Thermax wins another order worth Rs. 351 crore in Africa: to build and commission a captive power plant

Pune: December 04, 2014

Energy and environment major, Thermax Limited won a repeat order from a leading African industrial major. The new order worth Rs. 351 crore is also for supplying a captive power project for one of the conglomerate's cement plants. The scope of work includes system design, manufacture, supply and supervision of erection and commissioning of the plant.

The order was won against stiff global competition. As a back-to-back repeat order, it further strengthens Thermax's credentials to provide lump sum turnkey solutions for African customers.

"We are excited about the business opportunities emerging in Africa. Our two-year project management experience in the continent should really help in seamlessly executing these projects," says Thermax MD and CEO, M.S. Unnikrishnan.

The power plant, to be commissioned within a time frame of 15-16 months, will utilise the latest generation AFBC (Atmospheric Fluidised Bed Combustion) boilers and high pressure steam cycle to facilitate optimal plant efficiency. Air-cooled condensers will ensure low water utilisation by the power plant, which has been designed to respond to varying load requirements of the cement plant.

About Thermax Limited: Thermax Limited, a leading energy and environment solutions provider is one of the few companies in the world that offers integrated innovative solutions in the areas of heating, cooling, power, water and waste management, air pollution control and chemicals. Thermax has manufacturing facilities in India, China and Europe. The sustainable solutions Thermax develops for client companies are environment-friendly and enable efficient deployment of energy and water resources. For more information visit www.thermaxindia.com
