year, an increase of over 7%. The profit after tax also improved marginally by about 6% and stood at Rs. 29.05 crore. Though the Company requires funds for its growth plans, a dividend of 10% has been recommended for the year, entailing an outflow of about Rs. 10 crore, including the tax pay-out.

OUTLOOK

The GDP growth forecast in the Economic Survey published by the Indian Government and the aggregate trade growth estimates of the World Trade Organization have been encouraging. These are expected to re-kindle the domestic demand in the coming years. However, the unabated import of Polyol into India is a cause for worry.

Your Company has taken steps to develop new applications for its products and widen the customer base. The focus will be to produce products with better value addition. The availability of PO for the derivative plants has been assured with the bulk storage facility at Ennore Port becoming operational.

Your Company can now target higher plant utilization and achieve economies of large scale operation. Since the moratorium on new proposals at Manali has been lifted, your Company can now plan for new products and expansion. These measures are expected to improve the operational efficiencies of your Company while ensuring sustainable profitability.

ACKNOWLEDGEMENT

I would like to express my deep appreciation to you, for your support to us at all times. I also extend my sincere thanks to our vendors, esteemed customers, banks, the Tamilnadu Government and the Government of India for their continued support over the years. I also warmly acknowledge the commitment and dedication of the employees of your Company in achieving the Company's goals. Last but not the least, I wish to place on record my unqualified appreciation for the guidance and support of my colleagues on the Board.

Thank you.

28th Annual General Meeting
at Rajah Annamalai Mandram
on 13th August 2014

Speech by

Mr. Ashwin C Muthiah
Chairman

Ladies and Gentlemen,

I have great pleasure in welcoming you all to the 28th Annual General Meeting of your Company. You have had the annual report and audited financial statements with you for some time now and I am sure you would have reviewed your Company's performance. With your permission, I will consider them as read.

ECONOMIC OVERVIEW

The country witnessed sub-five per cent growth in the last two consecutive years. The persistent uncertainty in the global economic situation on account of the Euro crisis and global slowdown, compounded by the domestic structural constraints and inflationary pressures led to this situation. Though this was reflective of the general trend witnessed by many economies, the effects were felt deeper in India. The average growth during the last two years was 4.6 per cent against 8.3 per cent during 2004-05 to 2011-12. This slowdown has largely affected the manufacturing sector. Despite the inflation coming down, the desired levels have not

been reached yet. This is primarily on account of the food inflation.

On the brighter side, the Current Account Deficit declined to manageable levels during the last fiscal, after continuing to be very high in the previous two years. The fiscal deficit also came down for the 2nd year in a row.

Post the general elections, the financial markets have surged, bringing in new hope for better days ahead. Restoring investor confidence will greatly depend on reining in the inflation, which will guide the monetary policy. It is projected that the Indian economy is poised for better growth in 2014-15 and in the years to come.

MARKET SCENARIO

Your Company operates in the Polyurethanes (PU) market. The Indian PU market, after registering impressive growth during 2007-2012, was stagnant during the previous year but some signs of revival were witnessed during the year under review towards the end.

Your Company's products find use in various industries like automotive, refrigeration, insulation, furniture, etc. the health of which are closely tied to the overall economy. Thus, the performance of the Company is dependent on the general economic situation, making it cyclical. Additional PU capacities created elsewhere have become an important impediment for the domestic players. The dumping of Slab Stock Polyol, the major product of the Company continued and was at an all-time high during the year under review. With the new capacities abroad having been completed, the Company will have to face severe pressure from even higher levels of dumping by major MNCs into India.

COMPANY'S PERFORMANCE

The surge in imports had a severe impact on the market share and margins of the Company. However, through concerted efforts, the Company registered better revenue and also improved the profitability.

Your company recorded total revenue of Rs. 560.73 crore in FY 2013-14 against Rs. 522.42 crore in the previous
