During 2020-2021, we have ventured into new line of businesses i.e. trading infrastructure products and also intends to explore other business opportunities in which neither the Company not the Promoters have any rich experience. Further, the risks involved in entering a new line of business may be higher than expected. By entering in new line of business, we may be exposed to significant liability and could lose some or all of our investment in such business, as a result of which our business, financial condition and results of operations could be adversely affected. If we are unable to effectively manage the risks associated with our growth and expansion strategies, we may be adversely affected.

5. ***Any shortfall in the supply of our raw materials or an increase in our raw material costs, or other***

input costs, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.

The success of our operations depends on, among other things, our ability to source raw materials at competitive prices. Raw materials are subject to supply disruptions and price volatility caused by various factors such as the quality and availability of raw materials, currency fluctuations, consumer demand, changes in domestic as well as international government policies and regulatory sanctions.

We seek to source our raw materials from reputed suppliers and typically seek quotations from multiple suppliers. We do not have long-term contracts with our suppliers. We typically purchase raw materials on a purchase order basis. Consequently, we may be required to regularly negotiate prices with our suppliers in case of significant fluctuations in raw material prices. The absence of long-term supplier contracts subjects us to risks such as price volatility, unavailability of certain raw materials in the short term and failure to source critical raw materials in time, which would result in a delay in manufacturing of the final product. Further, we cannot assure you that we will be able to enter into new arrangements with suppliers on terms acceptable to us, which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner, if at all, which may impact our business and profitability. Our suppliers may also be unable to provide us with sufficient quantity of raw materials, at prices acceptable to us, for us to meet the demand for our products. While, we typically sell our products to our customers on a purchase order basis, given that we have long term relationships with many of our customers, our ability to pass on increases in the costs of raw materials and other inputs to our customers may be limited. We are also subject to the risk that one or more of our existing suppliers may discontinue their operations, which may adversely affect our ability to source raw materials at a competitive price.

If we are unable to purchase the raw materials from such suppliers for any reason including due to cessation of operations by such suppliers, disputes with such suppliers, or if there is a substantial increase in the prices charged by such suppliers, there can be no assurance that we will be able to identify alternative suppliers for our raw materials at similar cost and other terms of purchase.

Any increase in raw material prices may result in corresponding increases in our product costs. A failure to maintain our required supply of raw materials, and any inability on our part to find alternate sources for the procurement of such raw materials, on acceptable terms, could adversely affect our ability to deliver our products to our customers in an efficient, reliable and timely manner, and consequently adversely affect our business, results of operations and financial condition.

6. ***Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.***

Our Company has entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure (including this present proposed Rights Issue), formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying secured loan and unsecured loans, undertake guarantee obligations, which require our Company to obtain prior approval of the lenders for any of the above activities. We have applied to all the relevant lenders for consent/no objection certificate to undertake the Issue. As on date of this Draft Letter of Offer, we are yet to receive consents. Undertaking the Issue without such consents constitutes a breach of covenant under the relevant financing documents, which entitles the respective lender to consider this Issue as an event of default under the loan agreements and they may call up the entire outstanding amount and make it payable forthwith at their discretion. We cannot provide any assurance that our lenders will not enforce their rights relating to our breach of financial covenants, or grant us waivers with respect to any such breaches. The occurrence of any of the events mentioned above can adversely affect our business, results of operations and financial condition.

7. ***Our clients operate in various industry segments/verticals and fluctuations in the performance of the industries in which our clients operate may result in a loss of clients, a decrease in the volume of work we undertake or the price at which we offer our services. This can further lead to dependency***

on a limited number of clients, which may expose us to a high risk of client concentration.

For the FY ended March 31, 2021 and for the period ended six months September 30, 2021, our top ten customers contributed 78.73% and 54.26%, respectively and our top five customers contributed 67.23 % and 41.35%, respectively towards our revenue from operations, respectively. Our business operations are highly dependent on our customers and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations.

While we typically have long term relationships with our customers, as an industry practice, we do not enter into long terms agreements with most of our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers. The actual revenue earned by our Company may differ from the estimates of our management due to the absence of long-term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

A decline in our clients' business performance may lead to a corresponding decrease in demand for our product. We are also exposed to fluctuations in the performance of the industries in which our significant clients operate.

Our clients may also decide to reduce spending on services due to a changing economic environment and other factors relating to the industry in which they operate. For instance, in this period of pandemic wherein all the industries are facing a slowdown and cash crunch due to the lockdown and other restrictions imposed by several State Governments has resultant in a widespread impact on the industry. In view of the present situation, a number of our clients have halted their business operations which could prompt them to cease using our services, thereby resulting in loss of our market share. A loss of any of our significant clientele, a decrease in the volume of work our clients outsource to us or a decline in our prices may materially and adversely affect our business, operations, financial condition, results of operations and prospects.

8. ***We operate in a highly fragmented and competitive industry and increased competition may lead to a reduction in our revenues, reduced profit margins or a loss of market share.***

We operate in a highly competitive industry, dominated by a large number of organized and unorganized players. Increased competition from other organized and unorganized third-party logistics providers may lead to a reduction in our revenues, reduced profit margins or a loss of market share.

Our success depends on our ability to anticipate, understand and address the preferences of our existing and prospective clients as well as to understand evolving industry trends and our failure to adequately do so could adversely affect our business.

Other factors that could affect our ability to maintain our levels of revenues and profitability include the development of an operational model similar or superior to ours by a competitor. Our inability to compete effectively could affect our ability to retain our existing clients or attract new clients which may in turn materially and adversely affect our business, financial condition, results of operations, cash flows and prospects.

9. ***Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.***

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past. Following are the details of our cash flow position during the last three financial years and t for the period ended six months September 30, 2021 are;

Particulars	September 30, 2021	March 31, 2021	March 31, 2020
Net cash flow from operating activities (A)	-3,941.60	1,243.90	2,577.84
Net cash flow from / (used in) investing activities (B)	1,900.69	-42.18	560.27
Net cash flow from / (used in) financing activities (C)	2,118.54	-1,200.67	-3,174.63

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition. For further details please refer to "*Financial Information*" beginning on page 80 of this Draft Letter of Offer.

10. ***Our Company has posted negative profits in the past.***

Our Company has in the past incurred losses. There can be no assurance that we will be able to maintain the profitability in future. The details are as mentioned below:

Particulars	September 31, 2021	March 31, 2021	March 31, 2020
Total Comprehensive Income for the period	-321.61	-1,434.91	109.67

For further details please refer to "*Financial Information*" beginning on page 80 of this Draft Letter of Offer.

11. ***Our business strategies and expansion plans may be subject to various unfamiliar risks and may not be successful.***

Our business strategies include widening our customer base by entering into new geographies and strengthening our relationships with our existing clients. For further details, see "*Our Business—Business Strategy*" on page 68. These strategies require us to expand our operations to other geographical areas and in new industry verticals. Risks that we may face in implementing our business strategy in these markets may substantially differ from those previously experienced, thereby exposing us to risks related to new markets, industry verticals and clients. The commencement of operations beyond our current markets and industry verticals is subject to various risks including unfamiliarity with pricing dynamics, competition, service and operational issues as well as our ability to retain key management and employees. There can also be no assurance that we will not experience issues such as capital constraints, difficulties in expanding our existing operations and challenges in training an increasing number of personnel to manage and operate our expanded business, or that we will be able to successfully manage the impact of our growth on our operational and managerial resources and control systems. We may not be able to successfully manage some or all of the risks associated with such an expansion into new geographical areas and new industry verticals, which may place us at a competitive disadvantage, limit our growth opportunities and materially and adversely affect our business, results of operations and financial condition.

12. ***Misconduct or errors by manpower engaged by us could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.***

Misconduct or errors by manpower engaged by us could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such misconduct includes breach of security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. Consequently, our ability to control the workplace environment in such circumstances is limited. The risks associated with the deployment of manpower engaged by us across locations include, among others, possible claims relating to; actions or inactions, including matters for which we may have to indemnify our clients; our failure to adequately verify personnel backgrounds and qualifications resulting in deficient services; failure of manpower engaged by us to adequately perform their duties; errors or malicious acts or violation of health and safety regulations; or criminal acts.

