Profit After Tax (PAT)	1,023	800	4,108	3,674

Automotive Battery Business

The Company's Automotive Battery business again reported strong double digit revenue growth supported by good volume increase in 4 wheeler and 2 wheeler batteries, over the previous financial year, despite constraints during the year. The quarter witnessed a good growth in automotive OEM segment, in line with the enthused positive sentiment of turnaround in the various macro-economic conditions.

The volume growth in both four-wheeler and two-wheeler aftermarket segments was due to strong preference for Company's products, supported by complete product offering, strengthening of brand, expansion of channel and leveraging customer relationship. Amaron® and PowerZone™ continues to

enjoy the preference of customers, leading to gains in market share both in aftermarket and OEM. Aggressive mass media activities were taken up to strengthen the brand and make it a preferred choice of the customers. Exports of automotive batteries have substantially increased during the year.

The Supply of Amaron® and PowerZone™ branded tubular inverter batteries continued to serve the needs of the customers in the Home UPS segment. Delayed start of summer had a marginal impact on business in this segment.

Industrial Battery Business:

The Company's **Industrial Battery business** registered double digit revenue growth over the previous financial year, in a challenging & competitive market conditions.

The growth in demand from telecom sector is primarily driven by data growth and the drive for energy optimization by Tower Companies. The demand for UPS batteries is moderate. Increased Imports due to our country's Preferential Free Trade Agreements with ASEAN and Sri Lanka are a concern since the raw materials continue to attract higher import duty.

During the year revenue from exports has more than doubled compared to previous year.

Amidst these challenges, the industrial battery business improved the overall performance by virtue of its "preferred supplier status" with all major customers, efficient after sales service, customer relationship management and consistent product performance of its flagship brands PowerStack®, Quanta® and QRS Series batteries.

The Company has progressively started providing total solutions to customers enabling it to forge strategic alliances.

Commenting on the full year performance, **Mr. Jayadev Galla, Vice Chairman and Managing Director, Amara Raja Batteries** said, "We are pleased to report yet another highest ever sales and profit for the Company for the financial year 2014-15. Our Industrial and Automotive battery units have reported double digit revenue growth and gained market shares. We remain cautiously optimistic of the Company's performance in the coming year, against the back drop of continuing uncertainty in macro-economic condition, escalating costs and probable supply constraints. However, our ability to anticipate and perform with distinct approach will help us to sustain the growth momentum."

Commenting on the full year performance, **Mr. S.V. Raghavendra, Chief Financial Officer**, said, "The Company continues to enjoy debt free status and has free cash available to the tune of over Rs.2.20 billion at the end of the financial year. The year under review saw the Company's market capitalization

touching Rs. 150 billion with considerable improvement in PE ratio reflecting growing investor confidence. The capacity enhancement for the four wheeler battery business has been completed and production has commenced during the last quarter of the year. Further, expansion of two wheeler battery capacity and green field tubular battery plant are in progress as per the plan. All project costs are well within the approved costs. Continuing debt free status and sound credit rating of the Company will help us to leverage, as and when required, at minimal cost"
