REASONS FOR SICKNESS

As mentioned in earlier Annual Reports, the main reason for the continuous losses and consequent sickness was due to the cost and time overrun of revamp of Ammonia and Urea Plats, delay in stabilization of revamped Plants due to Technology related issues, higher energy, poor reliability, lack of maintenance for want of funds and unfavourable Pricing policies upto March 2009.

Thereafter, the Company's operations became profitable due to amendments in policies and increased quantum of Plan loans to maintain the Plants adequately. Once the Draft Rehabilitation Scheme is approved and implemented, the Company shall come out of sickness.

DIVIDEND

Company could not pay dividend to the shareholders due to huge accumulated losses and negative networth as on March 31, 2013.

PLANT PERFORMANCE

During 2012-13, Urea production was 4,35,771 MT (89.5% capacity) with an annual specific energy consumption of 7.822 Gcal/MT. Main reason for the lower production and a higher energy consumption is that there were two Turnarounds (TAR) viz., Apr-May 2012 and Feb- Mar 2013. During these months, exhaustive maintenance jobs were carried out to improve Productivity, Energy Efficiency & to address Pollution Control related aspects. The second Turnaround during the end of the year was in fact an advancement of the planned shutdown during Apr 2013 (FY 2013-14) under forced circumstances – unexpected equipment problem with potential for environment related issues. Plant has started reaping the benefits out of the maintenance jobs carried out during the advanced shutdown on startup from the last week of Mar 2013.

With respect to Complex Fertilizers, MFL produced 1,00,125 MT of NPK 17:17:17 during 2012-13 registering an increase of 179% over the previous year production.

Salient Features of Plant during 2012-13

- During Annual Turnaround 2012, Ammonia Converter S 200 Catalyst along with Basket was renewed after 21 years of service, which was a major achievement.
- Continuous Ambient Air Quality Monitoring Station (CAAQMS)

MFL installed one CAAQMS on 17th May 2012. The parameters analyzed are SO2, NOx, PM -10, PM-2.5,

47th Annual Report 2012 - 13

O3 and CO. This is a statutory requirement stipulated by TNPCBd.

Demineralization Plant (DM)

The New DM Plant's, operating system has been switched over to Distributed Control System (DCS) as in Ammonia and Urea Plants. on 17th May 2012

Urea production exceeded the day's installed capacity on 225 days during the year.

Turnaround during 2013

Refrigeration Compressor HP Case Seal leak and tube leaks in Inter-stage Coolers of Syngas Compressor and Process Air Compressor and deterioration of Cooling Water system were attended to.

Statutory Annual Inspection of Boilers were carried out in Feb 2013 availing the shutdown opportunity.

Post-Turnaround Performance

 The lowest specific energy consumption was 9.364 Gcal/ MT Ammonia (Design: 9.461 Gcal) & 6.818 Gcal/MT Urea (Derived design: 7.004 Gcal) on Mar 31, 2013, the average being 9.433 Gcal/MT & 6.882 Gcal/MT respectively during Mar 26-31, 2013.

GAS CONVERSION

MFL Ammonia Plant was revamped in 1997 and during that time itself, the Plant was designed to be gas compatible with minor modifications in the Front end of the Ammonia Plant.

Feasibility Report and Basic Engineering Design Package (BEDP) has been completed by M/s. HTAS, Denmark. Project is being executed through PDIL (Engineering Consultant) and is expected to be completed in Jan 2014, subject to delivery of equipment at site. Major equipment enquiry has been floated by M/s PDIL and offers were received from the Vendors and Technical Evaluation is in progress. The Tie-in points were identified by PDIL & MFL.

ANNEXURE - III

MANAGEMENT DISCUSSIONS AND ANALYSIS

Business

Madras Fertilizers Limited (MFL) incorporated in the year 1966 is a PSU under the administrative control of the Department of Fertilizers (DOF), Ministry of Chemicals & Fertilizers, Government of India.

MFL is engaged in the manufacture of Ammonia, Urea and Complex Fertilizers (N:P & N:P:K) at Manali, Chennai. MFL is also engaged in manufacturing and Marketing Bio-fertilizers and eco-friendly Agro Chemicals under the brand name "VIJAY".

Introduction

During the year 2012-13, scanty and sporadic rainfall was received in the marketing territory. All the reservoirs were half empty due to insufficient receipt of water from the catchment areas. The crop coverage was only 78% of normal in all the southern states of Company's marketing territory. The consumption of Urea and complex fertilizers also have come down when compared to last year due to adverse seasonal conditions and to certain extent the high cost of phosphatic fertilizers also due to soaring price of raw materials in the International Market.

Fertilizer Sector

The consumption of DAP and MOP have drastically come down because of huge escalation of cost compared to last year and also because of non-release of water from the reservoirs on due date in delta area consequent to minimum storage added to huge inventory of non-nitrogenous fertilizers in South India. Further, this has affected food grains productivity during the year.

