under Gujarat Shop and Establishment, registration under Contract Labor (Regulation and Abolition) Act, Gujarat Professional Tax.

Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business and financials.

4. We generate our entire sales from our operations in certain geographical regions of Ahmedabad, Gujarat and any adverse development affecting our operations in these regions could have an adverse impact on our revenue and results of operations.

Our entire revenues have been derived from trading of building and construction materials in Ahmedabad, Gujarat for the year 2022-23. Also, our future planned projects are situated in Ahmedabad, and thus any of our future revenues are also based on the development and market in this geographical location. Such geographical concentration of our real estate business in Ahmedabad, heightens our exposure to adverse developments related to competition, as well as changes in the supply and demand for properties comparable to those we develop, changes in the applicable governmental regulations, economic conditions, demographic trends, employment and income levels and interest rates in these regions which may affect our business prospects, financial conditions and results of operations. Further, our operations could also be affected by lack of skilled, semi-skilled and unskilled labour or increased cost thereof. Also, any localized social unrest, natural disaster or breakdown of services and utilities in and around Ahmedabad could have material adverse effect on our business, financial position and results of operations.

Further, we may not be able to leverage our experience in Ahmedabad region to expand our operations in other parts of India. We cannot guarantee that we will be able to acquire land, which is one of our primary raw materials, in Ahmedabad, either on ownership basis or development rights thereof or at all. Any inability to acquire land may affect

our future project planning and may require us to move to other geographical location and thus pose additional risks. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national developers, but also local developers who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors, suppliers, relevant government authorities and who are in a stronger financial position than us.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

5. *We rely on independent third party service providers and contractors to execute various parts of our projects and any failure on their part to perform their obligations could adversely affect our business, results of operations, and cash flows.*

We utilize various independent service providers and contractors to execute our projects. Also, many of our regulatory requirements and approvals are outsourced to third party consultancy firms who liaison with various government authorities on our behalf. Further, we constantly require labour for our construction work and the same are procured on contractual basis including contacting for electrical, plumbing and other such tasks. If a service provider or contractor fails to perform its obligations satisfactorily or within the prescribed time periods with regard to a project, or terminates its arrangement with us, we may be unable to develop the project with our intended quality, within the intended timeframe and at the pre-estimated cost. If this occurs, we may be required to incur additional cost or time to develop the property to appropriate quality standards in a manner consistent with our development objective, which could result in reduced profits or, in some cases, significant penalties and losses which we may not be able to recover from the relevant service provider or independent contractor. We cannot assure you that the services rendered by any of our independent contractors will always be satisfactory or match our requirements for quality. In addition, we may be subject to claims in relation to defaults and late payments to our contractors, which may adversely affect our business, results of operations, and cash flows.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

6. *We depend significantly on our success in our residential real estate business as this is our primary focus.*

Our primary focus is on the development of luxurious and comfortable residential real estate projects for sale. We rely on our ability to understand the preferences of our residential customers and to develop projects that suit their needs. We aim to create aspirational developments that we believe have distinctive eco-friendly designs and functionalities with quality construction and development, as we believe that this enhances our brand and reputation, and enables us to sell our units quickly and at a premium to other competing developments. Our inability to provide customers with distinctive designs or functionalities and quality construction or our failure to continually anticipate and respond to customer needs may affect our business and prospects and could lead to some of our customers switching to our competitors, which could, in turn, materially and adversely affect our business prospects, financial condition and results of operations.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

7. *We cannot assure you that the construction of our projects will be free from any and all defects.*

We cannot assure you that we will always finish the construction or development of our projects in accordance with the requisite specifications or that the construction of our projects will be free from any and all defects. If the work is unsatisfactory, the work has to be redone as per the designs and / or as per the instructions of project in-charge which will entail additional costs. In the event of discovery of defects/faults in our work, or due to damages to our construction due to factors beyond our control, or any of the other reasons, we may incur significant contractual liabilities and losses under our projects contracts and such losses may materially and adversely affect our financial performance and results of operations.

Further, it may result in cancellation by customers of any commitment to purchase in our real estate projects and/ or refund of any advance deposited with us by any customer as a guarantee for purchase in our real estate projects, dissatisfaction among our customers, resulting in negative publicity, consumer litigation and lack of confidence among future buyers for our projects and all these factors could adversely affect our business, financial condition and results of operations.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer. We face significant risk with regard to length of time needed to complete each project and there could be unscheduled delays and cost overruns in relation to our ongoing and future projects.

Further, any changes to the business environment such as non-availability of raw materials or increase in cost of construction materials during such time may affect the cost and revenues associated with the project and may ultimately affect the timelines of a project. We cannot assure you that we will be able to complete our projects within the expected budgets and time schedules at all. We may be penalized from the regulatory authorities as well as our client for delay in completion of project.

For further details of our completed Project and upcoming project through our Subsidiary, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

8. *Significant increases in prices of, or shortages of, or delay or disruption in supply of labour and key building materials could affect our estimated construction cost and timelines resulting in cost overruns or less profit.*

As our Company is engaged into construction of residential and commercial projects, our business would adversely be affected by variation in availability, cost and quality of raw materials and labour. We procure building materials for our projects, such as steel, cement, flooring products, hardware, bitumen, sand and aggregates, doors and windows, bathroom fixtures and other interior fittings, from third-party suppliers. The prices and supply of basic building materials and other raw materials depend on factors outside our control, including cost of their raw materials, general economic conditions, competition, production costs and levels, transportation costs indirect taxes and import duties. Our ability to develop and construct projects profitably is dependent on our ability to obtain adequate and timely supply of building materials within our estimated budget. As we source our building materials from third parties, our supply chain may be interrupted by circumstances beyond our control. Poor quality roads and other transportation-related infrastructure problems, unfavorable weather and road accidents may also disrupt the transportation of supplies.

Prices of certain building materials and, in particular, cement and steel prices, are susceptible to rapid increases. Further, we operate in a labor-intensive industry and if we or our contractors are unable to negotiate with the labour or their sub-contractors, it could result in work stoppages or increased operating costs as a result of higher than anticipated wages or benefits. In addition, it may be difficult to procure the required labour for ongoing or planned projects.

During periods of shortages in the supply of building materials or labour, we may not be able to complete projects according to our previously determined time frames, at our previously estimated project costs, or at all, which may adversely affect our results of operations and reputation. In addition, during periods where the prices of building materials or labour significantly increase, we may not be able to pass these price increases on to our customers, which could reduce or eliminate the profits we intend to gain from our projects. These factors could adversely affect our business, results of operations and cash flows.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

9. *Changes in market conditions between the time that we acquire land, enter into development agreements, construct and ultimately sale, may affect our ability to achieve the estimated profits out of our projects or at all, which could adversely affect our revenues and earnings.*

There might be a time gap between our acquisition of land or development rights to the land and the development and sale of our projects, during which, we may be exposed to risks of fluctuation in market value of land. Any downward changes in the market value of land could have a material adverse effect on our business. Our ability to mitigate the risk of any market value fluctuations is limited by the illiquid nature of real estate investments. We could be adversely affected if the market conditions deteriorate or if we purchase land at higher prices and the value of the land declines subsequently. As a result, we may experience fluctuations in property values over time which in turn may adversely affect our business, financial condition and results of operations.

10. *We depend on our corporate logo that we may not be able to protect and/or maintain.*

Our ability to market and sell our projects depends upon the recognition of our brand names and associated consumer goodwill. We have not yet applied trademark registration for our Corporate Logo. Consequently, we do not enjoy the statutory protections accorded to registered trademarks in India for our Company. There is no guarantee that the

application for registration of our logo will be accepted in favour of the Company whenever applied. This may affect our ability to protect our trademark in the event of any infringement of our intellectual property. In the absence of such registrations, competitors and other companies may challenge the validity or scope of our intellectual property right over these brands or our corporate name or logo. As a result, we may be required to invest significant resources in developing new brands or names, which could materially and adversely affect our business, financial condition, results of operations and prospects. In addition to same, our failure to comply with existing or increased regulations, or the introduction of changes to existing regulations, could adversely affect our business, financial condition, results of operations and prospects.

11. Our success depends in large part upon our qualified personnel, including our senior management, directors and key managerial personnel and our ability to attract and retain them when necessary will impact the operations of our Company.

We believe that our senior management team has contributed significantly to the development of our business. The loss or interruption of the continued services of any member of our senior management team, including our executive directors, would disrupt our business and adversely affect our financial condition, business and results of operations.

We also believe that the success of our real estate development activities is dependent on our ability to attract, train, motivate, and retain highly skilled employees. In the event we are unable to maintain or recruit a sufficient number of skilled employees, our business and results of operations may be adversely affected.