These claims may give rise to litigation and claims for damages, which could be time-consuming. These claims may also result in negative publicity and adversely impact our reputation and brand name. Further, we may be forced to indemnify our clients against losses or damages suffered by our clients as a result of negligent acts of manpower engaged by us. We may also be affected in our operations by the acts of third parties, including sub-contractors and service providers. Any claims and proceedings for alleged negligence as well as regulatory actions may in turn materially and adversely affect our brand and our reputation, and consequently, our business, financial condition, results of operations and prospects.

13. ***In the past, there have been instances of delays and non-filings of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 2013 to RoC.***

In the past, there have been certain instances of delays in filing statutory forms such as e-form DIR-12 etc. as per the reporting requirements under the Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC.

No show cause notice in respect to the above has been received by our Company till date and except as stated in this Draft Letter of Offer, no penalty or fine has been imposed by any regulatory authority in respect to the same. It cannot be assured, that there will not be such instances in the future or our Company will not commit any further delays or defaults in relation to its reporting requirements, or any penalty or fine will not be imposed by any regulatory authority in respect to the same. The happening of such event may cause a material effect on our results of operations and financial position.

14. ***As the securities of our Company are listed on Stock Exchanges in India, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations and comply with other SEBI regulations. Any non- compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.***

The Equity Shares of our Company are listed on BSE and NSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations and comply with other applicable Regulations framed by SEBI. Our Company endeavors to comply with all such obligations/reporting requirements, however there have been instances in the past of non-disclosures/delayed disclosures under SEBI Listing Regulations. Such non-compliance which might have been committed by us, may result into Stock Exchanges and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act and Rules and Regulations made there under and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

15. ***Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.***

Our business requires a significant amount of working capital. Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payment for the services provided by us, on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. All of these factors may result, or have resulted, in increase in the amount of receivables and short-term borrowings. Continued increase in working capital requirements may adversely affect our financial condition and results of operations. We may also have large cash flows, including among others, litigation costs, adverse political conditions, foreign exchange risks and liability claims. Moreover, we may require additional finance facility in the future to satisfy our working capital needs.

16. ***Our Company does not have any documentary evidence for the educational qualifications and experience of our Directors.***

Our Directors are unable to trace relevant documents with respect to their educational qualifications and their experience. Due to lack of documents and relevant information from the aforementioned Directors, we have relied upon their Biodata provided to us as is required under the SEBI ICDR Regulations. For further details, please refer to the chapter titled "*Our Management*" on page 77 of this Draft Letter of Offer.

17. ***We require certain approvals and licenses in the ordinary course of business, and any failure to obtain or retain such approvals in a timely manner, or comply with applicable laws, may materially and adversely affect our business, financial condition, results of operations and prospects.***

We require certain approvals, licenses, registrations and permissions for operating our business in India, if we fail to apply, obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, our business may be adversely affected.

In relation to our facility, we are required to maintain and avail certain approvals and licenses. We cannot assure you that we will receive all the required certifications or that we will able to maintain the validity of the quality certifications that have previously been awarded.

Further, government approvals and licenses are subject to numerous conditions, of which some may be onerous and may require us to undertake substantial compliance-related expenditure. Changes in laws and regulations, more stringent enforcement or alternative interpretation of existing laws and regulations in geographies in which we currently operate may make compliance with all applicable laws and regulations more challenging and could affect us adversely by tightening restrictions, reducing our freedom to do business, increasing our costs of doing business, or reducing our profitability.

Failure to comply with applicable laws or regulations, obtain and maintain any licenses, permits and approvals necessary to operate our business or non-compliance with any conditions imposed thereunder can lead to civil, administrative or criminal penalties, including but not limited to fines or the revocation of permits and licenses that may be necessary for our business activities.

18. ***Our Company has not yet applied for the registration of the logo or any of the intellectual property that it uses with the registrar of Trademarks.***

Our Company has not yet applied for the registration of the logo i.e. " " or any of the intellectual property that it uses. Any failure to get the same registered in our name may cause any third-party claim and may lead to litigation and our business operations could be affected. Even if our trademarks are registered, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects.

19. ***Our growth and our financial results may be affected by factors affecting the chemical and plastic industry in India.***

Our financial results are influenced by the macroeconomic factors determining the growth of the Indian economy as a whole and the chemical and plastic industry in particular.

Periods of slowdown in the economic growth of India has significantly affected the chemical and plastic sector in the recent past. Any further downturn in our industry and/or changes in governmental policies affecting the growth of this sector may have an adverse effect on the demand for our services which may have an adverse effect on our results of our operations. Especially, during the ongoing pandemic, the economy as a whole has withstood the worst impact of extended lockdown and reduction in the flow of income. Chemical and Plastic sector industries may see a downside in the current situation and an adverse and direct impact could fall on our business operations, demand of our services, revenue and financial condition.

20. ***Our Promoter, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Our Promoter, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. For further details please refer to "*Financial Information*" on page 80 of this Draft Letter of Offer.

There can be no assurance that our Promoter, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoter and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and other signification decisions. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

21. ***We have certain contingent liabilities and our financial condition and profitability may be adversely affected if any of these contingent liabilities materialize.***

As of September 30, 2021, our contingent liabilities and commitments (to the extent not provided for) as disclosed in the notes to our Financial Information aggregates to ₹ 5,32,86,647. The details of our contingent liabilities are as follows:

Particulars	**(₹ in lakhs)**
Bank guarantees issued by banks on behalf of the Company	3,15,04,000
Duty against advance license	88,53,908
Direct Tax Demand	98,03,756
Indirect Tax Demand	31,24,983
Total	**5,32,86,647**

For further details of contingent liability, see the section titled — "*Financial Information*" on page 80 of this Draft Letter of Offer. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

22. ***We have in past entered into related party transactions and we may continue to do so in the future.***

As of September 30, 2021, we have entered into several related party transactions with our Promoter, individuals and entities forming a part of our promoter group, our Directors and the entities in which they hold directorships. In addition, we have in the past also entered into transactions with other related parties. Our Company has entered into related party transactions for the six-months period ended September 30, 2021 and the Fiscal ended March 31, 2021. For further details, please refer to the chapter titled — "*Financial Information*" at page 80.

While we believe that all our related party transactions have been conducted on an arm's length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

23. ***In addition to our existing indebtedness for our existing operations, we may incur further***

indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.

As on September 30, 2021 our Company's total fund based indebtedness is ₹ 12639.72 lakhs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favorable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

24. ***Our Company has taken certain unsecured loans from financial institutions, which may be recalled at any time.***

As on September 31, 2021, our Company has outstanding unsecured loans aggregating to ₹ 1022.50 lakhs, which have been extended by certain financial institutions and may be recalled by them at any time. In the event, any of such lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations.

25. ***Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

26. ***Our success largely depends upon the knowledge and experience of our Promoter, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.***

Our Company depends on the management skills and guidance of our Promoter and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel. Some of our employees have been associated with our Company since a long period of time and have been integral to the growth and in the success of our Company. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Directors or Key Managerial Personnel are unable or unwilling to continue in his/ her present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages and incentives to such Key Managerial Personnel. In the event we are not able to attract and retain talented employees, as required for conducting our business, or we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and operations may be adversely affected. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — "*Our Management*" on page 77 of this Draft Letter of Offer.

27. ***Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.***

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as natural disasters. Presently, we have obtained certain insurance policies. The said policies insure stock, building, furniture, fittings, from earthquake, fire, shock, terrorism, etc. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

28. ***Our Company is subject to foreign exchange control regulations which can pose a risk of currency fluctuations.***

During the financial year 2020-21, our Company had foreign exchange earnings of Rs. Nil (inflow) and outgo of Rs. 124.12 Lakhs (outflow) in accordance with the rules and regulations prescribed under FEMA. Due to non-receipt of such payments in a timely manner, our Company may fail to adhere to the prescribed timelines and may be required to pay penalty to the appropriate authority or department to regularize the payment. Further, our international operations make us susceptible to the risk of currency fluctuations, which may directly affect our operating results. In case we are unable to adhere to the timelines prescribed under the applicable laws or are unable to mitigate the risk of currency fluctuation, it could adversely affect our business, results of operations, financial conditions and cash flows.

