In the event any of the lessors decide to terminate the arrangement, we may suffer a disruption in our operations. Also, in the event, we are required to vacate the premises, we will have to seek a new premises at short notice and for a price that may be much higher than what we are currently paying. This may affect our ability to conduct our business and may lead to an increase in our operating costs.

9. *Our Project has not been appraised by any Bank or Financial Institution. Any significant deviation in the project cost could adversely impact our operations and sustainability in absence of any independent monitoring agency.*

We have estimated fund raising upto ₹ 15000 Lacs to finance the 'Objects of the Issue'. The proposed project for which the funds are being raised has not been appraised by any Bank or Financial Institution and the fund requirements are based primarily on Management estimates. There is no guarantee that our estimates will prove to be accurate and any significant deviation in the project

cost could adversely impact our operations and sustainability in the absence of any independent monitoring agency.

10. We are dependent on the performance of the automotive sector in India, particularly the market for four-wheelers. Currently around 88% of our revenue comes from the Automotive Industry. Any adverse changes in the conditions affecting these markets can impact our business, results of operations and financial condition.

Presently, majority of our products are supplied to the Tier 1 of the OEMs in the automotive industry which increases our dependency on the automotive industry in India, particularly the four-wheeler market. During the current year we have embarked on enhancing our presence in non-auto sector. We have made considerable progress by supplying our products to the consumer appliances industry viz ; front loading washing machines, air conditioners, LED & CFL lightings. However, about 88% of sales for the FY 2016 was to the Automotive industry.

Hence, in the event of a decrease in demand for four-wheelers, or any developments that make the sale of components in the four-wheeler market less economically beneficial, we may experience more pronounced effects on our business, results of operations and financial condition.

11. We have in past entered into related party transactions and may continue to do so in future.

We have, in the course of our business, entered into transactions with related parties including entities forming part of our Promoter and group companies. There can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties.

Such related party transactions may give rise to potential conflicts of interest with respect to dealings between us and the related parties. Furthermore, it is likely that we will continue to enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

For details of related party transactions entered into by us please see “Auditor’s Report” on page 68 of this Draft Letter of Offer.

12. Our promoter and promoter group have promoted ventures that are permitted to carry similar line of business. Any future plans of these companies to enter into the similar line of business may result in conflict of interest.

Our promoter, Kingfa China and all its subsidiaries forming part of our promoter group are in the similar line of business of modified plastics of various Polymers viz, Poly strene, Poly carbonate, ABS, Nylon, PVC etc. Though our company today is predominantly into Polypropylene products and the other companies operate in China, we cannot assure you that they may not enter into India for manufacturing of similar products which may result in direct competition and impact our market share. It may also lead to potential conflict of interest which may affect the business operations and financials of our Company. However, neither our Promoter nor its subsidiaries presently have any intent to directly access Indian markets, since the same is being catered through our company. Further there are no non-compete agreements that have been entered into between our company and our promoter or its subsidiaries and there can be no assurances that our promoter or its subsidiaries will not compete with us in the future.

13. Some of our group companies (subsidiaries of Kingfa China) have made losses in last three financial years

Some of our group companies (subsidiaries of Kingfa China) have made net losses during last three financial years. The details of such loss making group companies are as under:

14. We have not yet placed orders for most of the plant & machinery and equipment requirements for our proposed project; as specified in the Objects of the Issue. Any delay in procurement of plant & machinery, equipment, etc. may delay the implementation schedule which may also lead to increase in prices of these equipments, further affecting our costs, revenue and profitability.

We propose to purchase plant & machinery worth ₹ 2937.10 Lacs from the proceeds of this Issue. Though we have procured quotations for them, we are yet to place orders for the plant & machinery; as specified in the section 'Objects of the Issue'. Any delay in procurement of plant & machinery, equipment, etc may delay the implementation schedule. We may also be subject to risks on account of inflation in the price of plant & machinery and other equipments that we require. Hence our project could face time and cost over-run which could have an adverse effect on the operations of our Company. Further, our working capital requirements based on proposed expansion have not tied-up. We shall approach the banks for future working capital requirements at an appropriate time after the expansion has been completed.

