Consumer Attitudes Change

MULTIPLE DEMAND MOMENTS

- Increased need for variety
- Nutrition/indulgence boundaries blurring
- ‘Not guilty’ food options
- Instant ‘feel good’ foods

FREE TO BE ME

- Increasing technology connects each family member to market place
- Increasing technology facilitating choice
- Segmentation on the rise

VALOURISING VALUE

- Inflation halo- not feeling poor, but stretched
- Searching for low cost, but higher value

CITIES WITHIN A CITY

- Straddling many worlds in parallel
- Sub-cities with purchase/consumption patterns
- Distribution of premium products/opportunity for PPP

SHOPPING 24X7

- Accessibility
- Online shopping
- Home delivery

Teamwork

Teamwork

Breaking

Silos and lethargic responses

Proud to be Nestlé

What to expect

- Greater Innovation
- Moving beyond the crisis
- Greater engagement
- Commitment to CSV
- Greater Talent and People capabilities

MAGGI NOODLES UPDATE

Financial Analysts' Meet
20 November 2015

Nestlé House, Gurgaon

Background

2014

- At Barabanki, Uttar Pradesh, one sample of MAGGI Noodles taken for analysis in March 2014 and declared misbranded on account of 'No added MSG' declaration
- On appeal, one sample sent to referral laboratory at Kolkata. It found:
 - a) Lead higher than permissible limit
 - b) MSG and therefore misbranded due to 'No added MSG' declaration

Monosodium Glutamate

What is Monosodium Glutamate?

- Known as the fifth taste – Umami
- Protein rich foods like cheese, milk, ground nut, tomatoes, etc. contain glutamate naturally
- MAGGI Noodles has hydrolysed groundnut protein, onion powder and wheat flour, etc. which contain ‘glutamate’ naturally, so will test +ve

Regulatory provision:

“Every advertisement for and/ or a package of food containing added Monosodium Glutamate shall carry the following declaration, namely –

[This package of (Name of the food) contains added MONOSODIUM GLUTAMATE] NOT RECCOMENDED FOR INFANTS BELOW 12 MONTHS”

Lead

- Lead occurs in the earth's crust and is present in air, soil and dust
- Safety Limits are therefore fixed by regulators; in this case 2.5 “parts per million”
- We regularly monitors levels of lead in raw materials, water, packaging materials
- All suppliers are audited by us
- Our tests have shown lead to be much below permissible limits
- The High Court mandated 3 independent NABL accredited, FSSAI notified laboratories gave the same findings

At Nestlé Quality = Trust

- 300 personnel work in India in the area of food safety
- 11 Internal and External laboratories
- NQAC laboratory at Moga factory has NABL accreditation and the capability to test heavy metals, antibiotics and other contaminants
- Moga NQAC is capable of testing “Parts Per Billion”, whereas regulatory limits are only in “Parts Per Million”
- 100 million analyses are carried out every year globally

