

## **TCS Recognized as a Leader in Business Intelligence Services by Independent Research Firm**

*Report Cites TCS' Customer Centricity as a Key Strength*

**SANTA CLARA | MUMBAI, October 29, 2014:** Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS) a leading IT services, consulting and business solutions organization, today announced it has been recognized as a "Leader" in Business Intelligence (BI) by Forrester Research, Inc., a leading independent research company, in its report *The Forrester WAVE™: BI Service Providers, Q4 2014*, authored by Forrester's Boris Evelson, VP and Principal Analyst, and Charles Green.

The top 12 global BI Services Providers including TCS were researched, analyzed, scored across 30 criteria, and grouped into three high-level buckets: Current Offering, Strategy and Market Presence. The focus of the evaluation was on large, global service providers with significant scale of at least \$500 million in BI services revenues and at least 3,500 BI focused full-time employees. Other criteria included a broad set of BI services offerings across all leading BI platforms, presence in major geographies, key industry verticals and business domains, as well as sufficient interest from Forrester clients.

TCS received top scores for "its experience across multiple geographies and industries, including delivery capabilities and strategic BI investments. TCS also received high scores for its BI vision and a broad network of technology partners. Additionally, clients gave TCS top scores for its delivery capabilities and high scores for overall client satisfaction and ability to innovate." The report cites "clients highlighted the strength and depth of quality individuals who TCS could bring to their engagement as particular strengths. In addition, clients liked the fact that TCS did not attempt to over-engineer projects or constantly upsell."

"Enterprises across industries around the world are looking for their next big competitive advantage in the emerging Digital Consumer Economy where consumers are highly empowered in their decision making. With our Digital Reimagination™ strategy that brings together the power of the Digital Five Forces (Mobility, Big Data, Social Media, Cloud, Artificial Intelligence (AI) and Robotics) to fundamentally reimagine enterprises, we at TCS are providing our customers exactly what they need in Business Intelligence services to succeed," said Dr. Satya Ramaswamy, Global Head of TCS Digital Enterprise. "We are excited to be recognized as a Leader by Forrester in their extensive analysis of the Business Intelligence service providers market."

TCS continues to invest heavily in BI and analytics as an integral part of its Digital Reimagination™ strategy for enterprise customers. With growing revenues from BI Services, and extensive investments in BI and analytics capabilities as well as intellectual property, TCS continues its global growth and formidable market leadership in this space.
