ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

- 1. Our operations are dependent on the supply of large amounts of raw materials, such as oils of coconut (copra), til, mustard, groundnut, cotton, and sunflower. Also, availability of quality raw oil which is procured from different regions in India. In addition, we do not have long term agreements or contracts with suppliers for our raw materials. Any increase in the cost of, or a shortfall in the availability of, such raw materials could have an adverse effect on our business and results of operations, and seasonable variations could also result in fluctuations in our results of operations.***

Our business depends on the availability of reasonably priced and high-quality raw materials in the quantities required by us. We procure raw oil from various suppliers scattered in different regions in India. Edible Oils timely availability and also non-availability of good quality raw oil from across the country could negate the qualitative and quantitative production of the various products of our Company. Volatility in oil prices is another major risk for this segment.

The price and availability of such raw materials depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such materials, production and transportation cost, duties and taxes and trade restrictions. Unfavourable local and global weather patterns, including extremes such as drought, floods and natural disasters. There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns and the frequency and severity of extreme weather and natural disasters. The availability of raw materials for our operations, which includes, amongst others, coconut oil, groundnut oil, til oil, mustard oil etc. may be

adversely affected by longer than usual periods of heavy rainfall in certain regions or a drought caused by weather patterns. Such events may have an adverse impact on the availability and prices of raw materials for our operations, which may increase the costs of our operations as well as negatively affect our business, results of operations and financial condition.

In addition, we do not have long term supply contracts with any of our suppliers and we typically place orders with them in advance of our anticipated requirements. The absence of long -term contracts at fixed prices exposes us to volatility in the prices of raw materials that we require and we may be unable to pass these costs onto our customers. If, for any reason, primary suppliers of raw materials curtail or discontinue their delivery of such materials or products to us in the quantities we need, or on commercially acceptable terms, production schedules could be disrupted and our business and results of operations could be adversely affected.

Additionally, the supply of raw materials for our business operations is subject to seasonal variations. For example, the supply of raw materials procured depends on the harvesting season of various crops, and crushing operations peak in 3 to 4-month period after the harvesting season. Groundnut, for instance, is primarily harvested in late October, with its peak crushing season being the months of November till February, whereas mustard is typically harvested in the month of March with its peak crushing season being the months of March till June. As a result of such seasonal fluctuations, and the fact that we do not have adequate storage infrastructure for off-season sales and arbitrage, our sales and results of operations may vary by fiscal quarter, and the sales and results of operations of any given fiscal quarter may not be relied upon as indicators of the sales or results of operations of other fiscal quarters or of our future performance.

2. ***Our revenue significantly depends on the sale of our edible oil products and any decline in the sale of our edible oil products, specifically groundnut oil and coconut oil in the market. Our major demand of the edible oil like groundnut oil and coconut oil is concentrated in region like Maharashtra and our inability to grow further in these regions would have a material adverse effect on our business, financial condition and results of operation.***

In Fiscal 2021, Fiscal 2022 and six-months period ended September 30, 2022, our revenue from sale of groundnut oil and coconut oil products in Maharashtra was ₹7,440.25 lakhs, ₹7,916.75 lakhs and ₹3,905.30 lakhs, respectively contributing towards 71.89%, 66.78% and 65.66%, of our revenues from operations, respectively. We will depend on the sale of our oil products especially coconut and groundnut oil for a majority of our income in the near future. Therefore, factors such as change in consumer preference for these oils in Maharashtra region may have an adverse impact on our total income. For us to grow in this region and other parts of country, we will have to put efforts in marketing our product in such a manner that consumers are attracted and we are able to build more consumers. We cannot assure that we will be able to maintain the sale of our oil products in the future which will have a positive impact on our total income. If the consumer preference for our edible oil products declines in the future, we may experience significant loss including costs involved for maintaining these manufacturing facilities which in turn will lead to lower revenues and gross and operating margins resulting into material adverse effect on our business, financial condition and results of operation.

3. ***Our Company is involved in certain outstanding litigations and other proceedings.***

Our name may not be deleted from such proceedings and the concerned court or authority may pass an order adverse to us in any such litigation.***

We cannot assure you that the concerned court will not pass an order adverse to us in any such litigation or we will not continue receiving notices from the regulatory agencies which will distract attention of our management and employees and increase our expenses.

5. ***We also sell our products through network of distributors, super stockist, branch offices and depots, and any inability to expand or effectively manage our growing distribution and sales network may have an adverse effect on our business, results of operations and financial condition.***

In addition to direct sales of our products to our institutional customers, we also have an extensive sales and distribution network that consisted, as on September 30, 2022 of over 132 distributors, 66 super stockist, 1 branch offices and 2 depots. We continuously seek to increase the penetration of our products by appointing new distributors through our sales executives targeted at different markets and geographies. We cannot assure you that we will be able to successfully identify and appoint new distributors or effectively manage our existing distribution network. If the terms offered to such distributors by our competitors are more favourable than those offered by us, distributors may decline to distribute our products.

Further, our competitors may have exclusive arrangements with other distributors which may restrict us from stocking and selling our products through them, thereby limiting our ability to expand our network. We may also face disruptions in the delivery of our products for various reasons beyond our control, including poor handling by distributors of our products, transportation bottlenecks, natural disasters and labour issues, which could lead to delayed or lost deliveries. If our distributors fail to distribute our products in a timely manner our business and results of operations may be adversely affected.

6. ***Our Registered Office from where we operate is tenanted property.***

Our registered office is situated at Aval Mansion 234 to 240, Bellasis Road, Mumbai – 400 008 which is a tenanted property. As the Company is in settled possession of the tenanted premises, prior to coming into force of Maharashtra Rent Control Act, 1999, hence, no registered documents are executed.

The tenancy agreement dated October 01, 2007 is not duly stamped as per Maharashtra Stamp Act, 1958 or Registered as per Registered Act, 1908 The Company has not entered into any fresh agreement after being taken over by the Order dated April 19, 2018 passed under Section 30(1) & (6) and Section 31 of Insolvency and Bankruptcy Code 2016, Hon'ble NCLT approved the resolution plan of our Company. If we are required to relocate our business operations in future, we may suffer financial loss, though our operations won't be affected.

7. ***A slowdown or shutdown in our manufacturing/ processing operations, or under-utilization at our existing manufacturing facility for our products could have an adverse effect on our business, results of operations and financial condition.***

We manufacture/ process our oil products in our manufacturing facility situated at Palghar, Maharashtra. This facility is spread in 32,187 sq. metre of land. Our oil products are dependent upon our ability to manage the manufacturing and processing facilities, which are subject to various operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents, severe weather conditions and natural disasters. Any significant malfunction or breakdown of our machinery may entail repair and maintenance costs and cause delays in our operations. If we are unable to repair malfunctioning machinery in a timely manner or at all, our operations may need to be suspended until we procure machinery to replace the same.

Further, we have experienced an instance of disruption at manufacturing/ processing facility in the past on account. Inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to slowdown or shut-down of our operations or the under-utilization of our facility, which in turn may have an adverse effect on our business, results of operations and financial condition.

8. ***We rely on third parties to transport raw oil for our products to our facilities and our depots and customers, and any disruption in our transportation arrangements or increases in transportation costs may adversely affect our business, results of operations and financial condition.***

We rely on third parties, for transport of raw materials to our manufacturing facilities and our final products to our depots and customers. A delay in the delivery of our raw materials to our manufacturing facilities may result in the slowdown or shutdown of our operations. For supply of raw materials to our facility and our products to our institutional customers, we rely on our transporters with whom we have built long term relations. In addition, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. Also, if the terms offered to such logistic providers by our competitors are more favourable than those offered by us, they may decline to provide their services to us. A failure to maintain a continuous supply of raw materials or to deliver the products to our clients in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations. Although we have insurance for transit of goods, for damages, since the cost of our goods carried by third party transporters is typically much higher than the consideration paid for transportation. Any disruption or inefficiencies in the operations of these third parties may adversely affect our business and results of operations.

9. ***The improper handling, storage or processing of raw oil or oils products, or any spoilage thereof, or any real or perceived contamination in our oils products, could adversely affect our business, results of operations and financial condition.***

The products that we manufacture or process are subject to risks such as contamination during their manufacturing or processing, adulteration and product tampering during their transport or storage. We face inherent business risks of exposure to product liability or recall claims in the event that our products fail to meet the required quality standards.

Also, apart from raw oil, our products are required to be stored, handled and transported under certain safety conditions. Such risks may be controlled, but not eliminated, by adherence to good manufacturing practices and finished product testing. Though our raw oil has vigorous checks before it is accepted for filtration and final packaging. Any product recall, product liability claim or adverse regulatory action may adversely affect our reputation and brand image, business, results of operations and financial condition.