Since Urea is sold under Government Administered price, the Urea manufacturers especially those who are using Naphtha as feedstock for Ammonia / Urea production facing liquidity problems due to the high cost of crude oil in the International market and the Government also maintaining the increased level of subsidy which is not conforming to the escalation cost of petroleum products / transport subsidy and Government has given forward planning direction to convert naphtha into Natural Gas as feedstock at the earliest to reduce the subsidy burden and to increase the profit.

For Complex fertilizers, NBS is applicable from 01.04.2010 where subsidy is fixed by Government on yearly basis and the MRP is allowed to be fixed by manufacturers based on market dynamics.

The subsidy element is being regulated by the Department of Fertilizers through mFMS for which Dealer Training Programmes were organised by the Marketing Field Personnel at District level to get acquaintance with the Government procedure for obtaining receipt based subsidy by the manufacturers.

Global Scenario

The prices of all major fertilizers are slashed down in the international market but for NPK which is almost maintained.

Production of NPK

Consequent to notification of additional compensation for complex fertilizers produced by using 'N' through captive ammonia based on Naphtha under NBS Policy, Company started production of complex fertilizers from October 2011 and the Company has switched over to production of 17-17-17. Since additional subsidy on 'N' is for a maximum period of two years effective April 1, 2010, and this has been extended till Jun 2013 for FACT (a Fertilizer PSU similar to MFL), the Company has requested GoI for similar consideration. MFL has also requested to extend this benefit till completion of gas conversion. Decision on the subject is expected shortly.

FEEDSTOCK SCENARIO

MFL's request for allocation of Natural Gas has been forwarded by Department of Fertilizers to Ministry of Petroleum & Natural Gas vide their letter No.12012/24/2006-FFP dt. 11.06.2010.

Considering reduction in production of Gas from KG-D6 field, Company is exploring the possibilities of getting R-LNG at MFL battery limit. In this regard, following options are being examined:

- 1. Sourcing R-LNG from Ennore Terminal (20 KM from MFL) expected to be commissioned in 1st quarter of 2016 and till that time examine the feasibility of receiving Naphtha at discounted price which may be equal to gas price
- 2. Sourcing R-LNG from PLL, Kochi, using 305 KM spur line to be laid by GAIL from Krishnagiri on Kochi-Mangalore-Bangalore trunk pipeline
- 3. During the intermediate period, till gas pipeline is made operational, source 75% of gas requirement from Krishnapatnam through M/s LNG Bharat Private Limited (LNGBPL) in cryogenic Road Tankers and use minimum 25% Naphtha since facilities for only ½ day storage would be provided by LNGBPL

After firming up the gas supplier, MFL has to enter into Gas Transportation Agreement (GTA) and Gas Sales Agreement (GSA) with MFL Board approval.

PRICING POLICY FOR UREA

A New Pricing Scheme (NPS) for Urea units took effect in the place of Retention Pricing Scheme from 1.4.2003 and implemented in Stages. Stage I, II &III were implemented from 1.4.2003 to 31.3.2004, 1.4.2004 to 30.9.2006 & 1.10.2006 respectively. Amendment to NPS-III was made effective from April 1, 2009 to restrict the reduction in fixed cost to 10%. The tenure of NPS-III policy which was upto March 31, 2011 has been extended provisionally till further orders. Now the Policy beyond NPS III is under consideration of Government.

NUTRIENT BASED SUBSIDY (NBS) POLICY FOR PHOSPHATIC & POTASSIC FERTILIZERS

The Government of India introduced the Nutrient Based Subsidy Phase I with effect from 1.4.2010. This scheme is applicable for DAP, MOP, MAP, SSP, TSP and for other twelve grades of Complex Fertilizers.

Under NBS, subsidy is fixed for the year without any escalation/de-escalation and market price is open. The manufacturers are having freedom to fix the market price based on input prices and they are required to print Maximum Retail Price (MRP) along with applicable NBS per bag on each fertilizer bag.

Si.No.	Nutrients	2012-13	2013-14
1	N	24.000	20.875
2	Р	21.804	18.679
3	K	24.000	18.833
4	S	1.677	1.677

The per kg Nutrient Based Subsidy for nutrients 'N' 'P' 'K' & 'S' for 2012-13 & 2013-14 is given below:

Accordingly, NBS was finalized for different P&K fertilizers and additional subsidy was given for fortified fertilizers with secondary & micro-nutrients like Sulphur, Boron & Zinc.