- 15. *We are dependent on our management team for success whose loss could seriously impair our ability to continue to manage and expand business efficiently. The loss of service of the senior management could impair the ability to continue to manage and expand the business efficiently.***

Our success depends on our ability to retain our senior executives and key management personnel. Our continued success will depend on our ability to attract, recruit and retain a large group of experienced professionals and staff. If any senior executives or key employees were to leave, they may not be easily and quickly replaced. Furthermore, we do not maintain “key person” insurance with respect to any of our personnel. Certain members of our key personnel are, and we expect will continue to be, employed by other Group Companies and there can be no assurance that they will continue to devote a sufficient amount of their time to us and our business. In addition, certain members of our key personnel have joined us, or have been transferred to us from other Group Companies, in the recent past and so have been associated with our Company only for a brief period. Any of the foregoing could have a material adverse effect on our business, financial condition and results of operations.

- 16. *Our manufacturing activities are dependent upon availability of skilled labour. Further, in respect of our plant located at Gurgaon, we rely on contract labor for our manufacturing.***

Our manufacturing activities are dependent on availability of skilled labor. Non-availability of labor and/or any disputes between the labor and the management may affect our business operations. We have 23 skilled workers at our Gurgaon facilities and none of them are on our permanent payrolls. In case we are not able to retain these workers the production at our factory may suffer until we find new skilled workers and train them as per our requirement.

- 17. *Our Promoter and Promoter Group shall continue to exercise significant control over our business which will allow them to determine the outcome of certain matters.***

Our Promoters viz; M/s Kingfa Sci and Tech Co. Ltd. holds 74.99% of our equity share capital. As a result, they are able to exercise significant control over the matters requiring shareholder approval, including significant corporate structuring exercises such as mergers or demergers, sale of assets, etc. Further, our promoters may take decision which may be in conflict of interest or detrimental to minority shareholders.

- 18. *We are dependent on our promoter Kingfa Sci. &Tech. Co. Ltd., (Kingfa China) with respect of supplies, sales, technology, brand and Key Managerial Personnel (KMP).***

Our promoter Kingfa China has a strong presence in polymers, automotive and non automotive sectors. Though our company has been in operation for more than 25 years in India, with increased competition in the field emanating from the Automotive sector and the strong presence of Kingfa China in other Polymers and other non auto sectors there will be dependency on Kingfa China for the developments of these compounds and also technical skills to develop and produce those compounds in India. Further we shall also be dependent on the key managerial personnel of our promoter who are presently with our company since these KMP act as the key link between our company and the Kingfa China development team. However we believe that our company being a subsidiary of Kingfa China, support will continue in future.

- 19. *We source certain raw materials from our promoter/promoter group***

We source certain raw materials from our promoter /promoter group (related parties), in the course of our business. While our Company believes that all such transactions have been conducted on an arm's length basis and are accounted as per Accounting Standard 18, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

20. *In the past we have faced shut down at our plant at Puduchery. The loss resulting from shutdown of operations at any of our units could have an adverse effect on our Company*

Our units are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents. In the year 2002 our plant situated at Puducherry was closed due to technical reasons for two months leading to labour dispute. Further we cannot assure that such labour disputes leading to closure will not occur in future. Though we take precautions to minimise the risk of any significant operational problems at our units they could have adverse effect on our financial performance.

21. *Our insurance coverage may not adequately protect us against certain operating hazards and this may have a material adverse effect on our business.*

Operating and managing a business involves many risks that may adversely affect our Company's operations, and the availability of insurance is therefore important to our operations. Our Company believes that our insurance coverage is generally consistent with industry practice. However, to the extent that any uninsured risks materialize or if it fails to effectively cover it for any risks, we could be exposed to substantial costs and losses that would adversely affect financial condition. In addition, our Company cannot be certain that the coverage will be available in sufficient amounts to cover one or more large claims, or that our insurers will not disclaim coverage as to any claims. A successful assertion of one or more large claims against our Company that exceeds our available insurance coverage or that leads to adverse changes in our insurance policies, including premium increases or the imposition of a large deductible or coinsurance requirement, could adversely affect our financial condition and results of operations. Our Company has however, not availed key man insurance policies

22. *Our Primary raw material viz; Polymer resin is a petroleum based product leading to higher susceptibility to price fluctuations in future. Price volatility of raw materials used for manufacturing our products may materially affect our business*

The main raw material for our product is Polymer resin which is a petro chemical based and hence the prices are linked with international crude oil prices. Any volatile fluctuations in the demand and/or supply of any and/or all such raw materials may impact the purchase price of the raw materials. The price of the raw material is directly proportionate to the price of petroleum/ crude oil. Crude oil prices behave much as any other commodity with price swings in times of shortage or oversupply. The crude oil price cycle may extend over several years responding to changes in demand as well as OPEC and non-OPEC supply.