10. ***One of our Independent Director have been taken into custody by Economic Offences Wing (EOW) before filing of this Draft Letter of Offer.***

Our Independent Director Mr. Huzefa Dawood Ghadiyali had been arrested and taken into custody incarcerated by EOW on October 02, 2022. against an FIR bearing No. 511/2022 which was filed against him and others under sections of Indian Penal Code, 1860, where he was alleged of committing crime/ fraud for an approx. amount of Rs. 58.80 Crore. He was released by EOW on October 17, 2022. The person who had filed the FIR, has filed an application before the Hon'ble court of Additional Chief Metropolitan Magistrate, Mumbai for quashing/ withdrawing his name and all the allegations against him from the FIR. It is stated in the quashing application that he had no active role in the crime/ fraud. The order for the application is pending before the Hon'ble Court of Additional Chief Metropolitan Magistrate, Mumbai.

We cannot assure you, if all the allegations made against him will be taken back from the Hon'ble Court and he may not hold anything against himself. If any adverse orders are passed by the Hon'ble Court, it may affect the reputation, goodwill and business of our Company. There can be no assurance that such arrest or enquiries may not take place in future which may impact the business, goodwill and reputation of the Company.

11. *Our inability to manage our inventory and foresee accurate demand for our products for a future period may adversely affect our reputation, business, results of operation and our financial performance.*

The estimations on demands of our products are typically based on our projections, inventory levels at our distribution networks, our understanding of the anticipation of consumption and spending by our consumers. If we overestimate demand for our products, we may face difficulty on storage of such products due to lower shelf life and complications with respect to storage of perishable products. Further, if we are unable to provide our products to our consumers due to any disruptions of our manufacturing facilities or shortage of raw materials, we may incur the risk of customers choosing other products over our products. While we closely monitor our inventory requirements for our product, we may be exposed to various risks including the aforementioned risks. While we have faced limited interruptions due to COVID-19, we have ensured average inventory for a period 30 days depending on the SKU to secure supplies, is generally maintained to ensure that the supply of our raw materials is not impacted. All of these factors could adversely affect our reputation, business, results of operation and our financial performance.

12. *Our Company was incorporated in the year 2001 and our Company was acquired by the current Promoters and Management on and from May 2, 2018, certain corporate records are not traceable.*

Our Company has not been able to trace certain corporate record and records of certain forms that were required to be filed by our Company with the RoC in the past. Given that our Company was acquired by the Promoters and current management pursuant to culmination of CIRP and the Resolution Plan and NCLT order dated April 19, 2018, our Promoters have primarily placed reliance on the information memorandum and handover report provided by the resolution professional in terms of IBC during the CIRP for ascertaining our Company's historic corporate and financial information prior to acquisition by our current Promoters and our current management. There can be no assurance that our Promoters are entirely versed with our historic operations. For instance, we are unable to trace the Sale deed / Purchase Agreement between the Partnership firm and Company. Before being formed as a Company there was a partnership agreement which use to run this business. The partnership was than purchased by the Company. The Company currently does not possess this Sale Deed/ Purchase Agreement through which the Partnership was taken over.

We also cannot assure you that the statutory authorities will not impose any penalty and if imposed that such penalty will not have an adverse effect on our business and result of operations.

13. *Our Company rely on key customers though we do not have any long-term contracts with our customers which may adversely affect our results of operations.*

As on March 31, 2022 and September 30, 2022, our Company's top ten customers contribute 52.49% and 48.58% of the revenue from operations. Our Company neither have any long-term contract with any of our buyers/ distributors nor any marketing tie up for our products with any of retail chain operators etc. Any change in the buying pattern of our end users can adversely affect the business of our Company. Our inability cater the needs of our distributors and big retail houses is important for our products on their shelves. We do not have long term contracts but our relationship with them over the years have grown and will continue to grow. But, due to reasons beyond our control, they can remove our product from their shelves or markdown our products. Our inability to sell our existing products, may adversely affect our business and profitability in future.

14. *The availability of spurious, look-alikes, counterfeit products primarily in our domestic market, could lead to losses in revenues and harm the reputation of our products.*

We are exposed to the risk that entities in India and elsewhere could pass off their products as ours, including spurious or pirated products. For example, certain entities could imitate our brand name, packaging material or attempt to create look-alike products or brands. This would not only reduce our market share due to customers confusing spurious products for our products whereby we may not be able to recover our initial development costs or experience loss in revenues but could also harm the reputation of our brands. The proliferation of unauthorised copies of our products, and the time lost in defending claims and complaints about spurious products could have a material adverse effect on our reputation, business prospects and results of operations.

15. *Our inability to effectively manage our growth or implement our growth strategies may have a material adverse effect on our business prospects and future financial performance.*

We have experienced growth in our financial performance over the past years. Our revenues from operations for six months period ended September 30, 2022 and for the year ended March 31, 2022 and March 31, 2021 were ₹ 5,947.61 Lakhs, ₹ 11,855.51 Lakhs and ₹ 10,349.97 Lakhs respectively. Our EBITDA for six months period ended

September 30, 2022 and for the year ended March 31, 2022 and March 31, 2021 were ₹ 189.32 Lakhs, ₹ 420.31 Lakhs and ₹ 586.44 Lakhs respectively. Our profit after tax for six months period ended September 30, 2022 and for the year ended March 31, 2022 and March 31, 2021 were ₹ 123.47 Lakhs ₹ 259.88 Lakhs and ₹ 407.13 Lakhs respectively.

Our inability to manage our expansion effectively and execute our growth strategy in a timely manner, or within budget estimates or our inability to meet the expectations of our customers and other stakeholders could have an adverse effect on our business, results of operations and financial condition. We intend to continue expansion to pursue existing and potential market opportunities. Our future prospects will depend on our ability to grow our business and operations, which could be affected by many factors, including our ability to introduce new products and maintain the quality of our products.

In order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively. Moreover, our ability to sustain our rate of growth depends significantly upon our ability to select and retain key managerial personnel, maintaining effective risk management policies and training managerial personnel to address emerging challenges.

We cannot assure you that our existing or future management, operational and financial systems, procedures and controls will be adequate to support future operations or establish or develop business relationships beneficial to future operations. Failure to manage growth effectively could have an adverse effect on our business and results of operations.

16. *Our inability to maintain distribution network can adversely affect our revenues.*

We have sales team on pay roll in the states where our products are sold. These sales team further search for distributors, who further take help of retailers/wholesalers to sell our products to final consumers. Therefore, it's a long chain to maintain and keep a check on our sales team along with the distributors. Our inability to maintain our existing distribution network or to expand it further as per the requirement of our proposed increased capacities, can adversely affect our revenues. In case, if we are not able to market our manufactured and /or traded products, it may affect our operations and profitability adversely. Additionally, if we are not able to maintain the chain or simplify the process of distribution, our business and profitability will be adversely affected.

17. *Unfavourable local and global weather patterns may have an adverse effect on our business, results of operations and financial condition.*

Our businesses are sensitive to weather conditions, including extremes such as drought and natural disasters. There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns and the frequency and severity of extreme weather and natural disasters. The availability of raw materials that we require for our operations and the demand for our products may be adversely affected by longer than usual periods of heavy rainfall in certain regions or a drought in India caused by weather patterns such as the El Nino. For example, natural disasters, excessive rainfall or extended periods of dry weather will lead to a decrease in the overall germination and growth of groundnut plantations to which we have access. Excessive rainfall may lead to poor pollination, decrease the effectiveness of fertilizers and affect harvesting, while drought results affecting its productivity to fifty percent. Adverse weather conditions may also cause volatility in the prices of commodities, which may affect growers' decisions about the types and quantum of crops to plant and may consequently affect the sales of our crop protection products. The increasing concern over climate change may also result in enhanced regional and global legal and regulatory requirements to reduce or mitigate the effects of greenhouse gases, as well as more stringent regulation of water rights. In the event that such regulations are enacted and are more aggressive than the sustainability measures that we are currently undertaking to monitor our emissions, improve our energy efficiency, and reduce and reuse water, we may experience significant increases in our costs of operations. Consequently, the occurrence of any such unfavourable weather patterns may adversely affect our business, results of operations and financial condition.

Any negative cash flows in the future could adversely affect our results of operations and financial condition. For further details, see “*Management’s Discussion and Analysis of our Financial Condition and Results of Operations –Cash Flows*” on page 86 of this Draft Letter of Offer.

19. Non-compliance with and changes in, safety, health, environmental and labour laws and other applicable regulations, may adversely affect our business, results of operations, financial condition and cash flows.

