Commenting on the performance, **Mr. Santosh Varalwar, Managing Director of Vivimed Labs** said:

“The performance for the year has been encouraging and we continue to invest to prepare ourselves for the next phase of growth. Though our top-line for FY2016 was marginally lower, we experienced significant improvement in our profitability. Even as the revenue growth was muted due to the change in product mix in the Specialty Chemicals business and eventual divestiture of certain identified product segments, our margins enhanced significantly due to improving performance of our pharmaceutical segment across both the API and formulations businesses.

We have taken various initiatives during the year and the efforts are anticipated to result into meaningful benefits over the long term. The Healthcare vertical is experiencing significant traction driven by opportunities in API and FDF, our compliance track record and strong customer base. We have witnessed a strong order book growth for our API business given increasing preference from our customer base for a manufacturing platform based in Europe and North America. Furthermore on the FDF side, we envisage a strong pick up in exports to the CIS region during FY2016. Progress on new generic product development has tracked our expectations and we believe will drive growth in the medium term.

In the Specialty Chemicals business, we continue to focus on a differentiated product mix and continue to look for opportunities to drive growth.

During the year, we also focused on bolstering our management team and are confident of capitalizing on the prevailing opportunities across our business and transitioning into the next phase of growth and better profitability.”

Note: 1. Net Sales includes Other Operating Income

FY2016 vs. FY2015

- **Revenues** decreased by 2.1% to Rs. 13,564 million primarily due to the change in product mix in the Specialty Chemicals business and eventual divestiture of certain identified product segments
 - **Healthcare segment** recorded a moderate growth of 4.3% to reach Rs. 9,742 million. This growth was primarily driven by improved performance of the FDF business coupled with steady growth from the API segment. Growth in the API business was around 15% on a constant currency basis
 - The performance of the **Specialty Chemical segment** remained soft with a revenue of Rs. 3,714 million, a decline of 16.8% y-o-y. The decline in the Specialty Chemical business was primarily due to strategic product mix changes (defocus on lower margin products in India) and eventual divestiture of certain identified product segments
- **EBITDA** increased by 9.0% to Rs. 2,429 million with margin of 17.9%, an improvement of 183 bps
 - This was driven by robust performance of both the API and FDF divisions in the healthcare vertical
- **Net Profit** for the year was Rs. 837 million, up 16.1%. The net profit margin for the period was 6.2%, an improvement of 97 bps
- **Outlook** for margins is positive as the Healthcare business is expected to benefit from higher utilization, improved product mix and cost optimization in the medium term. New product filings and sustained investment in R&D remains a focus area for the healthcare vertical. Post the Clariant deal, Specialty Chemicals businesses will continue to focus on niche chemicals for hair dyes, photochromic dyes and pharma intermediates