23. *Any failure to keep abreast with the latest trends in technology may adversely affect our cost competitiveness and ability to develop new products.*

Technology by its very nature is dynamic and our Company being technological oriented would always be trying to keep abreast with the technological environment. There are no major changes in the materials used for our business and all upgradation in processing machinery. Government pricing regulations on petroleum products from time to time may also impact the use of certain raw materials in preparation of polymer products. Any failure to keep abreast with these developments on our part could have a bearing on our ability to compete efficiently, our cost competitiveness, ability to develop new products and the consequential quality of our products, and could also impact our sales & profitability.

24. *Any failure to keep our self updated on the latest developments in the industries to which we cater to may adversely affect our cost competitiveness and ability to develop new products.*

Presently, majority of our products are supplied to the Tier 1 of the OEMs in the automotive industry and hence around 88% of our revenue comes from the Automotive industry. The demand of products in the automotive industry includes cyclical nature of demand for the products which depends on the ability of the consumer to spend. The spending ability of the consumers are dependent on the

continued growth in the Indian economy, adequate allocation of Government funds for development of infrastructure including roads and highways “Global” design concepts being used in the new models proposed to be launched by the car and commercial vehicle companies, continued positive climate for foreign investment into the economy etc.

Hence, there is a need for continuous process and product up-gradation, based on the market demand. Further we need to anticipate the demand of any particular product and be equipped to fulfill the same as and when it arrives in order to enable us to face the competition. Hence, if we fail to keep our selves updated on the latest developments in the industries we may not be able to cash the opportunity, which may affect our financials and competitiveness.

25. Foreign currency volatility may impact our financial condition

Some of our raw materials like Polyamide 6 & PBTP, Glass Fibre and Elastomers are imported by us from countries like China, Malasia, Singapore, etc. Any volatility in global financial markets may have an impact on our business, as we have to make payments in foreign exchange for our imports. In the event we are unable to manage the fluctuation in the foreign exchange, it may negatively impact on our financial condition.

RISKS ASSOCIATED WITH INDIA AND INVESTMENTS IN INDIAN COMPANIES

26. Our business is substantially affected by prevailing economic conditions in India.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal Stock Exchanges;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries;
- prevailing regional or global economic conditions, including in India’s principal export markets; and
- other significant regulatory or economic developments in or affecting India or its forging industry.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business and financial performance and the price of the Equity Shares.

27. Any downgrading of India’s sovereign debt rating or a decline in India’s foreign exchange reserves may adversely affect our ability to raise debt financing.

Any adverse revisions by international rating agencies to the credit ratings of the Indian national government’s sovereign domestic and international debt may adversely affect our ability to raise additional financing by resulting in a change in the interest rates and other commercial terms at which we may obtain additional financing. This could have a material adverse effect on our capital expenditure plans, business and financial performance. A downgrading of the Indian national government’s debt rating may occur, for example, upon a change of government tax or fiscal policy outside our control.

28. *A significant change in the Government of India's economic liberalization and deregulation policies could disrupt our business and cause the price of the Equity Shares to decline.*

Our assets and customers are located in India. The government of India has traditionally exercised and continues to exercise a dominant influence over many aspects of the economy. Its economic policies have had and could continue to have a significant effect on private sector entities, including us, and on market conditions and prices of Indian securities, including the Equity Shares. Any significant change in the government's policies could adversely affect business and economic conditions in India and could also adversely affect our business, our financial performance and the price of the Equity Shares.

RISKS ASSOCIATED WITH THE EQUITY SHARES AND THIS ISSUE

29. *There have been fluctuations in the price of the equity shares on the stock exchanges.*

There have been fluctuations in the price of the equity shares of our company on the stock exchange. The volatility in the shares is as a result of various factors including, among other things, volatility in the Indian and global securities markets, the results of our operations and performance, the performance of our competitors, developments in the industry in which we operate and changing perceptions in the market about participation in these sectors, changes in the estimates of our performance or recommendations by financial analysts. There can be no assurance for either liquidity in the shares of our company or for any price at which the equity shares would be traded on the stock exchange.