Our products, including the process of manufacture, storage and distribution of such products, are subject to numerous laws and regulations in relation to quality, safety and health. We are required to obtain and maintain various regulatory approvals and registrations for our operations, including consents from the local pollution control board in India to establish and operate manufacturing facilities. There can be no assurance that these relevant authorities will issue such permits or approvals, or renewals thereof, in the time frame anticipated by us. While we believe we currently have all the permits and approvals required for operating our manufacturing facility, certain of these approvals require to be renewed periodically, and we cannot assure you that we would be successful in renewing them in a timely manner or at all. These laws, rules and regulations also prescribe for penalties in case of any violations, and such permits or approvals may impose certain additional conditions on our Company.

We are also subject to the laws and regulations governing employees, including in relation to minimum wage and maximum working hours, overtime, working conditions, hiring and termination of employees, contract labour and work permits. These laws and regulations have, however, become increasingly stringent and it is possible that they will become significantly more stringent in the future. We cannot assure you that we will not be found to be in non-compliance with, or remain in compliance with all applicable environmental, health and safety and labour laws and regulations or the terms and conditions of any consents or permits in the future or that such compliance will not result in a curtailment of production or a material increase in the costs of production.

20. Our products are edible items and any dispute with consumers, regarding the quality of our products, may adversely affect the image and reputation of our Company.

Our operations of procuring raw oil, checking the quality as per the prescribed standards, storing, filtration of oil, storage of filtered oil and final packing. Any occurrence of any accident and/ or negligence and/ or oversight in the process may lead to non-compliance of quality standards as applicable to our products. For example, a small hair in our product may spoil the brand image of our Company. Occurrence of any such event may expose our Company to liabilities and claims which could adversely affect the brand image and reputation of our Company and our future growth, operations and profitability may be adversely affected. However, till date there were no such instances of any disputes with consumers.

21. As the Equity Shares of our Company are listed on the Stock Exchanges, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations and comply with other SEBI Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.

The Equity Shares of our Company are listed on BSE and NSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations. There have been instances in the past wherein, our Company has failed to comply with the requirements of the SEBI Listing Regulations in a timely

manner for example a notice have been issued in the year 2020 by NSE with respect to certain non-compliance under Regulation 17(1)(b) and Regulation 18 of SEBI Listing Regulations. The Company through its replies have explained the non-compliance and matter was quietus. But later the matter was reopened by NSE and Company has given its response.

Our Company endeavours to comply with all such obligations/reporting requirements, there may be non-disclosures/delayed/erroneous disclosures and/or any other violations which might have been committed by us, and the same may result into Stock Exchanges and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act and Rules and Regulations made there under and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

22. *If we are unable to introduce new products and respond to changing consumer preferences in a timely and effective manner or technological obsolescence the demand for our products may decline, which may have an adverse effect on our business, results of operations and financial condition.*

The success of our business depends upon our ability to anticipate and identify changes in consumer preferences and offer products that consumers require. For example, consumers in the edible oil markets are becoming more health conscious and select cooking oils based on considerations other than price and taste. Additionally, such consumer preferences are influenced by a number of other factors beyond our control, such as the prices of alternative products and economic conditions.

Before we can introduce a new product, we must successfully execute a number of steps, including successful research and development, obtaining required approvals and registrations, effective marketing strategies for our target customers, while scaling our vendor, production and infrastructure networks to increase or change the nature of our production capacity. We also depend on the successful introduction of new production and manufacturing processes to create innovative products, achieve operational efficiencies and adapt to advances in, or obsolescence of our technology. We cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to our technological infrastructure, keep up with technological improvements in order to meet our customers' needs or that the technology developed by others will not render our products less competitive or attractive. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs and lead to us being less competitive in terms of our prices or quality of products we sell. Failure in identifying the market and updating the technology could have an adverse effect on our business, results of operations and financial conditions.

23. *We maintain insurance coverage to cover certain risks associated with our business.*

Our Company has covered itself against certain risks. In case of any casualty, there can be no assurance that any claim under the insurance policies obtained by our Company will be honoured fully/ in part on time. Further, our Company may not have obtained or may not timely renewed insurance cover for any of our asset that does not expressly require us to maintain insurance.

We cannot assure you that our current insurance policies will insure us fully against all risks and losses that may arise in the future. Even if such losses are insured, we may be required to pay a significant deductible on any claim for recovery of such a loss, or the amount of the loss may exceed our coverage for the loss. In addition, our insurance policies are subject to annual renewal, and we cannot assure you that we will be able to renew these policies on similar or otherwise acceptable terms, or at all. If we incur a serious uninsured loss or a loss that significantly exceeds the limits of our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition.

24. *We are subject to government regulation and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business and results of operations may be adversely affected.*

Our operations are subject to government regulation and we are required to obtain and maintain a number of statutory and regulatory permits, certificates and approvals under central, state and local government rules in India, including approvals under the Food Safety and Standards Act, 2006 (the "FSSAI"), environmental related approvals, Legal Metrology Act, 2006, factory licenses, petroleum, tax related approvals etc., generally for carrying out our business and for our manufacturing units. For instance, the provisions of the FSSAI along with relevant rules and regulations are applicable to us and our products, which sets forth requirements relating to the license and registration of food businesses and general principles for food safety standards, and manufacture,

storage and distribution of food products. Contravention of the requirement to obtain a license or carrying a business without obtaining a license under the FSSAI is punishable with imprisonment for a period of up to six months and fines. Subsequent contraventions are punishable with twice the punishment during the first conviction and higher monetary and other penalties including cancellation of license.

As we require several statutory and regulatory permits, licenses and approvals in the ordinary course of our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension, delay in issuance or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business.

25. *Our inability to protect or use our intellectual property rights may adversely affect our business.*

We consider our brands and intellectual property to be one of our most valuable assets and we have several trademarks registered in India. We also rely on unpatented proprietary know-how, continuing technological innovation and other trade secrets to develop and maintain our competitive position. While we have applied for trademark registrations for certain of our products, which are currently pending and are opposed by third parties. If we are unable to register our trademarks for various reasons including our inability to remove objections to our trademark applications, or if any of our unregistered trademarks are registered in favour of or used by a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may not be able to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities, causing damage to our business prospects, reputation and goodwill.

Apart from the above, there are around various trademark oppositions filed by our Company with Trademarks Registry. These are against the third parties who have either applied for similar trademark or have used our Company's name in formation of their trademark, which might deceive the end user i.e. our customers, who might get an impression that the product is produced by our Company. This decisiveness might harm our reputation and give a wrong image of our Company and hence, we have opposed these similar trademarks to be registered. But in any case, if we are not able to get the result in our favour than it might affect our reputation and affect our business.

The measures we take to protect our intellectual property include initiating legal proceedings, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition.

26. *Fluctuations of oil prices in the international market which directly affect Indian market may affect our sales, business and results of operation.*

The current fluctuation in the oil market internationally due to war between Ukraine and Russia has impacted the Indian economy. If the war continues the impact would be deeper. Recent spikes in edible oil prices are unlikely to sustain for a prolonged period as demand for edible oils will deteriorate at higher price levels. Due to these reasons to maintain the current profits, we will require to increase the cost of our products. This increased cost may hit our current customers and they may switch to another cheaper options available in the market. We cannot assure, if we can maintain our profit margins and our sales turnover. Thus, the effect of increase in oil prices will affect our sales, business and its operations.

27. *We require sizeable amounts of working capital for our continued operation and growth. Our inability to meet our future working capital requirements could have a material adverse effect on our business, results of operations and financial condition.*

Our business requires working capital for day-to-day operations, procurement of raw materials and production. In addition, certain purchase orders may require a considerable increase in materials and production costs. The credit period given to customers may be considerable and customers may not be invoiced for products until the time of product delivery or after product delivery and, in some cases, the customer may not pay our invoices on time or at all. Our future success depends on our ability to continue to secure and successfully manage sufficient amounts of working capital. The actual amount of our future capital requirements may differ from estimates as a result of,

among other factors, unanticipated expenses, regulatory changes, economic conditions, technological changes and additional market developments.

Our inability to meet our working capital requirements cash from our operations, or the proceeds of the Issue, as the case may be, could have a material adverse effect on our business, results of operations and financial condition.

28. ***Our ability to pay dividends in the future will depend on a number of factors, including our profit after tax for the fiscal year, our capital requirements, our financial condition, our cash flows and applicable taxes, including dividend distribution tax payable by us.***

We have not paid any dividends in the last three Fiscals. Our ability to pay dividends in the future will depend on a number of factors, including our profit after tax for the fiscal year, our capital requirements, our financial condition, our cash flows and applicable taxes, including dividend distribution tax payable by us. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and subsequent approval of Shareholders and will depend on factors that our Board and Shareholders deem relevant. We may decide to retain all our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. We cannot assure you that we will be able to pay dividends in the future.