29. ***Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations.

30. ***The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled "Objects of the Issue".***

As the issue size shall be less than ₹10,000 lakhs, under Regulation 41 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Rights Issue Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoter shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — "*Objects of the Issue*" on page 52 of this Draft Letter of Offer.

31. ***We have not commissioned an industry report for the disclosures made in the chapter titled "Industry Overview" and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.***

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled "*Industry Overview*" of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

ISSUE SPECIFIC RISKS

32. ***Our Company will not distribute the Draft Letter of Offer and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.***

Our Company will dispatch this Draft Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the "**Offering Materials**") to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e- mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

33. ***SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020 and January 19, 2021, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020 and January 19, 2021 and April 22, 2021, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see "*Terms of the Issue*" on page 159 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

34. ***The B-WAP payment mechanism facility proposed to be used for this Issue may be exposed to risks, including risks associated with payment gateways.***

In accordance with SEBI Relaxation Circulars, a separate R-WAP facility (accessible at www.bigshareonline.com), has been instituted for making an Application in this Issue by resident Investors (only in the event such Investors are not able to utilize the ASBA facility for making an Application despite their best efforts). Further, B-WAP is only an additional option and not a replacement of the ASBA process. On B-WAP, the resident Investors can access and fill the Application Form in electronic mode and make online payment using the internet banking or UPI facility from their own bank account thereat. For details, see "*Terms of the Issue - Making of an Application through the Registrar's Web-based Application Platform ("B-WAP") process*" on page 159. Such payment gateways and mechanisms are faced with risks such as:

- keeping information technology systems aligned and up to date with the rapidly evolving technology in the payment services industries;
- scaling up technology infrastructure to meet requirements of growing volumes;
- applying risk management policies effectively to such payment mechanisms;
- keeping users' data safe and free from security breaches; and
- effectively managing payment solutions logistics and technology infrastructure.

Further, B-WAP is a new facility which has been instituted due to challenges arising out of the COVID-19 pandemic. We cannot assure you that B-WAP will not suffer from any unanticipated system failure or breakdown or delay, including failure on part of the payment gateway, and therefore, your Application may not be completed or may be rejected. These risks are indicative and any failure to manage them effectively can impair the efficacy and functioning of the payment mechanism for this Issue. Since Application process through B-WAP is different from the ASBA process, there can be no assurance that investors will not find difficulties in accessing and using the B-WAP.

35. ***The entitlement of Equity Shares to be allotted to investors applying for Allotment in physical form, will be kept in abeyance.***

In accordance with the SEBI ICDR Regulations, the option to receive the Rights Equity Shares in physical form will not be available after a period of six months from the date of coming into force of the SEBI ICDR Regulations, i.e., May 10, 2019. Since, the Rights Equity Shares offered pursuant to this Issue will be Allotted only after May 10, 2019, the entitlement of Rights Equity Shares to be Allotted to the Applicants who have applied for Allotment of the Rights Equity Shares in physical form will be kept in abeyance in electronic mode by our Company until the Applicants provide details of their demat account particulars to the Registrar. Pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

36. ***Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation (the last day for which is [●], [●]), such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

37. ***No market for the Rights Entitlements may develop and the price of the Rights Entitlements may be volatile.***

No assurance can be given that an active trading market for the Rights Entitlements will develop on the Stock Exchanges during the Renunciation Period or that there will be sufficient liquidity in Rights Entitlements trading during this period. The trading price of the Rights Entitlements will not only depend on supply and demand for the Rights Entitlements, which may be affected by factors unrelated to the trading in the Equity Shares, but also on the quoted price of the Equity Shares, amongst others. Factors affecting the volatility of the price of the Equity Shares, as described herein, may magnify the volatility of the trading price of the Rights Entitlements, and a decline in the price of the Equity Shares will have an adverse impact on the trading price of the Rights Entitlements. Since the trading of the Rights Equity Shares will be on a separate segment compared to the Equity Shares on the floor of the Stock Exchanges, the trading of Rights Equity Shares may not track the trading of Equity Shares. The trading price of the Rights Entitlements may be subject to greater price fluctuations than that of the Equity Shares.

38. ***Investment in Rights Equity Shares is exposed to certain risks. From the Call Record Date for each Call prior to the final Call, the trading of the Rights Equity Shares would be suspended for an applicable period under the applicable law. Further, the Rights Equity Shares will not be traded with effect from the Call Record Date for the final call fixed for the determination of the Investors liable to pay Call Monies, as determined by our Board at its sole discretion, from time to time. The holders of the Rights Equity Shares will not be able to trade in these securities till they are credited to the holders' account as fully paid-up. Further, until the subsistence of Rights Equity Shares, we may not be able to undertake certain forms of equity capital raising.***

The Issue Price is ₹ [●] per Rights Equity Share. Investors will have to pay ₹ [●] per Rights Equity Shares which constitutes 50% of the Issue Price on Application and the balance ₹ [●] per Rights Equity Shares which constitutes 50% of the Issue Price on one or more subsequent Call(s), as determined by our Board at its sole discretion, from time to time. The Rights Equity Shares offered under this Issue will be listed under a separate ISIN. An active market for trading may not develop for the Rights Equity Shares. This may affect the liquidity of the Rights Equity Shares and restrict your ability to sell them. If our Company does not receive the Call Money as per the timelines stipulated in the Call notice, unless extended by our Board, the defaulting Rights Equity Shareholders will be liable to pay interest as may be fixed by our Board unless waived or our Company may forfeit the Application Money and any Call Money received for previous Calls made, in accordance with the Companies Act, 2013 and our Articles of Association. For details, see "***Terms of the Issue***" beginning on page 159 of this Draft Letter of Offer. Rights Equity Shareholders are only entitled to dividend in proportion to the amount paid up and the voting rights (exercisable on a poll) by investors shall also be proportional to such investor's share of the paid-up equity capital of our Company. If certain investors do not pay the full amount, we may not be able to raise the amount proposed under this Issue. The ISIN representing partly paid-up Rights Equity Shares will be terminated after the Call Record Date for the final Call. On payment of the final Call in respect of the partly paid-up Rights Equity Shares, such partly paid-up Rights Equity Shares would be converted into fully paid-up Equity Shares and shall be listed and identified under the existing ISIN for our fully paid-up Equity Shares. Our Company would fix a Call Record Date for the purpose of determining the list of allottees to whom the notice for the final Call would be sent. From the Call Record Date for each Call prior to the final Call, the trading of the Rights Equity Shares would be suspended for an applicable period under the applicable law. Further, with effect from the Call Record Date, trading in the partly paid-up Equity Shares for which final Call have been made, would be suspended prior to the Call Record Date, for such period as may be applicable under the rules and regulations. Furthermore, the holders of the partly paid-up Rights Equity Shares will not be able to trade in these shares until they are credited to the holders' account as fully paid-up Rights Equity Shares. Similarly, for an applicable period, from the Call Record Date for each Call, the trading of the Rights Equity Shares would be suspended under the applicable law.

Further, there is little history of trading of partly paid-up shares in India and therefore there could be less liquidity in this segment, which may cause the price of the Rights Equity Shares to fall and may limit ability of Investors to sell the Rights Equity Shares. There may also be a risk of the Rights Equity Shares not forming part of the index. Further, until the subsistence of Rights Equity Shares, we cannot undertake further rights issues, further public offers or bonus issues. In terms of Regulations 62 and 104 of the SEBI ICDR Regulations, an issuer making a rights issue or further public offer is required to ensure that all its existing partly paid-up equity shares have either been fully paid-up or have been forfeited. Additionally, a bonus issue will not be permitted under law till the subsistence of partly paid-up equity shares in terms of Regulation 293 of the SEBI ICDR Regulations.

