2. *Our business and our financial condition would be materially and adversely affected if we fail to obtain new contracts.*

We are a Highway Operations & Maintenance (O&M) Service providing company. We thrive to make Highway Operations & Maintenance possible cost effective and easier with the help of Innovation, Technology & out-of-the-box solutions. Our revenue constitutes two segments, major maintenance and repairs & Highway operations. Our revenue is based on the projects we bid for on ongoing basis. Infrastructure projects are typically awarded to us following a competitive bidding process and satisfaction of prescribed pre-qualification criteria. While service, quality, health and safety, records and personnel, as well as reputation, experience and sufficiency of financial resources are important considerations in final bid decisions. There can be no assurance that we would always be able to meet such financial and technical qualification criteria, whether independently or together with other joint venture partners. Further, once the prospective bidders satisfy the pre-qualification requirements of the tender, the project is usually awarded on the basis of price competitiveness of the bid. We cannot assure you that we would bid where we have been pre-qualified to submit a bid or that our bids, when submitted or if already submitted, would be accepted. We may also not be able to secure bids due to negligence or disqualification of our joint venture partners in cases of bids in a consortium as these factors are beyond our control. The growth of our business mainly depends on our ability to obtain new contracts in the sectors in which we operate. Generally, it is very difficult to predict whether and when we will be awarded a new contract. Our future results of operations and cash flows can fluctuate materially from period to period depending on the timely award of contracts, commencement of work and completion of projects in the scheduled time period. If we are unable to obtain new contracts for our business, our business will be materially and adversely affected.

3. *Delays in the completion of current and future projects could lead to termination of contracts or cost overruns or claims for damages, which could have an adverse effect on our cash flows, business, results of operations and financial condition.*

We provide our clients with performance guarantees for completion of the construction of our projects within a specified time frame. Subject to certain customary exceptions such as (i) occurrence and continuance of force majeure events that are not within our control, or (ii) delays that are caused due to reasons solely attributable to our client, failure to adhere to contractually agreed timelines or extended timelines could require us to pay liquidated damages as stipulated in the project contract. Such liquidated damages are often specified as a fixed percentage of the contract price and our clients are entitled to deduct the amount of damages from the payments due to us. The client may also be entitled to terminate the contract in the event of delay in completion of the work if the delay is not on account of any of the agreed exceptions. With respect to some of our projects, in the event of termination for any of the aforesaid reasons, we may only receive partial payments under such agreements and such payments may be less than our estimated cash flows from such projects. Further, we may not be able to obtain extensions for projects on which we face delays or time overruns. In addition to the risk of termination by the client, delays in completion of development may result in cost overruns, lower or no returns on capital and reduced revenue for the client thus impacting the project's performance, as well as failure to meet scheduled debt service payment dates and increased interest costs from our financing agreements for the projects. The scheduled completion targets for our projects are estimates and are subject to delays as a result of, among other things, unforeseen engineering problems, force majeure events, issues arising out of right of way, unavailability of financing, unanticipated cost increases or adverse climatic conditions. We cannot assure you that such delays will not occur in the future. Such delays could jeopardize our reputation and our relationship with our existing clients and have adverse effects on our cash flows, business, results of operations and financial condition

4. *Our business involves usage of manpower and any unavailability of our employees or shortage of contract labour or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations.*

Our business involves usage of manpower and we are dependent on the availability of our permanent employees and the supply of a sufficient pool of contract labourers at our project locations. Unavailability or shortage of such a pool of workmen or any strikes, work stoppages, increased wage demands by workmen or changes in regulations governing contractual labour may have an adverse impact on our cash flows and results of operations. The number of contract labourers employed by us varies from time to time based on the nature and extent of work contracted to us and the availability of contract labour. We may not be able to secure the required number of contractual labourers required for the timely execution of our projects for a variety of reasons including, but not limited to, possibility of disputes with sub-contractors, strikes, less competitive rates to our sub-contractors as compared to our competitors or changes in labour regulations that may limit availability of contractual labour. We are subject to laws and regulations relating to employee welfare and benefits such as minimum wage, working conditions, employee insurance, and other such employee benefits and any changes to existing labour legislations, including upward revision of wages required by such state governments to be paid to such contract labourers, limitations on the number of hours of work or provision of improved facilities, such as food or safety equipment, may adversely affect our business and results of our operations.