29. ***Our Promoters will continue to retain majority control over our Company even after this Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.***

After completion of this Issue, our Promoters own [●] of the paid-up capital of our Company. As a result, our Promoters will be able to exercise a significant control on the outcome of any proposal that can be approved by a majority shareholder voting, including, the election of members to our board of directors. The interests of our Promoters may conflict with the interests of our other investors.

30. ***Any increase in or realization of our contingent liabilities could have a material adverse effect on our business, results of operations and financial condition.***

31. ***The success of our business depends on our management team and key operational workforce. Our inability to retain them could adversely affect our businesses.***

Our future success depends on the continued services and performance of the members of our management team and other key employees, strong promoter pedigree and experienced promoter. We cannot assure that we will be able to retain our existing senior management or attract and retain new senior management in the future. Any loss

of the services of key persons in the organisation could impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business and results of operations. We do not maintain **‘key man’** life insurance for senior members of our management team or other key personnel.

The success of our business will also depend on our ability to identify, attract, hire, train, retain and motivate skilled personnel in accordance with the requirement of our business. If we fail to hire and retain sufficient numbers of qualified personnel for functions such as manufacturing, technical, finance, marketing, sales and operations, our business, results of operations and financial condition could be adversely affected. Further, we cannot assure you that we will be able to re deploy and re-train our personnel to keep pace with continuing changes in our business and in the industry in which we operate.

32. *A shortage or non-availability of electricity and fuel may adversely affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.*

Our manufacturing operations require a significant amount and continuous supply of electricity and fuel and any shortage or non-availability may adversely affect our operations. We currently source our water requirements from state and municipal corporations and depend on state electricity boards for our energy requirements. Although we have diesel generators to meet exigencies. For running our diesel generators, we have a storage capacity of 2500 liters. Further, if we increase our storage capacity, we may require license from government authority. Any failure on our part to obtain alternate sources of electricity and fuel, in a timely fashion, and at an acceptable cost, may have an adverse effect on our business, results of operations and financial condition.

33. *Our warehouses/ depots are on leased premises. Our inability to seek renewal or extension of such leases may materially affect our business operations.*

We have leased out premises to store our stocks in Lucknow and Ghaziabad from various third parties. These are not long-term agreements and would require timely renewal. We may also enter into such transactions with third parties in the future. Any adverse impact on the title, ownership rights, development rights of the owners from whose premises we operate, breach of the contractual terms of any lease, leave and license agreements, or any inability to renew such agreements on acceptable terms may materially affect our business operations.

34. *The emergence of modern trade channels in the form of hypermarkets, supermarkets and online retailers may adversely affect our pricing ability, which may have an adverse effect on our results of operations and financial condition.*

While most of our current sales are through traditional trade channels, we sell some of our products to retail customers through modern trade channels, which include supermarkets, hypermarkets and we expect to have to do so more going forward with the increasing popularity of modern trade channels. In this regard, India has recently witnessed the emergence of supermarket and hypermarket chains and online retailers and the market penetration of large scaled organized retail in India is likely to increase further. While we believe this provides us with an opportunity to improve our supply chain efficiencies and increase the visibility of our brands, it also increases the negotiating position of such stores. We cannot assure you that we will be able to negotiate new distribution agreements, specially our pricing or credit provisions, on terms favourable to us, or at all. Any inability to enter into distribution agreements and on terms favourable to us, may have an adverse effect on our pricing and margins, and consequently adversely affect our results of operations and financial condition. Additionally, several large retailers have their own private labels under which they sell private label products which are typically cheaper than our brands, and this presents competition for our brands in the retail market.

35. *Any damages caused by fraud or other misconduct by our employees could adversely affect our business, results of operations and financial condition.*

We are exposed to operational risk arising from inadequacy or failure of internal processes or systems or from fraud. We are also susceptible to fraud or misconduct by employees or outsiders, unauthorised transactions by employees and operational errors. Further, unauthorised risks taken by our employees beyond the risk management limits, not reporting business and operational issues that may result in claims and damages far in excess of material cost. Our management information systems and internal control procedures are designed to monitor our operations and overall compliance. However, they may not be able to identify non-compliance and/or suspicious transactions in a timely manner or at all. As a result, we may suffer monetary losses, including contractual liabilities and penalties, which may not be covered by our insurance and may thereby adversely affect our business, results of operations and financial condition. Although, there have been no instances of fraud or

misconduct by our employees, such a result may also adversely affect our reputation, business, results of operations and financial condition.

36. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

37. *Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations. Further, failure to manage our inventory could have an adverse effect on our sales, profitability, cash flow and liquidity.*

Our business requires a significant amount of working capital for smooth functioning. As on September 30, 2022, March 31, 2022 and March 31, 2021, our inventories form 15.98%, 19.43% and 14.27% of our respective total assets and 38.75%, 45.07% and 41.04% of our respective current assets and trade receivables form 16.43%, 18.07% and 16.01% of our respective total assets and 39.84%, 41.89% and 46.04% of our respective current assets. We meet our requirement for working capital majorly through promoter funding and internal accruals. In future, our inability, if any, to meet our working capital requirements or inability to renew our existing working capital requirements through banking arrangements can adversely impact our business operations and financial position.

Our business is working capital intensive. A significant portion of our working capital is utilized towards trade receivables and inventories. Summary of our working capital position as on September 30, 2022, March 31, 2022 and March 31, 2021 is given below:

(Amount in Lakhs)

Sr. No	Particulars	Six- Month period ended September 30, 2022	As on March 31, 2022	As on March 31, 2021
I	Current Assets			
1	Trade receivables	554.78	642.59	520.12
2	Other current assets	267.47	168.48	112.93
3	Inventories	539.59	691.23	463.64
4	Cash and cash equivalents	30.59	31.53	32.92
	Total Current Assets (I)	1,392.43	1,533.83	1,129.61
II	Current Liabilities			
1	Trade Payables	1,123.12	1374.72	942.60
2	Short Term Borrowings	2,726.43	2,721.42	2,442.99
3	Other Current Liabilities	115.21	108.05	256.07
3	Other Financial Liabilities	193.58	256.81	674.70
	Total Current Liabilities (II)	4,158.34	4,461.00	4,316.36
III	Net Working Capital Requirements (I – II)	(2,765.91)	(2,927.17)	(3,186.75)
IV	Inventories as a % of Total Current Assets	38.75%	45.07%	41.04%
V	Trade Receivables as a % of Total Current Assets	39.84%	41.89%	46.04%

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables and inventories. The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture and trade

inventory accordingly. We estimate our sales based on the forecast, demand and requirements and also on the customer specifications.

Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of raw material and local transportation. Should our supply of raw materials be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation. To improve our line capability, we try to stock our inventory at our manufacturing facility. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of- stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

We intend to continue growing by expanding our business operations. This may result in increase in the quantum of current assets particularly trade receivables and inventories. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapters titled “*Objects of the Issue*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operation*” beginning on pages 50 and 140, respectively, of this Draft Letter of Offer.

38. *Our inability to accurately forecast demand or price for our products and manage our inventory may have an adverse effect on our business, results of operations and financial condition.*

Our businesses depend on our estimate of the demand for our products from customers. If we underestimate demand or have inadequate capacity due to which we are unable to meet the demand for our products, we may manufacture fewer quantities of products than required, which could result in the loss of business. While we forecast the demand and price for our products and accordingly plan our production volumes, any error in our forecast could result in a reduction in our profit margins and surplus stock, which may result in additional storage cost and such surplus stock may not be sold in a timely manner, or at all. At times when we have overestimated demand, we may have incurred costs to build capacity or purchased more raw materials and manufactured more products than required. In addition, certain of our products have a shelf life of a specified period and if not sold prior to expiry, may lead to losses or if consumed after expiry, may lead to health hazards. Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, results of operations and financial condition.

39. *Any contamination or deterioration of our products could result in legal liability, damage our reputation and adversely affect our business prospects and consequently our financial performance.*

We are subject to various contamination related risks which typically affect the FMCG products industry, including risks posed by the following:

- product tampering;
- low shelf life of certain of our products;
- ineffective storage of finished goods as well as raw materials;
- product labelling errors;
- non-maintenance of high food safety standards;
- contamination of our products during processing; and
- wastage of certain products during transportation.

The risk of contamination or deterioration of our products exists at each stage of the life-cycle of our products such as sourcing of raw materials, storage, production and delivery of the final products. Packaging, storage and delivery of our products to our consumers and the storage and shelving of our products by our stockists, distributors and retailers until final consumption by consumers are also subject to such contamination and deterioration risks. While we follow stringent quality control processes and quality standards at each stage of the production cycle such as conducting sampling tests to ensure that the colour, odour, taste, appearance and nutrients of the raw materials, comply with our requirements or regulatory requirements or standards set by our consumers in the export markets, maintain our facilities and machinery, and conduct our manufacturing operations in compliance with applicable food safety standards, laws and regulations and our own internal policies, and though we have, in the past, not materially suffered due to any of the aforementioned, we cannot assure that our products will not be contaminated or suffer deterioration in the future.