If we are unable to retain their services or hire appropriate skilled employees for our projects, we may not be able to meet the intended deadlines leading to cost over-runs. The Net Proceeds from this Issue, proposed to be raised for such purpose may not be sufficient or we have to vary their usage, which requires compliance with several regulations. Competition for skilled employees is intense and the pool of qualified candidates is limited. We may not therefore be able to attract and/or retain suitable senior management and skilled employees. Any loss of our senior management or key personnel or our inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of ongoing and planned projects and our ability to develop, maintain and expand customer relationships.

In addition, if any member of our senior management team or any of our other key personnel joins a competitor or forms a competing company, we may lose key future development opportunities to our competitors, and our business prospects, financial condition and results of operations will be adversely affected.

For further details of our Management, please refer to chapter titled “Our Management” beginning on Page 73 of this Draft Letter of Offer.

12. We benefit from our relationship of our Promoters and our business growth prospects may decline if we cannot benefit from this relationship in the future.

We benefit in many ways from our relationship of our Promoters, Mr. Birjukumar Ajitbhai Shah (Chairman & Managing Director) and Mrs. Jagrutiben Birjubhai Shah (Whole Time Director) as a result of their reputation, experience and knowledge of the real estate and property development industry. They have been associated with the property development, real estate and construction sector in Ahmedabad since many years and have been primarily responsible for the direction and growth of our business and have been instrumental in our strategic planning, including identifying our current development projects.

Our growth and future success is influenced, in part, by our continued relationship of our Promoters. We cannot assure you that we will be able to continue to take advantage of the benefits from this relationship in the future. If we lose our relationship of any of our Promoter for any reason, our business growth prospects may decline and our financial condition and results of operations may be adversely affected.

13. Our operating results could be adversely affected by weakening of economic conditions due to lock-down in all parts of India and other parts of world & other situation due to pandemic Covid-19.

Our overall performance depends in part on the economic conditions of India. Certain economies have experienced periods of downturn due to the present situation prevailing in India and outside India due to pandemic disease of Covid-19 which impacts financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, increases in unemployment, volatility in commodity prices and worldwide stock markets, and excessive government debt. The pandemic disease has adversely affected the real estate and trading

business.

Moreover, the instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy, or a curtailment in government or customer spending could delay or decrease our revenues and therefore have a material adverse effect on our business, operating results and financial condition.

14. We have entered into Rent Agreement with one of our Promoter, Mrs. Jagrutiben Birjubhai Shah to use her property as registered office of our Company and our subsidiary.

We have entered into Rent Agreement with one of our Promoter, Mrs. Jagrutiben Birjubhai Shah to use her property as registered office of our Company. Also our Company and subsidiary are using same office as their Registered office. Non-renewal of rent agreement or any dispute on property or dispute between Promoter and our Company or any damage to the property due to any reason might affect our use of such property as registered office of our Company, which could materially and adversely affect our reputation, business operations and have to pay increased rentals.

For further details of our Registered office, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

15. There are outstanding legal proceedings involving our Director. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

Our Director are involved in certain tax proceedings. We cannot provide assurance that these tax proceedings will be decided in our Director’s favour. Any adverse decisions in any of the proceedings may have an adverse effect on our business, results of operations, cash flows and financial condition. A summary of the pending civil and other proceedings involving the Director is provided below:

Cases against our Director: -

| Nature of Cases | No of Outstanding Cases | Amount involved (In Lacs) |
|-----------------------------------|--------------------------------|----------------------------------|
| Criminal Complaints | -- | -- |
| Statutory/ Regulatory Authorities | -- | -- |
| Other Litigation - Taxation | 1 | 3.49 |
| Other Litigation | -- | -- |

For further details of legal proceedings involving the Director, please see “Outstanding Litigations and Material Developments” beginning on page 88 of this Draft Letter of Offer

16. There have been some instances of erroneous execution in the past with certain agreements. If any party to such agreements is aggrieved, it may adversely affect our business, financial condition and results of operations.

In the past, there have been some instances of erroneous execution with certain agreements such as execution of partnership deed prior to conversion of firm into Company and rent agreement for registered office. Also our partnership deed dated December 02, 2014 is not registered with Registrar of Firms (ROF). Further the firm was registered with Registrar of Firms on September 22, 2020 with incorrect name i.e. “Samor Realty” which was later corrected with ROC as “Samor Reality” dated October 13, 2020. Till date of filing this Draft Letter of Offer, there have been no action taken by any party to such agreements. However, it cannot be assured that even in future no such parties will be aggrieved by erroneous execution of previous agreements. Therefore, if the any of the parties to such agreements are aggrieved, we may lose benefits enjoyed through such agreements and face certain punitive actions against our Company or our Directors/Officers in relation to the same which may adversely affect our business, financial condition and results of operations.

17. Our business is subject to the RERA, a comparatively recent legislation which may require more time and cost to comply with. Inability to comply with the provisions of RERA may subject us to penal consequences there under.

The Government notified the RERA in the official gazette on March 25, 2016. The RERA has been introduced to

regulate the real estate industry and to ensure, among others, imposition of certain responsibilities on real estate developers and accountability toward customers and protection of their interest. We are required to be compliant with the provisions of the RERA. RERA has inter-alia prescribed:

- registration of construction projects,
- conditions to monitor the funds allocated towards each project and placed restrictions on the usage of the same,
- submission of specific details of the projects for public access,
- disclosure of timeline for construction, completion and delivery of project and
- regulation of the advertising of the projects.

Any failure to comply with the requirements of RERA in the future may subject us to penalties and/or imprisonment.

In addition, we will have to comply with state-specific rules and regulations which may be enacted and / or amended by the state government where our upcoming projects are or our future projects may be located. To ensure compliance with the requirements of the RERA, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. Further, we may face challenges in interpreting and complying with the provisions of the RERA due to limited jurisprudence on them. In the event our interpretation of provisions of the RERA differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Any non-compliance of the provisions of RERA or such state-specific legislations may result in punishments (including fines or imprisonment) and revocation of registration of our future projects, which may have an adverse effect on our business, operations and financial condition.

18. It is difficult to predict our future performance, or compare our historical performance between periods, as our revenue fluctuates significantly from period to period.

As per our policy, revenue is recognized upon transfer of control of residential / commercial units to customers, in an amount that reflects the consideration the Company expects to receive in exchange for those residential / commercial units. In case of residential / commercial units, our Company satisfies the performance obligation and recognises revenue over time based on the stage of completion of construction. Our bookings depend on our ability to market and pre-sell our projects and the willingness of our customers to pay for developments or enter into sale agreements well in advance of receiving possession of properties, which can be affected by prevailing market sentiments. Construction progress depends on various factors, including the availability of labour and raw materials, the timely receipt of regulatory clearances and the absence of contingencies such as litigation and adverse weather conditions. The occurrence of any such contingencies could cause our revenues to fluctuate significantly, which could in turn adversely affect our margins. In addition, we cannot predict with certainty the rate of progress of construction or time of the completion of our real estate developments due to lags in development timetables occasionally caused by unforeseen circumstances.

As a result of one or more of these factors, we may record significant turnover or profits during one accounting period and significantly lower turnover or profits during prior or subsequent accounting periods. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of our future performance.

For further details of financial statements, please refer to chapter titled “Financial Information of our Company” beginning on Page 77 of this Draft Letter of Offer.

19. Certain information in this Draft Letter of Offer is based on management estimates which may change, and we cannot assure you of the completeness or the accuracy of other statistical and financial data contained in this Draft Letter of Offer.

Certain information contained in this Draft Letter of Offer, such as the amount of land or development rights owned by us, the location and type of development, the Carpet/Saleable Area and our intended use of proceeds of the Issue, is based solely on management estimates and our business plan and has not been appraised by any bank, financial institution or independent agency. The estimates of saleable area and developable area of our completed and planned projects are based on the current market trends, rules and regulations prevalent in the location of our respective projects. The total area of property to be developed and the actual total Saleable Area may differ from the descriptions of the property presented herein and a particular project may not be completely booked, sold, or developed until a date subsequent to the expected completion date.

We may also have to revise our funding estimates, development plans (including the type of proposed development) and the estimated construction commencement and completion dates of our future projects depending on future contingencies and events, including, among others:

- changes in laws and regulations;
- competition;
- receipt of statutory and regulatory approvals and permits;
- irregularities or claims with respect to title to land or agreements related to the acquisition of land;
- the ability of third parties to complete their services on schedule and on budget;
- delays, cost overruns or modifications to our ongoing and planned projects;
- commencement of new projects and new initiatives; and
- changes in our business plans due to prevailing economic conditions.

