MANAGEMENT DISCUSSION AND ANALYSIS

Suryalata Spinning Mills Limited is one of the largest producers of Yarn. We are basically into manufacturing of Synthetic blended yarns of Polyester / Viscose, 100% Polyester and 100% Viscose with counts ranging from 20s to 45s. Currently the Company has two manufacturing units with a total capacity of 59,328 spindles. One unit is located at Kalwakurthy which is ISO certified, where as the second unit is located at Urkondapet which is in the process of ISO certification. The unit at Kalwakurthy has an installed capacity of 36,288 spindles with a production capacity of 30 MTs per day. The second plant (Urkondapet) has an installed capacity of 23,040 spindles with a production capacity of 20 MT's per day. This unit started commercial production in the year 2006-2007. We are planning to expand the capacity of Urkondapet Unit by increasing its capacity by 14,112 Spindles. With this increase the total spindles at Urkondapet will be 37,152 Spindles and the total spindles of the Company for both the units will be 73,440 spindles.

INDUSTRY STRUCTURE AND DEVELOPMENT

Textile industry is a \$49 billion industry in India and constitutes about 4% of GDP. The Indian Textile and Clothing (T & C) exports contribute around 12% to Indian Foreign Exchange earnings. During the year 2008-09, T & C exports have shown a flat growth on account of economic slowdown in major T & C export markets. This was effected by a host of factors both internal and external during the year. On the domestic front, widening of the gap between demand and supply in power, peak increase in prices of raw materials, fluctuation in exchange rates followed by the tightening / loosening of money supply in the domestic market by RBI, etc. In addition to this, economic slowdown in the US followed by Europe pushing down the purchase baskets in

the developed countries. Due to high inflation rate for most of the period of the year, there were reduced demand for textile items coupled with increased number of cancellations of export orders, reduction in export quantities, extension of delivery periods and reduced prices because of fluctuations in forex rates, etc. All these factors had affected the operations of the textile & clothing industry drastically.

FUTURE OUTLOOK - BRIGHTER PROSPECTS FOR INDIAN TEXTILE EXPORTS

The economy is showing sign of recovery. Major markets for Indian Textile and Clothing (T & C) export are the USA and Europe and they are showing sign of recovery. The domestic market has shown some signs of healthy growth because of the fact that few manufacturing facilities operating abroad are slowing down due to recession. The home-textiles and garment segments are reflecting sound growth both in the domestic and international markets due to good demand of apparels. There is a substantial scope for further growth in these segments. If the quality and productivity levels are achieved as per international parameters, then the industry will be able to combat and face the recession. Also, it was expected that the new government will take adequate steps to provide relief to the textile industry. The major markets for India Textile and Clothing exports are the USA and Europe. We need to diversify T & C exports and seek new opportunities in the new markets like Gulf Cooperation Countries (GCC) namely Bahrain, Kuwait, Oman, Saudi Arabia, Qatar and UAE, Africa, Latin America, Russia and Oceania to withstand competition from our neighboring countries.

SWOT Analysis:

Strengths: our strengths are,

- Experienced management team with exposure in textile industry to run the operations
- Emphasis on quality of product nurtured across the company

- The company has established strong presence in the market for several years
- The business model is simple & needs minimum marketing requirement

Weaknesses

- There is disadvantage in the form of increased power tariff, fuel cost, etc.
- The company strongly implements corporate governance practices in the organization.
- Higher debt / equity ratio indicates low leverage.

Opportunities

- Booming hosiery manufacturing sector in India, who are probable customers of the Company.
- Lucrative export market for the yarn especially 40s/ 45s count.
- High demand in premium innerwear market which generally requires 40s count yarn.

Threats

- Threat of cheap Chinese import of yarn in Indian as well as global market.
- Raw materials constitute a significant percentage of the Company's total expenses. However, this is common for any spinning unit.
- The Company faces significant competition in its principal markets. A slowdown in economic growth in India could cause the Company's business to suffer.
- The market is highly competitive and is highly price sensitive.

RISKS AND CONCERNS

The Indian economy has been growing consistently and consumer spending has been increasing over the last three years. In 2008-09 however, inflation has increased rapidly and is now at record levels. Usually, growing inflation dampens consumer demand for household goods, including textiles and apparels. If India's inflation continues to stay at such a level, there is a risk that domestic sales would be negatively impacted. Further removal of quota regime has resulted in global competition and every country has to become cost competitive.

We suffer on account of poor infrastructure, high transaction cost, not so favourable labour laws, increased power tariff and fuel cost, uncertainty in the government policies, etc., Structural weaknesses need to be addressed particularly in the wake of growing threat from China and other countries. The industry needs to make focussed efforts to replace with advanced technology equipment to improve quality of product, to reduce cost of conversion and to make a clear analysis of its manpower requirements and participate in designing the training programmes. The appreciation in rupee value could also be turned into an advantage by using the opportunity to modernise quickly by acquiring the necessary ingredients.

According to the experts in the industry, better quality standards, upgradation of technology in the Indian Textile sector coupled with branding as a tool could help gaining a larger share of the global exports in the post quota regime.

OUTLOOK

The value of total textile exports in terms of both rupees and dollar terms has shown an increasing trend than the corresponding last year. However, the decline was sharp in US \$ terms as against rupee terms. As per the quick estimates released by Directorate General of Commercial Intelligence and Statistics (DGCI&S), Kolkata, for the month of February 2009 there was a decline of 13.77% in case of cotton yarn, fabrics in rupee terms. Imports have increased across all segments. So, the Company needs to take steps to increase its export as compared to increased imports during the last year.

Suryalata has advantages that enable it to leverage these opportunities. With its expansion plans on track, the company has the capabilities to service large volume needs of international and domestic customers at the right time. The end-to-end value chain enables Suryalata to offer competitive prices, since input costs are minimized. The Company has well laid distribution channels to reach its target market.

The extraordinary expenditure of Rs. 76 lakhs (previous year Rs.279 lakhs) represents MTM loss on derivatives structures, which have knocked in as per to the ICAI directive. During the year 2008-09, the textile industry was under pressure in all quarters. The prices of Raw material touches high in the first and second quarters due to sharp appreciation of the dollar against rupee and the rise in prices of raw material not fully absorbed by the market. Global recession impacted the export market and thus resulted in excessive supply into the domestic markets. The trend seems to take coming years to reverse.