39. ***Non-receipt of complete Call Money(ies) may have an impact of a consequential shortfall in Net Proceeds.***

The Calls shall be deemed to have been made at the time when the resolution authorizing such calls is passed at the meeting of our Board. The Calls may be revoked or postponed at the discretion of our Board, from time to time. Pursuant to the provisions of the Articles of Association, the Investors would be given at least 14 days' notice for the payment of the Calls. Our Board may, from time to time at its discretion, extend the time fixed for the payments of the Calls. Our Company, at its sole discretion, may send reminders for the calls as it deems fit, and if it does not receive the Call Money(ies) as per the timelines stipulated, it would forfeit the Application Money. Non-receipt of complete Call Money(ies) and a consequential forfeiture of the Application Money may lead to a shortfall in the Net Proceeds, which may have to be met out of internal accruals and may impact the business and capital expenditure plans. For details, see "***Objects of the Issue***" beginning on page 52 of this Draft Letter of Offer.

40. ***Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

41. ***Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

42. ***You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

43. ***You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

44. ***There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

45. ***Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

46. ***Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

47. ***Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may F significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

48. ***Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

49. ***The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations***.

The outbreak, or threatened outbreak, of any severe epidemic caused due to viruses (particularly the Novel Coronavirus) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of Novel Coronavirus has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding Novel Coronavirus and no government-certified treatment or vaccine is available. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of Novel Coronavirus remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts. If any of our employees were suspected of contracting Novel Coronavirus or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all of any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector in particular. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

50. ***Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.***

Our financial statements of assets and liabilities as at March 31, 2021 and statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2021 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

51. ***Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.***

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

52. ***A slowdown in economic growth in India could cause our business to suffer.***

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

53. ***Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules ("GAAR") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent maybe time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

54. ***Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

55. ***Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

56. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

57. ***Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure.

Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2020 ("Finance Act") on March 27, 2020, pursuant to assent received from the President, and the Finance Act will come into operation with effect from July 1, 2020 There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 ("Bill") has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

58. ***The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

59. ***We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- hostile or war like situations with the neighboring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

60. ***Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

Global Outlook

According to the World Bank, the global economy is on a path of robust recovery, with a projected growth of 5.6% in 2021—the strongest post-recession pace in 80 years. The real GDP of advanced economies is projected to expand by 5.4% whereas emerging markets and developing economies are expected to grow by 6.0%. However, the pace of recovery is diverging across countries, reflecting variations in pandemic-induced disruptions and the extent of policy support.

In the first half of 2021, the global recovery was primarily led by the US and China. The two largest economies are expected to grow by 6.8% and 8.5%, respectively, and are likely to contribute about one quarter each of global growth in 2021. Recovery in several emerging markets and developing economies is likely to be constrained by the resurgence of Covid-19 infections, uneven vaccinations, and limited fiscal space.

Inflation is emerging as a key risk to sustainable global economic recovery. Energy and industrial commodity prices have continued their upward surge. Average crude oil prices in Q2 increased by >13% q/q due to both higher demand and OPEC-induced supply constraints. The average price of aluminum and copper also increased by >14% in Q2/Q1. The IMF has warned that rising inflation, notably in the US, can pose significant risks of an earlier-than-expected tightening of monetary policy by the Federal Reserve, which could lead to significant capital outflows from emerging economies. Therefore, we would do well to make our policy environment as attractive as possible to foreign investors.

Compared to steady expansion in the first five months of 2021, the global Purchasing Managers' Index (PMI) recorded slower growth in June and July. However, it continues to remain in the expansion zone. In Asia, the manufacturing PMI witnessed deceleration in China. In India, manufacturing PMI rose to a three-month high of 55.3 in July, reflecting likely expansion of manufacturing activity in the coming months. India's services PMI improved to 45.4 but remained in the contraction zone.

Markets

With countries around the world ramping up their vaccination campaigns, especially in Europe and the US, the global equity market rose in the second quarter of 2021. The second quarter was strong for US equities. The S&P 500 had a strong start in this period. Almost all sectors made gains and reached a new all-time high in late June. Eurozone shares gained and the earnings for the first quarter of 2021 were generally very robust, except in the healthcare sector. UK equities performed well over the second quarter and small and mid-cap ("SMID") equities outperformed during this time period. Emerging market requisite registered a strong return.

Subsequent to a fairly robust recovery in the March quarter, the Indian economy was impacted by a much stronger Covid second wave, leading to imposition of strict curbs across states and decline in economic activity. High-frequency indicators, such as PMI, cement and steel production, power demand, auto sales, etc., show that recovery was negatively impacted in the June quarter. The RBI, in the monetary policy review in June, lowered its projection of real GDP growth for FY22 from 10.5% to 9.5%.

However, as per consensus estimates, despite downward revision in GDP growth projections, India is expected to be amongst the fastest-growing major economies in the world. A strong rebound is expected on the back of rapid vaccinations, a recovering monsoon boosting agricultural output, thrust on infrastructure investments by the Government, growth in exports, which have performed remarkably during April–June registering a growth of 18% over the same period in the pre-pandemic year of 2019-20. We also expect consumption to recover in the third and fourth quarters of the fiscal year.

Policy Support and Vaccines Expected to Lift Activity

Although recent vaccine approvals have raised hopes of a turnaround in the pandemic later this year, renewed waves and new variants of the virus pose concerns for the outlook. Amid exceptional uncertainty, the global economy is projected to grow 5.5 percent in 2021 and 4.2 percent in 2022. The 2021 forecast is revised up 0.3 percentage point relative to the previous forecast, reflecting expectations of a vaccine-powered strengthening of activity later in the year and additional policy support in a few large economies.

The projected growth recovery this year follows a severe collapse in 2020 that has had acute adverse impacts on women, youth, the poor, the informally employed, and those who work in contact-intensive sectors. The global growth contraction for 2020 is estimated at -3.5 percent, 0.9 percentage point higher than projected in the previous forecast (reflecting stronger-than-expected momentum in the second half of 2020).

The strength of the recovery is projected to vary significantly across countries, depending on access to medical interventions, effectiveness of policy support, exposure to cross-country spillovers, and structural characteristics entering the crisis (*Figure 1*).

Policy actions should ensure effective support until the recovery is firmly underway, with an emphasis on advancing key imperatives of raising potential output, ensuring participatory growth that benefits all, and accelerating the transition to lower carbon dependence. As noted in the October 2020 World Economic Outlook (WEO), a green investment push coupled with initially moderate but steadily rising carbon prices would yield needed emissions reductions while supporting the recovery from the pandemic recession

Strong multilateral cooperation is required to bring the pandemic under control everywhere. Such efforts include bolstering funding for the COVAX facility to accelerate access to vaccines for all countries, ensuring universal distribution of vaccines, and facilitating access to therapeutics at affordable prices for all. Many countries, particularly low-income developing economies, entered the crisis with high debt that is set to rise further during the pandemic. The global community will need to continue working closely to ensure adequate access to international liquidity for these countries. Where sovereign ddebt is unsustainable, eligible countries should work with creditors to restructure their debt under the Common Framework agreed by the G20.

Indian Outlook

After the 2020 huge GDP contraction, economic growth is projected to bounce back in 2021, driven by pentup demand for consumer and investment goods, before declining in 2022. The dramatic infections upsurge since February has weakened the nascent recovery and may compound financial woes of corporates and banks. As public anxiety over the virus spreads and lockdowns multiply, high-frequency indicators suggest that a marked slowdown may have taken place in the April-June quarter, although the overall annual impact is likely to be muted. Wholesale and retail inflation rates remain elevated, but within the target range of the central bank.

The damage that COVID-19 continues to inflict on the poor makes it necessary to prioritise policies that reduce scarring effects, in particular for children that have been out of school for months, and increase investment and employment opportunities. The banking sector remains fragile, although the proposal to create an asset recovery company and the planned privatisation of two public banks testify to the authorities' commitment to reforms. The healthy foreign exchange reserves position should provide sufficient buffers to deal with any potential external shock-driven capital-stop or outflows in the period ahead.

India's new confirmed COVID-19 virus infections have risen very rapidly, from a daily minimum of 13,000 cases in late January to more than 400 000 in early May. Although about 20% of the population is estimated to have antibodies, a rapidly transmissible strain doing the rounds, laxity in the application of social distancing and chronic underinvestment in public health make the situation calamitous. Localised containment measures have been reinstated and are impacting mobility, but a new nation-wide lockdown is unlikely. The inoculation rollout is slow, with domestic take-up far below the pace needed to meet the goal of vaccinating 300 million people by August. The National COVID-19 Vaccination Programme that has come into effect in May 2021 could help close that gap, notably by increasing vaccine supply and opening access to anybody beyond the age of 18.

