MANAGEMENT DISCUSSION AND ANALYSIS REPORT

A. INDUSTRY STRUCTURE AND DEVELOPMENTS:

Tourism is one of the most promising drivers of growth for the world economy. Tourism has emerged as an instrument of employment generation, poverty alleviation and sustainable human development. Tourism is one of the leading job creators in the world. Tourism is one of the biggest and fastest growing sectors in the global economy and has significant environmental, cultural, social and economic effects, both positive and negative. Tourism is a combination of attraction, transport, accommodation, amenities, restaurant, shopping and entertainment. Every nation's economy is considered one of the major components and to add these, there are three different sectors like Agriculture, Industry and Service sectors, the tourism & hospitality sectors (including hotels and restaurants) has been universally recognized as the growth of expansion and an engine for socioeconomic growth all over the world, tourism and hospitality sectors bring wealth and fortunes to cities and countries. The performance of hospitality industry was significantly impacted during the FY 2020-21 on account of pandemic Covid-19. The industry and all its segments recorded negative growth. During the current year, with the pandemic waning and the economy gaining momentum, most verticals in hospitality industry registered growth, which was partly due to lower base of previous year.

B. OPPORTUNITIES

The tourism sector is bouncing back from the impact of COVID across the world. With the success of the vaccination program, gradual relaxation of travel curbs, and other restrictions, the industry witnessed a return of demand and volumes picked up. Data suggests that the industry will crawl back to the pre-Covid-19 levels in a few months. According to the IBEF data, by 2028, the Indian tourism and hospitality industry is projected to earn US\$ 50.9 billion compared with 2018. This indicates a good sign for the industry. The sector's confidence is also boosted by some special incentives from the government. The ease of curbs from November 15, 2021 by India allowing fully vaccinated foreign tourists to India helped to revive the Indian travel and hospitality sector. The industry's direct contribution to the GDP is expected to record an annual growth rate of 10.35% between 2019 and 2028. There has been an increase in the demand for luxury stay among Indian consumers due to rising consumer spends.

The Indian Government has realized the country's potential in the tourism industry and has taken several steps to make India a global tourism hub. Large number of tourists from the Middle-East visit India for MICE, medical, wellness, luxury tourism etc. India showcased its different tourism products and potential at the Arabian Travel Market, Dubai -2022 as Middle-East has always been one of the major target markets for Indian Tourism. Tourism Ministry also undertook 'Namaste India' campaign for encouraging international visitors to travel to India during this mega event. Some of the major initiatives planned by the Government of India to boost the tourism and hospitality sector of India are as follows:

- Under the Swadesh Darshan scheme, 77 projects have been sanctioned of worth Rs. 6,035.70 crore (US\$ 863.60 million). The Ministry of Tourism has approved 16 projects for over Rs. 1,300 crore (US\$ 171.2 million) in India's North East under the "Swadesh Darshan" Scheme.
- The launch of several branding and marketing initiatives by the Government of India such as 'Incredible India!' and 'Athiti Devo Bhava' has provided a focused impetus to growth. The Indian Government has also released a fresh category of visa - the medical visa or M-visa, to encourage medical tourism in the country.

- The Indian Railway Catering and Tourism Corporation (IRCTC) runs a series of Bharat Darshan tourist trains aimed at taking people to various pilgrimages across the country. In November 2021, the Ministry of Tourism signed a Memorandum of Understanding (MoU) with Indian Railway Catering and Tourism Corporation to strengthen hospitality and tourism industry.
- In November 2021, the Indian government planned a conference to boost film tourism in the country with an aim to establish domestic spots as preferred filming destinations. This move is expected to create jobs and boost tourism in the country.
- Ministry of Tourism has introduced the Incredible India Tourist Facilitator (IITF) and Incredible India Tourist Guide (IITG) Certification Program, aimed at creating an online learning platform of well-trained tourist facilitators and guides across the country. The IITF concept is aimed to promote micro-tourism, i.e., tourism in less explored areas of the country.

C. SEGMENTWISE PERFORMANCE :

Segment-wise Revenue, Result and capital employed for the year ended 31st March 2022 & 2021

Please refer Note No. 38 of Notes to the financial statement

D. THREATS, RISKS AND CONCERNS :

The Tourism industry is wary of rising airfare due to a sharp jump in jet fuel prices since the beginning of this year and escalation of the Russia-Ukraine war. According to experts, there has been a 20-40% increase in domestic and international flight tickets and this certainly has an impact on tourists who are on a budget.

