## **ENFORCEMENT OF CIVIL LIABILITIES**

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the "Civil Procedure Code"). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A

party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

1. ***The novel coronavirus pandemic (COVID-19 Pandemic) outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.***

The rapid outbreak of the COVID-19 Pandemic resulted in an unpredictable chain of events across the globe. With reduced production and consumption, every economy witnessed a fiscal crunch like never before. The pandemic shook the Indian economy, which was already under the effects of demonetisation and GST enforcement. As Covid-19 Pandemic swiftly made its way into the nation, the Indian Government imposed a strict nationwide lockdown. Trade and travel restrictions along with shutdown of business activities led to a GDP contraction of 23.9%.

The financial year 2020-21 that led to nationwide lockdown. The lockdown was relaxed in a phased manner depending upon the severity and magnitude of the spread of the pandemic. The cases started declining after the ongoing COVID-19 Pandemic reached peak levels in September 2020. With revival of economic activities due to easing of lockdown, the economy rebounded. However, the resurgence of COVID-19 Pandemic impacted the nascent economic revival that was taking shape.

At this point of time, our Company cannot predict by when our Company's operation shall resume to normalcy, or at all. Further if in case due to any third or consequent wave of Coronavirus, or surge in new and deadly variants of the Virus if another lockdown is imposed in the country, we may face huge losses and our business operations could be severely impacted. Any such interruptions or disruptions could cause delays in the completion of our orders and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

2. ***The management and control of the Company has changed pursuant to the Share Purchase Agreement dated March 04, 2022 and Open Offer which closed on June 20, 2022.***

This may affect functioning, and thereby our operational activities. Consequently, our business, revenue generation and profitability may adversely affected.

3. ***Our Management has recently ventured into new segments.***

We started our journey with carrying the business of providing information technology based Engineering Services, development of software and software programmes, thereafter, entered into the business of energy sector. However, after the change of the control of the Company, our Company recently ventured into business segments namely trading of materials for construction and infrastructure development such as steel products comprising of TMT bars, girders, and hollow sections; Pipes & Tubes; pipes & plumbing systems; electrical conduits, switches, circuit breakers etc; irrigation pipes and sprinkler systems, drip irrigation systems and hybrid irrigation systems, borewell pumps etc; and rainwater harvesting systems. new edge technology and data driven businesses, trades and activities, essentials for enhancing quality of life, livelihood, overall environment or otherwise. Entering into new segment requires strategic planning and efficient use of resources. Due to our limited experience in such segments, we may face unanticipated hurdles with respect to such new initiatives. We may lack sufficient expertise and experience in these segments and this may impose additional strain on our resources and consume additional time and attention of our senior management. Further, some of these initiatives may fail to commence or may have to be abruptly discontinued at their early stages, due to regulatory, commercial or other reasons such as unavailability of adequate

infrastructure for operations. We may also fail to initiate or choose to discontinue the new initiatives if we do not attract significant revenue for continuous years.

The commencement of operations in new business segments and industry verticals is subject to various risks including unfamiliarity with pricing dynamics, competition, service and operational issues as well as our ability to implement strategies, retain key management and employees. There can also be no assurance that we will not experience issues such as capital constraints, difficulties in expanding our operations and challenges in training an increasing number of personnel to manage and operate our expanded business, or that we will be able to successfully manage the impact of our growth on our operational and managerial resources and control systems. We may not be able to successfully manage some or all of the risks associated with such entry into new segments and new industry verticals, which may place us at a competitive disadvantage, limit our growth opportunities and materially and adversely affect our business, results of operations and financial condition.

Further, we cannot assure that we will be able to obtain the approvals for which applications have been made including renewals in a timely manner or at all. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. If our Company fails to comply with, or unable to comply with any of these conditions stipulated under the licenses, our certificate of registration / licenses for carrying on a particular activity may be suspended and / or cancelled and we will not be able to carry on such activity, which would adversely impact our business and results of operations. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or seek fresh approvals, from time to time, as and when required in the ordinary course of our business.