In addition, while facts and other statistics in this Draft Letter of Offer relating to India, the Indian economy, as well as the Indian real estate sector have been based on various publications and reports from agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. Industry facts and other statistics have been prepared by us and the same have not been independently verified by any industry expert or advisers and, therefore we make no representation as to their accuracy or completeness. For detailed facts and other statistics please refer the chapter titled “Our Industry” beginning on Page No. 49 of this Draft Letter of Offer. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. We have entered into joint agreements with other parties in past for various purposes. Such agreement contains conditions and requirements, the non-fulfilment of which could result in delays or inability to implement and complete our projects as contemplated.

20. Our business is subject to various operating risks at our construction sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.

Our business operations are subject to operating risks, such as breakdown or failure of equipments used at the project sites, weather conditions, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, accidents, our inability to respond to technological advancements and emerging realty industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could result in stoppage of work along with penalty in monetary terms. Any stoppage of work may result in a delay in completing our projects leading to failure to deliver the real estate to the customers within the time frame.

Further, any of the aforesaid risks may also result in our contractors compromising on the quality standards in order to finish the work within the given timelines, which may in turn affect our reputation and ability to attract new customers. If any of the above were to occur, it would significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse effect on our business operations and financial conditions.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

21. If we suffer a large uninsured loss or if we suffer an insured loss that significantly exceeds our insurance coverage, our financial condition and results of operations may be adversely affected.

Our business could suffer damage from fire, natural calamities, misappropriation / burglary or other causes, resulting in losses, which may not be compensated by insurance as we have not taken any insurance. There can be no assurance that the terms of our insurance policies which we will take in future will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, we will have to renew the insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, we may face significant uninsured losses. If we suffer a large uninsured loss or if any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

22. Our operations and our workforce are exposed to various hazards and risks that could result in material liabilities, increased expenses and diminished revenues.

We conduct internal assessment pertaining to a particular area of land, prior to the acquisition of the same and attempt to assess its construction and development potential to the best possible ability. However, there are certain unanticipated or unforeseen risks that may arise in the course of property development due to adverse weather and geological conditions such as storms, hurricanes, lightning, floods, landslides and earthquakes. These weather conditions may expose our contracted workforce to various illnesses, de-hydration and other health hazards. Any stoppage of work on account of health hazards of our workforce may force us to re- schedule our timelines resulting in cost over-runs.

We endeavour to care for our employees and workforce and thus, we may plan to obtain a specific insurance policy for our employees and workforce. However, it may not be able to cover all possible risks and any expenses that we may have to incur beyond such covered risk, may burden our cash flows and financial condition.

Additionally, our operations are subject to hazards inherent in providing architectural and construction services, such as the risk of equipment failure, work accidents, fire or explosion. Many of these hazards can cause injury and loss of life, severe damage to and destruction of property and equipment and environmental damage. We cannot assure you that we will not bear any liability as a result of these hazards.

For further details of operation of our Company, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

23. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to use systems/equipment capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will use such systems/equipment effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market and other data or the strategies we use or plan in future to use will be successful under various market conditions.

24. We may not be able to manage our growth strategy effectively or it may change in the future.

Our business strategy includes the development of residential and commercial projects primarily in and around Ahmedabad city. Our developments have primarily focused on residential projects. Further, we have recently planned to work on a residential project under our subsidiary. In the future, we may decide to undertake projects in additional business lines of real estate development, such as commercial project, IT parks, special economic zones and service apartments. Sales strategies also differ from residential flats to commercial offices, shops and showrooms. We may not be able to capitalise on our strategy to develop commercial property if we fail to generate adequate sales therein.

As we grow and diversify, we may not be able to execute our projects efficiently on such an increased scale, which could result in delays, increased costs and diminished quality, each adversely affecting our reputation. This future growth may strain our managerial, operational, financial and other resources. If we are unable to manage our growth strategy effectively, our business, financial condition and results of operations may be adversely affected. In addition, depending on prevailing market conditions, regulatory changes and other commercial considerations, we may be required to change our business model and we may therefore decide not to continue to follow our business strategies described in this Draft Letter of Offer.

25. We have in the past entered into related party transactions and may continue to do so in future.

We have entered into certain transactions with related parties, including our Directors, Subsidiary, Promoters and Promoter Group and may continue to do so in future. These transactions entered into with, amongst others, our Promoters and Group Companies typically relate to remuneration, purchases, payment of rent for use of property and advances & acceptance of loans etc. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

There can be no assurance that we would not have achieved more favorable commercial terms with other parties. Furthermore, we may enter into related party transactions in the future, and such transactions may potentially involve conflicts of interest. There can be no assurance that such transactions, individually or in the aggregate, will not have

an adverse effect on our results of operations and financial condition. For more information, see “Related Party Transactions” of under chapter titled “Financial information” on page 77 of this Draft Letter of Offer.

26. Our Company’s activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel or occurrence of any work stoppages, our business operations could be affected.

We operate in a labour intensive industry and our contractors hire casual labour to work on our projects. In the event of a labour dispute, if our contractors are unable to successfully negotiate with the workmen or sub-contractors, it would result in work stoppages or increased operating costs. It may also be difficult to procure the required skilled workers for existing or future projects. In addition, we may also be liable for or exposed to sanctions, penalties or losses arising from accidents or damages caused by our workers or contractors. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management’s attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management’s attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

27. Our Company is dependent on third parties for the supply of building materials required for our projects and is exposed to risks relating to fluctuations in commodity prices and shortage of such materials. Further, we do not have any long term supply agreements with the raw material providers.

We require various building materials like bricks, stones, wood, steel, cement, etc. in the course of the construction of our projects and the costs of these materials are dependent on commodity prices, which are subject to fluctuations. Though we maintain good relations with our suppliers, we have not entered into any agreement or understanding for procuring these materials and based on price and availability, we select the best supplier at the time of requirement. In the absence of such contracts, our suppliers are not obligated to continue their supply to us or provide us the materials at a particular rate. They may prefer our competitor over us, thus resulting in delays in procuring such materials or in incurring additional cost for the same. If our suppliers do not wish to continue their relationship with us for any reason, we may not be able to identify a suitable supplier with the quality of materials desired by us within a reasonable time frame or at all. Any disruption in our construction work due to non-availability of building materials may delay our project and cause us cost-overruns.

Further, there can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delay in their supply of raw materials. If we experience a significant or prolonged shortage of materials from any of our suppliers and we cannot procure the materials from other sources, we would be unable to meet our project execution schedules in timely manner, which would adversely affect our sales, margins and customer relations. In the event the prices of such building materials were to rise substantially, we may find it difficult to make alternative arrangements for suppliers of our building materials, on the terms acceptable to us, which could materially affect our business, results of operations and financial condition.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

28. Our operations could be adversely affected by changes to the FSI/TDR regime in Ahmedabad.

We are subject to municipal planning and land use regulations applicable in each city in India, especially in Ahmedabad and Gujarat, which limits the maximum square footage of completed buildings we may construct on plots to specified amounts, calculated based on a ratio of maximum floor space of completed buildings to the surface area of each plot of land (the floor space index, or “FSI”).

Transferable Development Rights (“TDRs”), in the form of a Development Rights Certificate granted by the relevant

statutory authority, provides a mechanism by which a person, who is unable to use the available FSI of their plot for various reasons, is permitted to use the unused FSI on other properties in accordance with applicable regulations or transfer the unused FSI to a third party. Some of our development sites may be reserved for public purposes or for providing public amenities such as roads, gardens, playgrounds, hospitals and schools. If we decide to develop such sites, we are required to develop them in accordance with the applicable reservation and hand over the completed development to the relevant authority. In return, we are compensated by grants of TDRs in the form of FSI, which can be used by us within the same development or, subject to certain restrictions, within another development or transferred to a third party.

Sometimes, a development site has potential for development, but FSI has already been consumed. In such cases, we can acquire FSI by way of TDRs and utilize it on such developments. We believe that considering the current competition in the real estate market in Ahmedabad, we will be required to acquire TDRs for our future projects. If we are unable to acquire such TDRs or if we are unable to acquire them at the expected price, when required, then this may impact our ability to complete certain projects due to insufficient FSI or because of a significant increase in the cost of completing such projects. If we are required to purchase a TDR at price higher than estimated by us, we may not be able to pass on the increased cost to our customers in terms of increased flat / unit costs thus, affecting our profitability. The price and availability of TDRs may have an adverse effect on our ability to complete our projects and on our financial condition and results of operations.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

29. Any Penalty or demand raise by statutory authorities in future will affect our financial position of the Company.

Our Company is mainly engaged in business of real estate and trading which attracts tax liability such as Goods and Service Tax and other applicable provision of the Acts. However, the Company has been depositing the return under above applicable acts but any demand or penalty raised by concerned authority in future for any previous year and current year will affect the financial position of the Company. For detail, Please refer “Outstanding Litigations and Material Development” beginning on page 88 of Draft Letter of Offer.