RISK MANAGEMENT

Major challenges that fertilizer industry facing are increasingly volatile International market for fertilizers and raw materials, steep depreciation in rupee value, increasing prices of NPK fertilizers due to new NBS policy and rise in the working capital requirements of fertilizer firms in addition to the historical challenges associated with the rural markets. This supplementary audit has been carried out independently without access to the working papers of the Statutory Auditor and is limited primarily to inquiries of the Statutory Auditor and Company personnel and a selective examination of some of the accounting records. On the basis of my audit, nothing significant has come to my knowledge which would give rise to any comment upon or supplement to the Statutory Auditor's Report under Section 619(4) of the Companies Act, 1956.

M/s Che	AMENTS OF THE STATUTORY AUDITORS B THIAGARAJAN & CO, CHARTERED ACCOUNTANTS, ENNAI ON THE ACCOUNTS OF MADRAS FERTILIZERS ITED FOR THE YEAR 2012-13	THE COMPANY'S REPLIES UNDER SECTION 217 (3) OF THE COMPANIES ACT, 1956
7	In our opinion, the following amounts included in claims recoverable (forming part of Note 16 - Other Current Assets) should be charged off to Profit and Loss Statement	
	i. ₹28.93 lakhs under Price Concession Scheme	 These are old claims, nevertheless legitimate. Hence retained in Books.
	ii. ₹ 0.70 lakhs due from Customs Department (m.v. Pan Queen)	 The Claim is tenable and under the consideration of Customs Department. Hence retained in Books.
		Accordingly, charging the above amounts to Statement of Profit and Loss is not considered necessary. A final decision on these issues shall be taken during the year 2013-14.
8	Reference is invited to Note 24(B)(iii) regarding accounting of a sum of ₹ 47.40 crores towards additional compensation under Nutrient Based Subsidy (NBS) for producing P&K fertilizers which has been considered as receivable from Department of Fertilizers (DOF). As the proposal to extend the scheme for additional compensation is still under consideration by DOF as at the year end , in our opinion, the above sum of ₹ 47.40 crores is not recoverable and to that extent has the effect of overstatement of profit for the year ended 31^{st} March 2013 and claims recoverable (forming part of Note 16 - Other Current Assets) as at 31^{st} March 2013.	The additional compensation was originally approved by DOF for three companies using costly Naphtha based Ammonia in the production of NPK complex fertilizers up to March 31, 2012 to support them to sustain production of NPK and to convert to Natural Gas feedstock by that time. None of them could convert to Natural Gas as the same was not available. For one of the Companies which signed Gas Transportation Agreement, additional compensation was extended during 2012-13 also. Applying the same principle, the Company realistically accounted the additional compensation at the rates announced for 2011-12.
		in the considered opinion of the Company, had the same was not accounted, the Accounts shall not give a true and fair view and shall defeat the very purpose of matching concept in as much as the expenditure is accounted, the estimated income also has to be accounted.
		Adequate disclosure is made under the Significant Accounting Policies – Note 24 (A) 10 (ii).
		In addition, the Department of Fertilizers vide its letter no. 23011/8/2010 – MPR dated 26 April 2013 confirmed that the proposal is under consideration.
	Paragraphs 7and 8 have the effect of overstatement of the current year's profit to the extent of ₹ 47.70 crores and to that extent has the effect of overstatement of net worth and overstatement of claims recoverable (forming part of Note 16 - Other Current Assets).	

9	Reference is invited to Note No. 24(A)7(vii) of the Significant	Ammonia is only an intermediary and not a finished product
	Accounting Policies of the Company regarding valuation of inventories, Ammonia is valued at cost which is not	for the Company as it is mean't for captive consumption only and not for sale.
	in accordance with Accounting Standard 2 (Valuation of Inventories) which requires inventory to be valued at lower of cost and Net Realisable Value (NRV)	Ammonia valuation at cost is adequately disclosed under the Significant Accounting Policies - Note 24(A) 7 (vii) which is the Industry practice.
10	Reference is invited to Note 24(B)(ii) regarding accounting of a sum of ₹ 37.72 crores towards escalation in input prices which has been considered as receivable from Fertilizer Industry Coordination Committee (FICC) for the year ended 31 st March 2013 under New Pricing Scheme (NPS) for Urea. Adjustments may arise in future in respect of the above on final payment.	FICC have not notified the final concession rates for 2012-13. Hence the Company has realistically estimated the escalation and the same is adequately disclosed under the Significant Accounting Policies - Note 24 (A) 10 (i).
11	Reference is invited to Note 29(e) regarding balances in Long term borrowings from GOI, Trade Receivable/Payables, Claims recoverable and loans and advances are subject to confirmation and consequential adjustments.	The Company has obtained confirmation from most of the high value Trade Receivables / Payables. However, adequate disclosures made under note 29(e) annexed to Accounts. Hence there is no possibility of consequential adjustments.
•	The effect of Paragraphs 9, 10, 11 above on the profit of the Company for the year ended 31 st March 2013 is not ascertainable.