5. ***Our Company has reported certain negative cash flows from its Operating, investing and financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.***

<b>Net Cash Generated in Investing Activities</b>	(0.93)	NIL	NIL	NIL
<b>Net Cash Generated in Financing Activities</b>	2728.38	NIL	NIL	NIL

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

6. ***Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

We have not paid any dividends in the last three Financial Years. Our ability to pay future dividends will depend on our earnings, financial condition and capital requirements. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

7. ***Our Company has incurred losses in the past.***

Our Company has incurred losses in the past as set out below:

(₹ in lakhs)

Particulars	Period ended December 31, 2022	FY ended March 31, 2022	FY ended March 31, 2021	FY ended March 31, 2020

For the financial year ended 2021-22- and nine-months period ended December 31, 2022, our top ten clients accounted for almost 100% and 100% of our total income. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

9. ***Our Company has not yet applied for the registration of the logo or any of the intellectual property that it uses with the registrar of Trademarks.***

Our Company has not yet applied for the registration of any of the intellectual property that it uses. Any failure to get the same registered in our name may cause any third-party claim and may lead to litigation and our business operations could be affected. Even if our trademarks are registered, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or infringement will not cause damage to our business prospects.

10. ***We have in the past entered into related party transactions and may do so in the future. We cannot assure you that we could not have achieved more favourable terms if such transactions had not been entered into with related parties.***

We have entered into various transactions with related parties. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. It is likely that we may enter into related party transactions in

the future. Such related party transactions may potentially involve conflicts of interest. We cannot assure you that such transactions, individually or in the aggregate will not have an adverse effect on our business, results of operations, cash flows and financial condition resulting from potential conflict of interest or otherwise.

11. ***Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.***

Our business requires significant amount of working capital. Major Portion of our working capital is utilized towards debtors and inventory. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

Further, we have high Debtors which may result in a high risk in case of non-payment by these Debtors. In the event we are not able to recover our dues from our Debtors, we may not be able to maintain our sales level and thus adversely affecting our financial health. If this situation persists, we may not be able to pay our lenders / creditors which may result in adversely affecting our operations and future prospects.

12. ***Non-compliance with and changes in, safety, health, labour and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition. If we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.***

Our operations including trading activities which depends upon our third- party manufacturers are subject to extensive laws and government regulations, including in relation to safety, health and environmental protection. There is a risk that we may inadvertently fail to comply with such regulations, which could lead to enforced shutdowns and other sanctions imposed by the relevant authorities. We are also subject to the laws and regulations governing relationships with employees in such areas as minimum wages and maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour and work permits and maintenance of regulatory and statutory records and making periodic payments.

In addition, we are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we have applied and require to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to conversion of company from private to public Company and change in address in registered office of the Company. Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

13. ***Inventories and trade receivables form a major part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.***

Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our inventory (raw material and finished goods) and trade receivables. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we manufacture or purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

14. ***We are dependent on third party transportation providers for the delivery of our products.***

We use third party transportation providers for the delivery of our products to our customers. Transportation strikes could have an adverse effect on our ability to deliver our products to our customers. Non-availability of trucks and railway could also adversely affect our delivery of products. While usually the end consumer bears the cost, we may not always be able to pass on these costs to our customers. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

15. ***The success of our business operations depends largely upon our Promoter, Directors, and Key Managerial Personnel, the loss of any of them may negatively impact our business operations and financial conditions.***

Our success is highly dependent on the expertise and services of our Promoter Directors, Vishesh Gupta, and other key managerial personnel. Our ability to successfully function and meet future business challenges partly depends on our ability to attract and retain these key managerial personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoters have also promoted other companies / firms / ventures and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

Further, we also depend significantly on our Key Managerial Persons for executing their day-to-day activities. If our Promoters / Directors or any member of the senior management team is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

16. ***In the event our marketing initiatives do not yield intended result, our business and results of operations may be adversely affected.***

We believe that the recognition and quality of our products has contributed to the growth of our business. We intend to continue ensuring timely delivery of our quality products thereby keep our customer satisfied. To enhance our products reach further and broaden the target customers base the Company will initiate certain marketing and public relations initiatives, and as such required to invest significant resources towards marketing and advertising exercises, specifically with respect to new products or for geographic markets where we intend to expand our operations. We incur advertising and marketing expenses to increase our sales and customer base and to capture additional demand, and in the event, they do not yield their intended results, or we are required to incur additional expenditures than anticipated, our business and results of operations may be adversely affected.