Backed by strong foreign institutional investment ("**FII**") inflows and robust earnings in the March 2021 quarter, the Indian stock markets also traded at record high levels. Both the benchmark indices, Nifty 50 and S&P BSE Sensex, scaled new heights. After Fils sold equities worth USD 1.3 billion in April 2021 and USD 0.4 billion in May 2021, they invested USD 2.4 billion in Indian equities in June 2021. On the debt side, Flls pulled out funds from Indian debt instruments through June 2021 and made net sales worth USD 0.7 billion. This was the sixth consecutive month when they remained net sellers of the Indian debt.

India expected to fare better than developed economies and recover to a high growth path in the coming years

India's real gross domestic product ("**GDP**") has sustained an average growth between 6% and 7% since FY 1991. India has been the fastest-growing G20 economy since FY 2015, with an annual growth rate hovering around 7%. India's economy grew at 7% in FY 2019. The real growth rate declined to 4% in FY 2020 and witnessed a degrowth of 7.3% in FY 2021 due to the outbreak of the COVID-19 pandemic, which led to the imposition of lockdowns towards the last quarter of FY 2020 and a major part of the first quarter of FY 2021 causing a contraction in the economy. The impact of COVID-19 has caused several large economies to shrink. It is being estimated that India's GDP is expected to resume its pre-COVID growth momentum by FY22.

India witnessed a lower-case load in the 3rd quarter along with economic recovery, which continued till the mid of the 4th quarter of FY2021. However, since early March 2021, there has been a continuous rise in the number of COVID -19 cases in India. Daily new cases had risen to more than 0.2 million at the start of April 2021, and it increased to more than 0.3 million towards the end of April 2021. At the start of FY 22, projections of the Indian government, the IMF, and other organizations projected India's GDP to resume its pre-COVID growth momentum in FY22. This was in the backdrop of India witnessing a lower-case load in the 3rd quarter of FY 21 and the economic recovery that ensued during that period and in the following quarter 4. India launched its vaccination drive on 16 January. The vaccination scope was also widened to include all adults from the earlier approach of vaccinating only above the age group of 45 years. With the revised vaccination policy currently underway, India plans to vaccinate its entire population by December 2021.

In May 2021, the Consumer Price Index (CPI) inflation rose to 6.3% and breached RBI's threshold of 4(+/-2)% for the first time in six months, whereas the Wholesale Price Index (WPI) inflation spiked to an 11-year high of 12.9%. CPI inflation declined to 5.6% and WPI came down to 11.2% in July. Current high inflation is largely due to supply-side factors rather than demand-side issues and hence can be expected to be transitory.

After phased unlocking post the second Covid wave, economic activity has gained strength. The Government has also stepped in to provide another dose of stimulus of ₹ 6.3 lakh crore, focused on healthcare, tourism, agriculture, infrastructure, MSMEs and exports. As growth momentum gathers pace, supported by the measures undertaken by the government, the Indian economy will emerge stronger on a sustainable development path.

Specialty Chemicals

Global Position of India in Chemical Industry

Globally, India is fourth-largest producer of agrochemicals and sixth-largest producer of chemicals and also third largest consumers of Polymers. The Indian chemicals industry makes up 3.4% of the global chemicals industry. In 2019, the Indian chemicals market stood at US$ 178 billion and is forecast to reach US$ 304 billion by 2025.

India is the second-largest manufacturer and exporter of dyes and accounts for ~16% of the world production. According to the Basic Chemicals, Cosmetics & Dyes Export Promotion Council, the export value of dye in India stood at US$ 2.3 billion as of FY21.

Indian colorants industry has emerged as a key player with a global market share of ~15%. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals).

Indian Chemical Industry

The Indian chemical industry is one of the oldest industries in India and is a critical part of the Indian economy. Chemical industry is the mainstay of industrial and agricultural development of the country and provides building blocks for several downstream industries such as textiles, papers, paints, soaps, detergents, pharmaceuticals, varnish automotive, personal care, construction & engineering, food production and processing etc. With the increase in industrial activity, the demand for chemicals also increased, which resulted in higher international trade.

Covering more than 80,000 products, this industry services large number of end use application industries. It is estimated that Indian Chemical Industry employs more than 2 million people.

Indian chemical industry comprises of both small scale as well as large scale units. With initiatives like "Make in India" program gaining steam, investments, innovation and infrastructure are going to be the major thrust areas for chemical industry players. The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals.

The Indian chemicals industry stood at US$ 178 billion in 2019 and is expected to reach US$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US$ 300 billion to India's GDP by 2025.An investment of Rs. 8 lakh crore (US$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. In April 2021, production of key chemicals was 850,622 MT and petrochemicals was 1,868,939 MT.

(***Source****: Make in India; FICCI; IBEF*)

Speciality Chemical Market

Speciality Chemicals are derivatives of basic chemicals that are manufactured for specific end-use solutions. The characteristics of these chemicals include high value, high R&D and low volume. lndia also produces a large number of fine and specialty chemicals, which have very specific uses and are essential for increasing industrial production. These find wide usage as food additives and pigments, polymer additives, anti-oxidants in the rubber industry, etc. Specialty chemicals constitute for 22% of the total chemicals and petrochemicals market in India and Specialty chemicals account for more than 50% of total chemical exports from India. The Indian specialty chemicals sector is expected to increase at a CAGR of 12.4%, from US$ 32 billion in 2019 to an estimated US$ 64 billion by 2025.

With global companies seeking to de-risk their supply chains, which are dependent on China, the chemical sector in India has the opportunity for a significant growth. Recent pollution control measures in China have also resulted in the closure of many factories in that country. It is directly benefiting their Indian counterparts. The India's specialty chemicals companies are also expanding their capacities to cater to rising demand from domestic and overseas.

Rise in demand from end-user industries such as food processing, personal care and home care is driving development of different segments in India's specialty chemicals market. Specialty chemical companies in India have started accelerating their capex plan on the back of strong growth visibility and emerging opportunities.

Key growth drivers for demand of speciality chemicals

- A global shift towards Asia as the World's chemicals manufacturing hub.
- Per capita consumption of chemicals in India is lower as compared to western countries, so immense scope for new investments.
- A focus on new segments such as specialty and knowledge chemicals.
- strong R&D capabilities.

Key growth drivers in the end-user industry for specialty chemicals

- India has witnessed increasing demand for wide range of cosmetic chemicals, health care products and hygiene products that use specialty chemicals and polymers. This segment is likely to outperform other segments.
- With increasing demand for disinfestation of personal and public places post COVID-19, the chloro-alkali, ethanol, personal care, and surfactant industry is expected to record significant growth in near future.
- Further, according to reports, by 2030, India is likely to have ~80% of the households in the middle-income group. The growing middle-class and increasing urbanisation is driving the demand for personal care, agrochemicals, food, paints & coatings resulting into higher consumption of chemicals per capita.

Research & Development (R&D)

The Chemical sector is highly heterogeneous encompassing many segments like organic, in-organics, dyestuffs, pesticides, paints, soaps and petrochemicals etc. Research and Development is critical and of paramount importance for the growth and development of this sector. Continued R&D efforts in the part of the industry helps to improve their quality standards, obtain higher yields resulting in reduction in cost of production and to earn competitive edge in the International Market. Indian Chemical Industry spends about 2-3% of their total turnover on R&D, as against 9-10% by the multi-national companies in overseas countries. The industry would, therefore, have to make large investments in R&D to successfully counter competition from the international chemicals industry. lndia has a number of scientific institutions and the country's strength lies in its large pool of highly trained scientific manpower.