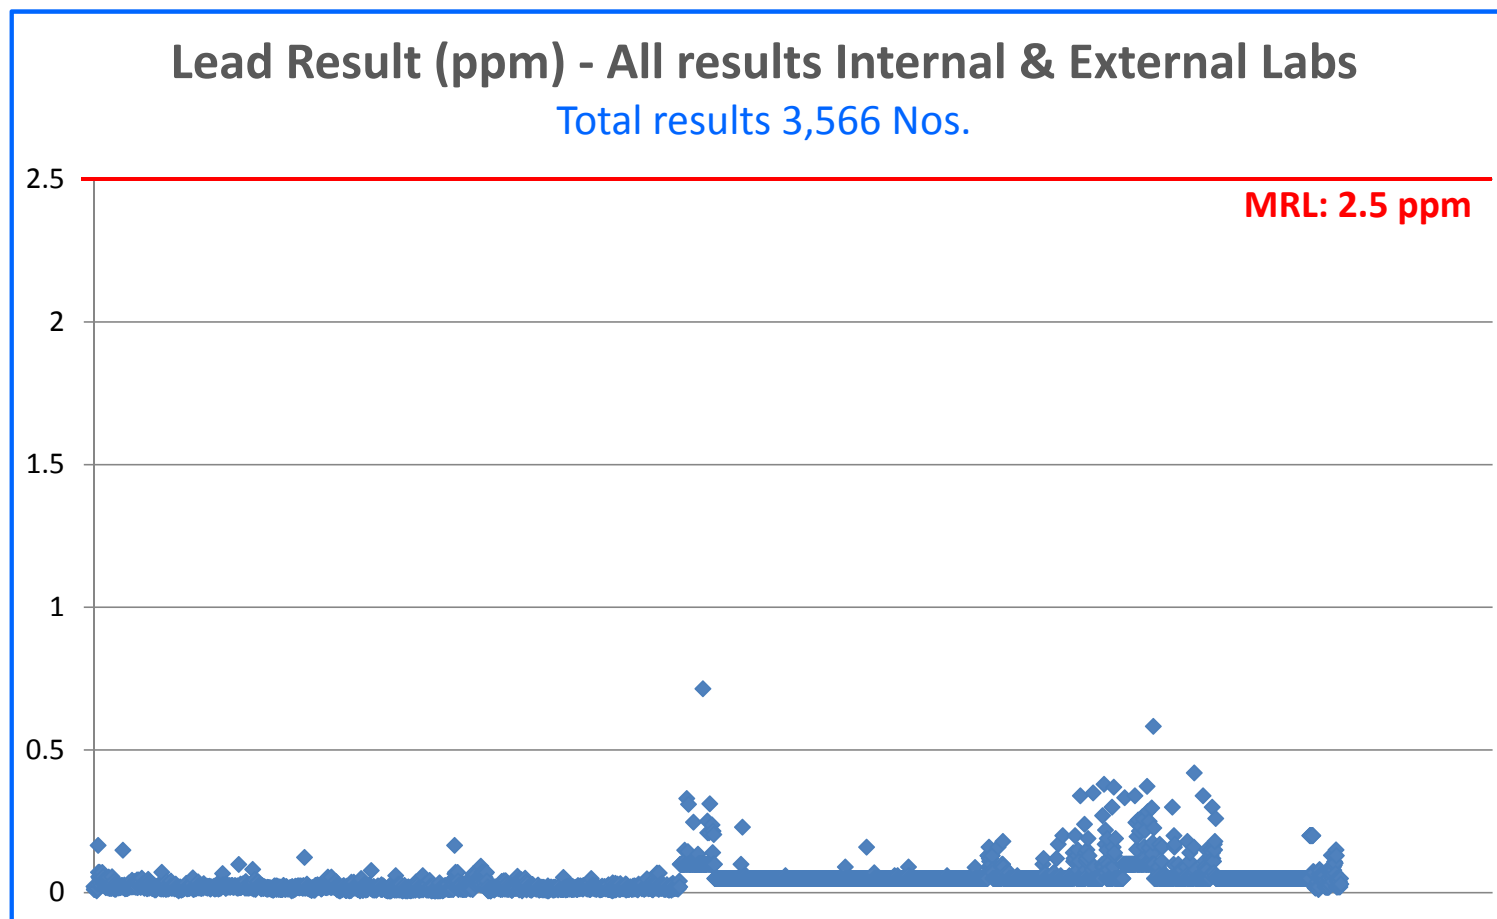

At Nestlé Quality = Trust

- 3,500 tests done in recent times at accredited labs (internal and external) have shown clear results
- 8 Countries including USA, UK, Singapore, Australia, etc. found MAGGI Noodles exported from India – “Safe for Consumption”
- 3 accredited labs mandated by Hon’ble Bombay High Court have cleared 100% samples (both existing and newly manufactured batches)

Test Results

How it started

- At Barabanki, Uttar Pradesh, one sample of MAGGI Noodles taken for analysis in March 2014 and declared misbranded on account of 'No added MSG' declaration
- On appeal, one sample sent to referral laboratory at Kolkata. It found:
 - a) Lead higher than permissible limit
 - b) MSG and therefore misbranded due to 'No added MSG' declaration

Background

- We were compliant and confident and in direct dialogues with stakeholders
- Press Release - 5th June 2015 12:30 AM

“MAGGI Noodles are completely safe and have been trusted in India for over 30 years.

