In making an investment decision, prospective investors must rely on their own examination and the terms of the Issue including the merits and risks involved. The risks described below are not the only ones relevant to us, our Equity Shares, the industry or the segment in which we operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

To obtain a complete understanding, you should read this section in conjunction with the sections “Industry Overview”, “Our Business” and “Management’s Discussion and Analysis of Financial Position and Results of Operations” on pages 50, 55 and 99 respectively of this Draft Letter of Offer, respectively. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The Scheme was approved on 08/01/2007 in the said case and our Company was discharged as a sick industrial company by the BIFR vide reference no. 439/2002 and the BIFR vide Order dated January 08, 2007 post which the face value of the shares of our Company was reduced to Rs.6/- per share. Our networth is now positive and we have also undergone a change in management recently and are confident of not being declared a sick company. 4. *In case we do not receive the minimum subscription, we will have to refund the entire subscription*

All our Promoters have not given an undertaking to subscribe to their entitlement and hence minimum subscription as stipulated in the SEBI (ICDR) Regulations, will be applicable. In case we do not receive the minimum subscription, we will have to refund the entire subscription.

5. *We are currently in tool and components manufacturing and supply them to our clients who operate in various industry segments and fluctuations in the performance of the industries in which our clients operate may result in a loss of clients, a decrease in the volume of work we undertake or the price at which we offer our services. Further, Our Company's business is dependent on few customers. Any loss of such customers or a significant reduction in purchases by such customers could also adversely affect our business, results of operations and financial conditions*

Our Company is currently engaged in the manufacturing tools and components For the FY ended March 31, 2022 and the nine month period ended December 31, 2022, our top ten customers contributed Rs 832.84 lakhs (99.78%) and Rs 619.73 lakhs, (99.54%) respectively and our top five customers contributed Rs 832.84 lakhs (99.78%) and Rs 619.73 lakhs, (99.54%) respectively towards our total sales Our business operations are highly dependent on our customers and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations.

A decline in our clients' business performance may lead to a corresponding decrease in demand for our services. Furthermore, the volume of work performed for these clients may vary from time to time and We are also exposed to fluctuations in the performance of the industries in which our significant clients operate. Our clients may also decide to reduce spending on services due to a changing economic environment and other factors relating to the industry in which they operate. For instance, in this period of pandemic wherein all the industries are facing a slowdown and cash crunch due to the lockdown and travel restrictions imposed by several State Governments has resulted in a widespread impact on the demand for our products. A loss of any of our significant clientele, a decrease in the volume of work our clients outsource to us or a decline in our prices may materially and adversely affect our business, operations, financial condition, results of operations and prospects.

6. *We are exposed to the risk of delays or non-payment by our clients, which may also result in cash flow mismatches.*

We are exposed to counter party credit risk in the usual course of our business dealings with our clients who may delay or fail to make payments. For the Fiscal ending March 31, 2022 and 2021 our trade receivables were ₹ 104.62 lakhs and ₹ 90.81 lakhs, respectively. Further, we had written off ₹ 2.23 lakhs as bad debts during the year ended March 31, 2022.

The financial condition of our clients may be affected by the performance of their business which may be impacted by several factors including general economic conditions. For instance, the on-going pandemic has led to a slowdown in the economy which may have directly/ indirectly impacted the industries in which our clients' function. Due to the current scenario, we might be exposed to an increased risk of payment delays and/or defaults of payments. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our clients will be received in a timely manner or to that extent will be received at all. If any of our clients default in making its payments, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

7. *Our Company has not entered into any long-term contracts with any of its customers for sale of the finished products and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

Our Company has had long standing business relationships with various customers and has been supplying our product to such customers for several years. However, we have not entered into any contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our manufactured sugar product. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the quality of products that our Company provides, and the customer's inventory management. Although we place a strong emphasis on quality and timely delivery of our product, in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