Further, there can be no assurance that disruptions in our business will not be experienced if there are strikes, work stoppages, disputes or other problems with sub-contractors or contract labourers deployed at our projects. This may adversely affect our business and cash flows and results of operations.

5. *Our business is capital intensive. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on our operations.*

Our business requires a significant amount of working capital which is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. In many contracts, significant amounts of working capital are required to finance the purchase or manufacturing of materials, mobilization of resources and other work on projects before payment is received from clients. Our working capital requirements may increase due to an increase in the size of our operations and the number and size of projects that are required to be executed within a similar timeframe. Since the contracts we bid typically involve a lengthy and complex bidding and selection process which is affected by a number of factors, it is generally difficult to predict whether or when a particular contract we have bid for will be awarded to us and the time period within which we will be required to mobilize our resources for the execution of such contract. In addition, we may need to incur additional indebtedness in the future to satisfy our working capital requirements.

Our capital expenditure requirements and growth strategy thus require continued access to significant amounts of capital on acceptable terms. We cannot assure you that market conditions and other factors will permit future project and acquisition financings, debt or equity, on terms acceptable to us. Our ability to arrange financing and the costs of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from financial institutions, the amount and terms of our existing indebtedness, investor confidence, the continued success of current projects and laws that are conducive to our raising capital in this manner.

6. *Our funding requirements and the deployment of Net Proceeds are based on management estimates and have not been independently appraised. Further, our management will have discretion in the application of the Net Proceeds, and there is no assurance that the Objects of the Issue will be achieved within the time frame expected or at all.*

We intend to use the Net Proceeds for the purposes described under “**Objects of the Issue**” on page 31. The Objects of the Issue include, funding of working Capital Requirements of our company amounting to ₹ [●] Lakh, and general corporate purposes amounting to ₹ [●] Lakh. While we believe that utilization of Net Proceeds would help us further business growth and expansion, for our Company. Given the nature of our business and due to various uncertainties involved, we may be unable to utilize the Net Proceeds within the time frame or as per the schedule of deployment that we currently estimate. In the case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by means available to us, including internal accruals and additional equity and/or debt arrangements.

7. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled “**Objects of the Issue**” on page 31 of this Draft Letter of Offer

8. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client’s default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

9. *We have entered into related party transactions in the past and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoter and associate companies. While we believe that all such transactions are conducted on arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter “**Financial Information- Related Party Transactions**” beginning on page 60 of the Draft Letter of Offer

10. *Our business strategies and expansion plans may be subject to various unfamiliar risks and may not be successful.*

Our business strategies include widening our customer base by entering into new geographies and strengthening our relationships with our existing clients. These strategies may require us to expand our operations to other geographical areas and in new industry verticals. Risks that we may face in implementing our business strategy in these markets may substantially differ from those previously experienced, thereby exposing us to risks related to new markets, industry verticals and clients. The commencement

of operations beyond our current markets and industry verticals is subject to various risks including unfamiliarity with pricing dynamics, competition, service and operational issues as well as our ability to retain key management and employees. There can also be no assurance that we will not experience issues such as capital constraints, difficulties in expanding our existing operations and challenges in training an increasing number of personnel to manage and operate our expanded business, or that we will be able to successfully manage the impact of our growth on our operational and managerial resources and control.

11. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past. Following are the details of our cash flow position during the last three financial years based on financial statements are;

(Rs. In Lakh)		
Particulars	March 31, 2022	March 31, 2021
Net cash flow from / (used in) operating activities	(1955.25)	113.28
Net cash flow from / (used in) investing activities	(151.79)	(155.65)
Net cash flow from / (used in) financing activities	2234.97	42.87

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition. For further details please refer to “Financial Information” beginning on page 60

12. If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.

Our industry is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological and regulatory changes. Our clients’ needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients’ demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients’ increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources and the services we provide and may increase our reliance on third-party service providers. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

13. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

14. We are dependent on a number of Key Managerial Personnel and our senior management, and the loss of, or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.