17. ***Our Company, if not able to manage our growth or to successfully implement our business plan could have an adverse effect on our business, results of operations and financial conditions.***

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans fail to generate the required results, it may adversely impact our profitability. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long-term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes in trends and fashions and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

18. ***There is an outstanding legal proceeding involving our Company***

There is an outstanding legal proceeding involving our Company. Decisions in such proceeding, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Our Promoter Director may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoter Director will always act to resolve any conflicts of interest in our favour, thereby affecting our business and results of operations and prospects.

21. ***Our funding requirements and deployment of the issue proceeds are based on management estimates and actual cost may vary compared with the estimated amount.***

Our funding requirement and deployment of the proceeds of the issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by banks or financial institutions and are based on our estimates. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change as a result of various factors which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the working capital limits maintained from time to time at the discretion of our board. In addition, schedule of implementation as described herein are based on the management's current expectations and are subject to change due to various factors some of which may not be in our control. In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant’s decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants’ ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline

29. ***You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

30. ***There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

31. ***Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

32. ***Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

33. ***Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be

- adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.
34. ***Investors will not have the option of getting the allotment of Equity Shares in physical form.***

*In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see “Terms of the Issue” on page 134. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.*

35. ***Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

#### **External Risk Factors**

36. ***Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards (“IFRS”), which investors may be more familiar with and consider material to their assessment of our financial condition.***

Summary statements of assets and liabilities as at March 31, 2022 and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2022 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our restated financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

37. ***Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.***

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects

agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

38. ***A slowdown in economic growth in India could cause our business to suffer.***

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- Any increase in Indian interest rates or inflation;
- Any scarcity of credit or other financing in India;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- Prevailing regional or global economic conditions; and
- Other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

39. ***Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- The General Anti Avoidance Rules ("GAAR") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We

cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

40. ***Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.***

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

41. ***Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.***

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

42. ***Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

43. ***Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

44. ***Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations***

*The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the insurance industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could*

increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of price points of various input costs and thereby increase our operational cost.

The Taxation Laws (Amendment) Act, 2019, also prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate (on gross basis) for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Furthermore, the Government of India announced the Union Budget for Fiscal 2022 ("Budget 2022"), pursuant to which the Finance Bill 2022 (defined below) has proposed various amendments which will only come into effect upon receipt of Presidential assent to the bill and notification in requisite acts. We have not fully determined the impact of these recent and proposed laws and regulations on our business.

There can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations in connection with GST. While we are and will comply with the GST rules and regulations, any failure to comply with the same may result in noncompliance with the GST and may adversely affect our business and results of operations. The GoI announced the union budget for fiscal year 2023, following which the Finance Bill, 2022 was introduced in the Lok Sabha on February 1, 2022. Subsequently, the Finance Bill 2022 received the assent from the President of India on March 30, 2022, and became the Finance Act, 2022 ("Finance Act 2022"). We cannot predict whether the amendments made and yet to be notified pursuant to the Finance Act 2022 would have an adverse effect on our business, financial condition, future cash flows and results of operations. Any changes in the Finance Act 2022 or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws that are applicable to our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Draft Letter of Offer, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as "gig workers" and "platform workers" and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future

45. ***The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.***

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concerns regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

46. ***We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.***

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- Hostile or war like situations with the neighbouring countries;
- Macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- Decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- Downgrading of India's sovereign debt rating by rating agencies; and
- Difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

47. ***Financial instability in other countries may cause increased volatility in Indian financial markets.***

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

### GOLBAL ECONOMY

The global economy continues to face steep challenges, shaped by the lingering effects of three powerful forces: the Russian invasion of Ukraine, a cost-of-living crisis caused by persistent and broadening inflation pressures, and the slowdown in China. Russia's invasion of Ukraine continues to powerfully destabilize the global economy. Beyond the escalating and senseless destruction of lives and livelihoods, it has led to a severe energy crisis in Europe that is sharply increasing costs of living and hampering economic activity.

Russia is a major supplier of oil, gas, and metals, and, together with Ukraine, of wheat and corn, the current and anticipated decline in the supply of these commodities has already driven their prices up sharply. Europe, Central Asia, Middle East and North Africa, and sub-Saharan Africa are most affected. The food and fuel price increases will hurt lower-income households globally, including in the Americas and Asia.