Investments and Recent Developments

A few recent developments/investments in the Indian chemical sector are as follows:

- In August 2021, Privi Speciality Chemicals Limited collaborated with Givaudan to strengthen manufacturing capabilities of its speciality fragrance ingredient products by establishing a production unit in Mumbai to manufacture small-volume fragrance ingredients.
- In August 2021, Adani Enterprises diversified into petrochemical sector by establishing Adani Petrochemicals Ltd. (APL), a new wholly-owned subsidiary.
- In August 2021, Swastik Interchem Pvt. Ltd. announced plan to expand chemical production capacity to meet the rising demand across industries.
- In July 2021, Rossari Biotech announced plan to acquire Tristar Intermediates Pvt. Ltd. for Rs. 120 crore (US$ 16.19 million) to strengthen its capabilities. The acquisition is expected to create opportunity in the specialty chemicals sector in India.
- As of June 2021, Reliance Industries (RELI.NS), which operates the world's largest refining facility in Jamnagar, Gujarat, plans to invest US$ 10.1 billion in clean energy over the next three years to become a net carbon zero corporation by 2035.
- In January 2020, Ultramarine & pigments have successfully commissioned the Sulphonation plant setup in Nellore, Andhra Pradesh, to manufacture surfactants and specialty chemicals.

- In November 2020, Indian companies are witnessing interest from strategic investors led by Japan, Korea

and Thailand, as they seek to diversify supply chains from China. This includes large deals in FY 2020—KKR's $414 million acquisition of JB Chemicals and Pharmaceuticals Ltd. and Carlyle's $210 million acquisition of SeQuent Scientific Ltd.

- On November 06, 2020, HIL (Hindustan Insecticides Limited) signed a memorandum of understanding with the Department of Chemicals & Petro Chemicals to achieve revenue target of Rs. 451 crore (US$ 60.86 million).
- On November 04, 2020, Pidilite Industries acquired Huntsman Group's Indian subsidiary for Rs. 2,100 crore (US$ 283.38 million) to strengthen adhesives and sealants portfolio that will complement the company's retail portfolio.
- In October 2020, Grasim Industries signed a definitive agreement with Lubrizol Advanced Materials (speciality chemical company) to manufacture and supply chlorinated polyvinyl chloride (CPVC) resin in Gujarat. The initial production is expected to begin in end-2022.

Government Initiatives

The government has started various initiatives such as mandating BIS-like certification for imported chemicals to prevent dumping of cheap and substandard chemicals into the country.

The Indian government recognises chemical industry as a key growth element and forecast to increase share of the chemical sector to ~25% of the GDP in the manufacturing sector by 2025.

- In July 2021, the government announced discovery of indigenous deposits of Phosphatic rocks. This will help expand fertiliser production domestically and boost the country's self-reliance in fertiliser production.
- The Odisha government accepted investment applications worth ~US$ 345 million in the metal, cement, chemical, plastic, food processing and manufacturing sectors in April 2021. This is likely to generate 2,755 jobs.
- The Production-linked Incentive (PLI) plan for the National Programme on Advanced Chemistry Cell Battery Storage has been approved by the Union Cabinet as of May 2021.
- Under the Union Budget 2021-22, the government allocated Rs. 233.14 crore (US$ 32.2 million) to the Department of Chemicals and Petrochemicals.
- The Government of India is considering launching a production linked incentive (PLI) scheme in the chemical sector to boost domestic manufacturing and exports.
- A 2034 vision for the chemicals and petrochemicals sector has been set up by the government to explore opportunities to improve domestic production, reduce imports and attract investments in the sector. The government plans to implement production-link incentive system with 10-20% output incentives for the agrochemical sector; to create an end-to-end manufacturing ecosystem through the growth of clusters.
- In October 2020, the government urged players in the agrochemicals industry to come out with new molecules of global standards for the farmers' benefit, while CropLife India, the industry body, pitched for stable policies and regulatory regimes to boost growth in the sector.
- 100% FDI is allowed under the automatic route in the chemicals sector with few exceptions that include hazardous chemicals. Total FDI inflow in the chemicals (other than fertilisers) sector reached US$ 18.06 billion between April 2000 and September 2020.
- The government has proposed several incentives for setting up a sourcing or manufacturing platform within an Indian SEZ, such as :

Plastic Industry

Introduction

Polymers are used widely as a substitute of metal and mineral based products due to its high performance, cost-effectiveness, and low weight. Polymer is one of the widely used chemical products in almost all the sectors such a medical, aerospace, packaging, automotive, construction, electrical appliances, and medical sector, and consequently, the global polymers market is thriving.

Global Polymers Market size is forecast to reach around $ 750 billion by 2025, after growing at a CAGR of 5.1% during 2020-2025.

The Indian plastics industry made a promising beginning in 1957 with the production of polystyrene. Thereafter, significant progress has been made, and the industry has grown and diversified rapidly. The industry spans the country and hosts more than 2,000 exporters. It employs about 4 million people and comprises more than 30,000 processing units, 85-90% of which are small and medium-sized enterprises. In FY20, plastic and linoleum export from India stood at US$ 7.55 billion. During April 2019 to January 2020, plastic export stood at US$ 7.045 billion with the highest contribution from plastic raw material at US$ 2.91 billion, plastic sheets, films, and plates at US$ 1.22 billion and packaging materials at US$ 722.47 million.

India exported plastics worth US$ 813 million in October 2020, and the export during April 2020 to October 2020 was US$ 5.58 billion. The total plastic and linoleum export during April 2020 to November 2020 was US$ 4.90 billion and for the month of November 2020, it was US$ 507.06 million.

The Indian plastics industry produces and export a wide range of raw materials, plastic-moulded extruded goods, polyester films, moulded/ soft luggage items, writing instruments, plastic woven sacks and bags, polyvinyl chloride (PVC), leather cloth and sheeting, packaging, consumer goods, sanitary fittings, electrical accessories, laboratory/ medical surgical ware, tarpaulins, laminates, fishnets, travel ware, and others.

The Indian plastics industry offer excellent potential in terms of capacity, infrastructure, and skilled manpower. It is supported by many polymer producers, plastic process machinery and mould manufacturers in the country.
Among the industry's major strengths is the availability of raw materials in the country. Thus, plastic processors do not have to depend on import. These raw materials, including polypropylene, high-density polyethylene, low-density polyethylene, and PVC, are manufactured domestically.

Recent Developments

The Department of Chemicals and Petrochemicals has approved 10 Plastic Parks in the country, out of which 6 parks have been given final approval in the below states:

- Assam (1 nos.)
- Madhya Pradesh (2 nos.)
- Odisha (1 nos.)
- Tamil Nadu (1 nos.)
- Jharkhand (1 nos.)

The Detailed Project Reports are under evaluation for two Plastic Park in Uttarakhand and Chhattisgarh respectively and proposal for setting up of two new Plastic Parks are under process.

These Plastic Parks will help to achieve environmentally sustainable growth and increase employment.

Plastics Export Promotion Council

The Plastics Export Promotion Council (PLEXCONCIL) is the apex Government body responsible for the promotion of plastic export. PLEXCONCIL members comprise large-/medium-/small-scale manufacturers and exporters. The council supports exporters by participating in international trade fairs, exploring new markets, organising buyer- seller meets both in India and overseas, and engaging in various other promotion and need-based activities.

In FY20 (till January 2020), plastic exports stood at US$ 7.045 billion with the highest contribution from plastic raw materials at US$ 2.91 billion; plastic sheets, films, and plates at US$ 1.22 billion; and packaging materials at US$ 722.47 million.

Key Strengths

Our competitive strengths are as follows:

We believe that presently we are only manufacturer of Organotin Stabilizers or MTM right from tin metal in India and amongst very few globally.

We are the only homegrown manufacturer in India with an in house R&D function, manufacturing MTM right from tin metal. Few other players in the world have such technological capability. Our Organotin stabilizers are US FDA compliant, giving us the ability to supply all over the world and substitute costly imports for Indian manufacturers locally. Further, Organotin is the only heat stabilizer used in the manufacture of CPVC pipes & fittings. The demand for Organotin stabilizers – lead-free alternative additives – is witnessing a rise both in India as well as globally. We believe that the nascent Indian market of CPVC (Chlorinated polyvinyl chloride) pipes and fittings in India is estimated to grow at more than 100% CAGR over the next 2-3 years.