Our performance depends largely on the efforts, expertise and abilities of our Key Managerial Personnel, senior management, and our operational personnel who possess significant experience in the industry in which we operate. We believe that the inputs and experience of our KMP and senior management, in particular, and other key personnel are valuable for the development of our business, operations and the strategic directions taken by our Company. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. Moreover, we may be required to substantially increase the number of our qualified personnel in connection with any future growth plans, and we may face difficulty in doing so due to the intense competition in the technology industry for such personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past in order to remain competitive in retaining.

15. Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results

may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

RISKS RELATING TO THE RIGHTS ISSUE

16. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of Investor's shareholding.

The Rights Entitlements that are not exercised prior to the end of the Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in the Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of the Company that may be caused as a result of the Rights Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Rights Issue with respect to such Rights Entitlements. For details, see "Terms of the Issue" on page 82.

17. There is no guarantee that the Rights Equity Shares issued pursuant to this Rights Issue will be listed on the Stock Exchange in a timely manner.

In accordance with Indian law and regulations and the requirements of the Stock Exchange, in principle and final approvals for listing and trading of the Rights Equity Shares issued pursuant to this Rights Issue will not be applied for or granted until after the Rights Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuance of Rights Equity Shares to be submitted. Accordingly, there could be a failure or delay in listing the Rights Equity Shares on the Stock Exchange. If there is a delay in obtaining such approvals, we may not be able to credit the Rights Equity Shares allotted to the Investors to their depository participant accounts or assure ownership of such Rights Equity Shares by the Investors in any manner promptly after the Closing Date. In any such an event, the ownership of the Investors over Rights Equity Shares allotted to them and their ability to dispose of any such Equity Shares may be restricted. For further information on issue procedure, see "Terms of the Issue" beginning on page 82.

18. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

19. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless the Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

20. *No market for the Rights Entitlements may develop and the price of the Rights Entitlements may be volatile.*

No assurance can be given that an active trading market for the Rights Entitlements will develop on the Stock Exchanges during the Renunciation Period or that there will be sufficient liquidity in Rights Entitlements trading during this period. The trading price of the Rights Entitlements will not only depend on supply and demand for the Rights Entitlements, which may be affected by factors unrelated to the trading in the Equity Shares, but also on the quoted price of the Equity Shares, amongst others. Factors affecting the volatility of the price of the Equity Shares, as described herein, may magnify the volatility of the trading price of the Rights Entitlements, and a decline in the price of the Equity Shares will have an adverse impact on the trading price of the Rights Entitlements. Since the trading of the Equity Shares will be on a separate segment compared to the Equity Shares on the floor of the Stock Exchanges, the trading of Equity Shares may not track the trading of Equity Shares. The trading price of the Rights Entitlements may be subject to greater price fluctuations than that of the Equity Shares.

21. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely affect the trading price of our Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the requirements specified by the RBI. If the transfer of shares is not in compliance with such requirements or falls under any of the specified exceptions, then prior approval of the RBI will be required. In addition, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection or tax clearance certificate from the income tax authority. Additionally, the Indian government may impose foreign exchange restrictions in certain emergency situations, including situations where there are sudden fluctuations in interest rates or exchange rates, where the Indian government experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the Indian government's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

22. *Any future issuance of Equity Shares by us or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares.*

Any future issuance of our Equity Shares by us could dilute your shareholding. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may also adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. We cannot assure you that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber their Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

23. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

EXTERNAL RISKS

24. *Our business is affected by prevailing economic, political and other prevailing conditions in India and the markets we currently service.*

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are dependent on prevailing economic conditions in India and our results of operations are affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our developments and expansions;
- adverse geo-political conditions, political instability, terrorism or military conflict in India or in countries in the region or globally, including with India's neighbouring countries;
- changes in India's tax, trade, fiscal or monetary policies;

- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- infectious disease outbreaks, epidemics, pandemics or other serious public health concerns;
- prevailing regional or global economic conditions, including in India's principal export markets; and
- other significant regulatory or economic developments in or affecting India or its financial services sectors.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares. Our performance and the growth of our business depend on the performance of the Indian economy and the economies of the regional markets we currently serve. These economies could be adversely affected by various factors, such as political and regulatory changes including adverse changes in liberalization policies, social disturbances, religious or communal tensions, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any slowdown in these economies could adversely affect the ability of our customers to afford our services, which in turn would adversely impact our business and financial performance and the price of the Equity Shares. In addition, the Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly those of emerging market countries in Asia. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries.

