All such parties expressly disclaim any and all liability for, or based on or relating to any such information contained in the valuation.

5. VALUATION APPROACH

- 5.1. For the purpose of valuation for transfer, generally the following approaches are adopted:

- (a) the "Underlying Asset" approach
- (b) the "Income" approach; and
- (c) the "Market" approach

- 5.2. We understand from the Management that GECPL has recently commenced operations and has not attained sustainable level of operations. Further the Management, is unable to estimate reasonable business plan of GECPL. Thus we have thought fit to value GECPL using the "Underlying Asset" approach.

- 5.3. Since Civil EPC Undertaking is not separately listed on any stock exchange, market approach is not applicable in the present valuation exercise. Considering the aforesaid, we have thought fit to value Civil EPC Undertaking using the "Income" approach.

5.4. UNDERLYING ASSET APPROACH

- 5.4.1. In case of the "Underlying Asset" approach, the value is determined by dividing the net assets of a company/business based on the estimated balance sheet as on the Appointed Date by the number of shares.

- 5.4.2. Valuation of net assets is calculated with reference to the historical cost of the assets owned by a company. Such value usually represents the minimum value or a support value of a going concern.

- 5.4.3. Since the shares are valued on a "going concern" basis and an actual realization of the operating assets is not contemplated, we have considered it appropriate not to determine the realizable or replacement value of the assets. The operating assets have therefore been considered at their book values.

5.4.4. The underlying net assets value as arrived above is divided by the outstanding number of equity shares to arrive at the value per share of GECPL.

5.5. INCOME APPROACH

Under the "Income" approach, Civil EPC Undertaking has been valued using Discounted Cash Flow (DCF) method.

5.5.1. Under the DCF method the projected free cash flows from business operations after considering fund requirements for projected capital expenditure and incremental working capital are discounted at the Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

5.5.2. The free cash flows represent the cash available for distribution to both the owners and the creditors of the business. The free cash flows are determined by adding back to profit before tax, depreciation and amortizations (non-cash charge). The cash flow is adjusted for outflows on account of capital expenditure, tax and change in working capital requirements.

5.5.3. WACC is considered as the most appropriate discount rate in the DCF Method, since it reflects both the business and the financial risk of the company. In other words, WACC is the weighted average of the company's cost of equity and debt. Considering an appropriate mix between debt and equity for the company/undertaking, we have arrived at the WACC to be used for discounting the Free Cash Flows.

5.5.4. Appropriate adjustment has been made for loan funds to arrive at the equity value of the Undertaking.

6. RECOMMENDATION

6.1. The fair basis of Slump Exchange of Civil EPC Undertaking into GECPL would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. As mentioned above we have considered the "Income" approach for arriving at the value of Civil EPC Undertaking and the "Underlying Asset" approach for arriving at the value of the shares of GECPL.

6.2. In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and

market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions. For example, Viscount Simon Bd in Gold Coast Selection Trust Ltd. vs. Humphrey reported in 30 TC 209 (House of Lords) and quoted with approval by the Supreme Court of India in the case reported in 176 ITR 417 as under:

"If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of the agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the shares, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives control of the company. If the asset is difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is an art, not an exact science. Mathematical certainty is not demanded, nor indeed is it possible."

- 6.3. We have divided equity value of Civil EPC Business by per share value of GECPL to arrive at the fair equity share consideration.
- 6.4. In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove in this report, in our opinion, fair equity consideration for transfer of Civil EPC Undertaking works out to 1,18,85,714 equity shares of INR 10 each of GECPL.

Thank you,
Yours faithfully,

Key Extracts of Valuation Report of SSPA & Co, Chartered Accountants

As requested by the management of Gammon Engineers and Contractors Private Limited (hereinafter referred to as "GECPL") and Gammon India Limited (hereinafter referred to as "GIL"), we have undertaken the valuation exercise of equity shares of GECPL and of 'Civil Engineering, Procurement and Construction Undertaking' of GIL (hereinafter referred to as the "Civil EPC Undertaking") for recommending the fair equity consideration for the purpose of proposed Slump Exchange of "Civil Engineering, Procurement and Construction Undertaking" of GIL into GECPL.

We have been informed that the Board of Directors of GIL and GECPL (hereinafter collectively referred to as "Companies") are considering a proposal for transfer of the "Civil EPC Undertaking" of GIL pursuant to provisions of Section 391 to 394 and other applicable provisions of the Companies Act, 1956 and the Companies Act, 2013, to the extent applicable ("Scheme of Arrangement"). Subject to necessary approvals, Civil EPC Undertaking, would be transferred to GECPL with effect from the Appointed Date of July 1, 2016 ("Appointed Date"). In consideration for Slump Exchange of Civil EPC Undertaking into GECPL, equity shares of GECPL would be issued to GIL.

For the purpose of valuation for transfer, generally the following approaches are adopted:

- (a) the "Underlying Asset" approach
- (b) the "Income" approach; and
- (c) the "Market" approach

We understand from the Management that GECPL has recently commenced operations and has not attained sustainable level of operations. Further the Management, is unable to estimate reasonable business plan of GECPL. Thus we have thought fit to value GECPL using the "Underlying Asset" approach.

Since Civil EPC Undertaking is not separately listed on any stock exchange, market approach is not applicable in the present valuation exercise. Considering the aforesaid, we have thought fit to value Civil EPC Undertaking using the "Income" approach.

UNDERLYING ASSET APPROACH

In case of the "Underlying Asset" approach, the value is determined by dividing the net assets of a company/business based on the estimated balance sheet as on the Appointed Date by the number of shares.

INCOME APPROACH

Under the "Income" approach, Civil EPC Undertaking has been valued using Discounted Cash Flow (DCF) method.

Under the DCF method the projected free cash flows from business operations after considering fund requirements for projected capital expenditure and incremental working capital are discounted at the Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

RECOMMENDATION

The fair basis of transfer of Civil EPC Undertaking into GECPL would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. As mentioned above we have considered the "Income" approach for arriving at the value of Civil EPC Undertaking and the "Underlying Asset" approach for arriving at the value of the shares of GECPL.

In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove in this report, in our opinion, fair equity consideration for transfer of Civil EPC Undertaking works out to 1,18,85,714 equity shares of INR 10 each of GECPL.

Conclusion and Opinion on Valuation Report

Conclusion:

We have reviewed the valuation report and based on the information, material data made available to us, to best of our knowledge and belief, the valuation suggested by the Valuer (SSPA & Co, Chartered Accountants) for the proposed Scheme of Arrangement is **Fair and Reasonable**.