8. *Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.*

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

(₹ in lakhs)				
Particulars	September 30 2022*	March 31, 2022	March 31, 2021	March 31, 2020
		Restated		
Net Cash Flow from/ (used in) Operating Activities	(6.73)	56.95	(17.36)	(8.94)
Net Cash Flow used in Investing Activities	(0.72)	7.29	12.34	(12.49)
Net Cash Flow used in Financing Activities	(0.01)	(0.02)	(0.04)	(3.76)

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

- 9. *As the securities of our Company are listed on Stock Exchange in India, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.***

The Equity Shares of our Company are listed on BSE and therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations. Our Company endeavours to comply with all such obligations/reporting requirements any delay in complying with the same may result in the Stock Exchanges and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act / Rules and Regulations / Circulars made there under. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares. We have however, been in compliance with the SEBI Listing Regulations for the past 12 months and therefore, this Letter of Offer is prepared and submitted in terms of Part B of Schedule VI to the SEBI ICDR Regulations.

- 10. *Our Equity Shares are currently under GSM Stage -1 on the BSE.***

Our Equity Shares are currently placed under GSM Stage -1 by the BSE which indicates that the securities are placed under the trade-to-trade category.

- 11. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.***

Our business requires a significant amount of working capital. Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payment for the services provided by us, on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. All of these factors may result in an increase in receivables and short-term borrowings. Continued increase in working capital requirements may adversely affect our financial condition and results of operations. Moreover, we may require additional finance facility in the future to satisfy our working capital needs.

- 12. *We have in past entered into related party transactions and we may continue to do so in the future.***

As of March 31, 2022, we have entered into several related party transactions with our Promoter, individuals and entities forming a part of our promoter group, our Directors and the entities in which they hold directorships. In addition, we have in the past also entered into transactions with other related parties. Our Company has entered into related party transactions for the Fiscal ended March 31, 2021. For further details, please refer to the chapter titled — “Audited Financial Information- Annexure B –Note 28 “Related Party Disclosures” on page 92 of this Draft Letter of Offer.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

- 13. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” on page 50 of this Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from

that presented in this Letter of Offer. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

- 14. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

- 15. *Our Registered Office cum Factory is located on a leased premises. Any failure on the part of the lessor to renew the lease agreement or any disruption of our rights as lessee or termination of the agreements with the licensors/lessors would adversely impact our business.***

The premises on which the registered office of the Company and the factory is situated is on a leased property. In the event the lease agreement is not renewed or we are unable to renew the lease agreement for the registered office and factory with the Lessor on terms which are agreeable to us, we may not be able to continue to use this premises as the registered office cum factory, which may in turn lead to disruption in the business and administrative operations of the Company having an adverse effect on our business. For further details regarding our leased premises, please refer to “Our Business – Leasehold Property” on Page 60 of this Draft Letter of Offer

- 16. *Our success largely depends upon the knowledge and experience of our Promoter, Directors and our Key Managerial Personnel. Loss of any of our directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

Our Company depends on the management skills and guidance of our Promoter and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel. Some of our employees have been associated with our Company since a long period of time and have been integral to the growth and in the success of our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Directors or Key Managerial Personnel are unable or unwilling to continue in his/ her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages and incentives to such Key Managerial Personnel. In the event we are not able to attract and retain talented employees, as required for conducting our business, or we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and operations may be adversely affected. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “Our Management” on 61 of this Draft Letter of Offer.

- 17. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.***

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as, fire, riots and natural disasters. Presently, we have obtained certain policies such as standard fire and special perils policy, The said policies insure our building, furniture, fittings, electrical installation, office equipment, stationery, meter wires, cables, godown, meeting rooms, building superstructure, any other office contents from earthquake, fire, shock, terrorism, etc.; There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

- 18. *We have not been paying dividends in the past and our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. We have not paid dividends in the past and there can be no assurance that our Company will declare dividends in the future also.

- 19. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.***

As the issue size shall be less than ₹10,000 under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. For further details, please refer to the chapter titled — “Objects of the Issue” on Page 43 of this Draft Letter of Offer.