Inflation in March was nearly 7%, and the same was reflected in transport and communication inflation. Fuel prices were increased by 7.5% while transport and communication inflation went up by 8%. Further, in May 2022 the RBI considered prevailing high inflationary conditions while raising interest rates by 40 basis points. The burden of inflation could only weigh down discretionary spending like travel, tour and hospitality.

Add to this, a slow pickup in Covid-19 cases in India is a cause for concern which may lead to another wave of Covid-19 infections. There is uncertainty in the hospitality business about the effect of the new variant, with conflicting reports pouring in from different regions concerning its intensity and speed of spread.

The sector is faced with multiple challenges such as limited enforcement of safety guidelines, growing number of unregistered tour operators and lack of physical infrastructure in certain remote regions.

E. OUTLOOK:

The central government and state governments have announced separate tourism plans and strategy seeks to amplify job potential and development within the tourism and hospitality sectors, foster economic integration and linkage with various sectors, some of the States where tourism has developed systems and enable the Central Government to legislate for tourism and hospitality development. As per the reports, the proposal is to include in Concurrent list was circulated to the state governments and the majority of the states agreed to the proposal. In general, the pandemic brought changes to the way we live and work. Some of those changes are likely to continue to affect travel once the health crisis subsides. FY22 has been a promising year for the sector wherein the revival in the occupancy and RevPAR has led to green shoots for the industry players. The decline in Covid cases, resumption of international flights from March 2022, and

strong leisure and wedding demand are the positive factors that should lead to growth in occupancy and ARR in FY23.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external

purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

In April, 2017, the said Banks assigned the entire debts of the Company alongwith all underlying security interest, all rights, title & benefits to M/s.RARE Asset Reconstruction Limited (previously known as Raytheon Asset Reconstruction Private Limited) under the applicable provisions of the SARFAESI Act. The Company opted for One-Time Settlement offer with the said ARC and obtained in-principle approval from them during March, 2021 and the final approval of OTS has now been received. As per terms of in-principle approval, the initial payment of Rs.30 crores was already paid to the said ARC on 30th March, 2021 from the proceeds of sale of Shopping Mall and part of Multiplex properties and paid Rs. 12.20 crore from the proceeds of sale of Hotel at Coonoor (Rs. 10 cr during the quarter ended December 31, 2021)and Advance received for sale of power plant (Rs.2.38 during the quarter ended March 31, 2022).

Stanes High School Association towards advance received in earlier years for Sale of coonoor property amounting to Rs. 5.80 Crore.

The revenues of the Velan Greenfields Hotel Tirupur was severely impacted due to the ongoing Covid-19 Novel Corona Virus pandemic forcing the closure of operations. With this closure all revenue generating operations of the Company has been suspended. The company is

exploring options of selling a part or all of its revenue generating assets to settle all liabilities. In view of the above, the Company's ability of continuing as a Going concern is dependent on the value that can be generated by the sale of assets and the surplus, if any, available subsequent to the settlement of all liabilities. In view of the uncertainty on the realisable values, the impairment to the value of assets is not ascertainable at this juncture.

As per the final OTS offer provided by the ARC and accepted by the Company, such communication has been considered for the confirmation of the Outstanding Debt.

The Company is taking necessary steps to regularise the Statutory Dues.

Note No.2

Basis of preparation of financial statements

A) Statement of compliance and basis of preparation

These financial statements are prepared in accordance with Indian Accounting Standards (Ind AS), the provisions of the Companies Act, 2013("the Companies Act"), as applicable and guide lines issued by the Securities and Exchange Board of India("SEBI"). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies(Indian Accounting Standards) Amendment Rules,2016. Up to the year ended March 31, 2017, the Company prepared its financial statements in accordance with the requirements of the Indian GAAP ("Previous GAAP"), which included Standards notified under the Companies (Accounting Standards) Rules, 2016.

All amounts included in the financial statements are reported in Indian rupees except share and per share data, unless otherwise stated.

B) Basis of measurement

These financial statements have been prepared on a historical cost convention and on an accrual basis, except for the following material items which have been measured at fair value as required by relevant Ind AS:-

- a) Derivative financial instruments;
- b) Financial instruments classified as fair value through other comprehensive income or fair value through profit or loss; and
- c) The defined benefit asset/(liability) is recognised as the present value of defined benefit obligation less fair value of plan assets.

