Q3 FY2014 Revenue Breakup

Commenting on the performance, Mr. Santosh Varalwar, MD and CEO of Vivimed Labs said:

“The last quarter saw revenue growth coming from both our business segments – Healthcare and Specialty Chemicals. We remain focused on integration and consolidation across business lines, which we believe will deliver improved and sustainable profitability as we move forward. Investment in R&D across both our business segments remain a core part of our growth strategy. In the Healthcare segment, Vivimed is working on a slate of new product filings in both its API and finished formulations business, targeting the regulated markets. We hope to leverage our strong API manufacturing platform to enhance market access and competitiveness over the medium term. In the Specialty Chemicals segment, Vivimed is focused on three aspects – new products, new customers and new geographies. Building a differentiated product pipeline and new distributor appointments in new regions to capture market share has been some of the key initiatives undertaken in the last quarter.

This is a period of transition for both our businesses and we are confident that these will be the building blocks of a growing, profitable and capital efficient enterprise over the medium term.”

Key Observations

- Revenue growth in Q3 FY2014 was driven by positive trends across both the Healthcare and Specialty Chemicals segments. Sales growth in the Healthcare segment was 29% y-o-y largely driven by the momentum in the API business which has experienced ramp up in a key custom manufacturing engagement and increased market share in key generic products. Specialty Chemicals segment grew 12.4% y-o-y as key customer accounts have now begun to scale up
- EBITDA margin improved by 242 bps on a y-o-y basis to 16.0% due to improved profitability across both Specialty Chemicals and Healthcare segments. Specialty Chemicals segment profitability has increased as a result of product portfolio rationalization, cost optimization and efficient operations. Healthcare segment profitability improvement was a result of higher capacity utilization, product repairs and cost optimization initiatives
- Finance costs increased on y-o-y basis due to increase in long term borrowings on account of the recent AP MPL facility and the adverse impact of depreciation of the INR on the foreign currency borrowings

Strategic Direction

Where Chemistry and Quality Matters

Continue to **strengthen engagements** with marquee customer base through superior product development and delivery capabilities

Move up the **value chain through vertical integration in Healthcare** (R&D to manufacturing of API / FDF / brands) and target **niche opportunities in the Specialty Chemicals** segment

Optimize utilization of existing global manufacturing platform to enhance capital efficiencies and shareholder returns

Increase penetration in existing **regulated and semi regulated Healthcare markets** and target selected new geographies

Focus on early stage **innovative R&D** and **product development** to drive monetization of business opportunity across all segments

Leverage the strengthened management team to support the future growth aspirations and deliver sustainable returns over the longer term

Successful integration of recent initiatives which will bring scalability through a larger opportunity space and a platform to address the same

Global Reach

A multinational global platform that provides Vivimed access to markets and significant cost advantage
