**LPL - R&D has developed an Extended Release Oral Suspension  
(Cough Syrup) brand name is "NAMCOLD- DX"(First Time In India)**

Lincoln Pharmaceuticals Ltd.(LPL) Company is based at Ahmedabad and engaged in Manufacturing and Export of Pharmaceuticals formulations under various Therapeutic product group, plant duly complied with WHO-GMP guidelines. The Company is Exporting more than 45 countries, along with Domestic market in more than 20 states in India.

LPL has its own **R&D facility** and during last 5 - 7 years, LPL has introduced 6 new formulations which is **First Time In India**. Today we are glad to announce, our R&D has successfully launched a Cough Syrup called "**NAMCOLD - DX**", which contains **Dextromethorphan Polistirex**. This is an "**Extended Release**", unique product of Novel Technology. Normal Cough syrups are effective upto 3-4 hours, so in 24 hours the patient has to take the syrup 4 to 5 times. But, our innovative product "**NAMCOLD - DX**" is **Extended Release**, so the drug releases periodically and therefore the patient has to take only 2 doses during 24 hours. Dextromethorphan Polistirex is a Liquid Oral Suspension with advanced Pennkinetic delivery system. First —uncoated particles of Dextromethorphan are released rapidly in the stomach to provide immediate effect while Polymer-coated particles provide sustained release of Dextromethorphan in the intestine. Dextromethorphan, a centrally acting Non-opioid Antitussive, acts centrally by depressing the cough center in the medulla of the brain and therefore elevates the threshold for coughing. Its Antitussive potency is nearly equal to that of codeine.

"**NAMCOLD - DX**", is designed for all age group of patient above 4 years. Our product is time tested and many trials have been done and it is approved by DCGI (Drug Controller General of India).

LPL is proud to announce that it has entered in one more R&D Formulation, which is **First Time In India**.

LPL will get more benefit in the market out of this unique product and the bottom line will also improve.