- 19. *We are subject to cyber security risks and security breaches and may incur increasing costs in an effort to minimize those risks and to respond to cyber incidents.***

A number of other companies have disclosed cyber-attacks and security breaches, some of which have involved intentional attacks. Attacks may be targeted at us, our customers, or both. Although we devote significant resources to maintain and regularly upgrade our systems and processes that are designed to protect the security of our computer systems, software, networks and other technology assets and the confidentiality, integrity and availability of information belonging to us and our customers, our security measures may not provide absolute security. Despite our efforts to ensure the integrity of our systems, it is possible that we may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because the techniques used change frequently or are not recognized until launched, and because cyber-attacks can originate from a wide variety of sources, including third parties outside the Company such as persons who are involved with organized crime or associated with external service providers or who may be linked to terrorist organizations or hostile foreign governments. A successful penetration or circumvention of the security of our systems could cause serious negative consequences, including significant disruption of our operations, misappropriation of our confidential information or that of our customers, or damage to our computers or systems or those of our customers and counterparties, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss of confidence in our security measures, customer dissatisfaction, significant litigation exposure, and affect to our reputation, all of which could have a material adverse effect on us.

Our servers are also vulnerable to computer viruses, physical or electronic break-ins, and similar disruptions. We may need to expend significant resources to protect against security breaches or to address problems caused by breaches. Security breaches, including any breach of our systems or by persons with whom we have commercial relationships that result in the unauthorized release of customers’ or businesses’ personal information, could damage our reputation and expose us to a risk of loss or litigation and possible liability.

- 20. *Failure to stay up to date with technological changes, as well as the uses and regulation of the internet, might be detrimental to our Company.***

The industry is very dynamic and fresh. We must keep up with changing technical breakthroughs, customer and small company usage habits, internet security threats, system failure or inadequacy hazards, and governmental regulation and taxation, all of which could have a negative influence on our entity.

If we are unable to adequately react to such developments, decreased demand for our products could result in a loss of revenues or a fall in profitability. The demand for our products could fall as a result of a variety of factors, including

regulatory restrictions that limit customer access to specific products, the availability of competing or alternative products, or changes in customers' financial circumstances, such as increases in income or savings. Our revenues could be severely reduced if we fail to adjust to a significant change in our clients' desire for, or access to, our products. Customers may refuse or reject products whose changes make them less appealing or less available, even if we make adjustments or launch new products to meet customer demand.

21. *The outbreak of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease could adversely affect our business / financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several containment measures such as travel bans and restrictions, quarantines and shutdowns. These measures may have an impact on the workforce and our operations and the operations of our customers. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may further cause significant economic disruption across India. The scope, duration and frequency of such measures could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian economy in general.

The COVID – 19 outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees and customers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak. The extent to which COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken to contain the coronavirus or treat its impact, among others. The degree to which COVID-19 may impact our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or the ability to treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, loss of life, injuries and impact the wellbeing of our people.

EXTERNAL RISK FACTORS

22. *Other financial institutions or the Indian financial sector as a whole may have difficulties, which could hurt our operations.*

We are exposed to risks as a result of our involvement in the Indian financial system. Financial troubles and other issues confronting Indian financial institutions may have an impact on this sector. Several Indian financial institutions have had problems in recent years, and certain banks have also had major financial and liquidity problems. Any significant problem or volatility in the Indian financial system could lead to a negative market perception.

23. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and IFRS, which investors may be more familiar with and consider material to their assessment of our financial condition.*

Our audited summary statements of assets and liabilities as at March 31, 2022 and audited summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Financial Year 2022 have been prepared in accordance with the Ind AS, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Audited Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

24. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

25. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

26. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of

companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

27. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

28. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

29. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

30. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions including wars amongst nations like the current Russia Ukraine conflict could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

ISSUE SPECIFIC RISKS

31. Our Company will not distribute the Draft Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.

Our Company will dispatch the Letter of Offer, the Abridged Draft Letter of Offer, Rights Entitlement Letter and Application Form (the "**Offering Materials**") to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

32. SEBI has by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and October 01, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and October 01, 2021 and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see "*Terms of the Issue*" on page 126 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

33. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncee(s) may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncee(s) prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

34. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if STT was paid on the sale transaction and, additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, has now levied taxes on long-term capital gains arising from sale of equity shares. However, where specified conditions are met, such long-term capital gains are only taxed to the extent they exceed Rs. 100,000.00 and unrealized capital gains earned up to January 31, 2018, continue to be exempt. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity Shares.

35. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

36. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchange until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

37. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, 2013, any company incorporated in India must offer its holders of equity shares pre-emptive

rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

38. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

39. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

40. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

Indian Economy

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Tooling refers to the process of developing and engineering tools that are required for manufacturing different parts of machines. It comprises dies, sheet metal, work holding and cutting tools, forging and extrusion machines, and welding and inspection fixtures. It helps machines function properly, repeat results and reduce man-hours. In addition, it delivers finished products within a specific tolerance that cannot be broken and degraded easily. Besides this, it allows manufacturers to provide high-quality and customized products while keeping production costs low.

Tooling Market Trends:

At present, there is a rise in the adoption of tooling in the manufacturing industry to produce parts of numerous machines. This, along with a considerable reliance on electrical devices for carrying out everyday tasks easily and conveniently, represents one of the key factors driving the market. Moreover, there is an increase in the customization of moulds and dies that are used in automotive engines, fuel tanks, turbines, propellers, and shafts. This, coupled with the increasing renewable energy systems, such as wind power energy generation, solar energy generation, and hydro-electricity plants, is impelling the market growth. In addition, the rising automation and growing popularity of artificial intelligence (AI) technology are augmenting the adoption of tooling worldwide. Besides this, the burgeoning plastic industry and new developments in biodegradable polymer material are offering a positive outlook to industry investors. Additionally, the escalating demand for light commercial vehicles (LCVs) around the world on account of the inflating global oil prices is positively influencing the market. Furthermore, key market players are focusing on different varieties of tool production in the automotive industry. They are also focusing on expanding their product portfolio to offer more economical products.

Based on the product type, the global tooling market has been segmented into dies and moulds, forging, jigs and fixtures, machine tools and gauges. Currently dies and moulds hold the majority of the total market share. The global tooling market, based on the end use industry, can be divided into automotive, electronics and electrical, aerospace, marine and defence, plastics industry, construction and mining and others. Among these, the automotive industry exhibits a clear dominance in the market.

Some of the major players in the global tooling market include Agathon AG, Bharat Forge Limited, Carlson Tool & Manufacturing Corp., Doosan Machine Tools Co. Ltd. (DTR Automotive), Godrej & Boyce Manufacturing Co. Ltd., Omega Tool Corp, Samvardhana Motherson Group, Sandvik AB, Siemens AG, Stratasys Direct Inc., Unique Tool & Gauge Inc., and Yamazaki Mazak Corporation.

The dies and moulds market in India is fragmented due to the presence of a large number of vendors. The influx of international players that offer high-quality products has increased the competition in the market. Hence, regional players are focusing on increasing their foothold in the market by offering products at comparatively lower-costs than international players. Some vendors are incorporating CAD/CAM software as well as automation technologies to gain a competitive advantage. Vendors are also adopting inorganic growth strategies such as mergers and acquisitions to remain competitive in the market.

The die and mould industry in India has evolved over the years and is currently enjoying a significant position in the global manufacturing landscape. An insight into the industry that is keeping pace with the time and redefining quality and precision. The die and mould industry of the country has undergone an awe-inspiring transformation. Capable of catering to a variety of specific demands from a number of booming sectors including Automotive, Plastic, Electronics and Electrical, Healthcare, and Machine Tools, the industry finds itself brimming with opportunities.