30. In addition to normal remuneration, other benefits and reimbursement of expenses, some of our Directors (including our Promoter) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

For further details of our director and their shareholding, please refer to chapter titled “Our Management” beginning on Page 73 of this Draft Letter of Offer.

31. The success of our residential real estate development business is dependent on our ability to anticipate and respond to latest trends and consumer requirements.

We believe that our ability to understand the preferences of our customers and to accordingly develop projects that suit their tastes and preferences plays a major role in our successful sales of our residential and commercial units. The growing disposable income of India’s middle and upper income classes has led to a change in popular lifestyle resulting in substantial changes in the nature of their demands. The range of amenities now demanded and expected by consumers include those that have historically been uncommon in India’s residential real estate market such as gardens, community space, security systems, playgrounds, fitness centres, tennis courts, swimming pools, etc. As customers continue to seek better housing and better amenities as part of their residential needs, we are required to continue to focus on the development of quality residential accommodation with various amenities. We also intend to continue to

provide quality facilities even in our middle-income housing projects. Our inability to provide customers with certain amenities or our failure to continually anticipate and respond to customer needs may result in our consumers preferring our competition, who may be providing better amenities. If our consumers perceive that our amenities or quality is not as per the current trends, our brand image may be adversely affected resulting in lower sales and thus adversely impacting our financial condition.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

32. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India’s principal export markets;

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

33. Any failure in our information technology systems could adversely affect our business.

We use information and communication technologies for the execution and management of our projects. We use an ERP system to manage our inventories, material deployment and order and various other tasks that are required for the construction & sale of a project. Any delay in implementation or disruption of the functioning of our information technology systems, especially the ERP system, could affect our ability to assess the progress of our projects, process financial information, manage creditors or debtors or engage in normal business activities. Any such disruption could have an adverse effect on our business operations and financial condition.

34. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of funds may not be recoverable, which may result in write-offs of such amounts and thereby adversely affecting our results of operations.

Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

35. Our business is heavily dependent on the performance of, and the prevailing conditions affecting, the real estate market in Ahmedabad and in India generally.

Our real estate projects are located primarily in Ahmedabad. As on date of this Draft Letter of Offer, all our Completed and upcoming projects through our subsidiary are located in Ahmedabad. For details of our projects, please refer

chapter titled “Our Business” beginning on Page No. 64 of this Draft Letter of Offer. As a result, our business, financial condition and results of operations have been and will continue to be heavily dependent on the performance of, and the prevailing conditions affecting, the real estate market in Ahmedabad and in India generally.

The real estate market in Ahmedabad and in India generally may be affected by various factors outside our control, including, among others:

- prevailing local economic, income and demographic conditions;
- availability of consumer financing (interest rates and eligibility criteria for loans);
- availability of and demand for properties comparable to those we develop;
- changes in governmental policies relating to zoning and land use;
- changes in applicable regulatory schemes; and
- the cyclical nature of demand for and supply of real estate.

These factors may result in fluctuations in real estate prices and the availability of land, which may negatively affect the demand for and the value of our projects, and may result in delays to or the cancellation of our projects, the cancellation of sales bookings or the termination of lease agreements. During times of crisis, market sentiment may be adversely affected, buyers may become cautious, rentals of office space may face downward pressure and sales or collections could be adversely affected which may have a material adverse effect on our financial condition and results of operations.

36. *Quality concerns could adversely impact our business.*

The business of our Company is dependent on the trust of our customers they are having in the quality of our construction. We market our residential units citing the various amenities and facilities that we provide in our projects, like club house, sports area, gyms, swimming pools, lawns, gardens and open areas. Besides, the common areas, our marketing team emphasises our construction quality, eco-friendly design and high quality fittings provided in the flats. Our customers evaluate their needs based on these quality commitments and facilities at the time of making their decision to buy our developed units. Any flat sold to our customers, which does not comply with the quality specifications or standards prevalent in the business or market segment, or if the customers deem our facilities to be not in line with their expectations, it may result in customer dissatisfaction, which may have an adverse effect on our reputation, sales and profitability.

For further details of our business, please refer to chapter titled “Our Business” beginning on Page 64 of this Draft Letter of Offer.

37. *Our business is capital intensive and is significantly dependent on the availability of real estate financing in India. Difficult conditions in the global capital markets and the global economy generally may adversely affect our business and results of operations and may cause us to experience limited availability of funds. We cannot assure you that we will be able to raise sufficient financing on acceptable terms, or at all.*

Our business is capital intensive, requiring substantial capital to develop and market our projects. The actual amount and timing of our future capital requirements may also differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our projects, changes in business plans due to prevailing economic conditions, unanticipated expenses, regulatory changes and engineering design changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek debt or equity financing. Debt financing, if available, could increase our interest cost and require us to comply with certain restrictive covenants in our financing agreements. Equity funding requires our promoters to dilute their current shareholding and also comply with various regulations and guidelines. In addition, the Indian regulations on foreign investment in housing, built-up infrastructure and construction and development projects impose significant restrictions on us, including the types of financing activities we may engage in.

Our ability to obtain additional financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- our results of operations and cash flows;
- the amount and terms of our existing indebtedness;
- general market conditions in the markets where we operate; and
- general condition of the equity markets.

38. *Our inability to obtain funding on reasonable terms, or at all, would have an adverse effect on our business and results of operations. We may experience difficulties in expanding our business into additional geographical markets in India.*

While Ahmedabad remains and is expected to remain our primary focus, we may evaluate growth opportunities in other parts of India on a case-by-case basis. However, we have limited experience in conducting business outside Ahmedabad and have not previously completed any real estate development projects outside of Ahmedabad. We may not be able to leverage our experience in Ahmedabad to expand into other cities as a result of various features which may differ in other cities and with which we may be unfamiliar, such as:

- competition;
- regulatory and taxation regimes;
- business practices and customs;
- languages;
- customer tastes, preferences, behaviour and culture;
- construction methods because of different terrains; and
- land and related laws applicable in other states.

If we enter new markets and geographical areas in India, we are likely to compete not only with national developers, but also local developers who may have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors, suppliers, relevant government authorities, and who have access to existing land reserves, all of which may give them a competitive advantage over us. Our inability to expand into and compete successfully in areas outside the Ahmedabad real estate market may adversely affect our business prospects.

39. *We may not be able to generate profits at the same rate of return that we earned from our historical projects.*

The profits that we generate from our projects may not be utilised in our business at or above the rate of return that we earn from these projects and we may not utilise capital in the most efficient manner. For example, there may be periods during which we may deposit funds in fixed deposits or other short term investments that generate low post-tax returns. We may also invest in mutual funds which are exposed to market and credit risks and may not generate rates of return above the rates of return we earn on our other investments, or at all, or such investments may result in losses. Our failure to generate rates of return on our capital equal to or above the rate of return we earn on our projects may decrease our return on net worth and capital employed, which may in turn adversely affect our business prospects, financial condition and results of operation.

40. *We face significant risks before we realise any income from our real estate developments because of the length of time required for completion of each project.*

Real estate developments typically require substantial capital outlay during the acquisition of land or development rights and/or construction phases and it may take a year or more before income or positive cash flows may be generated through sales of a real estate Projects. Depending on the size of the development, the time span for completing a real estate development projects runs into several years. Consequently, changes in the business environment during the length of time a project requires for completion may affect the revenue and cost of the development during the period from project commencement to completion, directly impacting on the profitability of the project. Factors that may affect the profitability of a project include the risk that the receipt of government approvals may take more time than expected, the failure to complete construction according to original specifications, schedule or budget, and lack lustre sales or leasing of properties. The sales and the value of a real estate development project may be adversely affected by a number of factors, including but not limited to the national, state and local business climate and regulatory environment, local real estate market conditions, perceptions of property buyers and tenants in terms of the convenience and attractiveness of the project and competition from other available or prospective properties developments.

If any of the risks described above materialises, our returns on investment may be delayed and/or lower than originally expected by us and our financial performance may be adversely affected.

41. *We may be involved in legal and administrative proceedings arising from our operations from time to time.*

We may be involved from time to time in disputes with various parties involved in the development and sale of our properties, such as contractors, sub-contractors, suppliers and governmental authorities. These disputes may result in

legal and/or administrative proceedings, and may cause us to suffer litigation costs and project delays. We may, for example, have disagreements over the application of law with regulatory bodies or third parties in the ordinary course of our business, which may subject us to administrative proceedings and unfavourable decisions, resulting in financial losses and the delay of commencement or completion of our projects. We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.

The market for our industry is competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes such as timely delivery, pricing, the quality of our design, construction and facilities and the location of our projects. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

42. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage or accurately report our financial risks.

Effective internal controls are necessary for us to prepare reliable financial reports and avoid fraud. Moreover, any internal controls that we may implement or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. There can be no assurance that additional deficiencies in our internal controls will not arise in the future or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls.