25. It may not be possible for you to enforce any judgment obtained outside India against us, our management or any of our respective affiliates in India, except by way of a suit in India on such judgment.

We are incorporated under the laws of India and our Directors and executive officers reside in India. A substantial majority of our assets, and the assets of our Directors and officers, are also located in India. As a result, you may be unable to: i) effect service of process outside of India upon us and our Directors and officers; or ii) enforce in courts outside of India judgments obtained in such courts against us and our Directors and officers.

26. A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

27. Companies operating in India are subject to a variety of central and state government taxes and surcharges.

Tax and other levies imposed by the central and state governments in India that affect our tax liability include income tax and indirect taxes on goods and services such as goods and services tax ("GST"), surcharge and cess currently being collected by the central and state governments, which are introduced on a temporary or permanent basis from time to time. The central or state government may vary the corporate income tax in the future which may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could materially and adversely affect our business, financial condition and results of operations. GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services and has increased administrative compliance for companies, which is a consequence of increased registration and form filing requirements. As the taxation system is relatively new and could be subject to further amendments in the short term for the purposes of streamlining compliance, the consequential effects on us cannot be determined as of now and there can be no assurance that such effects would not adversely affect our business and future financial performance.

SECTION VI: ABOUT THE COMPANY

INDUSTRY OVERVIEW

The information in this section has been extracted from various websites and publicly available documents from various industry sources. The data may have been re-classified by us for the purpose of presentation. Neither we nor any other person connected with the issue has independently verified the information provided in this section. Industry sources and publications, referred to in this section, generally state that the information contained therein has been obtained from sources generally believed to be reliable but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured, and, accordingly, investment decisions should not be based on such information.

INDIAN ECONOMY

The Indian economy has fully recovered to the pre-pandemic real GDP level of 2019-20, according to the provisional estimates of GDP released on May 31, 2022. Real GDP growth in FY 2021-22 stands at 8.7%, which is 1.5% higher than the real GDP in FY 2019-20. These figures are associated with stronger growth momentum, indicating increased economic demand. The investment rate in the fourth quarter increased to its highest level in the previous nine quarters. Moreover, capacity utilisation in the manufacturing sector rose in the fourth quarter, as against the third quarter, implying a build-up in demand, which is consistent with the growth objectives of the Indian economy.

Future capital spending of the government in the Indian economy is expected to be supported by factors such as tax buoyancy, streamlined tax system, thorough assessment and rationalisation of the tariff structure and digitisation of tax filing. In the medium term, an increase in capital spending on infrastructure and asset-building projects is set to increase growth multipliers. Furthermore, revival in monsoon and Kharif sowing helped the agriculture sector gain momentum. As of July 11, 2022, the South-West monsoon has covered the entire country, resulting in 7% higher rainfall than the normal level.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

- India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.
- According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.
- Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also launching growth-oriented policies to boost the economy. In view of this, the country witnessed many developments in the recent past, some of which are mentioned below.

- As of July 15, 2022, India's foreign exchange reserves reached US\$ 572.71 billion.
- Private equity-venture capital (PE-VC) sector investments stood at US\$ 34.1 billion, up 28% YoY, across 711 deals through January-June 2022.
- India's merchandise exports stood at US\$ 676.2 billion in FY22. In June 2022, India's merchandise exports stood at US\$ 37.9 billion, recording the highest ever exports in June 2022.
- PMI Services was at 58.9 in May 2022 compared to 57.9 in April 2022.
- In June 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 1.44 trillion (US\$ 18.1 billion).
- According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDI equity inflow in India stood at US\$ 588.53 billion between April 2000-March 2022.