Indian tooling industry is estimated to grow up to ₹26,000 crore in value by 2025 on the back of strong growth in key end-user segments but government support and intervention is required on many forefronts to augment tooling ecosystem in India, according to a report by NRI Consulting and TAGMA. The inverted duty structure, challenges in access to finance and lack of skilled workforce are some of the key challenges ahead of the industry and it needs government support to address these hurdles, said the Indian Tool Room Industry by Nomura Research Institute Consulting & Solutions India Pvt. Ltd (NRI Consulting) and TAGMA (Tool and Gauge Manufacturers Association).

As per the report, the market size of tool room industry in India is estimated to be around ₹18,000 crore with around 70% of demand being met domestically and approximately 30% from imports. It further said that tooling imports into India are about five times the exports from the country by value with China and Korea accounting for almost 40% of the total tooling imports. Captive tooling supply has not changed much in the last two years but imports have captured a larger portion of incremental demand than commercial tool rooms.

Commenting on the total tooling demand expectations over the next five years, the report said: “Indian tool room industry is estimated to grow to ₹25,000 crore to ₹26,000 crore in value by 2025 on back of strong growth in key end user segments.” As per the report, in terms of key end-users of the Indian tool room industry, the automotive segment is expected to grow 8%, consumer durables 9%, plastics 12%, electronics 14% and electrical by 21% over the next five years.

Calling for government intervention, the report said rationalisation of duty structure is needed to ensure imported finished tools incur more duty than imported raw materials and standard components. Also, reduction in import duty on raw materials and components will aid in enhanced cost competitiveness, it said adding concession in import duty (around 8%) or complete waiver on machinery required for press tools will be of immense help to tool rooms.

On the issue of lack of skilled manpower, the report by NRI Consulting and TAGMA highlighted the need for revising curriculum in tool training institutes and introducing advanced courses on tool engineering. While suggesting technical tie up and collaboration with overseas tool rooms/training institutes for sharing knowledge and best practices, the report also called for setting up dedicated R&D institutes specific to the die and moulds sector and incentivising R&D spend in tool rooms.

Plastic Injection Moulding

The Plastics Injection Moulding Market is growing at a CAGR of >3.5% over the next 5 years. Additionally, demand for plastic injection moulding is anticipated to be strengthened by the growing residential construction sector in the country. The Indian government, in its Union Budget 2022-23, allocated INR 48,000 crores (USD 6.44 billion) for its 'PM Awas Yojana' scheme, reiterating its commitment to implementing 'Housing for All' which aims to build 80,00,000 affordable housing units for the urban and rural poor in FY 2022-23. The India injection moulding machine market size is anticipated to expand at a compounded annual growth rate (CAGR) Compound Annual Growth Rate of 6.1% from 2022 to 2030. The Global Plastic Injection Moulding Market Size accounted for USD 271.6 Billion in 2021 and is estimated to achieve a market size of USD 419.1 Billion by 2030 growing at a CAGR of 5% from 2022 to 2030.

Benefits of Plastic Injection Moulding:

- 1) Plastic injection moulding is a very versatile method of manufacturing parts and products. It is extremely simple, reliable, and an efficient method over other methods of plastic moulding.
- 2) The injection moulds are subjected to extremely high pressure which makes it possible to add a large amount of complex shapes and details into the design. These geometrical designs otherwise would have been too complicated to manufacture.
- 3) The plastic injection moulding process takes less time which allows more parts to be manufactured from a single mould. The high production output rate makes plastic injection moulding cost-effective and efficient.
- 4) One of the major advantages of using plastic injection moulding is the use of co-injection moulding which makes it possible to use different types of plastic.
- 5) Plastic injection moulding is an automated process. It is carried out by robotics which acts as a sole operator to control and manage the process. This minimizes manufacturing costs, as the overheads are considerably reduced.
- 6) With abundant R & D into this space, plastic injection moulding today is an environment-friendly process. The scrap plastic generated during the production process is reground and re-used, ensuring that the process generates very little waste.