43. We have not identified any alternate source of raising the funds mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

Our Company has not identified any alternate source of funding for our investment and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability of our subsidiary and Company. The delay/shortfall in receiving these proceeds could result in inadequacy of investment in subsidiary or may require our Company to borrow funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the Company.

For further details of our Object for the Issue, Please refer chapter titled “Object for the Issue” beginning on Page 44 of this Draft Letter of Offer.

44. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.

We are a real estate development company. Our future ability to pay dividends will depend on the earnings, financial condition and capital requirements of our Company. Dividends distributed by us will attract tax at rates applicable from time to time. We cannot assure you that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all.

Our business is capital intensive and we may plan to make additional capital expenditures to complete the real estate that we are developing. Our ability to pay dividends could also be restricted under certain financing arrangements that we may enter into. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements for the real estate projects, financial condition and results of operations.

45. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue price.

Our Promoters’ average cost of acquisition of Equity Shares in our Company could be lower than the Issue Price as decided by the Company in consultation with the Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter titled “Offer Document Summary” and “Capital Structure” beginning on Page Nos. 42 and 42, respectively of this Draft Letter of Offer.

46. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

47. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

48. The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control: volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;

- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the real estate sector;
- adverse media reports about us or the Indian real estate sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

49. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such

issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

50. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

51. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

52. The novel coronavirus (Covid-19) pandemic outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the real estate industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the second wave of the virus and the likelihood of a third wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

Further if in case due to any third or consequent wave of Coronavirus or surge in new and deadly variants of the Virus, if another lockdown is imposed in the country and further restrictions are imposed by the government, we may face huge losses and our business operations could be severely impacted. Any such restrictions could cause delays in the completion of our Projects and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

53. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2021 ("Finance Act") on March 28, 2021, pursuant to assent received from the President, and the Finance Act will come into operation with effect from July 1, 2020. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any

amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 (“Bill”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

54. Changes in interest rates in India could adversely affect our business and the market for our real estate developments.

Our results of operations, and the purchasing power of our real estate customers, are substantially affected by prevailing interest rates and the availability of credit in the Indian economy. Interest rates in India have fluctuated over the last few years. Our ability to borrow funds for the development of our real estate projects is affected in part by the prevailing interest rates available to us from leading Indian banks. Changes in prevailing interest rates affect our interest expense in respect of our future borrowings, and our interest income in respect of our interest on short-term deposits with banks and loans to associates. Significantly, the interest rate at which we may borrow funds, and the availability of capital to us for development purposes, affects our results of operations by limiting or facilitating the number of projects we may undertake and determining the return which we must obtain from each project to meet our obligations under our borrowings.

Changes in interest rates also affect the ability and willingness of our prospective real estate customers, particularly the customers for our residential properties, to obtain financing for their purchases of our completed developments. The interest rate at which our real estate customers may borrow funds for the purchase of our properties affects the affordability and purchasing power of, and hence the demand for, our real estate developments.

There can be no assurance that variations in interest rates and interest rate policy by the RBI will not adversely affect our financial condition and results of operations.

55. Our business is substantially affected by prevailing economic conditions in India.

We perform all of our real estate development activities in India, all of our projects are located in Ahmedabad, Gujarat, India, and the predominant portions of our customers are Indian nationals. As a result, we are highly dependent on prevailing economic conditions in India and our results of operation are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our real estate developments and the purchase thereof by our customers;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India’s present tax, trade, fiscal or monetary policies;
- natural disasters, political instability, communal disturbances, riots, civil unrest, terrorism or military conflict in India or incountries in the region or globally, including in India’s various neighboring countries;
- prevailing national, regional or global economic conditions, including in India’s principal export markets; and
- other significant regulatory or economic developments in or affecting India or its real estate development sector.

In addition to the factors set forth above, our business may be affected by adverse changes specific to the residential, and office space real estate markets. Demand in the residential real estate market may be adversely affected by changes such as a decrease in disposable income or a rise in residential mortgage rates or a decline in the population. Demand for our office space developments may be adversely affected by deteriorating economic conditions that could prompt current and potential tenants to place any expansion plans on hold or to search for locations with lower rental rates.

56. Our business and results of operations could be adversely affected by the incidence and rate of property taxes and stamp duties.

Being in real estate industry, we are subject to the property tax regime in the geography that we operate in. We are also subject to stamp duty for the agreements entered into in respect of the properties we buy and sell. These taxes could increase in the future, and new types of property taxes, stamp duties may be introduced which would increase our overall costs. If these property taxes and stamp duties increase, the cost of buying and selling properties may rise. Additionally, if stamp duties or higher stamp duties were to be levied on instruments evidencing transactions, our acquisition costs and sale values may be affected, resulting in a reduction of our profitability. Any such changes in the incidence or rates of property taxes or stamp duties could have an adverse effect on our business and results of operations.

57. Corrupt practices or fraud or improper conduct may delay the development of a project and adversely affect our business and results of operations.

The real estate development and construction industries in India and elsewhere are not immune to the risks of corrupt practices or fraud or improper practices. Large construction projects in all parts of the world provide opportunities for corruption, fraud or improper conduct, including bribery, deliberate poor workmanship, theft or embezzlement by employees, contractors or customers or the deliberate supply of low quality materials. If we or any other persons involved in any of the projects are the victim of or involved in any such practices, our reputation or our ability to complete the relevant projects as contemplated may be disrupted, thereby adversely affecting our business and results of operations.

58. Foreign investors are subject to foreign investment restrictions under Indian law.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

59. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

60. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

61. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and

economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

62. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

63. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs of doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

64. Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

GLOBAL ECONOMIC OVERVIEW

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia’s war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent.

The balance of risks remains tilted to the downside, but adverse risks have moderated since the October 2022 WEO. On the upside, a stronger boost from pent-up demand in numerous economies or a faster fall in inflation are plausible. On the downside, severe health outcomes in China could hold back the recovery, Russia’s war in Ukraine could escalate, and tighter global financing costs could worsen debt distress. Financial markets could also suddenly reprice in response to adverse inflation news, while further geopolitical fragmentation could hamper economic progress.

In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spillovers. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

The World Bank slashed its 2023 growth forecasts on 10 January to levels teetering on the brink of recession for many countries as the impact of central bank rate hikes intensifies, Russia's war in Ukraine continues, and the world's major economic engines sputter.

The bank said it expected global GDP growth of 1.7% in 2023, the slowest pace outside the 2009 and 2020 recessions since 1993. In its previous Global Economic Prospects report, in June 2022, it had forecast 2023 global growth at 3.0%.

It forecast global growth in 2024 to pick up to 2.7% – below the 2.9% estimate for 2022 – and said average growth for the 2020-2024 period would be under 2%, the slowest five-year pace since 1960.

The bank said major slowdowns in advanced economies, including sharp cuts to its forecast to 0.5% for the United States and flat GDP for the eurozone, could foreshadow a new global recession less than three years after the last one.

"Given fragile economic conditions, any new adverse development – such as higher-than-expected inflation, abrupt rises in interest rates to contain it, a resurgence of the COVID-19 pandemic or escalating geopolitical tensions – could push the global economy into recession," the bank said in a statement accompanying the report.

The bleak outlook will be especially hard on emerging and developing economies, the World Bank said, as they struggle with heavy debt burdens, weak currencies and income growth, and slowing business investment that is now forecast at a 3.5% annual growth rate over the next two years – less than half the pace of the past two decades.

INDIAN ECONOMIC OVERVIEW

Introduction

India's commencement of its G-20 presidency on 1st December marks a significant step towards undertaking a leadership role on the global stage as the global economy sails through the storm of a unique set of economic challenges. With the theme of India's G20 presidency "Vasudhaiva Kutumbakam" or "One Earth, One Family, One Future", India has identified several points which shall be prioritized for its G20 presidency, these include inclusive, equitable, and sustainable growth; LiFE (lifestyle for the environment); women's empowerment; digital public infrastructure and tech-enabled development in health, agriculture, education, commerce, skill-mapping, and culture and tourism; climate financing; circular economy; global food security; energy security; green hydrogen; disaster risk reduction and resilience; developmental cooperation; fight against economic crimes; and multilateral reforms.

The country has transitioned to a modern economy, wherein it has become more globally integrated and exports a fifth of its output, compared to one-sixteenth at the time of independence. India also benefits from the demographic transition with the help of a lower infant mortality rate and a steady increase in the literacy rate. Therefore, with more equitable income distribution, better employment levels, and globally comparable social amenity provision, India's per capita GDP may expand in the next 25 years as it did in the previous 75 years.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which reached ₹4.1 lakh crores (US\$ 49.53 billion) during April-October 2022 which is 61.5% higher than the corresponding period of last year. The resilient growth of the Indian

economy in the first half of FY 2022-23 has been the fastest among major economies, thereby strengthening macroeconomic stability. India registered a broad-based expansion of 9.7% in the first half of FY 2022-23, supported by robust domestic demand and upbeat investment activity.