Persistent and broadening inflation pressures have triggered a rapid and synchronized tightening of monetary conditions, alongside a powerful appreciation of the US dollar against most other currencies. Tighter global monetary and financial conditions will work their way through the economy, weighing demand down and helping to gradually subjugate inflation. So far, however, price pressures are proving quite stubborn and a major source of concern for policy makers. We expect global inflation to peak in late 2022 but to remain elevated for longer than previously expected, decreasing to 4.1 percent by 2024.

The global economy is experiencing a number of turbulent challenges. Inflation higher than seen in several decades, tightening financial conditions in most regions, Russia's invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Normalization of monetary and fiscal policies that delivered unprecedented support during the pandemic is cooling demand as policymakers aim to lower inflation back to target. But a growing share of economies are in a growth slowdown or outright contraction. The global economy's future health rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply side disruptions, for example, in China.

Global growth is forecast to slow from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023. About a third of the world economy faces two consecutive quarters of negative growth. Global inflation is forecast to rise from 4.7 percent in 2021 to 8.8 percent in 2022 but to decline to 6.5 percent in 2023 and to 4.1 percent by 2024.

The global economy enters 2022 in a weaker position than previously expected. As the new Omicron COVID-19 variant spreads, countries have reimposed mobility restrictions. Rising energy prices and supply disruptions have resulted in higher and more broad-based inflation than anticipated, notably in the United States and many emerging market and developing economies. The ongoing retrenchment of China's real estate sector and slower-than-expected recovery of private consumption also have limited growth prospects.

Global growth is expected to moderate from 5.9 in 2021 to 4.4 percent in 2022—half a percentage point lower for 2022 than in the October World Economic Outlook (WEO), largely reflecting forecast markdowns in the two largest economies. A revised assumption removing the Build Back Better fiscal policy package from the baseline, earlier withdrawal of monetary accommodation, and continued supply shortages produced a downward 1.2 percentage-points revision for the United States. In China, pandemic-induced disruptions related to the zero-tolerance COVID-19 policy and protracted financial stress among property developers have induced a 0.8 percentage-point downgrade. Global growth is expected to slow to 3.8 percent in 2023. Although this is 0.2 percentage point higher than in the previous forecast, the upgrade largely reflects a mechanical pickup after current drags on growth dissipate in the second half of 2022. The forecast is conditional on adverse health outcomes declining to low levels in most countries by end-2022, assuming vaccination rates improve worldwide and therapies become more effective.

Elevated inflation is expected to persist for longer than envisioned in the October WEO, with ongoing supply chain disruptions and high energy prices continuing in 2022. Assuming inflation expectations stay well anchored, inflation should gradually decrease as supply-demand imbalances wane in 2022 and monetary policy in major economies responds.

Risks to the global baseline are tilted to the downside. The emergence of new COVID-19 variants could prolong the pandemic and induce renewed economic disruptions. Moreover, supply chain disruptions, energy price volatility, and localized wage pressures mean uncertainty around inflation and policy paths is high. As advanced economies lift policy rates, risks to financial stability and emerging market and developing economies' capital flows, currencies, and fiscal positions especially with debt levels having increased significantly in the past two years—may emerge. Other global risks may crystallize as geopolitical tensions remain high, and the ongoing climate emergency means that the probability of major natural disasters remains elevated.

With the pandemic continuing to maintain its grip, the emphasis on an effective global health strategy is more salient than ever. Worldwide access to vaccines, tests, and treatments is essential to reduce the risk of further dangerous COVID-19 variants. This requires increased production of supplies, as well as better in-country delivery systems and fairer international distribution. Monetary policy in many countries will need to continue on a tightening path to curb inflation pressures, while fiscal policy—operating with more limited space than earlier in the pandemic—will need to prioritize health and social spending while focusing support on the worst affected. In this context, international cooperation will be essential to preserve access to liquidity and expedite orderly debt restructurings where needed. Investing in climate policies remains imperative to reduce the risk of catastrophic climate change.

Since the start of October, COVID-19 deaths have averaged about 7,000 a day worldwide, down from about 10,000 in late August. The diffusion of vaccines—although still uneven—has played a major role, with over 55 percent of people having received at least one dose. Yet the emergence of the Omicron variant in late November threatens to set back this tentative path to recovery. As of mid-January, Omicron appeared to be more transmissible than Delta, but its symptoms are perhaps less severe. The net effect on hospitalizations and deaths is still unknown. The baseline forecast is conditioned on adverse health outcomes—severe illness, hospitalizations, and deaths—coming down to low levels in most countries by the end of 2022. Some emerging market and developing economies are anticipated to fall short of the vaccination target in 2022 and achieve sufficiently broad coverage only in 2023.