Typical Products Made with Plastic Injection Moulding

Plastic bottles are the most common product manufactured by the billions each year, ranging in multiple shapes and sizes. Typically, the plastic bottles used to hold potable water and other drinks are made from polyethylene terephthalate (PET), because the material is both strong and light.

Electronic housings are also quite commonly fabricated with injection moulding services. Used in devices such as remote controls, computers, televisions, medical equipment, and other consumer electronic components, housings are all produced by injection moulding process. Injection moulding services can manufacture any custom plastic enclosures for practically any application and sizes.

Toys: Imagine a building material which is lightweight, durable, and doesn't corrode; it comes in many sizes and colours and is designed for easy precise assembly. The Lego brand of building block recognized by all is made of firmer plastic granules which are heated until liquefied and then injected into metal moulds in which the plastic cools and solidifies into a studded brick or other shape. But what's important is that each brick and component is accurately moulded so they'll all fit together. It's a precision product available in many colours, shapes, and sizes.

Household: Moulded closures, containers, components, and drink ware are just a few of the common items that can be custom fabricated with injection moulding.

Injection moulds must have a high precision match between the two mould halves in order to perfectly control the material flow. Creating the mould is crucial to building a seamless, precision product. Injection moulds are typically constructed using steel or aluminum, and precision machined to form the features of desired product.

The injection moulding process is fairly repetitive once a functional, errorless mould has been produced. It also has a low scrap rate relative to other manufacturing processes such as CNC machining which cut away considerable portions of the original material blank in a subtractive process.

Further, our Company has and will continue to maintain good relations with the vendors which ensures uninterrupted supply of raw materials to our factory.

PLANT AND MACHINERY

Our factory is equipped with various machinery, technology and equipment for the purpose of carrying out the manufacturing process effectively and efficiently. The Company has undertaken the modernization of the technology from time to time to adopt the latest technology in the manufacturing process for both automotive and commercial plastic components.

PROCESS

1. INJECTION MOULDING:

Plastic injection moulding is a manufacturing process used in the mass fabrication of plastic parts. It involves an injection of molten plastic material into the mould where it cools and solidifies to its final form. Injection moulding uses a special-purpose machine that has three parts: the injection unit, the mould and the clamp. Parts to be injection-moulded must be very carefully designed to facilitate the moulding process; the material used for the part, the desired shape and features of the part, the material of the mould, and the properties of the moulding machine must all be taken into account. The versatility of injection moulding is facilitated by this breadth of design considerations and possibilities.

The process of injection moulding is divided into 6 major steps as shown below.

The process is proceeded as shown above and products can be made successively by repeating the cycle.

3. INJECTION MOULDING MACHINE:

Injection moulding machine is divided into 2 units i.e. a clamping unit and an injection unit. The functions of the clamping unit are opening and closing a die, and the ejection of products. There are 2 types of clamping methods, namely the toggle type shown in the figure below and the straight-hydraulic type in which a mould is directly opened and closed with a hydraulic cylinder. The functions of the injection unit are to melt plastic by heat and then to inject molten plastic into a mould.

The screw is rotated to melt plastic introduced from the hopper and to accumulate molten plastic in front of the screw (to be called metering). After the required amount of molten plastic is accumulated, injection process is started.

While molten plastic is flowing in a mould, the machine controls the moving speed of the screw, or injection speed. On the other hand, it controls dwell pressure after molten plastic fills out cavities. The position of

change from speed control to pressure control is set at the point where either screw position or injection pressure reaches a certain fixed value.

