Letter From The Chairman

Dear Shareholders,

I am happy to inform you that despite the economic meltdown, your company has reported excellent performance, i.e., nearly 115% growth in its volume of sales that stood at Rs. 35.66 Cr during the year under review as compared to that of Rs. 16.57 Cr in FY 2007-08. During the year under review, your company has achieved an all time high net profit of Rs. 6.70 Cr after tax.

Performance

The performance of your company for the year under review is quite satisfactory and seems to have beaten the global recession. It also proves that derivatized guar gum polymers export is on a robust growth trajectory. Guar gum polymers are extensively been used in the manufacture of personnel care items like shampoos, bar soaps, toothpaste, and other items alike.

Outlook

The global market for derivatized guar gum polymers used in the manufacture of personnel care items has experienced constant growth over the last few years. This is because of the fact that derivatized guar gum polymers are natural hydrocolloids that do not have any adverse effect on the health of human beings. In the international market, natural gums are preferred as compared to that of synthetic gums. Therefore, the demand of derivatized guar gum polymers are expected to increase gradually in the years ahead.

Modernization and Expansion - An investment for future

Despite soaring inputs prices, fluctuating market, and the world economy in a state of flux, your company remained focused on its modernization and expansion plans which after completion will add aggregating to 30000 TPA to its production capacity progressively. The modernization and expansion plans of your company, while emphasizing capacity expansion, also put maximum thrust on value addition and product mix improvement, technological upgradation, including modernization of existing assets and environment related projects. These investments will create competitive and sustainable businesses in the future enhancing long-term stakeholder value.

Securing Raw Materials

For manufacturing guar gum polymers used in the production of personnel care items, the principal raw material is guar gum splits. Company sources its raw materials from the open market from its approved suppliers. Despite poor monsoon, 2009 guar crop is adequate to meet out global demand. Therefore, supply of raw material is not expected to pose any problem.

Market potential

Market of derivatized guar gum polymers are on increase. These polymers are used in almost all the personnel care items like shampoos, conditioners, toothpaste, shaving cream and bar soaps. The demand of these items are increasing day by day with the increase of disposable income globally. Therefore, the demand of derivatized guar gum polymers in these segments is expected to increase many folds in the years ahead.

Types of guar gum

To talk about 'guar gum' as a single entity is misleading. There are many types of guar gum manufactured by employing chemical modification to give them an enormous range of application.

There are many different types of guar gum derivative that can be produced by chemical modification for altering chemical and physical properties to give the polysaccharide new applications. Your company is on the way to produce various chemically modified guar gum polymers to tap market potentials.

Corporate Governance

Your company is committed to conform to the highest standards of corporate governance by ensuring transparency, disclosures, and reporting as required under various laws, regulations and guidelines issued by the market regulatory authority.

Acknowledgments

Before I close, I would like to take this opportunity to thank all the shareholders of the company for their continued support and encouragement. I would also like to thank and acknowledge the immense contribution made by the employees of the company by offering their dedicated service.

Thank you ladies and gentlemen.

With warm regards,

S/d Bimla Jindal Managing Director

The financial statements of Vikas Granaries Limited (Formerly known as Adarsh Derivatives Limited) ("the Company") have been prepared to comply with the Accounting Standards referred to in the Companies (Accounting standards) Rule 2006 issued by the Central Government in exercise of the power conferred under sub-section (I) (a) of section 642 and the relevant provisions of the Companies Act, 1956 (the 'Act'). The financial statements have been prepared under the historical cost convention on accrual basis.

2) Use of estimates

In preparing the Company's financial statements in conformity with the accounting principles generally accepted in India, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period; actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in the current and future periods

3) Fixed Assets

- i. Fixed Assets are stated at cost less accumulated depreciation and impairment losses if any.
- Cost comprises the purchase price and any attributable costs of bringing the asset to its working condition for its intended use.
- iii. When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit (including capital profit) or loss, if any, is reflected in the Profit and Loss account.
- Self fabricated fixed assets include material cost and appropriate share of attributable expenses.

4) Depreciation

Depreciation on all assets of the company has been provided on straight line basis at the rates specified in Schedule XIV to the Act.

Expenses in respect of other short term benefits including performance bonus is recognized on the basis of amount paid or payable for the period during which services are rendered by the employee.

6) Taxation

Tax expense comprises current taxes, deferred taxes and fringe benefit taxes.

Provision for current taxation is ascertained on the basis of the assessable profits computed in accordance with the provisions of the Income-tax Act, 1961.

Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets relating to timing differences are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The Company makes provision for fringe benefit tax in accordance with applicable Income-tax laws.

7) Contingent liabilities and provisions

Depending upon the facts of each case and after due evaluation of legal aspects, claims against the Company not acknowledged as debts are treated as contingent liabilities. The Company makes a provision when there is a present obligation as a result of a past event where the outflow of economic resources is probable and a reliable estimate of the amount of obligation can be made. Possible future or present obligations that may but will probably not require outflow of resources or where the same cannot be reliably estimated, has been made as a contingent libility in the fianacial statements.

8) Earnings per share

Basic earning per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events of bonus issue and share split.

9) Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sale of goods

Revenue from sale of goods is recognized when the significant risks and rewards of ownership of the goods are transferred to the customer. In case of export sales, revenue is recognized after shipment.

Interest

Revenue is recognised on a time proportion basis taking into account the amount outstanding and the applicable rate of interest.

10) Inventories

Inventories are valued as follows:

Raw materials, stores and spares and packaging materials

Lower of cost and net realizable value. Cost is determined on a weighted average basis.

Work in progress and finished goods

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and to make the sale.

11) Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the profit and loss account. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

12) Miscellaneous expenditure