The trust of our consumers and the safety of our products is our first priority. Unfortunately, recent developments and unfounded concerns about the product have led to an environment of confusion for the consumer, to such an extent that we have decided to withdraw the product off the shelves, despite the product being safe.

We promise that the trusted MAGGI Noodles will be back in the market as soon as the current situation is clarified.”

- Withdrawal process initiated.
- Around noon on 5th June, FSSAI ordered the ban on manufacture and sale.

FSSAI Order

- Salient features
 - Withdraw and recall 9 approved variants being hazardous and unsafe
 - Stop further production, processing, export, distribution and sale
 - Rectification of label (Re. “No added MSG”)
 - Withdraw MAGGI Oats Masala Noodles – No Product Approval

Proceedings before Hon'ble Bombay High Court

- 11th June – Petition filed in the High Court
- 13th August - Bombay Court set aside the ban
- Salient Features:
 - Principles of Natural Justice not followed
 - Labs conducting tests were not accredited
 - 'No Added MSG' declaration – No ground for ban
 - Refile application for MAGGI Oats Noodles

Hon'ble Bombay High Court directed the way forward

- Out of already manufactured stock, samples to be sent to the 3 accredited laboratories mandated by the High Court (samples taken and sent under FDA Officer's Directions – 100% clear)
- Manufacturing to start, if all samples clear
- Samples from new manufacture to be tested again (100% clear)
- Sales can then Start (Started on 9th November)

Present Situation

Manufacturing

Sales

We have learnt that Special leave petition against Bombay High Court has been preferred. Notice not yet served.