30. *Future issues or sales of Equity Shares by our Company may significantly affect the trading price of the Equity Shares.*

Future issue of Equity Shares or disposal of Equity Shares by any of our major Equity Shareholders or the perception that such issues or sale may occur may significantly affect the trading price of the Equity Shares. There is no restriction on our ability to issue Equity Shares or the relevant Equity Shareholders' ability to dispose of their Equity Shares, and there can be no assurance that we will not issue Equity Shares or that any such Equity Shareholder will not dispose of, encumber, or pledge, its Equity Shares.

31. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect your ability to sell, or the price at which you can sell, Equity Shares at a particular point in time.*

We are subject to a daily "circuit breaker" imposed by all Stock Exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian Stock Exchanges. The percentage limit on our circuit breakers is set by the Stock Exchanges based on the historical volatility in the price and trading volume of our Equity Shares.

The Stock Exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

2. UPGRADATION OF RESEARCH & DEVELOPMENT FACILITY AT THE EXISTING PLANT AT PUDUCHERRY

Presently the manufacturers in the Indian thermoplastics compounding Industry are facing challenges due to presence of many small & medium players. In order to differentiate oneself from the competition and offer innovative products at a competitive pricing, we will be required to invest in developing R&D facility to bring about enhancement in the properties of existing products and also develop new products.

We manufacture specific products for customer/ industry specific application and speciality compounds. The demand for such customised products is expected to increase in the near future due to increased demand of features, safety and performance with respect to efficiency in automobiles, consumer goods, electric & electronic goods. This requires new test facilities and work in developing speciality compounds. The existing facility and R&D needs to be expanded to meet the revised and increased performance demands.

As the products manufactured in India are expected to be of global standards, customers are demanding, material behaviour over long term, new environmental regulations (ROHS, REACH, Blue Angel, etc.) and also certain subjective properties like touch/feel/odour. New equipments are required to be added in the R&D department to test and validate new formulations.

We propose to develop new products which will have:

- Grades for component weight reduction.
- Improved scratch resistance (Better quality of plastics used in car interiors).
- Grades with low level of Volatile Organic Compound VOC and odour to improve air quality in vehicle.
- Better part appearance for customer appeal.
- Elimination of paint to protect the environment.
- Replacement of metal with plastics to reduce the weight and number of operations.

These grades would help the company to promote new concepts and thereby develop new applications/new markets. These new grades would bring better realisation with increased margins and also expand our application base.

For the said R & D facility we propose to utilise ₹ 956.00 lacs out of the proceeds of the proposed rights issue. The equipments to be installed have been sourced through various suppliers and includes imported machineries. No second hand equipments have been purchased or is proposed to be purchased through the proceeds of the issue

Process Flow

Raw Materials

Major raw materials required for manufacturing the compounds are Polymer resin, fillers like talc, glass fibre, chalk besides additives, elastomers, oxidizing agents besides pigments required to meet the desired colour specifications. The proportion of the various raw materials would depend on the final compound which in turn depends on the application which is proposed to be used.

Stage 1: Charging of raw materials

The above said raw materials are suitably blended in high speed mixers and charged in the silos. We would have a provision for 4 silos for each of the extruding machines. The material is fed into the compounding machine by the gravity force from the silos and the rate of flow of the materials are controlled through loss-in-weight feeders which are electronically set up.

Stage 2: Compounding Process

Compounding is a process of melt blending plastics with other additives. This process changes the physical, thermal, electrical or aesthetic characteristics of the thermoplastic. The final product is called a compound or composite. Compounding starts with a base resin or polymer. Depending on the performance requirement and the economics the right base resin is selected that would best fit the final application requirements.

By incorporating an extensive range of additives, fillers, and reinforcements, a wide range of properties can be achieved such as:

1. Uniform shrinkage for critical dimensionally stable moldings
2. High Gloss and Color for application requiring high aesthetics
3. Higher Strength with reinforcements for structural and load bearing applications
4. Thermal stability for applications requiring continuous exposure to heat
5. Modification to enhance molding of thin walled parts having the required strength and part integrity
6. Flame retardant and low smoke density for electrical and safety requirements
7. Lower friction for moving parts

Based on the end use requirements a wide range of additives and modifiers are used and compounded with base resin. The technology is the formulation that gives the desired effects and performance and the manufacturing of the same by using the right compounding and feeding techniques. The compounded resin is validated for different properties to ensure that it finally meets the customers processing and performance requirements.

