Global presence and industry-benchmark manufacturing sites

With its global and regional headquarters in Frankfurt, Germany and regional headquarters in Channahon (USA) and Singapore, Styrolution has a global market presence, which allows it to always be close to its customers and to serve their needs in the best possible way. The company employs around 3,400 people, and its 17 manufacturing sites across ten countries represent industry benchmarks and are among the most efficient in the world. With best-in-class production technology, leading R&D skills and strong IP and patents positions, Styrolution is perfectly equipped to ensure top quality, efficiency and innovation.

ABOUT STYROLUTION

Styrolution is the leading global styrenics supplier with a focus on styrene monomer, polystyrene, copolymers, and ABS. As a joint venture of BASF and INEOS, Styrolution combines the key styrenics assets of two of the biggest chemical companies in the world – with more than 70 years of experience, complementary competencies and portfolios. Styrolution strives to serve the success of its customers by offering them the best possible solution, designed to give them a competitive edge in their markets. The company provides styrenics applications for many everyday products across a broad range of industries, including automotive, electrical/electronics, building and construction, household appliances, toys/sports/leisure, packaging, healthcare and diagnostics. In 2010, pro forma combined sales were at 6.4 billion euros, resulting in an EBITDA before exceptionals of 407 million euros. Styrolution employs about 3,400 people at 17 sites in ten countries.