- In May 2022, the Index of Industrial Production (IIP) stood at 137.7 driven by mining, manufacturing and electricity sectors.
- Consumer Price Index (CPI) inflation stood at 7.01% in June 2022 compared to 7.04% in May 2022.
- In July 2022 (until 21 July 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 228,862 crore (US\$ 28.65 billion)
- Wheat procurement in Rabi 2021-22 and anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

The sudden hit of COVID 19 pandemic impacted countries and economies all around the world. The pandemic induced lockdown resulted in an accumulation of a lot of projects which impacted their on-time completion and cost as well. Although, now businesses have devised new ways of working amidst the pandemic. The government is also working swiftly to turn the looming economy around by introducing initiatives and announcements for infrastructure and MSME sector. According to Government reports, with an average speed of 29.81 km per day, the construction of national highways during 2020-2021 was the highest ever in the last five years despite the Covid-19 crisis and months of lockdown. The total length of National Highway construction up to February 5, 2021 was 9,242 km.

Adding to the ongoing flow of roads and highways projects, this year's budget focused immensely on strengthening the infrastructure sector. The government's effort towards further enhancing the roads and highways projects to 7,400 new projects is a welcome step which will ensure a better year for the infrastructure sector as well as for the construction equipment industry. The multitude of announcements on the highway projects in Tamil Nadu, Kerala, West Bengal and Assam will further give a much-needed boost to the sector. The Minister of Road Transport and Highways Nitin Gadkari has also set the target for 2026 and planned to expand around 60,000 km of National Highways (NHs) in the next five years. Additionally, Ind-Ra and ICRA has revised its outlook on the construction equipment sector to 'Stable' from 'Negative' following a strong ramp up in volumes. The Off-Highway Research predicts that the availability of the Covid vaccine is expected to push the recovery rate further in 2021. Sales of road construction equipment will increase by 25 per cent to 76,375 units in 2021 and a further 16 per cent to 88,700 units in 2022. The construction market is forecast to touch 100,300 units in 2023 with a growth of 13 per cent. Another factor that will add to the growth of the road equipment industry in 2021 is technology. Technological elements like Virtual

Reality, AI security and BIM are making a major impact on construction equipment productivity and efficiency. It has become necessary for every construction equipment manufacturer to equip their machines with the latest and advanced technology to make the workflow easy and resourceful. According to McKinsey, the use of innovative technologies is bolstering the construction industry with advancements such as pulsed radar object detection, drones, radio frequency identification (RFID), prefabrication, smart wearables, 3D printing, immersive solutions (VR/AR, Internet of Things (IoT) and smart materials. By harnessing industry 4.0 tools like IoT, AI and automation, processes will see 30 to 50% reduction in machine downtime; 15 – 30% improvement in labor productivity; 10 to 30% increase in throughput; and 10 to 20% decrease in the cost of quality. These advantages are important as full-scale digitization in construction could result in annual savings of between \$700 trillion and \$1.2 trillion. With the government focusing on construction and infrastructure activities we're confident that this year will be great for the CE segment. Keeping all the above initiatives in mind, the outlook for construction and infrastructure seems positive and all these efforts will play an important role in reviving the sector and bringing back the economy to normalcy.

OVERVIEW

We are a Highway Operations & Maintenance (O&M) Service providing company. We thrive to make Highway Operations & Maintenance cost effective and easier with the help of Innovation, Technology & out-of-the-box solutions. Our vast experience of 19 years in offering superior services in the Highway Operations & Maintenance (O&M) have earned us name in the (O&M) domain. Our principal business operations are broadly divided into three categories:

- i) Highway Operations under which we provide services like Toll operations, Route Patrolling and Incident management;
- ii) Highway Maintenance under which we provide services like Routine Maintenance, Preventive Maintenance and Major Maintenance & Repairs (MMR);
- iii) Specialized Maintenance Services under which we provide services which enhance the life and quality of road, these are Microsurfacing (MS), Base / Sub base Stabilization (FDR) and Cold In Place Recycling (CIPR).