8. Cargo traffic handled at major ports stood at 507.1 million tonnes during April-November 2022.
9. Railway freight traffic growth stood at 978.7 million tonnes from April-November 2022.

11. 61.1 crore e-way bills were raised during April-November 2022, as compared to 48.5 crore e-way bills raised during April-November 2021.
12. India registered a broad-based expansion of 9.7% during the first half of FY 2022-23, supported by robust domestic demand and upbeat investment activity. Sectoral analysis reveals that growth was driven by demand from the services sector, enhanced agriculture exports, and robust construction activity aided by increased infrastructure investment. Private consumption reached its highest among all second quarters during the past 11 years at 58.4% of GDP. The investment rate also rose to be the highest among all the second quarters since 2012-13 at 34.6% of GDP, hinting at the beginnings of an investment cycle.
13. From April-November 2022, the gross Goods and Services Tax (GST) revenue collection crossed the Rs. 1.4 lakh crores (US\$ 17.62 billion) benchmark.
14. In December 2022, the Indian basket of crude oil reached US\$ 78.1 a barrel, compared to US\$ 87.55 in November 2022.
15. In April-November 2022, UPI transactions were valued at Rs. 87.4 lakh crores (US\$ 105 billion).
16. Merchandise exports during April-November 2022 stood at US\$ 295.3 billion.
17. Net Foreign Portfolio Investment (FPI) flows, which were negative in Q1 2022-23, turned positive in the second quarter, and in the third, as of 21st December 2022, stood at USD 4.9 billion.
18. Overall system liquidity remained in surplus. During October-November, the average total absorption under the liquidity adjustment facility (LAF) was 1.4 lakh crore, down from the average of 2.2 lakh crore during August-September 2022-23.
19. As of December 23, 2022, reserve money stood at Rs. 4,174,957 crores (US\$ 504.38 billion).
20. As of December 23, 2022, currency in circulation (CIC) registered Rs. 3,242,470 crores (US\$ 391.73 billion).
21. Rupee strength reached Rs. 81.81/US\$, as of November 2022.
22. During April-October 2022, India received Net Foreign Direct Investments worth US\$ 22.7 billion.
23. As of December 9, 2022, India's foreign exchange reserves stood at US\$ 564.1 billion.
24. According to RBI:
 - Bank credit stood at Rs. 129.47 trillion (US\$ 1.56 trillion) as of November 18, 2022.
 - Credit to non-food industries stood at Rs. 128.95 trillion (US\$ 1.56 trillion) as of November 18, 2022.

India's economy grew faster during the first half of FY2022-23 than other economies, driven by strong demand and investment. Inflationary pressures have been moderating since October, with CPI inflation tempering to an eleven-month low in November. On top of that, it has fallen below the RBI's upper target band for the first time in 2022, mainly driven by the decline in food inflation. Furthermore, inflation expectations have also moderated in the November round of the RBI's Households' Inflation Expectations Survey. This bodes well for augmenting consumption in rural and urban regions in the upcoming months. Improvement in business and consumer sentiment is also likely to bolster discretionary spending. The real investment rate during Q2 of FY2022-23 prevailing at a high level of 34.6% demonstrates the Government's continued commitment towards asset creation.

An overall rise in Rabi coverage with adequately filled irrigation reservoirs plays a pivotal role in the agricultural output growth in 2022-23. An increase in minimum support prices for both Kharif and Rabi crops in 2022-23 and progress in rice procurement have already been supplementing rural incomes in the country. Higher incomes have further resulted in an increase in sales of passenger vehicles, two and three-wheelers, and tractors by a good year-on-year margin in Oct-Nov. The rise in GST collection, robust e-way bill generation, and increased e-toll collection reaffirm the resilience of economic activity.

In addition, steady growth momentum in service activity continues with expansion in PMI Services during Oct-Nov, attributing to the growth in output and accommodative demand conditions, leading to a 5 sustained upturn in sales. The growth impetus in rail freight and port traffic remains upbeat, with further improvement in the domestic aviation sector. Strong growth in fuel demand, domestic vehicle sales, and high UPI transactions also reflect healthy demand conditions.

Continuous capital spending by the central government during the first seven months expanded by 61.5%, amounting to Rs. 4.1 trillion (US\$ 49 billion) which totals up to 54.6% of the available budget. With stable foreign direct investment inflows, resurgent FPI inflows, and adequate foreign exchange reserves providing an import cover of 9 months, the external front remains resilient. This has resulted in the Indian Rupee performing well as compared to other EMEs (Emerging Market Economies). As per the data released by the National Statistical Office (NSO), irrespective of the deterioration in global economic activities, Indian exports have registered a growth sequentially as well as yearly in the 2nd Quarter of the Financial Year 2022-23.

As we head into 2023, global economic developments are expected to complicate the outlook further, and therefore continued vigilance is a critical aspect in maintaining India's external resilience. Going forward, India needs to focus

on medium-term challenges such as securing technology and resources for energy transition and skilling its youth for the 21st century economy, while staying the course on fiscal consolidation at the general government level. With continuous efforts during the last several years, a strong platform has been erected on which the superstructure of a middle-income economy can be constructed

Indian Economy: GDP growth sustains momentum in Q2: 2022-23

1. India's real GDP grew at 6.3 per cent YoY in Q2 of 2022-23, aided by robust domestic demand and steady investment activity. Having reached a level 8 per cent higher than the corresponding pre-pandemic level of 2019-20, Q2 of 2022-23 also marked a post-recovery growth for the Indian economy. Sequentially, India's real GDP grew by 3.6 per cent from Q1 to Q2, sustaining the growth momentum that emerged at the beginning of the year. This growth compares much favourably with the average sequential growth of -0.1 per cent of all the second quarters between 2013-14 and 2019-20. Sequential growth of such a large magnitude reflects the significant release of pent-up demand in India's economy.

2. On the supply side, the real GVA YoY growth in agriculture and allied sectors in Q1 was sustained in Q2, supported by growth in exports of agricultural products. Led by trade, hotels, transport, and communication, the real GVA in contact-intensive services comfortably stood above its corresponding pre-pandemic level in Q2 of 2019-20, driven by the release of pent-up demand, seen in a high sequential growth of 16 per cent from Q1 to Q2.

3. The GVA in the manufacturing sector contracted in Q2 on a high base reached in the previous year following the waning of the second wave. GVA of manufacturing may have also declined with output growth, turning tepid to absorb a large build-up of inventory accumulating over five quarters to more than 1.3 per cent of GDP. The Q-o-Q growth in GVA of the construction sector declined in Q2 as heavy monsoons in the second quarter slowed construction activity.

The real estate market is segmented into real estate rental and real estate agency and brokerage.

The main types of real estate are real estate rental, real estate agency, and brokerage. Renting real estate, also referred to as hiring or letting, is a contract in which a fee is paid in exchange for the temporary use of a good, service, or property that belongs to someone else. The different modes include online, and offline and involve various property types such as fully furnished, semi-furnished, and unfurnished.

The global real estate market grew from \$3694.47 billion in 2022 to \$3976.18 billion in 2023 at a compound annual growth rate (CAGR) of 7.6%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The real estate market is expected to grow to \$5209.84 billion in 2027 at a CAGR of 7.0%.

The real estate market's growth will be aided by stable economic growth forecasted in many developed and developing countries. The International Monetary Fund (IMF) predicts that the global real GDP growth will be 3.7% over 2019 and 2020 and 3.6% from 2021 to 2023. Recovering commodity prices, after a significant decline in the historic period is further expected to aid the market growth. Developed economies are also expected to register stable growth during the forecast period. Additionally, emerging markets are expected to continue to grow slightly faster than developed markets in the forecast period. For instance, according to official data from the World Bank, the GDP of India increased to reach \$3173.40 billion in 2021, compared to \$2667.69 billion in 2020.

The outbreak of Coronavirus disease (COVID-19) has acted as a massive restraint on the real estate market in 2020 as the need for services offered by these establishments declined due to lockdowns imposed by governments globally. COVID-19 is an infectious disease with flu-like symptoms including fever, cough, and difficulty in breathing. The virus was first identified in 2019 in Wuhan, Hubei province of the People's Republic of China, and spread globally including Western Europe, North America, and Asia. Steps by national governments to contain the transmission have resulted in a decline in economic activity with countries entering a state of 'lock down' and the outbreak had a negative impact on businesses throughout 2020 and into 2021. However, it is expected that the real estate market will recover from the shock across the forecast period as it is a 'black swan event' and not related to ongoing or fundamental weaknesses in the market or the global economy.