Our manufacturing facility for certain product categories are located in close proximity to the delivery locations or the ports. However, the finished products are primarily transferred on a 'free on board – destination' basis to distributors and stockists. We cannot assure that contamination and deterioration of our products or raw materials will not occur during the transportation, and distribution due to ineffective storage facilities or any other reasons including factors unknown to us or beyond our control. If our products or raw materials are found to be amongst others, spoiled, contaminated, adulterated, tampered with, incorrectly labelled or reported to be associated with any such incidents, we may be forced to recall our products from the market and we could incur criminal or civil liability for any adverse medical condition or other damage resulting from consumption of such products by consumers which we may not be able to fully recover from our suppliers or insurance coverages. We may also be subject to liabilities arising out of such violations under the provisions of the Food Safety and Standards Act, 2006 ("FSS Act") along with relevant rules and regulations. Though, we have not been subject to such incidents during fiscal 2020 and fiscal 2021, however, we may be subject to such an event in the future, which may have a material adverse effect on our reputation, business and financial condition.

If we were to incur a serious uninsured loss or any product liability claim or a loss that significantly exceeds the limits of our insurance policies, it could have a material adverse effect on our business, results of operations and financial condition.

EXTERNAL RISKS

40. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition

In recent months, consumer and wholesale prices in India have exhibited increased inflationary trends, as the result of an increase in crude oil prices, higher international commodity prices, and higher domestic consumer and supplier prices. The Consumer Price Index increased from 3.4% (average) in Fiscal 2019 to 4.8% (average) in Fiscal 2020 to an estimated 6.2% (average) in Fiscal 2021 although the RBI has enacted certain policy measures designed to curb inflation, these policies may not be successful. In February 2022, hostilities between Russia and the Ukraine commenced. The market price of oil has risen sharply since the commencement of these hostilities which could have an inflationary effect in India. Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, raw materials and other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our business, financial condition and results of operations.

41. Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations, financial condition and cash flows.

The Indian economy and capital markets are influenced by economic, political and market conditions in India and globally. We currently operate only in India and as a result, are dependent on prevailing economic conditions in India. Our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy and hence our results of operations, may include:

- the macroeconomic climate, including, any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in and actual or perceived trends in trading activity on, India's principal stock exchanges; changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- occurrence of natural or man-made disasters (such as typhoons, flooding, earthquakes and fires) which may cause us to suspend some or all of our operations;
- civil unrest, acts of violence, terrorist attacks, regional conflicts or situations or war;
- epidemic, pandemic or any other public health issue in India or in countries in the region or globally, including in India's various neighboring countries, such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 pandemic;
- prevailing regional or global economic conditions,
- any downgrading of India's credit rating by a domestic or international rating agency;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, increased regulations or capital investment requirements;
- logistical and communications challenges;
- financial instability in financial markets;

- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis;
- prolonged Russia-Ukraine conflict that is currently impacting, inter alia, global trade, prices of oil and gas and could have an inflationary impact on the Indian economy;
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so; and
- other significant regulatory or economic developments affecting India Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

42. *Changing laws, rules and regulations and legal uncertainties in India and other countries may adversely affect our business and financial performance.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“GST”) regime with effect from July 1, 2017, that combined multiple taxes levied by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

Further, the Government of India has announced the union budget for the Fiscal 2023, and the Finance Bill, 2022 (“Finance Bill”) has been introduced in Lok Sabha on February 1, 2022. Subsequently, the Finance Bill 2022 received the assent from the President of India on March 30, 2022, and became the Finance Act, 2022 (“Finance Act 2022”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, a draft of the Personal Data Protection Bill, 2019 (“Bill”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

43. *Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations and financial condition.*

We are incorporated in India and all of our operations are located in India. As a result, our results of operations and financial condition are significantly affected by factors influencing the Indian economy. Any slowdown in economic growth in India could adversely affect us, including our ability to grow our business and revenues and our ability to implement our strategy. In addition, an increase in India’s trade deficit, a downgrading in India’s sovereign debt rating or a decline in India’s foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations and financial condition.

44. *Recent global economic conditions have been unprecedented and challenging and continue to affect the Indian market, which may adversely affect our business, results of operations and financial condition.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors’ reactions to developments in one country may have adverse effects

on the market price of securities of companies located in other countries, including India. For instance, the economic downturn in the U.S. and several European countries during a part of Fiscal 2008 and 2009 adversely affected market prices in the global securities markets, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India, and could depress economic activity and restrict our access to capital. Any financial disruption could have an adverse effect on our business, results of operations and financial condition, future financial performance, shareholders' equity and the price of our Equity Shares.

45. Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

46. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who

seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

47. *A decline in India's foreign exchange reserves may affect liquidity and interest rates in the Indian economy, which could adversely impact our financial condition.*

Flows to foreign exchange reserves can be volatile, and past declines may have adversely affected the valuation of the Rupee. Further, declines in foreign exchange reserves as well as other factors could adversely affect the valuation of the Rupee and could result in reduced liquidity and higher interest rates that could adversely affect our future financial performance.

48. *We may be affected by competition laws, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002, of India, as amended ("Competition Act"), regulates practices having an appreciable adverse effect on competition in the relevant market in India ("AAEC"). Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an AAEC is considered void and may result in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment or the provision of services or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or number of customers in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise.

On March 4, 2011, the Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India (the "CCI"). Additionally, on May 11, 2011, the CCI issued Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that maybe generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations, cash flows and prospects.

49. *Communal disturbances, riots, terrorist attacks, other acts of violence or war involving India and/or other countries, health epidemics and natural calamities or similar events that are beyond our control could adversely affect India's economy and the financial markets, result in loss of customer confidence, and adversely affect the price of our Equity Shares, our business results of operations and financial condition.*

India has experienced communal disturbances, terrorist attacks and riots during recent years. Any major hostilities or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business and may adversely affect the Indian stock markets where our Equity Shares will trade as well as global equity markets generally. Such acts could negatively impact business sentiment and consumer confidence, which could adversely affect our business, results of operations and financial condition.

India and other countries may enter armed conflict or war with other countries or extend pre-existing hostilities. Military activity or terrorist attacks could adversely affect the Indian economy by, for example, disrupting communications and making travel more difficult. Such events could also create a perception that investments in Indian companies involve a higher degree of risk. This could adversely affect customer confidence in India, which could have a negative impact on the economies of India and other countries, on the markets for our products and

services and on our business.

Any future outbreak of infectious diseases or pandemic like covid, other serious public health epidemics may have a negative impact on the economies, financial markets and level of business activity in affected areas, which may adversely affect our business.

India has also experienced natural calamities such as earthquakes, floods, drought and a tsunami in the recent past. The length and severity of these natural disasters determine the extent of their impact on the Indian economy. Prolonged spells of abnormal rainfall and other natural calamities could have an adverse impact on the Indian economy.

Such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares, and adversely affect our business, results of operations and financial condition.

ISSUE SPECIFIC RISK

- 50. *SEBI by way of circulars dated January 22, 2020, May 6, 2020, July 24, 2020, January 19, 2021, April 22, 2021, and May 19, 2022 streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.***

As the concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, July 24, 2020, January 19, 2021, April 22, 2021 and May 19, 2022, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialized form; and (ii) a demat suspense escrow account (namely, “[●]”) opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

- 51. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 164 of this Draft Letter of Offer.

- 52. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020 and May 6, 2020, read with SEBI circular SEBI/HO/CFD/DIL1/CIR/P/2020/136 dated July 24, 2020, SEBI circular

SEBI/HO/CFD/DIL1/CIR/P/2021/13 dated January 19, 2021, SEBI circular bearing reference number SEBI/HO/CFD/DIL2/CIR/P/2021/552 dated April 22, 2021 and SEBI circular bearing reference number SEBI/HO/CFD/SSEP/CIR/P/2022/66 dated May 19, 2022, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 164 of this Draft Letter of Offer. In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circulars, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only.

53. *Investors will not have the option of getting the Allotment of Rights Equity Shares in physical form and the Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholders”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with Regulation 77A of the SEBI (ICDR) Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. For details, see “*Terms of the Issue – Procedure for Application by Eligible Equity Shareholders holding Equity Shares in physical form*” on page 169 of this Draft Letter of Offer.

54. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant’s decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants’ ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

55. *Our Company will not distribute the Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form to certain overseas Shareholders who have not provided an address in India for service of documents.*

Our Company will dispatch the Letter of Offer, the Abridged Letter of Offer, Rights Entitlement Letter and Application Form (the “Offering Materials”) to such shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

56. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that

we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

57. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Rights Equity Shares and Rights Entitlement.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 (Twelve) months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 (Twelve) months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

58. *You may not receive the Equity Shares that you subscribe in the Issue until 15 (fifteen) days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 (fifteen) days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

59. *There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.*

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

60. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

61. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to

undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

62. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a Company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian Company than as shareholder of a corporation in another jurisdiction.