NEW DELHI

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

(Referred to in paragraph 2 (f) under 'Report on Other Legal and Regulatory Requirements' of our report of even date)

REPORT ON THE INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING UNDER CLAUSE (i) OF SUB-SECTION 3 OF SECTION 143 OF THE COMPANIES ACT, 2013 ("THE ACT")

We have audited the internal financial controls over financial reporting of VIKAS ECOTECH LIMITED ("the Company") as of March 31, 2021 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's management is responsible for establishing and maintaining internal financial controls based on "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITORS' RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on my/our audit conducted in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate Internal Financial Controls over Financial Reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

NEW DELHI

MEANING OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS OVER FINANCIAL REPORTING

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

Except for the possible impact due to matter reported in other matters para, in our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2021, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

Other Matters

With reference to stock and inventory, the company needs to make its inventory management system including physical stock taking process more effective and robust. Further the company also needs to improve its process for conduct of physical verification of fixed assets in phased manner at regular intervals and also process for obtaining balances confirmations from suppliers or customers at regular interval.

Subsequent expenditures related to an item of property, plant and equipment are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized, when replaced. All other repair and maintenance costs are recognised in the Statement of Profit and Loss during the reporting period in which they are incurred.

The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is derecognised.

Depreciation methods, estimated useful lives and residual values

Assets are depreciated to the residual values on a written down value method over the estimated useful lives of the assets, derived as per the Schedule II of the Companies Act, 2013, which are as follows:-

	Useful lives
Office building	60 years
Leasehold Improvement (Office)	60 years
Leasehold Improvement (Factory Building)	30 years
Plant and machinery	10 - 15 years
Office equipment	5 years
Furniture and fixtures	10 years
Vehicles – Motor cycles and scooters	10 years
Vehicles – Motor cars	8 years
Computers	3 years
Leasehold land	Period of lease or useful life, whichever is less

In case of intangible assets, amortistion has been done considering useful life as 3 years derived on the basis of management judgement and estimate.

The residual values are not more than 5% of the original cost of the asset. The assets' residual values and useful lives are reviewed at each financial year end or whenever there are indicators for impairment, and adjusted prospectively, as appropriate.

As asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in Statement of Profit and Loss within other gains/ (losses). Depreciation is calculated on a pro-rata basis for assets purchased/ sold during the year.

c) **Impairment of non-financial assets**

The Company assesses, at each reporting date, whether there is an indication that a non-financial asset maybe impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units' (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. Impairment losses, if any, are recognized in Statement of Profit and Loss.

A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited to the extent the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation or amortisation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognized in the Statement of Profit and Loss when the asset is carried at the revalued amount, in which case the reverse is treated as a revaluation increase.

d) **Leases – Company as a lessee**

The determination of whether an arrangement is(or contains) a lease is based on the substance of an arrangement at inception date: whether fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset, even if that right is not explicitly specified in an arrangement.

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease.

Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in finance costs in the Statement of Profit and Loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's policy on the borrowing costs.

Leased assets are depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term and escalation in the contract, which are structured to compensate expected general inflationary increase are not straight-lined. Contingent rents are recognized as expense in the period in Statement of Profit and Loss in which they are incurred.

e) **Cash and cash equivalents**

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the Statement of Cash Flows.

f) **Financial instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are initially recognised when the Company becomes a party to the contractual provisions of the instrument. All financial assets are recognised initially at fairvalue plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial assets.

Classification and subsequent measurement

For the purpose of subsequent measurement, the Company classifies financial assets in following categories:

- Financial assets at amortized cost
- Financial assets at fair value through other comprehensive income (FVTOCI)
- Financial assets at fair value through profit or loss (FVTPL)
- Equity investments measured at fair value through other comprehensive income (FVTOCI)

Financial assets at amortised cost

The category applies to the Company's trade receivables, unbilled revenue, other bank balances, security deposits, etc.

A financial asset being a 'debt instrument' is measured at amortised cost if both the following conditions are met:

a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows and

b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss.

Financial assets at FVTOCI

A financial asset being a 'debt instrument' is measured at FVTOCI if both the following conditions are met:

· The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and

· The asset's contractual cash flows represent SPPI.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Company recognizes interest income, impairment losses & reversals in the Statement of Profit and Loss. On de-recognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to Statement of Profit and Loss.

Financial assets at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization at amortized cost or at FVTOCI, is classified at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit and Loss. The Company does not have any financial assets which are measured through FVTPL.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch'). The Company has not designated any debt instrument at FVTPL.

Equity investments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 applies are classified as at FVTPL. There are no such investments in the Company.

De-recognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- The contractual rights to receive cash flows from the asset have expired, or
- The Company has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the financial assets that are debt instruments and are initially measured at fair value with subsequent measurement at amortised cost e.g. Trade receivables, unbilled revenue etc.

The Company follows 'simplified approach' for recognition of impairment loss allowance for trade receivables.

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, twelve month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in the subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on a twelve month ECL.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls),discounted at the original EIR.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings or payables, as appropriate.

All financial liabilities are recognised initially at fairvalue and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Company's financial liabilities include trade and other payables, security deposits, etc.

Classification and subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at FVTPL

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risks are recognized in OCI. These gains/ loss are not subsequently transferred to Statement of Profit and Loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the Statement of Profit or Loss.

NEW DELHI

Financial liabilities at amortised cost

This category includes security deposit received, trade payables etc. After initial recognition, such liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. Such changes are evident to external parties. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

g) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods

Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods have been passed to the customer. Sales are net off sales returns, free quantities delivered and trade discounts.

Export Incentives

The Company recognises Export incentives such as MEIS License as per accounting principal i.e. on accrual basis.

Commission

When the Company acts in the capacity of an agent rather than as the principal in a transaction, the revenue recognised is the net amount of commission earned by the Company. Further, Company also provides serivces related to Export Facilitation and the same has been recognised as sale of services under Revenue from Operations.

NEW DELHI

Rental income

Rental income from investment property is recognised as part of revenue from operations in profit or loss on a straight line basis over the term of the lease except where the rentals are structured to increase in line with expected general inflation. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease. Rental income from sub-leasing is also recognised in a similar manner and included under other income.

Interest income

Interest income on financial assets (including deposits with banks) is recognised as it accrues in Statement of Profit and Loss, using the effective interest rate (EIR) method (i.e. time proportionate basis) which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset.

Government grants

An unconditional government grant related to a biological asset that is measured at fair value less cost to sell is recognised in profit or loss as other income when the grant becomes receivable. Other government grants are recognised initially as deferred income at fair value when there is reasonable assurance that they will be received and the Company will comply with the conditions associated with the grant, they are recognised in profit or loss as other operating revenue on a systematic basis. Grants that compensate the Company for expenses incurred are recognised in profit or loss as other operating revenue on systematic basis in which such expenses are recognised.

Other operating income

Other operating income is recognised on accrual basis (i.e. time proportionate basis) in the accounting period in which services are rendered and in accordance with the terms of the agreement.

h) Inventories

Inventories are valued at the lower of cost or net realisable value. The cost of inventories is based on the first-in-first-out formula, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their present location and condition.

Cost incurred in bringing each product to its present location and conditions are accounted for as follows:

- Raw materials: Purchase cost on first-in-first out basis
- Finished goods and work in progress: Cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs
- Inventory related to real estate division: Valued at cost incurred

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Raw materials, components and other supplies held for use in production of finished goods are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realisable value.

Obsolete, slow moving, defective inventories, shortage/ excess are identified at the time of physical verification of inventories and wherever necessary provision/ adjustment is made for such inventories.

i) Income taxes

Income tax expenses comprises of current tax and deferred tax. It is recognised in the Statement of Profit and Loss except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

Current tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, by the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). The management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Minimum Alternate Tax ('MAT') credit entitlement under the provisions of the Income-tax Act, 1961 is recognised as a deferred tax asset when it is probable that future economic benefit associated with it in the form of adjustment of future income tax liability, will flow to the Company and the asset can be measured reliably. MAT credit entitlement is set off to the extent allowed in the year in which the Company becomes liable to pay income taxes at the enacted tax rates. MAT credit entitlement is reviewed at each reporting date and is recognised to the extent that is probable that future taxable profits will be available against which they can be used. MAT credit entitlement has been presented as deferred tax asset in the Balance sheet. Significant management judgement is required to determine the probability of recognition of MAT credit entitlement.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

j) Dividend payments

Final dividend is recognized, when it is approved by the shareholders and the distribution is no longer at the discretion of the Company. However, interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors.

k) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

l) Retirement and other employee benefits

Short term employee benefits are measured on undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

The Company post-employment benefits include defined benefit plan and defined contribution plans.