The raw materials are fed into the compounding extruder machines. The extruders are powered by a DC motor and they have 3 – 4 temperature zones in them with temperature ranging from 150°C to 230°C. The material, on passing into the extruders, the Polymer melts and mixes with the various fillers, additives, pigments materials by the shearing action of the conveying screw in the extruder. The conveying screw subsequently pushes the material outside and thereby ensures homogenized mixing of the materials. The molten mix that comes out of the extruder is led through a multihole die. This then transforms into the strands. The strands are taken through a water bath for cooling and they are passed through a pelletiser on line where the strands are cut into pellets. To enable this process smoothly, the speed of the pelletiser is set to match the output from the extruder machine. There are electric heaters fitted in the machine to generate the required heat for the process and there are cooling systems also to cool the material if the temperature goes beyond the set points. Both the heating and cooling are controlled through temperature controllers. Since the heating is using electrical power, it is pollution free – No smoke etc.

Although we currently supply to various industry segments, about 88% of our revenue comes from the Automotive industry.

Going forward, we want to focus on increasing our exposure and revenue contribution from industries other than the Automotive industry. Our focus would be directed towards segments which are poised to grow at higher rates. LED lightings, appliances (front loading washing machines), air conditioners, water heaters, electronic chargers, telecom are a few industry segments where we have started making progress already. With wider industry reach and exposure we would be able to mitigate any risk associated with dependency on single industry segment.

KEY INDUSTRY REGULATIONS

The following description is a summary of the relevant regulations and policies as prescribed by the GoI and other regulatory bodies that are applicable to the manufacturing business. The information detailed below has been obtained from various legislations, including rules and regulations promulgated by regulatory bodies, and the bye laws of the respective local authorities that are available in the public domain. The regulations set out below may not be exhaustive and are merely intended to provide general information to the shareholders and neither designed, nor intended to substitute for professional legal advice. For details of government approvals obtained by us, see the section titled “Government and Other Approvals” on page 101 of this Draft Letter of Offer.

Approvals from Local Authorities

Setting up of a factory or manufacturing / housing unit entails the requisite planning approvals to be obtained from the relevant Local Panchayat(s) outside the city limits and appropriate Metropolitan Development Authority within the city limits. Consents are also required from the state pollution control board(s), the relevant state electricity board(s), the state excise authorities, sales tax, among others, are required to be obtained before commencing the building of a factory or the start of manufacturing operations.

Shops and Establishments Legislations

The provisions of various shops and establishments legislations, applicable in the states in which the establishments are set up, regulate the work and employment of the workers employed in shops and establishments, including commercial establishments, and provide for fixation of working hours, rest intervals, overtime, holidays, leave, termination of service, maintenance of shops and establishments, and other rights and obligations of the employers and employees.

Foreign Investment Regulations

The new industrial policy was formulated in 1991 to implement the Government's 57 authorized 57 ion programme and consequent industrial policy reforms relaxed the industrial licensing requirements and restrictions on foreign investment.

Foreign investment in India is governed primarily by the provisions of the FEMA and the rules, regulations and notifications thereunder, read with the presently applicable Consolidated FDI Policy (effective from April 1, 2011 to September 30, 2011) as issued by the Department of Industrial Policy and Promotion, (“DIPP”).

The RBI, in exercise of its powers under the FEMA, has notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2000, as amended (“FEMA Regulations”) to prohibit, restrict, regulate, transfer by, or issue of security, to a person resident outside India.

At present, investments in manufacturing companies fall under the RBI automatic approval route for foreign direct investment up to 100%.

SEBI (Foreign Portfolio Investors) Regulations, 2014

In order to harmonize the various available routes for foreign portfolio investment in India, the Indian securities market regulator i.e. Securities Exchange Board of India (“SEBI”) has introduced a new class of foreign investors in India known as the Foreign Portfolio Investors (“FPIs”). This class has been formed by merging the existing classes of investors through which portfolio investments were previously made in India namely, the Foreign Institutional Investors (“FIIs”), Qualified Foreign Investors (“QFIs”) and sub-accounts of the FIIs. Previously portfolio investment was governed under different laws i.e. the SEBI (Foreign Institutional Investors) Regulations, 1995 (“FII Regulations”) for FIIs and their subaccounts and SEBI circulars dated August 09, 2011 and January 13, 2012 governing QFIs, which are now repealed under the SEBI (Foreign Portfolio Investors) Regulations (“FPI Regulations”) that

govern FPIs. SEBI has, thus, intended to simplify the overall operation of making foreign portfolio investments in India.

