

22nd December 2014

Suzlon's arm Senvion wins new and repeat orders totalling over 60 MW in the United Kingdom

- Suzlon's arm Senvion wins new and repeat orders of over 60 MW in UK that would provide ~ 38,000 homes with electricity
 - Senvion's new contract is with RES for a total rated output of **28.7 MW**
 - Senvion's repeat orders with UK customers are of the size of **34.8 MW**

22nd December 2014 Hamburg/Edinburgh/Pune: Senvion SE, a wholly owned subsidiary of the Suzlon Group, the world's fifth-largest* manufacturer of wind turbines, has signed four new contracts totalling over 60 megawatts (MW) in the UK, including the first contract to be signed in the UK with developer RES.

Details of the project are given below:

| Client | Order size (MW) | Product | Project Site |
|---------------------------|-----------------|---------|---------------|
| RES | 28.7 | MM82 | Penmanshiel |
| InfraRed Capital Partners | 10.2 | 3.4M104 | Reaps Moss |
| John Laing | 14.35 | MM82 | New Albion |
| Broadview Energy | 10.25 | MM92 | Watford Lodge |
| Total | 63.5 | | |

Located near Granthouse in the Scottish Borders, Penmanshiel wind farm, developed by RES, will consist of 14 Senvion MM82, with a total rated output of 28.7 MW, producing enough electricity to power more than 20,000 homes. Pre-construction works have recently started on site and project completion is due in autumn 2016. A 20 year service contract has also been signed for the project.

Reaps Moss wind farm is the second contract for Senvion with InfraRed Capital Partners and is located east of Bacup in east Lancashire and will consist of three Senvion 3.4M104. Once completed, the wind farm will have a total rated output of 10.2 MW, enough to power over 5000 homes. Installation will begin in summer 2015 and a 20 year ISP service contract has also been signed.

New Albion wind farm, located in Northamptonshire, is the third contract Senvion has signed with John Laing. The project will consist of seven Senvion MM82 with a total rated output of 14.35 MW, enough electricity to power more than 7600 homes, as well as a 15 year service contract. Pre-construction works have already begun and installation of the wind turbines is due to start in January in 2015 with the project scheduled to be fully operational by January 2016.

Watford Lodge wind farm located near Daventry, Northamptonshire, is the company's fourth contract with Broadview Energy, and will consist of five Senvion MM92, with a total rated output of 10.25 MW. Watford Lodge will produce enough electricity to power over 5000 homes. Construction will start in the summer 2015 and is due for completion in autumn the same year. Senvion will also look after maintenance of the wind farm for 15 years.

Andreas Nauen, CEO of Senvion SE, commented: "We are delighted to be signing a further four turbine contracts in the UK, including our first contract with RES. This caps off what has been a highly successful year for Senvion in the UK, having signed contracts totalling nearly 250 MW since January."

Raymond Gilfedder, Senvion Northern Europe Managing Director, said: "2014 has been a very positive year for Senvion in the UK so far. We continue to develop new relationships and further strengthen existing ones, and we are looking forward to more successes in the New Year."

About Senvion:

Senvion SE, a wholly owned subsidiary of the Suzlon Group, is one of the world's leading manufacturers of onshore and offshore wind turbines. The international mechanical engineering company develops, produces and markets wind turbines for almost any location – with rated outputs of 1.8 MW to 6.15 MW and rotor diameters of 82 metres to 152 metres. Furthermore, the company offers its customers project specific solutions in the areas of turnkey, service and maintenance, transport and installation, as well as foundation planning and construction. The profitable and reliable systems are designed at the SenvionTechCenter in Osterrönfeld and manufactured at its plants in Husum (North Friesland), Trampe (Brandenburg) and Bremerhaven, as well as Portugal, Canada and India. With more than 3,400 employees worldwide, the company - headquartered in Hamburg - makes use of the experience gained from the manufacture and installation of more than 5,600 wind turbines around the world. Senvion is represented by distribution partners, subsidiaries and participations in European markets such as France, Belgium, the Netherlands, the UK, Italy, Portugal, Sweden, and Poland as well as on a global level in the USA, China, Australia and Canada. About Suzlon Group:

The Suzlon Group is ranked as the world's fifth largest* wind turbine manufacturer, in terms of annual installed capacity and market share in 2013. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 25,000 MW of wind energy capacity installed, operations across over 31 countries and a workforce of over 10,000. The Group offers one of the most comprehensive product portfolios – ranging from sub megawatt onshore turbines at 600 Kilowatts (KW), to the world's largest commercially-available offshore turbine at 6.15 MW – with a vertically integrated, low-cost manufacturing base. The Group – headquartered at Suzlon One Earth in Pune, India – comprises Suzlon Energy Limited and its subsidiaries, including Senvion SE. Visit us at www.suzlon.com
