Dear Sir,

Sub : Production of ANP fertilizer has been resumed at the Taloja facility

Pursuant to Clause 36 of the Listing Agreement, it is informed that production of ANP fertilizer has been resumed at the Taloja facility of the Company with imported RLNG as feedstock. The supply of domestic natural gas had been discontinued since 15th May, 2014 as per the order of Ministry of Petroleum and Natural Gas (MoPNG), which the Company has challenged before the Hon'ble Delhi High Court. An Inter-Ministerial Committee, formed for this purpose, by the Department of Fertilisers, Government of India, is also reviewing the issue. Outcomes from both are awaited.

The Company had recently received many requests for resumption of production of its flagship fertilizer 24:24:0 from various farmers, farmer cooperatives/ associations, MPs and MLAs, as well as a directive from the Department of Agriculture, Government of Maharashtra to meet the demand of the product during the ongoing Khariff season. Some of these requests are from farmer-suicidal/riot sensitive zones in Maharashtra. The resumption of production is based on expensive RLNG as the feedstock and the Company's decision is clearly not driven by commercial considerations.

This action arising from the concern for farmers is without prejudice to the Company's legitimate rights for restoration of domestic natural gas.

We request you to kindly take this information on your record.

Yours faithfully,
For Deepak Fertilisers
And Petrochemicals Corporation Limited

Tushar Dey
Executive Vice President (Legal) &
Company Secretary