Supply disruptions continued into the fourth quarter, hindering global manufacturing—especially in Europe and the United States. A resurgence in COVID cases (particularly in Europe) also held back a broader recovery. In China, disruptions from COVID outbreaks, interruptions to industrial production from power outages, declining real estate investment, and a faster-than-expected withdrawal of public investment all contributed to a second-half slowdown. Although there were signs of a global turnaround in November—with a pickup in international trade and upside surprises for services activity and industrial production data—this only partially offset earlier declines.

The emergence of a new variant is not the only risk that has crystallized in recent months. Inflation continued to rise throughout the second half of 2021, driven by several factors of varying importance across regions (Figure 1). Fossil fuel prices have almost doubled in the past year, driving up energy costs and causing higher inflation, most prominently in Europe. Rising food prices have contributed to higher inflation, for example in sub-Saharan Africa. Meanwhile, ongoing supply chain disruptions, clogged ports, land-side constraints, and high demand for

goods have also led to broadening price pressures, especially in the United States. Higher imported goods prices have contributed to inflation for example in Latin America and the Caribbean region.

In the United States, with price and wage pressures broadening, the Federal Reserve decided to accelerate its taper of asset purchases and signalled that it will raise rates further in 2022 than previously expected. The European Central Bank (ECB) has announced it will end net asset purchases under the Pandemic Emergency Purchase Programme in March 2022, while it will temporarily increase net purchases by a modest amount under its longer-standing Asset Purchase Programme. The ECB has also committed to maintaining its key interest rates at current levels until adequate progress is made toward stabilizing inflation at its medium-term target.

Global growth is estimated at 5.9 percent in 2021 and is expected to moderate to 4.4 percent in 2022, half a percentage point lower than in the October 2021 World Economic Outlook (Table 1). The baseline incorporates anticipated effects of mobility restrictions, border closures, and health impacts from the spread of the Omicron variant. These vary by country depending on susceptibility of the population, the severity of mobility restrictions, the expected impact of infections on labor supply, and the importance of contact-intensive sectors. These impediments are expected to weigh on growth in the first quarter of 2022. The negative impact is expected to fade starting in the second quarter, assuming that the global surge in Omicron infections abates and the virus does not mutate into new variants that require further mobility restrictions.

*Note: Forecasts are based on information up to 18 January 2022.*

The upward revision to global growth in 2023 is mostly mechanical. Eventually, the shocks dragging 2022 growth will dissipate and—as a result—global output in 2023 will grow a little faster. Among prominent revisions not due to the pandemic, India’s prospects for 2023 are marked up on expected improvements to credit growth—and, subsequently, investment and consumption—building on better-than-anticipated performance of the financial sector. Japan’s 2023 growth outlook is also revised up by 0.4 percentage point, reflecting anticipated improvements in external demand and continued fiscal support. The upward revision to 2023 global growth is, however, not enough to make up ground lost due to the downgrade to 2022. Cumulative global growth over 2022 and 2023 is projected to be 0.3 percentage point lower than previously forecast.

Note: Real effective exchange rates are assumed to remain constant at the levels prevailing during December 10, 2021–January 7, 2022. Economies are listed on the basis of economic size.

Inflation is expected to remain elevated in the near term, averaging 3.9 percent in advanced economies and 5.9 percent in emerging market and developing economies in 2022, before subsiding in 2023. Assuming medium-term inflation expectations remain well anchored and the pandemic eases its grip, higher inflation should fade as supply chain disruptions ease, monetary policy tightens, and demand rebalances away from goods-intensive consumption towards services. The rapid increase in fuel prices is also expected to moderate during 2022–23, which will help contain headline inflation. Futures markets indicate oil prices will rise about 12 percent and natural gas prices about 58 percent in 2022 (both considerably lower than the increases seen in 2021) before retreating in 2023 as supply-demand imbalances recede further. Similarly, food prices are expected to increase at a more moderate pace of about 4½ percent in 2022 and decline in 2023. In many countries, nominal wage growth remains contained despite employment and participation returning almost to pre-pandemic levels. But in the United States the story is different: a sharp decline in unemployment has been accompanied by buoyant nominal wage growth. This suggests a degree of tightening in US labor markets not evident elsewhere. If US labor force participation remains below pre-pandemic levels and discouraged workers remain on the sidelines, tighter labor markets may feed through to higher prices. As a result, the Federal Reserve communicated in December 2021 that it will taper asset purchases at a faster pace and signaled that the federal funds rate will likely be raised to 0.75–1.00 percent by the end of 2022, some 50 basis points higher than in the previous guidance.

