Statement from McDonald's India
Vikram Ogale; Director, National Supply Chain and Quality Assurance

McDonald's India strongly denies the claim and accusation made in the CSE report and press release dated, May 23, 2016, "*What's in our bread?*".

McDonald's India does not use potassium bromate or potassium iodate in the flour and all other ingredients that goes into our buns. The claims made by CSE in their press release and report are completely baseless.

At McDonald's India, we serve our customers with the highest quality products across all our restaurants. We go through a lot of efforts to ensure our food is safe for our customers and have stringent quality processes at every stage. In India, as also globally, McDonald's adheres to the highest food safety standards and pursues strict compliance with consumer safety laws and regulations.

Our customers expect the highest quality from us, and we are dedicated to providing them with that. We always follow the highest food safety practices in all countries in which we do business, and we demand all our suppliers do the same.