Contribution payable by the Company to the central government authorities in respect of provident fund, pension fund and employee state insurance are defined plans. A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions to a statutory authority and will have no legal or constructive obligation to pay further amounts. The Company contributions to defined contribution plans are recognized in Statement of Profit & Loss when the related services are rendered. The Company has no further obligations under these plans beyond its periodic contributions.

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. Under the defined benefit retirement plan, the Company provides retirement obligation in the form of Gratuity. Under the plan, a lump sum payment is made to eligible employees at retirement or termination of employment based on respective employee salary and years of experience with the Company.

The cost of providing benefits under this plan is determined on the basis of actuarial valuation carried out as at the reporting date by an independent qualified actuary using the projected unit credit method. Actuarial gains and losses are recognised in full in the period in which they occur in the Statement of Profit and Loss. The obligation towards the said benefit is recognised in the balance sheet as the difference between the fair value of the plan assets and the present value of the plan liabilities. Scheme liabilities are calculated using the projected unit credit method and applying the principal actuarial assumptions as at the date of Balance Sheet. Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Gratuity is covered under the Gratuity policy respectively, of Life Insurance Corporation of India (LIC).

All expenses excluding re-measurements of the net defined benefit liability (asset), in respect of defined benefit plans are recognized in the profit or loss as incurred. Re-measurements, comprising actuarial gains and losses and the return on the plan assets (excluding amounts included in net interest on the net defined benefit liability (asset)),are recognized immediately in the Balance Sheet with a corresponding debit or credit through other comprehensive income in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

m) **Provisions**

i) **General**

Provisions are recognised when the Company has a present obligation (legal or constructive)as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

When the Company expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss, net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time (i.e. unwinding of discount) is recognised as a finance cost.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

ii) **Contingent assets/ liabilities**

Contingent assets are not recognised. However, when realisation of income is virtually certain, then the related asset is no longer a contingent asset, and is recognised as an asset.

Contingent liabilities are disclosed in notes to accounts when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

n) **Earnings per share (EPS)**

Basic EPS is calculated by dividing the profit for the period attributable to ordinary equity shareholders of the Company by the weighted average number of equity shares outstanding during the year.

Diluted EPS is calculated by dividing the profit attributable to ordinary equity shareholders of the Company by the weighted average number of equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares (such as preferential shares, ESOP, share warrants, share application money, etc.) into equity shares.

o) **Fair value measurement**

The Company measures financial instruments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

I. Level 1- Quoted prices (unadjusted) in active markets for identical assets or liabilities.

II. Level 2- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

III. Level 3- Inputs for the assets or liabilities that are not based on observable market data(unobservable inputs)

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value measurement. Other fair value related disclosures are given in the relevant notes.

p) Foreign currency

Functional and presentation currency

The Company's financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. Functional currency is the currency of the primary economic environment in which an entity operates and is normally the currency in which the entity primarily generates and expends cash. All the financial information is presented in INR, except where otherwise stated.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Company at the functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Differences arising on settlement or translation of monetary items are recognised in Statement of Profit or Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fairvalue is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

Foreign exchange gains/ (losses) arising on translation of foreign currency monetary loans are presented in the Statement of Profit and Loss on net basis.

q) Corporate social responsibility expenditure

Pursuant to the requirements of section 135 of the Act and rules thereon and guidance notion "Accounting for expenditure on Corporate Social Responsibility activities" issued by ICAI, with effect from 1 April 2015, CSR expenditure is recognised as an expense in the Statement of Profit and Loss in the period in which it is incurred.

4. Segment Reporting

The Company is in the business of manufacturing of Speciality Additives, Compounds & Polymers and hence has only one reportable segment as per 'Ind-AS 108 : Operating Segments.

a) The carrying value of cash and cash equivalents, trade receivables and trade payables and liabilities approximate their fair values mainly due to short-term maturities of these instruments.

b) The fair value of other financial assets and other financial liabilities is estimated by discounting future cash flows using rates applicable to instruments with similar terms, currency, credit risk and remaining maturities. The fair values of other financial assets and other financial liabilities are assessed by the management to be same as their carrying value and is not expected to be significantly different if estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities. These are classified as level 3 fair values in the fair value hierarchy due to the inclusion of unobservable inputs.

c) The Company's borrowings have been contracted at floating rate of interest, which resets at short intervals. Accordingly, the carrying value of such borrowings (including interest accrued but not due) approximates fair value. Borrowings (current) includes unsecured loan accepted from Director of the company amounting to Rs. 10,22,50,000/- (other than amount adjusted against right issue in FY 21-22) for two years tenure has been discounted using the rate 8.00% p.a and stated at amortised cost of Rs. 8,76,62,894/-.

There are no significant unobservable inputs used in the fair value measurement.

Fair value hierarchy

All financial instrument for which fair value is recognised or disclosed are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole;

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
Level 3: Inputs for assets or liabilities that are not based on observable market data (unobservable inputs)

The following table presents the financial instruments measured at fair value, by level within the fair value measurement hierarchy:

Basis of Allotment

Subject to the provisions contained in this Draft Letter of Offer, the Abridged Letter of Offer, the Rights Entitlement Letter, the Application Form, the Articles of Association and the approval of the Designated Stock Exchange, our Board will proceed to Allot the Rights Equity Shares in the following order of priority:

a) Full Allotment to those Eligible Equity Shareholders who have applied for their Rights Entitlements of Rights Equity Shares either in full or in part and also to the Renouncee(s) who has or have applied for Rights Equity Shares renounced in their favour, in full or in part.

b) Eligible Equity Shareholders whose fractional entitlements are being ignored and Eligible Equity Shareholders with zero entitlement, would be given preference in allotment of one additional Rights Equity Share each if they apply for additional Rights Equity Shares. Allotment under this head shall be considered if there are any unsubscribed Rights Equity Shares after allotment under (a) above. If number of Rights Equity Shares required for Allotment under this head are more than the number of Rights Equity Shares available after Allotment under (a) above, the Allotment would be made on a fair and equitable basis in consultation with the Designated Stock Exchange and will not be a preferential allotment.

c) Allotment to the Eligible Equity Shareholders who having applied for all the Rights Equity Shares offered to them as part of this Issue, have also applied for additional Rights Equity Shares. The Allotment of such additional Rights Equity Shares will be made as far as possible on an equitable basis having due regard to the number of Equity Shares held by them on the Record Date, provided there are any unsubscribed Rights Equity Shares after making full Allotment in (a) and (b) above. The Allotment of such Rights Equity Shares will be at the sole discretion of our Board in consultation with the Designated Stock Exchange, as a part of this Issue and will not be a preferential allotment.

d) Allotment to Renouncees who having applied for all the Rights Equity Shares renounced in their favour, have applied for additional Rights Equity Shares provided there is surplus available after making full Allotment under (a), (b) and (c) above. The Allotment of such Rights Equity Shares will be made on a proportionate basis in consultation with the Designated Stock Exchange, as a part of this Issue and will not be a preferential allotment.

e) Allotment to any other person, that our Board may deem fit, provided there is surplus available after making Allotment under (a), (b), (c) and (d) above, and the decision of our Board in this regard shall be final and binding.

After taking into account Allotment to be made under (a) to (d) above, if there is any unsubscribed portion, the same shall be deemed to be ‘unsubscribed’.

Upon approval of the Basis of Allotment by the Designated Stock Exchange, the Registrar shall send to the Controlling Branches, a list of the Investors who have been allocated Rights Equity Shares in this Issue, along with:

1. The amount to be transferred from the ASBA Account to the separate bank account opened by our Company for this Issue, for each successful Application;
2. The date by which the funds referred to above, shall be transferred to the aforesaid bank account; and
3. The details of rejected ASBA applications, if any, to enable the SCSBs to unblock the respective ASBA Accounts.

While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) ("**DPIIT**"), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The DPIIT issued the Consolidated FDI Policy Circular of 2020 ("**FDI Circular 2020**"), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail.