NOTES FORMING PART OF THE RESTATED FINANCIAL STATEMENTS

1. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies mentioned herein are relating to standalone financial statements of the Company.

a) Brief description of the Company

IYKOT HITECH TOOLROOM LTD is a public limited company incorporated and domiciled in India and engaged in integrated commercial tool room and related activities.

b) Basis of Preparation

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

The financial statements have been prepared on the historical cost convention under accrual basis of accounting except for certain financial assets and liabilities (as per accounting policy below), which have been measured at fair value.

c) Use of estimates

The preparation of financial statements requires management to make certain estimates and assumptions that affect the amounts reflected in financial statements and notes thereto. The management believes that these estimates are reasonable and prudent. However, actual result could differ from these estimates. Any revision to accounting estimates is recognised prospectively in the current and future period.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgements is included in the relevant notes together with information about the basis of calculation for each affected line in the financial statements.

d) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and net of returns, trade allowances, rebates and amounts collected on behalf of third parties. It excludes value of GST.

Sale of products:

Revenue from sale of products is recognised, when significant risks and rewards of ownership pass to the customer, as per the terms of contract and it is probable that the economic benefits associated with the transaction will flow to the Company.

e) Property, Plant and Equipment

All items of Property, Plant and Equipment are stated at cost of acquisition or construction less accumulated depreciation/ amortization and impairment, if any. Cost includes purchase price, taxes

and duties, labour cost and directly attributable overheads incurred upto the date the asset is ready for its intended use. However, cost excludes G S T to the extent credit of tax is availed of.

Subsequent costs are included in the asset's carrying amount or recognised as separate asset, as appropriate, only when it is probable that future economic benefit associated with the item flows to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repair and maintenance are charged to Profit and Loss during the reporting period in which they are incurred.

f) Depreciation and amortization

- 1) Depreciation on tangible fixed assets is charged over the estimated useful life of the asset or part of the asset (after considering double/ triple shift), on straight line method, in accordance with Part A of Schedule II of the Companies Act, 2013. On tangible fixed assets added/ disposed off during the year, depreciation is charged on pro-rata basis from the date of addition/ till the date of disposal.
- 2) Tools used are depreciated based on the quantity of components manufactured and the life of the tools, subject to maximum of 5 years.
- 3) Residual values and lives are reviewed, and adjusted, if appropriate, for each reporting period.
- 4) Depreciation in respect of tangible assets costing less than Rs. 5000/- is provided at 100%.

g) Inventories

Inventories are valued at the lower of cost and net realisable value.

- 1) Cost of raw materials, components, stores, spares, work-in-progress and finished goods are ascertained on a moving average basis.
- 2) Cost of finished goods and work-in-progress comprise of direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Costs are assigned to individual items of inventory on the basis of weighted average costs. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is determined as estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Materials and supplies held for use in production of inventories are not written down if the finished products in which they will be used are expected to be sold at or above cost. Slow and non-moving material, obsolescence, defective inventories are duly provided for.

h) Employee benefits

i) Short term obligations:

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' service upto the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet. Such liabilities are disposed by way of monthly contribution to the fund administered by the Regional Provident Commissioner, Tamilnadu and the Employees' State Insurance Corporation, Tamilnadu Regional Office.

ii) Other long term employee benefit:

The liabilities for earned leave is are settled on cash payment basis as and when the same arises. Liability towards Gratuity is provided in the books on accrual basis.

i) Cash and Cash equivalents

For the purpose of presentation in the cash flows, cash and cash equivalents include cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within current liabilities in the balance sheet.

j) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

k) Taxes on Income

Tax expense comprises of current and deferred taxes.

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. The management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in the other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

l) Provisions

A provision is recorded in the when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources would be required to settle the obligation and the amount can be reasonably estimated. The estimated liability for product warranties is recorded when products are sold on technical evaluation.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is the pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to passage of time is recognised as interest expense.

m) Borrowings

Borrowings are initially recognised at fair value, net of transaction cost incurred. Borrowings are subsequently measured at amortised cost. Any difference between proceeds (net of transaction cost) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the established loan facilities are recognised as transaction cost of the loan, to the extent that it is probable that some or all the facility will be drawn down.

Borrowings are discharged from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other gain/ (loss). Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

n) Current and Non-Current classification

The Company presents assets and liabilities in the balance sheet based on current/non-current classification.