63. There may be less information available in the Indian securities markets than in more developed securities markets in other countries.

There is a difference between the level of regulation and monitoring of the Indian securities markets and that of the activities of investors, brokers and other participants in securities markets in more developed economies SEBI is responsible for monitoring disclosure and other regulatory standards for the Indian securities market. SEBI has issued regulations and guidelines on disclosure requirements, insider trading and other matters. There may be less publicly available information about Indian companies than is regularly made available by public companies in more developed countries pursuant to such disclosure requirements, which could adversely affect the market for our Equity Shares. As a result, investors may have access to less information about our business, financial condition, cash flows and results of operation, on an ongoing basis, than investors in companies subject to the reporting requirements of other more developed countries.

64. No market for the Rights Entitlements may develop and the price of the Rights Entitlements may be volatile.

No assurance can be given that an active trading market for the Rights Entitlements will develop on the Stock Exchanges during the Renunciation Period or that there will be sufficient liquidity in Rights Entitlements trading during this period. The trading price of the Rights Entitlements will not only depend on supply and demand for the Rights Entitlements, which may be affected by factors unrelated to the trading in the Equity Shares, but also on the quoted price of the Equity Shares, amongst others. Factors affecting the volatility of the price of the Equity Shares, as described herein, may magnify the volatility of the trading price of the Rights Entitlements, and a decline in the price of the Equity Shares will have an adverse impact on the trading price of the Rights Entitlements. Since the trading of the Equity Shares will be on a separate segment compared to the Equity Shares on the floor of the Stock Exchanges, the trading of Equity Shares may not track the trading of Equity Shares. The trading price of the Rights Entitlements may be subject to greater price fluctuations than that of the Equity Shares.

65. There is no public market for the Equity Shares or Equity Shares outside India.

After this Issue, there will continue to be no public market for our Equity Shares in the United States or any country other than India, we cannot assure you that the face value of the Equity Shares will correspond to the price at which the Equity Shares will trade subsequent to this Issue. This may also affect the liquidity of our Equity Shares and Equity Shares and restrict your ability to sell them.

66. Any trading closures at the Stock Exchanges may adversely affect the trading prices of our Equity Shares.

Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

GLOBAL ECONOMIC SCENARIO

Fragmentation and Fragility Set to Slow Growth during 2022–23

The war in Ukraine has led to extensive loss of life, triggered the biggest refugee crisis in Europe since World War II, and severely set back the global recovery. After a strong recovery in 2021, short-term indicators suggest that global activity has slowed (see Figure 1.1). Global growth is projected to decline from an estimated 6.1 percent in 2021 to 3.6 percent in 2022–23—0.8 and 0.2 percentage points lower for 2022 and 2023 than in the January 2022 World Economic Outlook. The ongoing war in Ukraine and sanctions on Russia are expected to reduce global growth in 2022 through direct impacts on the two countries and global spillovers. This shock comes just as the threat from the Omicron variant appeared to be fading, with many parts of world moving past the acute phase of the pandemic.

(Source: <https://www.imf.org/en/Publications/WEO/Issues/2022/04/19/world-economic-outlook-april-2022>)

Five principal forces shape the near-term global outlook:

- **War in Ukraine**—The invasion and resulting sanctions on Russia will have important consequences for the global economy. The baseline forecast assumes that the theater of conflict remains limited to Ukraine and that sanctions on Russia (along with European plans to become independent of Russian energy) do not tighten beyond those announced by March 31 and remain in place over the forecast horizon. The effects of conflict and sanctions will hit Ukraine, Russia, and Belarus directly. But international spillovers via global commodity prices, trade and financial linkages, labor supply, and humanitarian impacts will spread the effects more widely—notably in Europe.
- **Monetary tightening and financial market volatility** —Even before the war, inflation had risen significantly (Figure 1.2), and many central banks tightened monetary policy. This contributed to a rapid increase in nominal interest rates across advanced economy sovereign borrowers. In the months ahead, policy rates are generally expected to rise further and record-high central bank balance sheets will begin to unwind, most notably in advanced economies (for more discussion, see the April 2022 Global Financial Stability Report). In emerging market and developing economies, several central banks also tightened policy, adding to those that had already done so in 2021. One exception is China, where inflation remains low and the central bank cut policy rates in January 2022 to support the recovery. Expectations of tighter policy and worries about the war have contributed to financial market volatility and risk repricing (see the April 2022 Global Financial Stability Report). In particular, the war and related sanctions have tightened global financial conditions, lowered risk appetite, and induced flight-to-quality flows. In Russia, the sanctions and the impairment of domestic financial intermediation have led to large increases in its sovereign and credit default swap spreads. Emerging market economies in the region, as well as Caucasus, Central Asia, and North Africa, have also seen their sovereign spreads widen (Figure 1.3).

Emerging markets capital outflows in early March were as large and fast as those seen early in the pandemic, albeit concentrated among a few economies. Since mid-March, though, the situation has stabilized, with slow-but-steady capital inflows reversing around one quarter of initial losses. Overall, markets have so far differentiated across emerging market securities based on geographic proximity, trade linkages, and commodity exposures to Russia and Ukraine.

Expectations are based on the federal funds rate futures for the United States, the sterling overnight interbank average rate for the United Kingdom, and the euro short-term rate (€STR) forward rates for the euro area, updated April 8, 2022.

- **Fiscal withdrawal**—Policy space in many countries has been eroded by necessary higher COVID-related spending and lower tax revenue in 2020–21. Faced with rising borrowing costs, governments are increasingly challenged by the imperative to rebuild buffers. Fiscal support is set to generally decline in 2022 and 2023—particularly in advanced economies—as emergency measures to cushion the impact of the pandemic are wound down (Figure 1.4; also see the April 2022 Fiscal Monitor for more discussion on the evolution of fiscal measures over the acute phase of the pandemic and subsequent recovery).
- **China's slowdown**—Slowing growth in China's economy has wider ramifications for Asia and for commodity exporters. The combination of more transmissible variants and a zero-COVID strategy entail the prospect of more frequent lockdowns, with attendant effects on private consumption in China. Moreover, the continued tight stance toward highly leveraged property developers means that real estate investment remains subdued.

(Change in structural primary fiscal balance, percent of potential GDP)

Note: Cyclically adjusted balance is the general government balance adjusted for the economic cycle. Structural balance is the cyclically adjusted balance corrected for a broader range of noncyclical factors, such as asset and commodity prices. Primary balances shown are obtained by subtracting interest income and adding interest expense to the two series.

- Pandemic and vaccine access**—Worker shortages and mobility restrictions compounded supply disruptions and bottlenecks early in 2022, constraining activity and adding to inflation. Restrictions have begun to ease as the peak of the Omicron wave passes and global weekly COVID deaths decline (Figure 1.5). The risk of infection leading to severe illness or death appears lower for the dominant Omicron strain than for others—especially for the vaccinated and boosted. The baseline assumes that the health and economic impacts of the virus start to fade in the second quarter of 2022 and that hospitalizations and deaths are brought to low levels in most countries by the end of the year. A key assumption in the baseline is that the virus does not mutate into new strains requiring further restrictions (see “Risks Are Large and to the Downside” in this chapter). The baseline assumes that most countries will not attain the target of 70 percent full vaccination in 2022. Given vaccination shortfalls in low-income countries, the possibility of renewed outbreaks is factored into the baseline. Yet their impact on activity is assumed to be less than in earlier waves. Adaptation has improved, effective therapeutics are more readily available, and immunity due to previous infection or vaccination has increased. The forecasts are based on information up to 31 March 2022.

Economic Slack to Narrow in the Medium Term; Significant Scarring Expected

Beyond short-term output losses, the pandemic and geopolitical conflict are likely to leave longer-lasting footprints. First and foremost, the displacement of people and destruction of physical capital will mean that activity in Ukraine will remain well below pre-war projections for some time. Elsewhere, sanctions can induce permanent dismantling of trade and supply chain linkages, entailing productivity and efficiency losses along the way. This is most prominent in Russia, where output is expected to remain below pre-war projections in the medium term. And scarring effects from the pandemic are likely to materialize through several other channels—including corporate bankruptcies, productivity losses, lower capital accumulation due to a drag on investment, slower labor force growth, and human capital losses from school closures.

