## PRESS RELEASE

### Cyient selected by Liberty Global to Support GIGAWorld Broadband Rollout

**Cyient to support Liberty Global fast track its footprint expansion program providing broadband services to customers in Europe**

**Amsterdam, March 9, 2017:** Cyient, a global provider of engineering, manufacturing, data analytics, network and operations solutions, has been selected by Liberty Global, the world's largest international cable TV and broadband company, to support its new GIGAWorld initiative to bring Gigabit broadband speeds to its operations in Europe.

Announced last November, Liberty Global's GIGAWorld initiative seeks to bring broadband speeds of one gigabit and more to tens of millions of households across Europe. Around 50 million homes in Europe have access to Liberty Global's fiber-based "GIGAReady" networks today. Liberty Global expects that millions more will be connected over the coming years.

With capabilities in delivering FTTP (fiber-to-the-premise) and HFC (hybrid-fiber coaxial) planning and design services, Cyient will support Liberty Global in its goal for faster provisioning of next-generation broadband services to existing and new customers.

**Mr. Krishna Bodanapu, Managing Director and CEO, Cyient,** added, "We are very happy to be selected for this very important Liberty Global growth initiative. Cyient clearly understands the key requirements in delivering programs of this scale. With over 25 years of experience in network management and operation, we are well placed to provide data-driven designs for Liberty Global's footprint expansion program."

**Mr. Colin Buechner, Managing Director, Access Network, Liberty Global,** said, "Through our GIGAWorld initiative, we're investing in the infrastructure of our age. By selecting Cyient we hope to enhance and expand our networks so they become not only faster but also more resilient and responsive to the evolving needs of our customers."

Over the past five years, Cyient has developed proven capability in successfully delivering planning and design services for over 20 million homes passed globally and in varied environments.

## About Cyient

**Cyient** (Estd: 1991) provides engineering, manufacturing, geospatial, network and operations management services to global industry leaders. Cyient leverages the power of digital technology and advanced analytics capabilities, along with their domain knowledge and technical expertise, to help clients solve complex business problems. As a Design-Build-Maintain partner that takes solution ownership across the value chain, Cyient empowers its clients to focus on their core, innovate, and stay ahead of the curve.

Relationships form the core of how Cyient works. With a client-centric approach and a workforce of nearly 14,000 in 21 countries, Cyient combines global delivery with proximity to its clients to function as their extended team. Cyient's industry focus includes aerospace and defense, medical, telecommunications, rail transportation, semiconductor, utilities, industrial, energy and natural resources.