Environmental Laws

The business of the Company is subject to various environment laws and regulations. The applicability of these laws and regulations varies from operation to operation and is also dependent on the jurisdiction in which the Company operates. This includes rules for, inter alia, laying down the quality of environment, standards for emission of discharge of environment pollutants from various sources as given under the Environment (Protection) Rules, 1986, inspection of any premises, plant, equipment, machinery, examination of manufacturing processes and materials likely to cause pollution. Penalties for violation of the EPA include fines up to ₹ 100,000 or imprisonment of up to five years, or both. The imprisonment can extend up to seven years if the violation of the EPA continues.

There are provisions with respect to certain compliances by persons handling hazardous substances, furnishing of information to the authorities in certain cases, establishment of environment laboratories and appointment of Government analysts.

The Water (Prevention and Control of Pollution) Act, 1974, as amended (the “Water Act”)

The Water Act aims to prevent and control water pollution as well as restore water quality by establishing and empowering the Central Pollution Control Board and the State Pollution Control Boards. Under the Water Act, any person establishing any industry, operation or process, any treatment or disposal system, use of any new or altered outlet for the discharge of sewage or new discharge of sewage, must obtain the consent of the relevant State Pollution Control Board, which is empowered to establish standards and conditions that are required to be complied with. In certain cases the State Pollution Control Board may cause the local Magistrates to restrain the activities of such person who is likely to cause pollution. Penalty for the contravention of the provisions of the Water Act include imposition of fines or imprisonment or both.

The Central Pollution Control Board has powers, inter alia, to specify and modify standards for streams and wells, while the State Pollution Control Boards have powers, inter alia, to inspect any sewage or trade effluents, and to review plans, specifications or other data relating to plants set up for treatment of water, to evolve efficient methods of disposal of sewage and trade effluents on land, to advise the State Government with respect to the suitability of any premises or location for carrying on any industry likely to pollute a stream or a well, to specify standards for treatment of sewage and trade effluents, to specify effluent standards to be complied with by persons while causing discharge of sewage, to obtain information from any industry and to take emergency measures in case of pollution of any stream or well. The State Pollution Control Board is required to grant

consent within a period of four months of receipt of an application, but may impose conditions relating to pollution control equipment to be installed at the facilities. No person operating any industrial plant in any air pollution control area is permitted to discharge the emission of any air pollutant in excess of the standards laid down by the State Pollution Control Board.

The penalties for the failure to comply with the provisions of the Air Act include imprisonment of up to six years and the payment of a fine as may be deemed appropriate. If an area is declared by the State Government to be an air pollution control area, then, no industrial plant may be operated in that area without the prior consent of the State Pollution Control Board.

Hazardous Waste (Management and Handling) Rules, 1989 (“Hazardous Waste Act”)

The Company being an industrial establishment is responsible for safe and environmentally sound handling of hazardous waste generated in the establishment. As per the Hazardous Waste Act, environmentally sound management of hazardous wastes means taking all steps required to ensure that the hazardous wastes are managed in a manner, which shall protect health and the environment against the adverse effects, which may result from such waste.

Every person who is engaged in generation, processing, treatment, package, storage, transportation, use, collection or the like of the hazardous waste shall require to obtain an authorization from the State Pollution Control Board. The State Pollution Control Board is required to grant consent within a period of 120 days from the receipt of an application.

The penalties for the failure to comply with the provisions of the Hazardous Waste Act shall be a financial penalty as deemed appropriate by the State Pollution Control Board.

State Fire Safety Act

The Fire safety Acts have been enacted by each state separately, which is applicable to the Establishment which is likely to cause a risk of fire falling within the jurisdiction of that particular state. Fiscal Regulations***Foreign Trade (Development and Regulation) Act, 1992 (“FTA”)***

FTA seeks to increase foreign trade by regulating the imports and exports to and from India. FTA read with the Indian Foreign Trade Policy provides that no export or import can be made by a person or company without an importer exporter code number unless such person or company is specifically exempt. An application for an importer exporter code number has to be made to the office of the Joint Director General of Foreign Trade, Ministry of Commerce. An importer-exporter code number allotted to an applicant is valid for all its branches, divisions, units and factories.