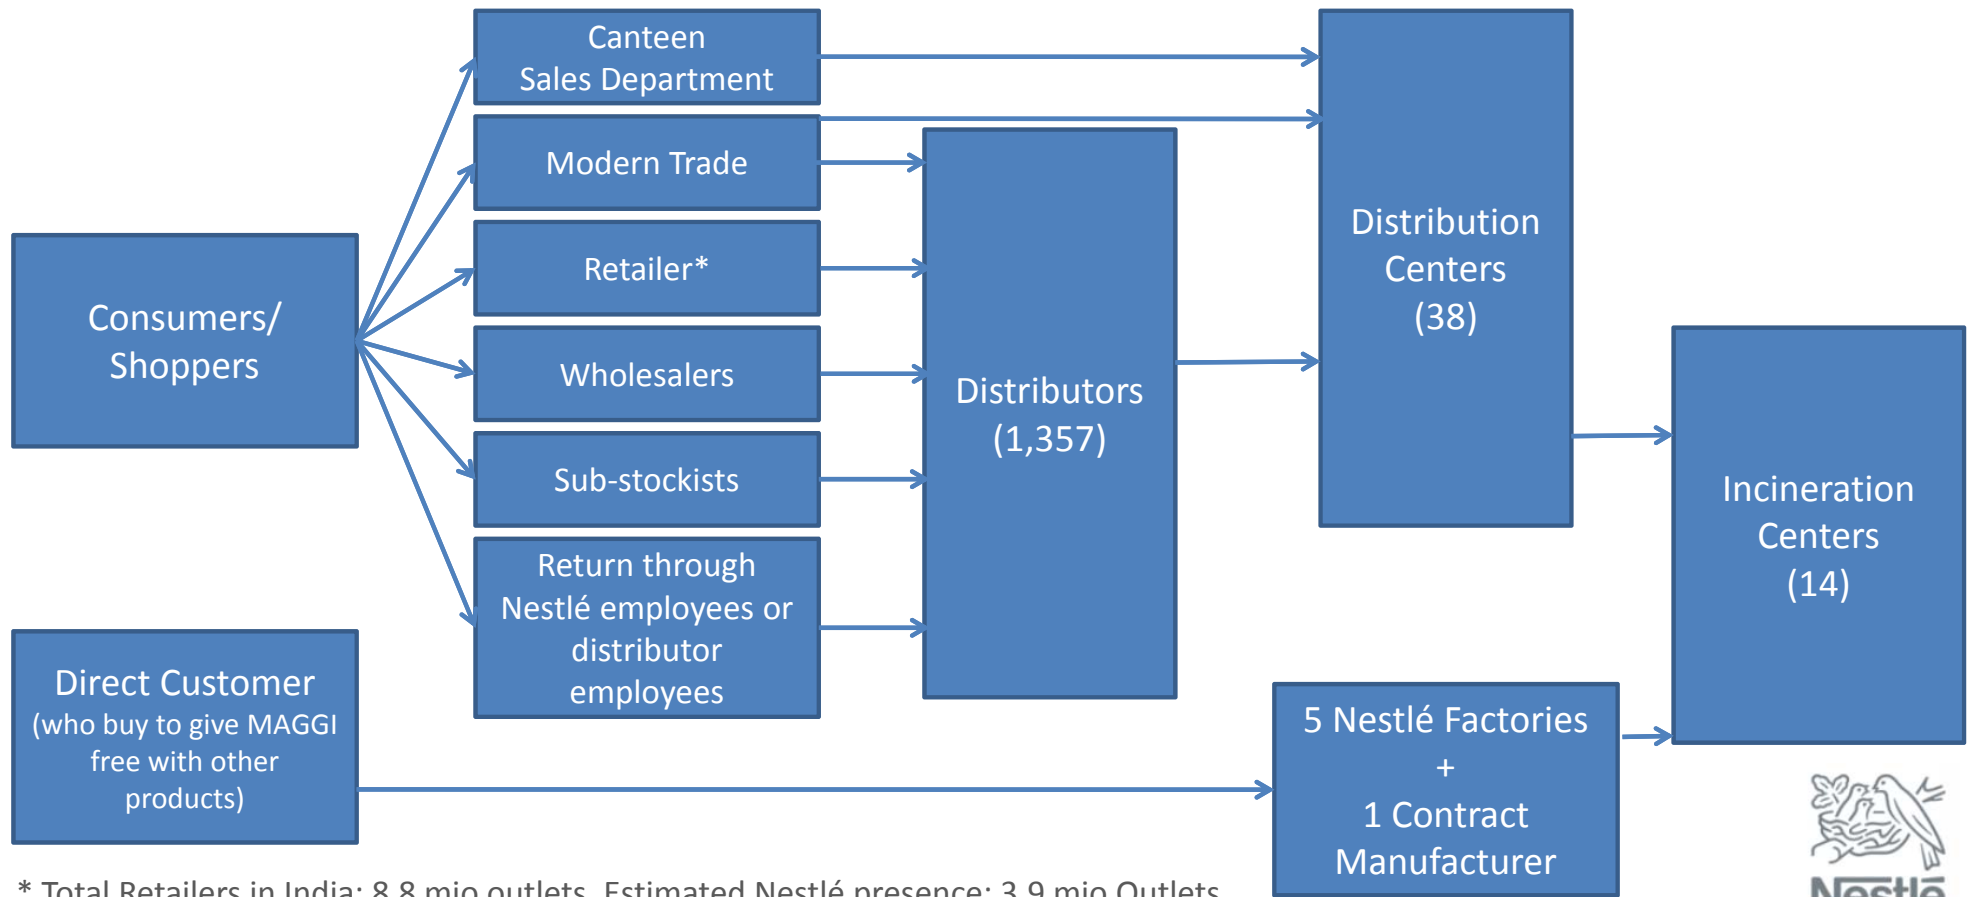

Efficient and Transparent Withdrawal

- Biggest withdrawal – handled professionally, transparently and efficiently
- Immediate stoppage of Manufacturing, Blocked Stocks at Depots and Order processing, Customers' stocks also blocked
- Regular updates to FSSAI
- Dedicated toll free number and customer care centre established
- Recall information ads in leading mainline and regional newspapers
- Picked up MAGGI directly from > 10,000 households

