Duck Creek Technologies Adds NIIT Technologies to Global Alliance Program

NIIT Technologies builds on long-standing relationship to become new certified Delivery Partner

INDIA | Noida, COLUMBIA, S.C.; Jan.19, 2017 - Duck Creek Technologies today announced that NIIT Technologies Limited, a leading global IT solutions organization, has joined its Global Alliance Program as a certified Delivery Partner.

Duck Creek's Global Alliance Program is comprised of delivery, solution and technology members who play a crucial role in providing complementary software services and solutions to insurers of all sizes. As a Delivery Partner, NIIT Technologies will implement, enable and optimize the solution for carriers worldwide. Insurers can work with certified NIIT Technologies team members to implement the Duck Creek software suite and configure it in way that is optimal for that company.

For more than a decade, NIIT Technologies has built a panel of experts, who understand the nuances of the software suite and provide industry-leading counsel and support for configuration. Additionally, NIIT Technologies has enabled the integration of secondary technology solutions to incorporate data and targeting tools so companies can optimize their offerings for enhanced customer service.

"Duck Creek Technologies continues to be a market disruptor for the insurance industry through its continuous innovation of the platform and ability to make the entire industry more efficient," said Lalit Dhingra, U.S. president, NIIT Technologies. "With this partnership, we are building upon an already strong relationship so that any company utilizing our services to implement Duck Creek solutions will have access to the most up-to-date resources and information possible."

NIIT Technologies will provide Duck Creek's customers with services including:

- **Implementation and configuration of the entire Duck Creek suite of software**, which includes skinning, form establishment, server configuration and client-specific product definition.
- **Extensions and enhancements for increased insight into data**, which includes integrating Duck Creek with other NIIT Technologies offerings such as performance monitoring to enable customers to better understand how processes are working.
- **Complete training for customer's team members**, which will allow new users to become engrained in the technology and quickly learn how to use the system appropriately.

"We are excited to have NIIT Technologies join our Duck Creek Global Alliance Program as a certified delivery partner," said Michael A. Jackowski, chief executive officer at Duck Creek Technologies. "Our solutions can help insurance companies transform their operations, but we realize many companies do not have an on-site technical staff to implement and optimize our software. For this reason, we are partnering with trusted companies, like NIIT Technologies, that will work with us to help customers obtain a competitive advantage and realize success."