Cash and Cash equivalent is treated as current, unless restricted from being exchanged or used to settle a liability for at least twelve months. In respect of other assets, it is treated as current when it is expected to be realised or intended to be sold or consumed in the normal operating cycle. It is held primarily for the purpose of trading, expected to be realised within twelve months after the reporting date. All other assets are classified as non-current.

A liability is treated as current when expected to be settled in the normal operating cycle. it is held primarily for the purpose of trading. it is due to be settled within twelve months after the reporting period. There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between acquisition of asset for processing and their realization in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

o) **Earnings per Share (EPS)**

Basic earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares outstanding during the year/period. Diluted earnings per share is computed by dividing the profit after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

- The preparation of the Statement in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 (IND AS 34) "Interim Financial Reporting" prescribed under section 133 of the Companies Act, 2013, as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India, read with the Circular is the responsibility of the Company's management and has been approved by the Board of Directors of the Company. - We conducted our review of the Statement in accordance with the Standard on Review Engagement (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement of financial results is free of material misstatement. We have not performed an audit and accordingly, we do not express an audit opinion.
- Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying statement of unaudited standalone financial results prepared in accordance with the recognition and measurement principles laid down in the applicable Indian Accounting Standards ('Ind AS') specified under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other recognised accounting practices and policies has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 read the Circular, including the manner in which it is to be disclosed, or that it contains any material misstatement.

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Credit Risk: Credit risk is defined as the possibility of losses associated with diminution in the credit quality of borrowers or other counterparties.

Interest Rate Risk: The Company is subject to interest rate risk, principally because it lends to customers at fixed interest rates and for periods that may differ from its funding sources, which bear fixed and floating rates. Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other factors.

Operational Risk: Operational risks are risks arising from inadequate or failed internal processes, people and systems or external events. The internal control includes effective separation of functions, segregation of roles and responsibilities, reliance on the maker-checker concept, monitoring of exceptions, etc. We also attempt to mitigate operational risk by maintaining a comprehensive system of internal controls, establishing policies and procedures to monitor transactions, maintaining necessary back-up procedures and undertaking contingency planning.

Liquidity Risk: Liquidity risk arises due to the unavailability of an adequate amount of funds to meet the Company's financial obligations at an appropriate price and tenure. The Company attempts to minimise this risk through a mix of strategies, including diversification of sources of funds, securitisation and assignment of receivables, fixing caps on short term funds and maintaining liquidity buffer.

Business Risk: The Company, being an NBFC, is exposed to various external risks which have a direct bearing on the sustainability and profitability of the Company. Foremost amongst them are Industry Risk and Competition Risk. The volatile macroeconomic conditions and change in sector dynamic in various commercial segments cause ups and downs in the business and may result in impairment of loan assets.

Regulatory Risk: It is the risk of change in-laws and regulations materially impacting the business. All the periodic guidelines issued by regulators including the RBI, SEBI, NHB, IRDA are fully adhered to and complied with by the Company. The Company strictly adheres to the Capital Adequacy, Fair Practices Code, Asset Classification and Provisioning Norms, submission of all required returns to the regulators with zero tolerance for non-compliance.

Reputation Risk: Reputational risk is the risk of possible damage to the company's brand and reputation, and the associated risk to earnings, capital or liquidity, arising from any association, action or inaction which could be perceived by stakeholders to be inappropriate, unethical or inconsistent.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will not be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs through the FDI Circular 2020 (defined below).

The DPIIT issued the Consolidated FDI Policy Circular of 2020 (“**FDI Circular 2020**”), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as at October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular. The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under the FEMA Rules will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Foreign investment in this Offer shall be on the basis of the FEMA Rules. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non- resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Please also note that pursuant to Circular no. 14 dated September 16, 2003 issued by RBI, Overseas Corporate Bodies (“OCBs”) have been derecognised as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident

must do so in accordance with the FDI Circular 2020 and FEMA Rules. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors.