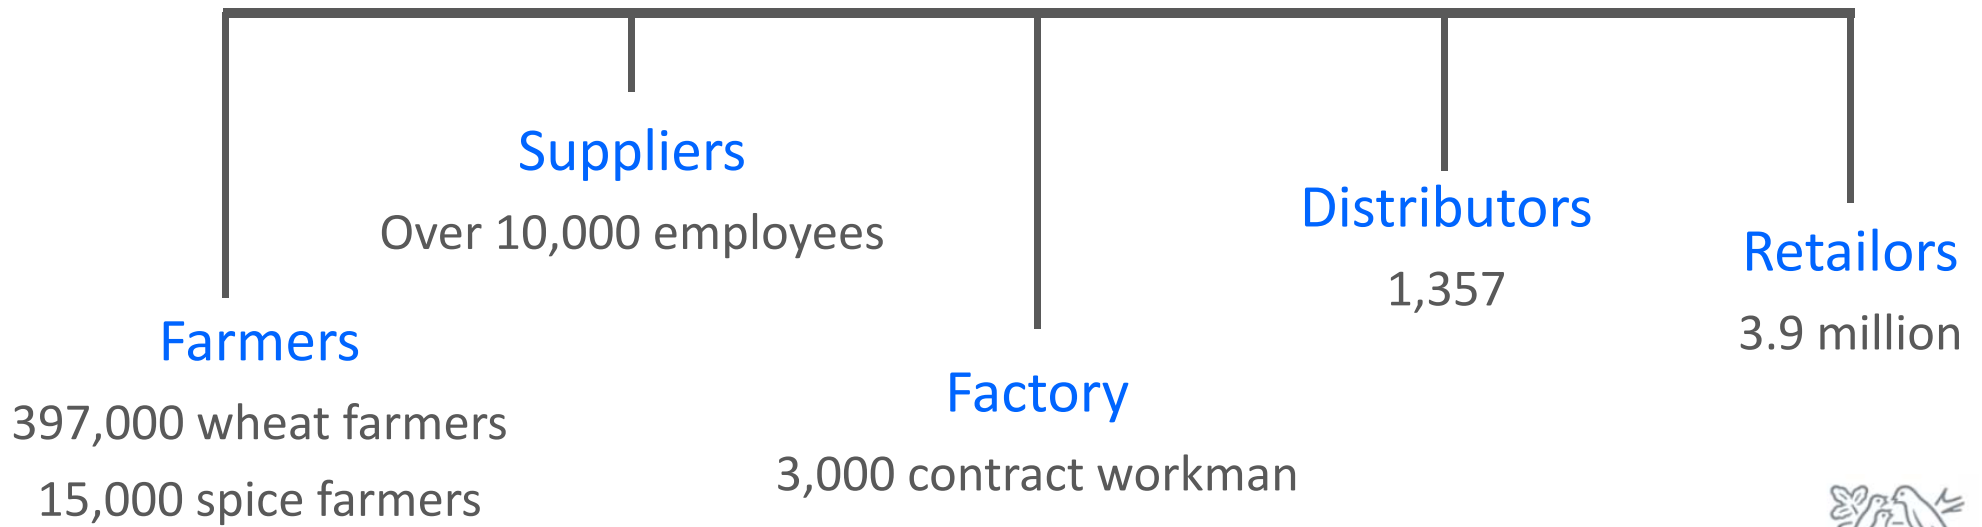

Reverse Logistics in the Withdrawal Process

* Total Retailers in India: 8.8 mio outlets, Estimated Nestlé presence: 3.9 mio Outlets

Social Impact

- Across the Value Chain

NCDRC

- The Consumer Affairs Ministry filed a complaint before NCDRC seeking Rs. 640 Crores
- Main allegations similar to the ones decided by Hon'ble Bombay High Court
- NCDRC has sent 13 samples to CFTRI, Mysore for testing the level of Lead and MSG.
