TECHNOFAB ENGINEERING LIMITED

Dt : 14th August 2014

Information Update

The Board of Directors of Technofab Engineering have approved the financial results after limited review by Statutory Auditors, of the quarter ending 30 June 2014.

The Turnover (standalone) during the quarter was Rs 90.75 Crores. This is 24% more than the turnover during the corresponding first quarter of the previous year.

While the pre tax EBIT from operations at Rs 5.02 Crores was 9% higher than the corresponding quarter of the previous year, the post tax profit at Rs 1.15 Crores was lower. This was primarily because of substantial other income in the corresponding quarter/previous year.

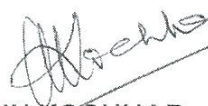

The Company's business strategy remains unchanged and the Company is poised to take advantage of any upturn in the domestic market. However as yet there is no sign of any upturn in the form of significant jump in enquiries. As previous experience shows there may be a time gap of around 2 years between enquiries and its impact on business performance. In the interim there can be a slight positive impact if some of our financially stressed customers are able to restructure or arrange additional funding. This will translate into release of some outstanding and open work fronts improving cash flows.

In the meantime the Company continues to actively look for business opportunities abroad.

Additional information is enclosed.

An investors concall is planned to be organised for which separate intimation will be given and posted on the stock exchanges.