C) Use of estimates and judgment

The preparation of the financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

- a) Impairment testing: Investments in subsidiaries, goodwill and intangible assets are tested for impairment at least annually and when events occur or changes in circumstances indicate that the recoverable amount of the asset or cash generating units to which these pertain is less than its carrying value. The recoverable amount of cash generating units is higher of value-in-use and fair value less cost to dispose. The calculation of value in use of a cash generating unit involves use of significant estimates and assumptions which includes turnover and earnings multiples, growth rates and net margins used to calculate projected future cash flows, risk-adjusted discount rate, future economic and market conditions.

- b) **Deferred taxes:** Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carry forwards become deductible. The Company considers the expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The amount of the deferred tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.
- c) **Defined benefit plans and compensated absences:** The cost of the defined benefit plans, compensated absences and the present value of the defined benefit obligation are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Note No. 3

Significant Accounting Policies

- i) **Functional and presentation currency :** These financial statements are presented in Indian rupees, the national currency of India, which is the functional currency of the Company.
- ii) **Foreign currency transactions and translation** Transactions in foreign currency are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation at the exchange rates prevailing at the reporting date of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of profit and loss and reported within foreign exchange gains/(losses), net within results of operating activities. Gains/(losses) relating to translation or settlement of borrowings denominated in foreign currency are reported within finance expense. Non-monetary assets and liabilities denominated in foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction. Translation differences on non-monetary financial assets measured at fair value at the reporting date.

iii) **Equity**

- a) **Share capital and share premium**

The authorized share capital of the Company as of March 31, 2022 and March 31, 2021 50,00,00,000 divided into 5,00,00,000 equity shares of Rs. 10 each. Par value of the equity shares is recorded as share capital and the amount received in excess of par value is classified as share premium.

Every holder of the equity shares, as reflected in the records of the Company as on the date of the shareholder meeting shall have one vote in respect of each share held for all matters submitted to vote in the shareholder meeting.

- b) **Revaluation Reserve**

Revaluation reserve amounting to Rs. 5,77,76,780 (March 31, 2021 is Rs.5,84,55,635) is not freely available for distribution.

c) Retained earnings

Retained earnings comprises of the Company's undistributed earnings after taxes.

d) Other comprehensive income

Changes in the fair value of financial instruments measured at fair value through other comprehensive income and actuarial gains and losses on defined benefit plans are recognized in other comprehensive income (net of taxes), and presented within equity as other comprehensive income.

iv) Property, plant and equipment

a) Recognition and measurement

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures directly attributable to the acquisition of the asset. General and specific borrowing costs directly attributable to the construction of a qualifying asset are capitalized as part of the cost.

b) Depreciation

The Company depreciates property, plant and equipment over the estimated useful life on a straight-line basis from the date the assets are available for use. Assets acquired under finance lease and leasehold improvements are amortized over the shorter of estimated useful life of the asset or the related lease term. Term licenses are amortized over their respective contract term. Freehold land is not depreciated. The estimated useful life of assets are reviewed and where appropriate are adjusted, annually.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably.

The cost of property, plant and equipment not available for use as at each reporting date is disclosed under capital work-in-progress.

v) Intangible assets

Intangible assets acquired separately are measured at cost of acquisition. Intangible assets acquired in a business combination are measured at fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and impairment losses, if any. The amortization of an intangible asset with a finite useful life reflects the manner in which the economic benefit is expected to be generated. The estimated useful life of amortizable intangibles are reviewed and where appropriate are adjusted, annually.

vi) Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date. The arrangement is, or contains a lease if, fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

a) Arrangements where the Company is the lessee

Leases of property, plant and equipment, where the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at lower of the fair value of the leased property and the present value of the minimum lease payments. Lease payments are apportioned between the finance charge and the outstanding liability. The finance charge is allocated to periods during the lease term at a constant periodic rate of interest on the remaining balance of the liability. Leases where the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases are recognized in the statement of profit and loss on a straight-line basis over the lease term.

b) Arrangements where the Company is the lessor

In certain arrangements, the Company recognizes revenue from the sale of products given under finance leases. The Company records gross finance receivables, unearned income and the estimated residual value of the leased equipment on consummation of such leases.

Unearned income represents the excess of the gross finance lease receivable plus the estimated residual value over the sales price of the equipment. The Company recognizes unearned income as finance income over the lease term using the effective interest method.

vii) Inventories

Inventories are valued at lower of cost and net realizable value, including necessary provision for obsolescence. Cost includes all direct costs and applicable overheads to bring the goods to present location and condition.

viii) Impairment

Goodwill and intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

ix) Employee benefits

a) **Post-employment and pension plans**

The Company participates in various employee benefit plans. These employment benefits are classified as either defined contribution plans or defined benefit plans.

