**Sub: Disclosure under clause 36 of the Listing Agreement**

**Low Levels of Operations in Solvent Extraction due to inadequate supply of Soya Seeds**

This is to inform you that because of the failure and damaged conditions of Soya Crop in Vidarbha Region of Maharashtra State from where the company is mainly sourcing its principal raw material i.e Soya seed, the availability of raw material has become very poor. Further demand of Soya De-meal both in domestic as well as in the export market is also not picking up as expected. Due to this situation the company has decided to minimize the operations of its solvent division and oil refinery division.

However the inadequate supply of seeds has not affected the manufacturing activities of Fish Feed Division and Powder Lecithin Division, which are operating at normal levels.

**The Low Levels of Operations in the Solvent Division and Oil Refinery**, has resulted in a delay towards the payment of salaries and wages to the staff and workers of the Company.

Under the present adverse situation in solvent industry, the company is now focusing more attention to increase the scale of operations of its Aqua Feed division and has decided to widen its marketing network from Andhra Pradesh to other states such as Orisa and West Bengal.

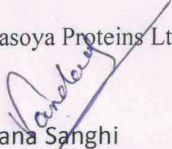

However, we are confident that the present situation in Solvent Industry shall not last for a long time & is expected to change in a very short span with the improvement in supply of raw material and picking up of the demand of the soya de-meal in the domestic & international market.

Accordingly, the operating levels of the Solvent Division and Oil Refinery shall be gradually increased commensurate with the supply of seeds.

We request you to take the above information on your record & oblige us.

Yours faithfully,

For Rasoya Proteins Ltd.

  
Vandana Sanghi  
(Company Secretary)