Scarring effects from the pandemic are expected to be much larger in emerging market and developing economies because of relatively larger human capital and investment losses along with more limited telework adaptability, more limited policy support, and generally slower vaccination. In those economies, economic activity and employment are expected to remain below the pre-pandemic trend throughout the forecast horizon. Overall, the pattern of forecast revisions indicates that the pandemic shock to advanced economies has been relatively more transitory; while in emerging market and developing economies it has been relatively more permanent.

Risks Are Large and to the Downside

The risks to the outlook are to the downside. Although a fast resolution of the war in Ukraine would lift confidence, ease pressure on commodity markets, and reduce supply bottlenecks, it is more likely that growth could slow further and inflation turn out higher than expected. Overall, risks are elevated and broadly comparable to the situation at the start of the pandemic—an unprecedented combination of factors shapes the outlook, with individual elements interacting in ways that are inherently difficult to predict. Many of the risks described below are essentially an intensification of forces already present in the baseline. Moreover, the realization of near-term risks can precipitate medium-term risks and make it harder to address longer-term challenges. The most prominent negative risks include the following:

- 1) **A worsening of the war** would exacerbate the direct and indirect effects factored in the baseline forecast. In addition, tighter sanctions could lead to additional ruptures of trade connections—including crucial energy links between Russia and Europe—with detrimental effects on cross-border investment. This would lead to more supply disruptions, global price rises, and volatility in commodity markets, with further declines in regional and global output.
- 2) **Increased social tensions:** The war in Ukraine has increased the probability of wider social tensions in the near term through two main channels. The first is a further sharp rise in global fuel and food prices—a particular concern in emerging market and developing economies with limited fiscal space that are highly dependent on energy and food imports for basic consumption. This could intensify commodity hoarding, export controls, and domestic restrictions—with further knock-on effects on supply disruptions, prices, and social unrest. The second is the longer-term impact of the humanitarian crisis. And such pressures will be amplified should the conflict spread or persist. In the longer term, large refugee inflows may exacerbate preexisting social tensions and fuel unrest.
- 3) **A resurgence of the pandemic:** Although conditions are improving, the pandemic may yet take another turn for the worse—as seen, for example, with recent rising caseloads in China and elsewhere in the Asia-Pacific region.
- 4) **A worsening slowdown in China:** A prolonged downturn in China is another immediate risk that could expose structural weaknesses such as high local government liabilities, property developer leverage, household debt, and a fragile banking system. In addition, the combination of more transmissible variants and the strict zero – COVID policy could continue to hamper economic activity and increase uncertainty. Larger disruptions could impact key commercial activities, including through port lockdowns.
- 5) **Rising medium – term inflation expectations:** Inflation expectations remained reasonably well anchored in most economies during the pandemic. Despite recent rises, markets expect inflation to moderate over the medium term as central banks around the world respond. Inflation expectations have so far risen substantially in only a few emerging market and developing economies. Yet with already high inflation and rising energy and food prices, higher inflation expectations could become more widespread and, in turn, lead to further increases in prices.
- 6) **Higher interest rates leading to widespread debt distress:** The pandemic led to record levels of public debt around the world. As interest rates rise, this will strain public budgets with tough choices around fiscal consolidation over the medium term, as pressures for social and, in some cases, defense spending may remain high.

- 7) **A wider deterioration of the geopolitical environment:** In the longer term, the war in Ukraine risks destabilizing the rules-based frameworks that have governed international relations in the post–World War II period. Increased international polarization, or a more widespread conflict, would worsen the humanitarian crisis and impede the global economic integration essential for long-term prosperity. Technological exchange may be limited, production networks and technology standards could coalesce into distinct blocks, and welfare gains from globalization could be reversed if countries adopt more protectionist policies.

INDIAN ECONOMIC OVERVIEW

GDP grew by 5.4% during October–December 2021 (Q3 FY2021–22), slower than we had earlier estimated (figure 1). Growth in the July–September quarter was revised up to 8.4%, which explains the fading recovery in the subsequent quarter. The uneven (modest, at best) recovery in a few sectors, especially agricultural, manufacturing, and contact-intensive services sectors, weighed on the overall growth.

On the expenditure front, although festive demand and reduced infections boosted private consumption, growth momentum slowed compared to previous quarters (figure 1). Slower-than-expected demand growth and lower capacity utilization weighed on the momentum in gross fixed capital formation growth. Even government expenditure declined this quarter. However, exports maintained a strong momentum, pushing the overall growth upward.

Road Ahead

Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution, on January 21, 2022 said that Indian industry to raise 75 unicorns in the 75 weeks leading up to the country's 75th anniversary next year.

Mr. Piyush Goyal said that India will achieve exports worth US\$ 650 billion in the financial year 2021-22.

India's electronic exports are expected to reach US\$ 300 billion by 2025-26 this will be nearly 40 times the FY2021-22 exports (till December 2021) of US\$ 67 billion.

As per the data published in a Department of Economic Affairs report, in the first quarter of FY22, India's output recorded a 20.1% YoY growth, recovering >90% of the pre-pandemic output in the first quarter of FY20. India's real gross value added (GVA) also recorded an 18.8% YoY increase in the first quarter of FY22, posting a recovery of >92% of its corresponding pre-pandemic level (in the first quarter of FY20). Also, in FY21, India recorded a current account surplus at 0.9% of the GDP. The growth in the economic recovery is due to the government's continued efforts to accelerate vaccination coverage among citizens. This also provided an optimistic outlook to further revive industrial activities.

As per RBI's revised estimates of July 2021, the real GDP growth of the country is estimated at 21.4% for the first quarter of FY22. The increase in the tax collection, along with government's budget support to states, strengthened the overall growth of the Indian economy.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity to 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing

GLOBAL SCENARIO OF EDIBLE OIL INDUSTRY

The Global edible oils market forecast to grow at a CAGR of 5.1% from USD 112.6 billion in 2021 to USD 159.4 billion in 2028.

(Source: <https://www.researchandmarkets.com/reports/5571462/edible-oils-market-by-types-by-end-user-by#relc0-5138736>)

According to the OECD-FAO Agricultural Outlook 2019-2028 statistics, it is estimated that the per capita vegetable oil consumption is predicted to grow by 0.9% per annum. This is comparatively lower than the 2.0% per annum growth observed during the time period 2009-2018. Developing regions of the world are predicted to contribute to increasing the market growth for vegetable oil during the forecast period.

In China, the consumption of vegetable oil is predicted to be around 30 kg per capita, and for Brazil, it is estimated to be around 24 kg per capita. For developing nations, the per capita consumption of vegetable oil is assumed to reach 27 kg with a growth rate of 0.4% per annum.

After China, India is the second-largest consumer and is ranked as the number one importer of vegetable oil at the international level. The country is projected to maintain the high per capita vegetable oil consumption with a growth rate of 3.1% per annum. It is further projected to achieve 15 kg per capita consumption by the end of 2028. The substantial growth is attributed to the expanding domestic production in the country and growth of imports specifically palm oil from Indonesia and Malaysia. For the Least Developed Countries (LDCs), the per capita availability of edible oil is projected to surge by 1.2 per annum and is further estimated to attain 10 kg per capita in 2028.

Demand for Edible Oil

- The global cooking oil market is driven by the robust demand for organic health-based products, with increased consumption of high-quality edible oils/cooking oils by health-conscious consumers and the growing demand from the various applications, such as confectionery, primarily in the production of candies.
- Also, refined olive oil and coconut oil are increasingly being used in various bakery applications, as they are bland in taste, thereby, allowing the food to maintain the original flavour. Additionally, they do not exhibit any pungency, unlike mustard oil.
- The demand for non-GMO cooking oil has also catered to the market, as it augmented the shares of sunflower oil, coconut oil, and olive oil, together with leading segments of the market studied, including, palm oil, canola oil, and soybean oil.
- Asia-Pacific holds a significant share in the market studied, due to the huge demand from food industries, attributed to the increasing number of health-conscious consumers, strong population base, and changing living standards, coupled with the presence of major palm oil producing nations in the region. Additionally, a prominent factor in the increasing edible oil use is the growing consumption of processed food.

Asia Pacific Emerges As The Fastest Growing Market

Asia-Pacific accounts for the largest share of the global vegetable oil market and it is the second-fastest-growing region. Asia-Pacific has emerged as a dominant market for fish oil consumption owing to the massive concentration of the aquaculture industry in China, India, Vietnam, and Indonesia. Moreover, the rising health concerns among consumers leads to the usage of fish oil as a nutritional supplement in developed countries such as Japan and Australia. Olive oil, in particular, has the highest growth rate due to its health benefits. In Asia-Pacific, China holds the largest share of vegetable oil consumption, as well as production. Though the production volume is high, consumption exceeds production, resulting in higher import volumes when compared to export volumes. China is an import-oriented country.