Under a defined contribution plan, the Company's only obligation is to pay a fixed amount with no obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits. The related actuarial and investment risks fall on the employee. The expenditure for defined contribution plans is recognized as an expense during the period when the employee provides service.

Under a defined benefit plan, it is the Company's obligation to provide agreed benefits to the employees. The related actuarial and investment risks fall on the Company. The present value of the defined benefit obligations is calculated by an independent actuary using the projected unit credit method. All actuarial gains or losses are immediately recognized in other comprehensive income, net of taxes and permanently excluded from profit or loss. Further, the profit or loss will no longer include Unexpected return on plan assets. Instead net interest recognized in profit or loss is calculated by applying the discount rate used to measure the defined benefit obligation to the net defined benefit liability or asset. The actual return on the plan assets above or below the discount rate is recognized as part of remeasurement of net defined liability or asset through other comprehensive income, net of taxes.

The Company has the following employee benefit plans:

i. Provident fund

Employees receive benefits from a provident fund, which is a defined benefit plan. The employer and employees each make periodic contributions to the plan. The contributions to the provident fund are charged to the statement of profit and loss for the year when the contributions are due.

ii. Gratuity

In accordance with the Payment of Gratuity Act, 1972, applicable for Indian companies, the Company provides for a lump sum payment to eligible employees, at retirement or termination of employment based on the last drawn salary and years of employment with the Company. The Company's obligation in respect of the gratuity plan, which is a defined benefit plan, is provided for based on actuarial valuation using the projected unit credit method. The Company recognizes actuarial gains and losses in other comprehensive income, net of taxes.

b) Termination benefits

Termination benefits are expensed when the Company can no longer withdraw the offer of those benefits.

c) Short-term benefits

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

d) Compensated absences

The employees of the Company are entitled to the compensated absences. The employees can carry forward a portion of the unutilized accumulating compensated absences and utilize it in future periods or receive cash at retirement or termination of employment. The Company records an obligation for compensated absences in the period in which the employee renders the services that increases this entitlement. The Company measures the expected cost of compensated absences as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. The Company recognizes accumulated compensated absences based on actuarial valuation using the projected unit credit method. Non-accumulating compensated absences are recognized in the period in which the absences occur.

x) Provisions

Provisions for legal claims, service warranties, volume discounts and returns are recognised when the group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period.

xi) Revenue

Income from Guest Accommodation is recognised on a day to day basis after the Guest Checks into the hotel. Sale of Food and beverage is recognised at the point of serving those items to the guest. Revenues are shown net of sales tax, value added tax, service tax and Good and Service Tax.

xii) Borrowing cost

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. Other borrowing costs are expensed in the period in which they are incurred.

xiii) Other income

Other income comprises interest income on deposits and dividend income.

- a) Interest income is recognized using the effective interest method.
- b) Dividend income is recognized when the right to receive payment is established.

xiv) Income tax

Income tax comprises current and deferred tax. Income tax expense is recognized in the statement of profit and loss except to the extent it relates to a business combination, or items directly recognized in equity or other comprehensive income.

a) Current income tax

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for the period. The tax rates and tax laws used to compute the current tax amount are those that are enacted or substantively enacted as at the reporting date and applicable for the period. The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and liability simultaneously.

b) Deferred income tax

Deferred income tax is recognized using the balance sheet approach. Deferred income tax assets and Liabilities are recognized for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred income tax arises from the initial recognition of good will or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred income tax assets are recognized to the extent it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized. Deferred income tax liabilities are recognized for all taxable temporary differences except in respect of taxable temporary differences associated with investments in subsidiaries, associates and foreign branches where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at their reporting date.

The Company offsets deferred income tax assets and liabilities, where it has a legally enforceable right to offset current tax assets against current tax liabilities, and they relate to taxes levied by the same taxation authority on either the same taxable entity, or on different taxable entities where there is an intention to settle the current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

xviii) Earnings per share

Basic earnings per share is computed using the weighted average number of equity shares outstanding during the period adjusted for treasury shares held. Diluted earnings per share is computed using the weighted-average number of equity and dilutive equivalent shares outstanding during the period, using the treasury stock method for options and warrants, except where the results would be anti-dilutive.

The management assessed that the fair value of cash and cash equivalent, trade receivables, trade payables, and other current financial assets and liabilities approximate their carrying amounts largely due to the short term maturities of these instruments. The fair values of non current borrowings are based on discounted cash flows using a current borrowing rate. They are classified as level 3 fair values in the fair value hierarchy due to the use of unobservable inputs, including own credit risk.