Gen Z (born between the mid-1990s and early 2000s) is the next generation of renters after the millennials and they are predicted to spend more than any other generation on rental services in their lifetime. Gen Z is highly dependent on technology and relies more on the internet and social media to make purchasing and lifestyle decisions. Since Gen Z has experienced technology their entire lives, leasing and marketing campaigns for real estate rental services should incorporate the use of technology to reach this generation where they are most active such as on apps, on social media, or any other internet source. Gen Z makes up almost one-quarter of the U.S. population therefore, the real estate rental services market is expected to witness growth from this generation in the five years from 2019 to 2023.

Government Initiatives

Government of India along with the governments of respective States has taken several initiatives to encourage development in the sector. The Smart City Project, with a plan to build 100 smart cities, is a prime opportunity for real estate companies. Below are some of the other major Government initiatives:

In October 2021, the RBI announced to keep benchmark interest rate unchanged at 4%, giving a major boost to the real estate sector in the country. The low home loan interest rates regime is expected to drive the housing demand and increase sales by 35-40% in the festive season in 2021.

Under Union Budget 2021-22, tax deduction up to Rs. 1.5 Lac (US\$ 2069.89) on interest on housing loan, and tax holiday for affordable housing projects have been extended until the end of fiscal 2021-22.

The Atmanirbhar Bharat 3.0 package announced by Finance Minister Mrs. Nirmala Sitharaman in November 2020 included income tax relief measures for real estate developers and homebuyers for primary purchase/sale of residential units of value (up to Rs. 2 crore (US\$ 271,450.60) from November 12, 2020 to June 30, 2021).

In order to revive around 1,600 stalled housing projects across top cities in the country, the Union Cabinet has approved the setting up of Rs. 25,000 crore (US\$ 3.58 billion) alternative investment fund (AIF).

Government has created an Affordable Housing Fund (AHF) in the National Housing Bank (NHB) with an initial corpus of Rs. 10,000 crore (US\$ 1.43 billion) using priority sector lending short fall of banks/financial institutions for micro financing of the HFCs.

As of January 31, 2021, India formally approved 425 SEZs, of which 265 were already operational. Most special economic zones (SEZs) are in the IT/ BPM sector.

Road Ahead

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform, which will allow all kind of investors to invest in the Indian real estate market. It would create an opportunity worth Rs. 1.25 trillion (US\$ 19.65 billion) in the Indian market in the coming years. Responding to an increasingly well-informed consumer base and bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family-owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The residential sector is expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.

The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

The growing flow of FDI in Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards. Indian real estate is expected to attract a substantial amount of FDI in the next two years with US\$ 8 billion capital infusion by FY22.

The response of the government to the COVID-19 outbreak has been swift and comprehensive. A national lockdown to contain the health emergency was complemented by a comprehensive policy package to mitigate the impact on the poorest households (through various social protection measures) as well as on small and medium enterprises (through enhanced liquidity and financial support).

To build back better, it will be essential for India to stay focused on reducing inequality, even as it implements growth-oriented reforms to get the economy back on track. The World Bank is partnering with the government in this effort by helping strengthen policies, institutions, and investments to create a better future for the country and the people through green, resilient and inclusive development.

In response to the COVID-19 shock, the government and the Reserve Bank of India took several monetary and fiscal policy measures to support vulnerable firms and households, expand service delivery (with increased spending on health and social protection) and cushion the impact of the crisis on the economy. Thanks in part to these proactive measures, the economy is expected to rebound.

In 2022-23, India's GDP is expected to rise by 8.0-8.5%, owing to broad vaccine coverage, gains from supply-side reforms and regulatory ease, healthy export growth, and the availability of fiscal space to ramp up capital spending. The trajectory set for India's economy by the previous year's budget has been reinforced in Budget 2022-23. A lot of private investments taking place and consumption levels are rising as a result of increased employment. Capex generated by the government will also encourage private investment. The Production Linked Incentive (PLI) schemes in 14 sectors will further encourage private investment in order to boost export growth and allow for feasible import substitution in the country. The growth forecast for 2022-23 is based on the premise that there will be no further devastating pandemic-related economic disruption, that the monsoon will be expected, and that major central banks will withdraw global money in a relatively orderly manner.

Despite the third wave of COVID-19, overall economic activity remained stable, indicating that India has learned to cope with virus-related restrictions. Several high frequency indicators, such as electricity consumption, PMI manufacturing, exports, and e-way bill creation, reflect this. The economy's confidence has been bolstered even more by the rapid pace of immunisation. In addition, the Union Budget commitment to asset creation (public infrastructure development) in 2022-23 will re-energize the virtuous cycle of investment and crowd in private investment with huge multiplier effects, boosting inclusive and sustainable growth. Consumption will rise up once the uncertainty and worry caused by the Covid-19 virus has passed, and the demand rebound will allow the private sector to step in with investments to boost production to satisfy the rising demand. This scenario should play out for the Indian economy in 2022-23, barring geopolitical and economic surprises.

The geo-political tension triggered by the conflict between Russia and Ukraine since 24th February, 2022 has not ceased. The economic fallout of the crisis is only gradually unfolding. It may be accentuating some of the trends already underway such as global food shortages. The dated Brent Crude oil price, which forms the bulk of Indian crude oil basket has hovered around USD 105-106 / bbl since 1st of April, after having risen above USD 135 in the first/second week of March from around USD 95 just before the crisis. The Government is exploring all viable options, including import diversification, to procure crude at an affordable price. Affordability is desired as even the present level of international crude price, should it persist for a long time, may come in the way of India achieving a real economic growth rate north of 8 per cent in FY23. Be that as it may, India's economy, having swiftly recovered in 2021-22, after the pandemic induced contraction, may prove resilient owing to government's thrust on capital expenditure and improved corporate sector's financial health.

Real GDP of India increased by 8.4% YoY in Q2 of FY 22, recovering more than 100% of pre-pandemic output in the equivalent quarter of FY 20. India is one of the few countries to have grown for four consecutive quarters in Covid-19 (Q3, Q4 of FY21 and Q1, Q2 of FY22), demonstrating the economy's resiliency.

The recovery was fuelled by a resurgence in the services sector, a complete recovery in manufacturing, and continued expansion in the agriculture sector. In addition to successful pandemic management and signalling impact of promised measures, recovery was aided by a quick increase in vaccine coverage from 32% of the adult population at the end of

Q1 to 75% at the end of Q2 of FY 22. According to the latest GDP estimates issued by the NSO, the Indian economy increased by 8.4% YoY in Q2 of FY 22, after growing by 20.1% YoY the previous quarter.

Industry has also been showing robust growth, particularly in the second -half of 2021-22. The combined Index of Eight Core Industries registered a YoY growth of 5.8 per cent in February 2022, highest in the last four months following an increase in output of natural gas, coal, refinery products among others. PMI manufacturing has stayed in the expansionary zone continuously for nine months contributing much to the recovery in 2021-22. Credit to industry has also seen a boisterous growth with loan growth to large corporates finally turning positive towards end of 2021-22.

Action against Covid-19 – India

India has been successfully running world's second largest vaccination programme administering, as on 31st March 2022, more than 184 crore doses of vaccine. Around 91 crore of adults have received at least one dose, of which 79 crore are now fully vaccinated. The coverage of adolescents aged between 15-18 years stands at 76 per cent. In numbers, 5.7 crore adolescents have received at least one dose of which 3.8 crore are fully vaccinated, equivalent to 51 per cent of their population.

From 16th March 2022, vaccination drive has been extended to cover the adolescent population in the age group of 12-14 years. As of 31st March 2022, 1.7 crore doses have been administered to this age group. Additionally, India has also expanded its booster dose programme by removing a restriction related to comorbidities. About 2.3 crore precautionary doses have been administered to healthcare, front line workers and people aged above 60 years.

Steady fall in new COVID-19 cases and the consequent withdrawal of restrictions across states continue to strengthen the economic activity. Daily cases further abated to less than 1400 in March, reaching about one-eighth of what it was in February. The daily recoveries continue to outnumber daily new cases pushing up the recovery rate to 98.7 per cent. As on 31st March, 2022 India had less than 26 thousand active cases – down from a peak of 22.0 Lac cases on 27th Jan 2022. Delhi and Maharashtra have now made masks optional to wear reflecting their belief that the pandemic is under control. The hope is that any new variant such as Omicron XE would not pose a serious threat to the economic recovery.

In view of the controlled pandemic situation, mobility continues to expand above prepandemic levels by 7.5 per cent in March compared to 3.3 per cent in February. Average daily E-toll count increased to 87.2 Lac in March 2022 registering a growth of 40 per cent on year on year (y-o-y) basis. While average E-toll collection expanded by 32.8 per cent on y-o-y basis to ₹132.0 crore in March 2022. During 2021-22, average daily E-toll collection increased by 64 per cent while average daily E-toll count higher by 81 per cent compared to previous year.