India is a developing country & numerous new highways & express ways are the need of the hour for efficient and fast movement of material & people. Due to liberalization & reforms taken up in the year 1991, the Indian Economy has opened up & this has led to global players coming in India. As a result of this, a need for better & faster movement of goods & people was desired & this necessitated improvement in the infrastructure facilities available in India. The infrastructure development could not have been complete without development of the Highways & Expressways which are the need of the hour. Such development also requires huge funding & therefore a new concept known as PPP (Public Private Partnership) was introduced by Govt. of India. In this concept, the road development was awarded to private participants on BOT (Build Operate & Transfer) basis who are required to put in the financial funds. The concessioner had to invest and make the road at his own cost and then recover his money by collection of Toll from the commuters for certain period of time. He was also supposed to maintain the facility developed. The private players, Indian as well as global, who were in such business grabbed this opportunity & developed the highways & the express ways across the country. And obviously for recovery of their investment they were required the set up the facility for toll collection of toll from the commuters as well as maintenance of the infrastructure developed. However, since Highway operation and maintenance being a very tedious and required certain special skill sets as organization. The private players/developers whose core activity was development did not want to diversify from their core business. This sought the option of outsourcing the operation & maintenance.

This being a new sector, there were not many players having requisite knowledge & expertise to run such outsource operation.

Our company who was in the business of road marking envisaged this opportunity & ventured in this business activity, Operation and maintenance of these infrastructure projects in 2009. As the same time because of its wear & tear nature of the highways, maintenance of the infrastructure developed also become mandatory. The periodic maintenance of these projects itself became one of the major activities for the various contractors.

As the time passing and maintenance of these projects becoming due and our company envisage another opportunity and decided to go in for offering complete array of maintenance services. Over the last few years, we have not only achieved huge credibility based on performance in the market but is also one of the well-known O & M operators in the country and today are one of the trusted service providers in the Highway O&M sector operating pan India basis under the Markolines Umbrella.

To keep up with trend to work with innovative and new technology, Markoline decided to go for the specialized road surfacing treatment called as Micro surfacing. This being a relatively new and cost-effective technology there is a huge potential for this business too. With the Markoline commitment, in a short span of few years of starting the operation. Our company has completed 6.6 Million SQM of Micro-surfacing. Keeping up to the track record Markoline ventured into Cold In Place Recycling (CIPR) and Base / Sub base Stabilization (FDR) and has achieved experience which is unique and unmatched in India.

Subsequent to the completion of various BOT projects where the highway infrastructure was ready which needed to be re-strengthened and maintained. Realizing the potential for Monetization, Government of India came up with new model Toll Operate & Transfer (TOT), wherein the about 5/10 projects were put in the Bundle and offered for Re-strengthen and maintenance for a long period of 15/30 years.

Due to the huge requirement of Funds, Long tenure and better returns many FDI's/FI's ventured in this business. For all such institutions, this not being the core business outsourcing of O&M was obvious and that brings in huge potential of 1000s of

crores of business for this sector of O&M. Being very few service providers in this sector and Markolines with high credentials and one of the preferred vendors is at an advantageous position to en-cash and clock huge growth in coming years.

Our company was incorporated on November 08, 2002 and since our inception we have gradually increased our execution capabilities in terms of the size and Number of projects that we have executed. We started our business operation with a single product that was thermoplastic road marking and over the years we have transformed into a well-known Highway Operations & Maintenance (O&M) service provider in India. In over a decade and a half, we have transitioned from a single product company to a multi-product company and aspire to be an Indian Multinational Company (MNC) in Highway Operations & Maintenance (O&M). We have, since 2002, executed over 110+ Highway Operations & Maintenance (O&M) projects. As on the date of this draft letter of offer, we have completed projects of Major Maintenance & Repairs of around 1730 km and around 45.00 km of National Highways Projects are ongoing in the state of West Bengal, Maharashtra, Uttar Pradesh, Madhya Pradesh, and Rajasthan. We have completed projects for Toll Operations, Routine Maintenance, and Route Patrolling services, managing around 993km and around 1252.24 km of National Highways Projects ongoing in the state of Rajasthan, Uttar Pradesh, Maharashtra, Jharkhand, Bihar, Tamil Nadu, West Bengal, and Andhra Pradesh, Haryana, Telangana.