Less accommodative monetary policy in the United States is expected to prompt tighter global financial conditions, putting pressure on emerging market and developing economy currencies. Higher interest rates will also make borrowing more expensive worldwide, straining public finances. For countries with high foreign currency debt, the combination of tighter financial conditions, exchange rate depreciations, and higher imported inflation will lead to challenging monetary and fiscal policy trade-offs. Although fiscal consolidation is anticipated in many emerging market and developing economies in 2022, high post-pandemic debt burdens will be an ongoing challenge for years to come.

Global trade is expected to moderate in 2022 and 2023, in line with the overall pace of the expansion. Assuming that the pandemic eases over 2022, supply chain problems are expected to abate later in the year. The accompanying moderation in global goods demand will also help reduce imbalances. Cross-border services trade—particularly tourism—is expected to remain subdued.

Even before Omicron, inflation pressure had become more broad-based in many economies. Central banks in some emerging market and developing economies—and a few advanced economies—have already been raising interest rates. For some the decision to tighten policy reflects a difficult choice, trading off the benefits of getting ahead of price pressures against the costs of potentially slowing an already subdued employment recovery. Policy responses will vary according to country-specific inflation and employment developments and the strength of central bank policy frameworks. Extraordinary support is likely to continue in the euro area and Japan to allow the recovery to take firmer hold. By contrast, it will very likely be withdrawn in the United States in 2022—where the recovery is more advanced—with the prospect of a broader return of interest rates to higher levels thereafter. The timing and extent of responses in emerging markets is uncertain and will be complicated by ongoing developments with the pandemic, both domestically and through imported inflation stemming from international supply disruptions. This underscores the need to carefully monitor key indicators of future inflationary pressures, including inflation expectations, wage growth and unit labor costs (particularly as demand rebalances back toward services), and firms' profit margins, which can foreshadow whether higher cost pressures are likely to be passed on to prices.

Effective monetary policy communication is a key tool to avoid provoking overreactions from financial markets. In countries where inflation expectations have increased, and there is a tangible risk of more persistent price pressures, central banks should continue to telegraph an orderly, data-dependent withdrawal. This is particularly important given the exceptional uncertainty around the impact of the Omicron variant. Central banks should clearly signal that the pace at which monetary support will be withdrawn may need to be recalibrated if the pandemic worsens again.

Moreover, a tighter stance of monetary policy, especially if not clearly communicated, could have financial stability implications as financial vulnerabilities remain elevated in a number of sectors. A sudden repricing of risk in markets, should investors reassess further the economic and policy outlook, could interact with such vulnerabilities and lead to tighter financial conditions. Policymakers should take early action and tighten selected macroprudential tools to target pockets of elevated vulnerabilities (see the October 2021 Global Financial Stability Report).

Preparing for tighter external financial conditions: Less accommodative monetary policy in advanced economies will pose challenges for central banks and governments in emerging market and developing economies. Higher returns elsewhere will incentivize capital to flow overseas, putting downward pressure on emerging market and developing economy currencies and raising inflation. Without commensurate tightening, this will increase the burden on foreign-currency borrowers, both public and private. But tighter policy also brings costs at home, as domestic borrowers will find credit harder to come by. Overall, tighter policies will likely be appropriate in many emerging market and developing economies to stave off the threat of persistently higher inflation. Moreover, emerging markets are generally more resilient, with higher reserves and better current account balances than in the previous tightening cycle—including during the 2013 taper tantrum. But financial vulnerabilities remain, and many countries have higher public and private debt. Debt service burdens could therefore rise significantly with higher interest rates.