Government Initiatives

Government of India along with the governments of respective States has taken several initiatives to encourage development in the sector. The Smart City Project, with a plan to build 100 smart cities, is a prime opportunity for real estate companies. Below are some of the other major Government initiatives:

In October 2021, the RBI announced to keep benchmark interest rate unchanged at 4%, giving a major boost to the real estate sector in the country. The low home loan interest rates regime is expected to drive the housing demand and increase sales by 35-40% in the festive season in 2021.

Under Union Budget 2021-22, tax deduction up to Rs. 1.5 Lac (US\$ 2069.89) on interest on housing loan, and tax holiday for affordable housing projects have been extended until the end of fiscal 2021-22.

The Atmanirbhar Bharat 3.0 package announced by Finance Minister Mrs. Nirmala Sitharaman in November 2020 included income tax relief measures for real estate developers and homebuyers for primary purchase/sale of residential units of value (up to Rs. 2 crore (US\$ 271,450.60) from November 12, 2020 to June 30, 2021).

In order to revive around 1,600 stalled housing projects across top cities in the country, the Union Cabinet has approved the setting up of Rs. 25,000 crore (US\$ 3.58 billion) alternative investment fund (AIF).

Government has created an Affordable Housing Fund (AHF) in the National Housing Bank (NHB) with an initial corpus of Rs. 10,000 crore (US\$ 1.43 billion) using priority sector lending short fall of banks/financial institutions for micro financing of the HFCs.

As of January 31, 2021, India formally approved 425 SEZs, of which 265 were already operational. Most special economic zones (SEZs) are in the IT/ BPM sector.

Road Ahead

The Securities and Exchange Board of India (SEBI) has given its approval for the Real Estate Investment Trust (REIT) platform, which will allow all kind of investors to invest in the Indian real estate market. It would create an opportunity worth Rs. 1.25 trillion (US\$ 19.65 billion) in the Indian market in the coming years. Responding to an increasingly well-informed consumer base and bearing in mind the aspect of globalisation, Indian real estate developers have shifted gears and accepted fresh challenges. The most marked change has been the shift from family-owned businesses to that of professionally managed ones. Real estate developers, in meeting the growing need for managing multiple projects across cities, are also investing in centralised processes to source material and organise manpower and hiring qualified professionals in areas like project management, architecture and engineering.

The residential sector is expected to grow significantly, with the central government aiming to build 20 million affordable houses in urban areas across the country by 2022, under the ambitious Pradhan Mantri Awas Yojana (PMAY) scheme of the Union Ministry of Housing and Urban Affairs. Expected growth in the number of housing units in urban areas will increase the demand for commercial and retail office space.

The current shortage of housing in urban areas is estimated to be ~10 million units. An additional 25 million units of affordable housing are required by 2030 to meet the growth in the country's urban population.

The growing flow of FDI in Indian real estate is encouraging increased transparency. Developers, in order to attract funding, have revamped their accounting and management systems to meet due diligence standards. Indian real estate is expected to attract a substantial amount of FDI in the next two years with US\$ 8 billion capital infusion by FY22.

OUR BUSINESS PROCESS:

The process of real estate development can be divided into distinct stages of activity. The stages are as follows:

STEPS INVOLVED IN OUR BUSINESS PROCESS:

1. Land Identification and Acquisition:

We have developed specific procedures to identify land that is suitable for our needs and perform ongoing market research to determine demand for residential properties. Our land acquisition process is overseen by our top management. The process of land acquisition begins with the identification of appropriate locations based on locations where we sense business opportunities based on the assessment report prepared. Other determining factors include a site's accessibility from nearby roads and major thoroughfares and the availability of utility infrastructure, such as electric transmission facilities, telephone lines and water systems. We also take into consideration general economic conditions and anticipated demand for residential properties in a particular area, the overall competitive landscape and the neighboring environment and amenities.

We also consider the feasibility of obtaining required governmental licenses, permits, and authorizations and adding necessary improvements and infrastructure, including sewage works, roads and electricity against a purchase price that will maximize margins. This also helps in determining the product positioning, corresponding price point and sales potential.

We also have a team of professionals who are continuously seeking to acquire developable land in desirable locations on which to construct projects. This team closely works with the various property consultants, advisory bodies, local architects and consultants who provide information regarding the availability of land, development restrictions, planned developments and market trends specific to the location.

2. Planning, Designing and Approval:

We coordinate with architects for our projects. Our team is responsible for budgeting, planning, contracting and tracking the execution of projects. Our top management is actively involved in execution of projects. We collaborate with well-known architects for our projects. We benefit from long-term and established relationships with several architects and labor contractors. The work performed by these third parties must comply with specifications provided by us and, in all cases, is subject to our review.

The design includes master-planning, landscaping and phasing of development with orientation of buildings. At the conceptual design stage, detailed analysis is done to evaluate criteria such as building design and layout, sub-soil conditions, geological data, building selection, site egress and access to arrive at the optimal design and Orientation of our projects. The final decision on the conceptualization of project and the development of each property is made by our top management.

Before the execution process the final stage commences with the obtaining of requisite statutory and regulatory approvals, including environmental approvals, approvals of building plans, layout plans and occasionally approvals for conversion of agricultural land to commercial or residential land. We hire architects, engineers and legal professionals whose function is to obtain approvals from various statutory authorities.

3. Project Execution:

We seek to ensure that we control the quality of construction, develop construction know-how, and realise synergies in procuring construction materials from our raw material suppliers and equipment and other efficiencies. We place significant emphasis on cost management and monitor our projects to ensure that time and costs remain within the budgeted amount. We believe we have good relationships with our raw material suppliers, from whom we procure material such as cement, ready mix concrete and steel, among others.

We hire engineers who perform the following functions:

- managing site development and construction activities;
- coordinating the activities of third party contractors and suppliers;
- overseeing quality and cost controls; and
- Ensuring compliance with zoning and building codes and other regulatory requirements.

Our terms with contractors generally require them to obtain necessary approvals, permits and licenses for their part of work and contain a standard defect liability period from the completion of their work.

4. Project Completion:

This is final completion stage of our Projects and the buyers are informed during the various stages of construction and the buyers receive advance notice in anticipation of final possession. We register the sale documents and transfer title to the customer upon the completion of the project and the receipt of the building completion certificate from the appropriate authorities. We ensure the entire consideration is paid to us prior to the transfer of title or before possession is handed over, whichever is earlier.

After handing over of the Property, we encourage continuous feedback from our buyers and have a team in place that collates all issues pertaining to customer needs to ensure appropriate action on our part and to ensure customer satisfaction.

We have audited the accompanying Consolidated Financial Statements of Samor Reality Limited (Formerly known as M/s. Samor Reality) ("the Parent"/"the Holding Company") and its subsidiaries, (the Parent/ Holding Company and its subsidiaries together referred to as "the Group"), which comprise the Consolidated Balance Sheet as at March 31, 2022, and the Consolidated Statement of Profit and Loss and the Consolidated Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Consolidated Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Accounting Standards prescribed under section 133 of the Act read with the Companies (Accounting Standards) Rules, 2006, as amended ("Accounting Standards") and other accounting principles generally accepted in India, of the state of affairs of the Group as at March 31, 2022, its profit/loss and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the Consolidated Financial Statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the Consolidated Financial Statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the Consolidated Financial Statements.

Information Other than the Consolidated Financial Statements and Auditor's Report Thereon

- The Holding Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Management Discussion and Analysis and Directors Report (the "Reports"), but does not include the Consolidated Financial Statements and our auditor's report thereon.
- Our opinion on the Consolidated Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the Consolidated Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially

inconsistent with the Consolidated Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Consolidated Financial Statements that give a true and fair view of the financial position, financial performance and cash flows in accordance with the Accounting Standards and other accounting principles generally accepted in India. The respective management of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Parent/ Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate or cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group are also responsible for overseeing the financial reporting process of the Group.

Auditor's Responsibility for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Holding Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Consolidated Financial Statements, including the disclosures, and whether the Consolidated Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such business activities included in the consolidated financial statements of which we are the independent auditors. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the Consolidated Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Consolidated Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Consolidated Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended March 31, 2022, we have audited the internal financial controls over financial reporting of Samor Reality Limited (Formerly known as Samor Reality) (hereinafter referred to as "the Holding Company" / "Parent"). Reporting under clause (i) of sub section 3 of Section 143 of the Act in respect of the adequacy of the internal financial controls with reference to financial statements is not applicable to the subsidiary.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company / Parent are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI)". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the holding company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Holding Company/ Parent based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Holding Company/ Parent.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that

transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion to the best of our information and according to the explanations given to us, the Holding Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the criteria for internal financial control over financial reporting established by the holding company considering the essential components of internal control stated in the Guidance Note.