Foreign Trade Policy

Under the FTA, the Central Government is empowered to periodically formulate the Export Import Policy (“**EXIM Policy**”) and amend it thereafter whenever it deems fit. All exports and imports have to be in compliance with such EXIM Policy. The current EXIM Policy covers the period from 2009-2014.

The Duty exemption Scheme enables duty free imports of inputs required for production of export products by obtaining Advance license (AL).

The Duty Remission Scheme enables post export replenishment/ remission of duty on inputs used in the export product. This scheme consists of Duty Free Remission Certificate (DFRC) and Duty Entitlement Pass Book (DEPB).

While DFRC enables duty free replenishment of inputs used for manufacturing of export products, under DEPB Scheme, exporters on the basis of notified entitled rates are granted duty credit, which would entitle them to import goods except Capital Goods, without duty. The current DEPB rates for saleable products to be manufactured by us are ranging from 2% to 6%.

The imports of inputs under AL and DFRC for the products exported by the company are subject to Input and Output norms as prescribed in EXIM Policy.

EPCG Scheme allows imports of capital goods at 0% duty subject to export obligation which is linked to the amount of duty saved at the time of import of such capital Goods as per the provisions of EXIM Policy.

Excise Regulations

The Central Excise Act, 1944 seeks to impose an excise duty on excisable goods which are produced or manufactured in India. The rate at which the said duty is sought to be imposed is contained in the Central Excise Tariff Act, 1985. However, the Government has the power to exempt certain specified goods from excise duty, by notification.

Customs Regulations

All imports in the country are subject to duties under the Customs Act, 1962 at the rates specified under the Customs Tariff Act, 1975. However, the Government has the power to exempt certain specified goods from excise duty, by notification.

Central Sales Tax Act, 1956 (“Central Sales Tax Act”)

The Central Sales Tax Act formulates principles for determining (a) when a sale or purchase takes place in the course of inter-state trade or commerce; (b) when a sale or purchase takes place outside a State and (c) when a sale or purchase takes place in the course of imports into or export from India. This Act provides for levy, collection and distribution of taxes on sales of goods in the course of inter-state trade or commerce and also declares certain goods to be of special importance in inter-State trade or commerce and specifies the restrictions and conditions to which State laws imposing taxes on sale or purchase of such goods of special importance (called as declared goods) shall be subject. Central Sales tax is levied on inter State sale of goods. Sale is considered to be inter-state when (a) sale occasions movement of goods from one State to another or (b) is effected by transfer of documents during their movement from one State to another.

A sale or purchase of goods shall be deemed to take place in the course of inter-state trade or commerce if the sale or purchase is affected by a transfer of documents of title to the goods during their movement from one state to another. When the goods are handed over to the carrier, he hands over a receipt to the seller. The seller sends the receipt to buyer. The buyer gets delivery of goods on submission of the receipt to the carrier at other end. The receipt of carrier is ‘document of title of goods’. Such document is usually

called Lorry Receipt (LR) in case of transport by Road or Air Way Bill (AWB) in case of transport by air. Though it is called Central Sales Tax Act, the tax collected under the Act in each State is kept by that State only. Central Sales Tax is payable in the State from which movement of goods commences (that is, from which goods are sold). The tax collected is retained by the State in which it is collected. The Central Sales Tax Act is administered by sales tax authorities of each State. The liability to pay tax is on the dealer, who may or may not collect it from the buyer.

Competition Act, 2002, as amended (the “Competition Act”)

The Competition Act prohibits anti competitive agreements, abuse of dominant positions by enterprises and regulates “combinations” in India. The Competition Act also established the Competition Commission of India (the “CCI”) as the authority mandated to implement the Competition Act. The provisions of the Competition Act relating to combinations were notified on March 4, 2011 and have come into effect on June 1, 2011. Combinations which are likely to cause an appreciable adverse effect on competition in a relevant market in India are void under the Competition Act. A combination is defined under Section 5 of the Competition Act as an acquisition, merger or amalgamation of enterprise(s) that meets certain asset or turnover thresholds. There are also different thresholds for those categorized as ‘Individuals’ and ‘Group’. The CCI may enquire into all combinations, even if taking place outside India, or between parties outside India, if such combination is likely to have an appreciable adverse effect on competition in India. Effective June 1, 2011, all combinations have to be notified to the CCI within 30 days of the execution of any agreement or other document for any acquisition of assets, shares, voting rights or control of an enterprise under Section 5(a) and (b) of the Competition Act (including any binding document conveying an agreement or decision to acquire control, shares, voting rights or assets of an enterprise); or the board of directors of a company (or an equivalent authority in case of other entities) approving a proposal for a merger or amalgamation under Section 5(c) of the Competition Act. The obligation to notify a combination to the CCI falls upon the acquirer in case of an acquisition, and on all parties to the combination jointly in case of a merger or amalgamation.