Countries with stronger fiscal positions and clearer policy frameworks will be better placed to manage tighter global financial conditions. More generally, emerging market borrowers should extend debt maturities where feasible, while containing a further buildup of currency mismatches. Exchange rate flexibility can also help absorb shocks. But in economies with market distortions or balance sheet vulnerabilities limiting market access,

the impact of capital flow reversals can imperil financial stability. In those economies, foreign exchange intervention may be needed to smooth disorderly market conditions and temporary capital flow management measures may be warranted—but should not substitute for needed macroeconomic policy adjustment. More generally, policymakers should strengthen resolution regimes where needed to facilitate orderly deleveraging and restructuring.

International cooperation will also be essential to minimize stress during the forthcoming tightening cycle. Ready access to reserve currency liquidity is an important buffer against the international amplification of these risks. IMF lending arrangements (precautionary or disbursing) can be an important backstop to smooth the impact of the shocks. For countries with large financing needs and unsustainable debt, liquidity relief may not be sufficient. In such cases, quick operationalization of the G20 Common Framework for debt treatment will provide an effective mechanism for timely and orderly debt restructuring. The progress in the initial country cases has been too slow. Urgent improvements are needed to move the process forward and extend its country coverage.

Public finances will come under strain in the coming months and years, as global public debt has reached record levels to cover pandemic-related spending at a time when tax receipts plummeted. Higher interest rates will also make borrowing more expensive, especially for countries borrowing in foreign currencies and at short maturities. As a result, fiscal deficits in most countries will need to shrink in the coming years, although the extent of consolidation should be contingent on the pace of the recovery. If the pandemic worsens, consolidation can be slowed where fiscal space permits. Where mobility restrictions are reintroduced, governments should reprise programs such as lifelines for the worst-affected households and firms as needed and increase support for the most vulnerable segments of the population. However, policy space is much reduced, so better targeting of such support will be essential to preserve fiscal sustainability. Initiatives should be nested in credible and sustainable medium-term fiscal plans. Decisive support from the international community to low-income countries with elevated debt levels will be necessary so that they can provide such fiscal support. On the other hand, in countries with upside growth surprises where the recovery continues to take hold (e.g., Chile, Colombia, Peru), there is scope to retire extraordinary crisis expenditures and enhance revenue mobilization.

Ultimately, higher growth and stronger tax revenues will be required for many countries to avoid the risk of debt distress. Such challenges make structural reforms (see below) and improvements to fiscal frameworks all the more essential.

## **OVERVIEW OF THE INDIAN ECONOMY**

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

- India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY2021-22.
- India is the third-largest unicorn base in the world with over 83 unicorns collectively valued at US\$ 277.77 billion, as per the Economic Survey. **Restated Notes forming part of Ind AS Financial Statements for the period ended December 31, 2022, March 31, 2022, March 31, 2021 and March 31, 2020**

Based on the nature of services and their realization in cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current – noncurrent classification of assets and liabilities.

**D) Revenue recognition and expenses**

Company earns revenue primarily from three segments i.e. Dealing In Shares/Securities, Engineering based services and Trading Division - Infrastructure

Revenue is recognised upon transfer of control of promised services or products to customers in an amount that reflects the consideration which Company expects to receive in exchange for those services or products.

- Revenue from time and material and job contracts is recognised on output basis measured by units delivered, efforts expended, number of transactions processed, etc.
- Revenue related to fixed price maintenance and support services contracts where Company is standing ready to provide services is recognised based on time elapsed mode and revenue is straight lined over the period of performance.
- In respect of other fixed-price contracts, revenue is recognised using percentage-of-completion method ('POC method') of accounting with contract costs incurred determining the degree of completion of the performance obligation. The contract costs used in computing the revenues include cost of fulfilling warranty obligations.
- Revenue from the sale of distinct third party hardware and / or software is recognised at the point in time when control is transferred to the customer.

Revenue is measured based on the transaction price, which is the consideration, adjusted for volume discounts, service level credits, performance bonuses, price concessions and incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes collected from customers.

Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled revenue when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

The billing schedules agreed with customers include periodic performance based payments and / or milestone based progress payments. Invoices are payable within contractually agreed credit period.

Contracts are subject to modification to account for changes in contract specification and requirements. Company reviews modification to contract in conjunction with the original contract, basis which the transaction price could be allocated to a new performance obligation, or transaction price of an existing obligation could undergo a change. In the event transaction price is revised for existing obligation, a cumulative adjustment is accounted for.

Company disaggregates revenue from contracts with customers by geography.