INDIAN EDIBLE OIL INDUSTRY

Edible oil market in India is projected to grow from around \$ 21.5 billion in 2019 to \$ 35.2 billion by 2025 due to increasing disposable income and rising consumer awareness about healthy lifestyle & wellness. Moreover, strong marketing activities by leading edible oil brands, changing tastes and preferences of consumers, expanding population, and shifting consumption pattern towards branded oils is leading to rising consumption of edible oils in the country.

Surging penetration of processed foods is expected to continue driving consumption of edible oils in the country. In 2019, Soya oil accounted for more than one-third of the market share in India edible oil market. The other leading oil types include Mustard oil, Palm oil and Sunflower oil. Olive oil segment continues to gain market traction in India, however, the product's share stood at just around 1% in 2019.

West India dominated the country's edible oil market in 2019, and the region is expected to maintain its dominance during the forecast period. East and West regions also account for a significant market share, with the South region grabbing the smallest market pie.

EDIBLE OIL SCENARIO

Importance of Edible Oils in the Country's Economy

Oilseeds and edible oils are two of the most sensitive essential commodities. India is one of the largest producer of oilseeds in the world and this sector occupies an important position in the agricultural economy, accounting for the estimated production of 36.56 million tons of nine cultivated oilseeds during the year 2020-21 (November-October) as per 3rd Advance Estimates released by the Ministry of Agriculture on 25.05.2021.

Consumption Pattern of Edible Oils in India

India is a vast country and inhabitants of several of its regions have developed specific preference for certain oils largely depending upon the oils available in the region. For example, people in the South and West prefer groundnut oil while those in the East and North use mustard rapeseed oil. Likewise several pockets in the South have a preference for coconut and sesame oil. Inhabitants of northern plain are basically consumers of fats and therefore prefer Vanaspati, a term used to denote a partially hydrogenated edible oil mixture of oils like soyabean, sunflower, rice bran and cottonseed oils. Many new oils from oilseeds of tree and forest origin have found their way to the edible pool largely through vanaspati route. Of late, things have changed.

Through modern technological means such as physical refining, bleaching and de-odorization, all oils have been rendered practically colorless, odorless and tasteless and therefore, have become easily interchangeable in the kitchen. Oils such as soyabean oil, cottonseed oil, sunflower oil, rice bran oil, palm oil and its liquid fraction-palmolein which were earlier not known have now entered the kitchen. The share of raw oil, refined oil and vanaspati in the total edible oil market is estimated roughly at 35%, 60% and 5% respectively. About 56 % of domestic demand of edible oils is met through imports out of which palm oil/palmolein constitutes about 54%. The consumption of refined palmolein (RBD palmolein) as well as its blending with other oils has increased

substantially over the years and is used extensively in hotels, restaurants and in preparation of wide varieties of food products.

Types of Oils commonly in use in India

India is fortunate in having a wide range of oilseeds crops grown in its different agro climatic zones. Groundnut, mustard, rapeseed, sesame, safflower, linseed, nigerseed, castor are the major traditionally cultivated oilseeds. Soyabean and sunflower have also assumed importance in recent years. Coconut is most important amongst the plantation crops. Efforts are being made to grow oil palm in Andhra Pradesh, Karnataka, Tamil Nadu and North-Eastern parts of the country in addition to Kerala and Andaman & Nicobar Islands. Among the non-conventional oils, rice bran oil and cottonseed oil are the most important. In addition, oilseeds of tree and forest origin, which grow mostly in tribal inhabited areas, are also a significant source of oils. Figures pertaining to estimated production of major cultivated oilseeds, availability of edible oils from all domestic sources (from Domestic and Import Sources) during the last ten years and current year are as under: -

Export Import Policy on Edible Oils

The country has to rely on imports to meet the gap between demand and supply. Import of edible oils is under Open General License (OGL). In order to harmonize the interests of farmers, processors and consumers,

Government reviews the duty structure of edible oils from time to time. With effect from 14.06.2018, the import duty on all crude and refined edible oils, except Palm oil and Olive oil was raised to 35% and 45% respectively while the import duty on Olive oil was increased to 40%. With effect from 08.01.2020, import policy of Refined Palm Oil is amended from 'free' to 'Restricted' category. With effect from 27.11.2020, the import duty on crude palm oil was revised from 37.5% to 27.5%.

As per Union Budget 2021-22, the basic custom duty on Crude Palm Oil has been reduced from 27.5% to 15% and that on Crude Soyabean Oil and Crude Sunflower Oil from 35 % to 15 %. An agri-cess of 17.5 % has been imposed on Crude Palm Oil and 20 % on both Crude Soyabean and Crude Sunflower Oil. With this, the effective rate of duty on Crude Palm Oil has increased from 30.25% to 35.75%. In case of Crude Soyabean and Crude Sunflower Oil, the effective rate of duty remains the same i.e. 38.5%.

In order to ensure availability of edible oil in the country, export of edible oil has been banned w.e.f. 17.03.2008, which was extended from time to time. With effect from 06.02.2015, export of rice bran oil in bulk has been permitted. With effect from 27.03.2017, export of groundnut oil, sesame oil, soyabean oil and maize (corn) oil has been permitted. With effect from 06.04.2018, export of all edible oils except mustard oil was made free without quantitative ceiling; pack size etc, till further orders. Information other than the Financial Statements and Auditor's Report thereon

The Board of Directors of the Company are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's responsibility for the Ind AS Financial Statements

The Board of Directors of the Company are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the State of Affairs (financial position), Profit or Loss (financial performance including Other Comprehensive Income), Changes in Equity and Cash Flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent, and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS Financial Statements, the Management and Board of Directors are responsible for assessing the ability of the Company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Management and Board of Directors either intend to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing financial reporting process of the Company.

Auditor's Responsibilities for the Audit of Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- a) Identify and assess the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls
- c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and Board of Directors in the financial statements.
- d) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- e) Evaluate the overall presentation, structure and content of the Ind AS Financial Statements, including the disclosures, and whether the Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- f) Obtain sufficient appropriate audit evidence regarding the financial information of the Company to express an opinion on the Ind AS Financial Statements.

Materiality is the magnitude of misstatements in the financial statements that individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in i) planning the scope of our audit work and in evaluating the results of our work and ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

"ANNEXURE B" TO THE INDEPENDENT AUDITOR'S REPORT - MARCH 31, 2022

Referred to in Paragraph 1(g) under Report on Other Legal and Regulatory Requirement's section of our report to the Members of Raj Oils Mills Limited of even date

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Raj Oil Mills Limited ("the Company") as of March 31, 2022 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Board of Director of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ("Guidance Note") issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note issued by ICAI and the Standards on Auditing prescribed under section 143 (10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects except which stated in Audit Report.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate except which stated in Audit Report to provide a basis for our audit opinion on the company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Company has in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022 based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of internal Financial Controls over Financial Reporting issued by the ICAI.

The Company provides for the liability in its books of accounts based on the actuarial valuation. The following tables summarize the components of net benefit expense recognized in the statement of profit and loss and the funded status and amounts recognized in the balance sheet for the respective plans.

a) The principal assumptions used in determining gratuity benefit obligations for the Company's plan are shown below:

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared with the previous period.

Sensitivity due to mortality is not material hence impact of change due to these is not calculated. Sensitivities as to rate of increase of pensions in payment, rate of increase of pensions before retirement and life expectancy are not applicable.

(i) **Accounting classifications**
The fair values of the financial assets and liabilities are determined at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.
The following methods and assumptions were used to estimate the fair values:
The carrying amounts of trade receivables, cash and cash equivalents, bank balances, short term deposits, trade payables, payables for acquisition of property, plant and equipment, short term loans from banks, financial institutions and other current financial assets and liabilities are considered to be the same as their fair values, due to their short-term nature.

(ii) **Fair value measurements**
The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:
Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The following table presents carrying value and fair value of financial instruments by categories and also fair value hierarchy of assets and liabilities measured at fair value :

The Company is exposed to financial risks arising from its operations and the use of financial instruments. The Company has identified financial risks and categorised them in three parts viz.

- (i) Credit Risk,
- (ii) Liquidity Risk and
- (iii) Market Risk.

Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The board of directors are responsible for developing and monitoring the Company's risk management framework, are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. (i) Credit Risk

Credit risk refers to the possibility of a customer and other counterparties not meeting their obligations and terms and conditions which would result into financial losses. Such risk arises mainly from trade receivables, other receivables, loans and investments. The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis through each reporting period. To assess whether there is a significant increase in credit risk the Company compares the risk of default occurring on asset as at the reporting date with the risk of default as at the date of initial recognition. It considers reasonable and supportive forward-looking information such as:

- i) Actual or expected significant adverse changes in business,
- ii) Actual or expected significant changes in the operating results of the counterparty,
- iii) Financial or economic conditions that are expected to cause a significant change to the counterparty's ability to meet its obligations,