In the year 2019, we have also received and order for Laying, joining & Commissioning of DI K-9/DI K-7 Class Pipe for Raw/ Clear Water pumping feeder. 1. MICROSURFACING: Microsurfacing is a cost-effective surface treatment for preservation and extension of life of roads. With ample technical knowledge, Markolines has ventured into Microsurfacing to execute turn-key jobs and ensure smooth journeys across India. It is an eco-friendly surface treatment used to restore and preserve the surface characteristics of the road. It is a mix of polymer modified asphalt emulsion, graded aggregate, cement, water and additives. When applied in a semi-liquid condition with specialised paving equipment, it changes chemically and sets quickly. As a result, it gives a uniform coat of cold mix dense material that allows lesser downtime, resuming traffic within two hours of laying. It is called Green Technology for infrastructure projects. By using glass fibers in Microsurfacing, we have introduced the next generation known as Microsurfacing with Suspended Fiber Technology (MS - SFT) for the first time in India. Moreover, as a step ahead Markolines has set up an exclusive Technology Centre to offer latest techniques in Microsurfacing. The Technology Centre supports the field staff for the precise technical needs of a project considering the vital aspects like condition of road, resources available & environment and delivers solutions tailor-made for it – making us the #1 in Microsurfacing in India.

Thousands of new road kilometres are needed and will be built over the next years to expand the network of traffic arteries in the booming economy. This requires fast-paced, reliable and economical construction processes. At the same time for the existing roads, the sub-base of roads exposed to major stresses due to heavy goods traffic is often damaged. To remedy this damage, the complete road structure must be repaired. Cold-In-Place-Recycling (CIPR) and Soil stabilization is the best solution and meet both these requirements. It has become a standard construction method on large-scale construction projects around the world. As part of pavement rehabilitation services, we undertake Cold-in-Place Recycling (CIPR)

2. COLD-IN-PLACE RECYCLING: CIPR involves removing and reusing the existing asphalt surface. It involves grinding off the top layer (up to 200mm) of the existing asphalt surface and mixing the crushed asphalt with foamed bitumen and placing it back down with a recycler and allied machinery. Our team of experts can undertake this complex and specialized activity. As described in the ARRA (Asphalt Recycling and reclaiming Association) Basic Asphalt Recycling Manual, CIR “consists of recycling asphalt pavement without the application of heat during the recycling process to produce a rehabilitated pavement. The cold-in-place process is typically performed using a “train” of equipment, which includes a water tanker, bitumen tanker, recycler, graders and rollers. We own the complete set of machinery used in the Cold-in-Place Recycling (CIPR) process. CIPR can correct deep asphalt defects such as rutting, fatigue (alligator) cracking, and utility cuts that cannot be addressed by a surface treatment or an overlay, and allows minor corrections to the profile of a road surface, reduces reflective cracking, and results in a minor inconvenience to traffic.

Advantages of Cold-In-Place Recycling:

- CIPR overlay lasts 10-15 years as compared to 5-8 years of traditional overlay (Subject to traffic and overloading)
- Shorter construction period, due to high production capacity of recycling machines
- Cost effective due to reuse as well as on site execution.
- Conserves raw materials and natural Resources.
- Conserves energy
- Reduces greenhouse gas emissions
- Work is performed with minimal traffic disruption

3. SOIL STABILIZATION converts ground of insufficient bearing capacity into soil that is highly suitable for construction of roads, airports, ports, and factories. This improves the bearing capacity, Volume stability and the Resistance to water of the existing ground, which later forms the backbone of the new base strengthening the road pavements.

Lime Treatment reduces the soil moisture content (Drying). It reduces the plasticity of soil by aiding the compaction (Modification) and increasing early strength (Modification). It also increases the long-term strength of soil by reducing its swell potential (Stabilization). The permeability of cement-stabilized material is greatly reduced. The result is a moisture-resistant material that is highly durable and resistant to leaching over the long term. Cement-soil Stabilization is another technique, Where Portland cement can be used to stabilize and strengthen certain type of soils.

Advantages of Soil Stabilization:

- Higher resistance (R) values
- Reduction in plasticity
- Lower permeability
- Reduction of pavement thickness
- Elimination of excavation, exporting unsuitable material and importing new materials Aids compaction

"Annexure B" to the Independent Auditor's Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of M/s. **MARKOLINES PAVEMENT TECHNOLOGIES LIMITED** ("the Company") as of March 31, 2022 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI).

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“FDI Circular 2020”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid in order to make any investment in the Issue.

Our Company will not be responsible for any allotments made by relying on such approvals. Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“OCBs”) have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as a incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.