Expenses are accounted for on accrual basis and provisions are made for all known liabilities and losses.

**Interest Income:**

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable. For all debt instruments measured either at amortized cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR).

**G) Financial Instruments**

All financial assets and liabilities are recognized at fair value on initial recognition except for the trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are added to or deducted from the fair value on initial recognition.

**a) Subsequent measurement (Non derivative financial instruments)**

**1. Financial assets carried at amortized cost**

**c) De-recognition of financial instruments**

The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

**H) Fair Value measurement of Financial Instruments**

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market which can be accessed by the Company for the asset or liability

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

**I) Impairment of assets**

**(i) Financial Assets**

The Company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in profit or loss.

**(ii) Non-Financial Assets**

Intangible assets and property, plant and equipment

Intangible assets and property, plant and equipment are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis.

**Current Income Tax**

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for that period. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

Current tax assets and liabilities are offset only if, the Company:

- ♦Has a legally enforceable right to set off the recognized amounts; and
- ♦Intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

**Deferred Income Tax**

Deferred tax is recognized for the future tax consequences of deductible temporary differences between the carrying values of assets and liabilities and their respective tax bases at the reporting date, using the tax rates and laws that are enacted or substantively enacted as on reporting date.

Minimum Alternate Tax ("MAT") under the provisions of the Income Tax Act, 1961 is recognised as deferred tax in the Statement of Profit and Loss. The credit available under the Income Tax Act, 1961 in respect of MAT paid is recognised as an asset only when and to the extent it is probable that future taxable profit will be available against which these tax credit can be utilised. Such an asset is reviewed at each Balance Sheet date.

Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses and credits can be utilized.

Deferred tax assets and liabilities are offset only if:

- ♦Entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- ♦Deferred tax assets and the deferred tax liabilities relate to the income taxes levied by the same taxation authority

**N) Earnings per Share (EPS)**

Basic earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The diluted potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value which is the average market value of the outstanding shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

**O) Cash and Cash Equivalents**

Cash and Cash equivalents comprises cash and calls on deposit with banks and corporations. The Company considers all highly liquid financial instruments, which are readily convertible into cash and have original maturities of three months or less from the date of purchase, to be cash equivalent.

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The FDI Policy prescribes the limits and conditions subject to which foreign investment can be made in different sectors of the Indian economy and FEMA regulates the precise manner in which such investment may be made.

The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the press release dated May 24, 2017, the Union Cabinet phased out the FIPB and it was replaced by the Foreign Investment Facilitation Portal (**FIFP**) to speed up the FDI inflow and to increase the transparency in the FDI approvals in the country. The DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the "**SOP**"). The SOP provides a list of the competent authorities to grant approvals for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under the automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the "**Competent Authority**") for the grant of post facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP will identify the Competent Authority.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("**FDI**") through press notes and press releases. The DIPP, has issued a consolidated FDI Policy DPIIT File Number 5(2)/2020-FDI Policy Dated the October 15, 2020 ("**FDI Policy 2020**"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DIPP that were in force till that date. The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, the FDI Policy 2020 will be valid until the DIPP issues an updated circular.

Under the FDI Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to 100% without any prior approvals, however the foreign investor must follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will now be handled by the **FIFP**.

The transfer of shares between an Indian resident and a non-resident does not need prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA, and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the extant policy of the Government of India, erstwhile OCBs cannot participate in this Issue. OCBs or Overseas Corporate Bodies have been derecognised as a class of investor entity in India with effect from September 16, 2003.

Overseas Corporate Body means a company, partnership firm, society and other corporate body owned directly or indirectly to the extent of at least sixty per cent by Non- Resident Indians and includes overseas trust in which not less than sixty percent beneficial interest is held by Non-resident Indians directly or indirectly but irrevocably, which was in existence as on September 16, 2003 and was eligible to undertake transactions pursuant to the general permission granted under FEMA. Any investment made in India by such entities will be treated as investments by incorporated non-resident entities, i.e. a foreign company.

The Issue, if renounced by our shareholders, may include offers within India, to Indian institutional, non-institutional and retail investors in offshore transactions as defined in, and made in reliance upon exemptions from the registration requirements under the United States Securities Act of 1933, as amended (the "**U.S. Securities Act**"), including the exemption under Regulation S ("**Regulation S**") of the U.S. Securities Act.