Option to receive Equity Shares in Dematerialized Form

Investors shall be allotted the Equity Shares in dematerialized (electronic) form at the option of the Investor. The Company has signed a tripartite agreement with NSDL on May 11, 2001 and with CDSL on April 28, 2001 which enables the Investors to hold and trade equity shares in a dematerialized form, instead of holding the equity shares in the form of physical certificates.

In this Issue, the allottees who have opted for Equity Shares in dematerialized form will receive their Equity Shares in the form of an electronic credit to their beneficiary account as given in the CAF, after verification with a depository participant. Investor will have to give the relevant particulars for this purpose in the appropriate place in the CAF. Allotment advice, refund order (if any) would be sent directly to the Investor by the Registrar to the Issue but the Investor's depository participant will provide to him the confirmation of the credit of such Equity Shares to the Investor's depository account. CAFs, which do not accurately contain this information, will be given the Equity Shares in physical form. No separate CAFs for Equity Shares in physical and/or dematerialized form should be made.

INVESTORS MAY PLEASE NOTE THAT THE EQUITY SHARES OF THE COMPANY CAN BE TRADED ON THE STOCK EXCHANGE ONLY IN DEMATERIALIZED FORM.

The procedure for availing the facility for Allotment of Equity Shares in this Issue in the electronic form is as under:

- Open a beneficiary account with any depository participant (care should be taken that the beneficiary account should carry the name of the holder in the same manner as is registered in the records of our Company. In the case of joint holding, the beneficiary account should be opened carrying the names of the holders in the same order as registered in the records of our Company). In case of Investors having various folios in our Company with different joint holders, the Investors will have to open separate accounts for such holdings. *Those Equity Shareholders who have already opened such beneficiary account(s) need not adhere to this step.*
- For Equity Shareholders already holding equity shares in dematerialized form as on a day prior to the book closure period (i.e. Thursday, September 24, 2015 to Monday, September 28, 2015), the beneficial account number shall be printed on the CAF. For those who open accounts later or those who change their accounts and wish to receive their Equity Shares by way of credit to such account, the necessary details of their beneficiary account should be filled in the space provided in the CAF. It may be noted that the Allotment of Equity Shares arising out of this Issue may be made in dematerialized form even if the original equity shares are not dematerialized. Nonetheless, it should be ensured that the depository account is in the name(s) of the Equity Shareholders and the names are in the same order as in our records.
- The responsibility for correctness of information (including Investor's age and other details) filled in the CAF vis-à-vis such information with the Investor's depository participant, would rest with the Investor. Investors should ensure that the names of the Investors and the order in which they appear in CAF should be the same as registered with the Investor's depository participant.
- If incomplete/ incorrect beneficiary account details are given in the CAF, then such shares will be credited to a demat suspense a/c which shall be opened by the Company as specified in the SEBI circular no. SEBI/CFD/DIL/LA/1/2009/24/04 dated April 24, 2009.
- The Equity Shares allotted to applicants opting for issue in dematerialized form, would be directly credited to the beneficiary account as given in the CAF after verification. Allotment advice, refund order (if any) would be sent directly to the applicant by the Registrar to the Issue but the applicant's depository participant will provide to him the confirmation of the credit of such Equity Shares to the applicant's depository account. It may be noted that Equity Shares in electronic form can be traded only on the Stock Exchanges having electronic connectivity with NSDL or CDSL.
- Renouncees will also have to provide the necessary details about their beneficiary account for Allotment of Equity Shares in this Issue. In case these details are incomplete or incorrect, the application is liable to be rejected.
- Non-transferable allotment advice/refund orders will be directly sent to the Investors by the Registrar.
