#### MANAGEMENT DISCUSSION AND ANALYSIS REPORT:

#### INDUSTRY STRUCTURE & DEVELOPMENT:

The Company is engaged in the business of agrochemicals. The performance of the Agrochemical Industry

is largely dependent on Farming sector & Timely Rains. The year under review saw the healthy growth of the Indian Agrochemical market due to wide spread Rains & the higher commodity prices.

The competition in Export market has increased & weakening of Rupee has benefited in aggressive pricing of the products for exports.

The Company will continue to focus on cost control and cost effective production measures and give dedicated and specified thrust to Branded formulation export.

#### **OPPORTUNITIES AND THREATS:**

The consumption of Pesticides in India is still the one of the lowest in the world. The increased focus of the Indian farmers for the crops for exports, growth in irrigation, growth in food processing facilities & Farmer supporting Government at the Centre are positive indicators for the long term potential of the Pesticides Industry. The increase in production & use of Bio-Fuels remains one of the most promising factors for future Pesticides business growth.

The unfavorable climatic conditions, large inventory maintenance and extended credit due to seasonal nature of the agri-business, high raw material and energy costs due to high crude prices and cultivation of

genetically modified crop, non availability of customer credit due to Global subprime crisis remain major threats for the Pesticides Business.

#### OUTLOOK:

The business outlook for the current year is optimistic even though in the progress of the monsoon in India is below normal. Sales from the many new exports markets are expected this year due to the new Registrations, approvals obtained. As most of the raw materials are indigenously manufactured, Depreciation of Rupee will help the Export Business.

#### **RISKS & CONCERNS:**

The changes in weather conditions with erratic monsoon remain the major Risk & concern of the pesticides Industry. The benefits of the genetically modified crops to the farmers are not proved convincingly, so its effect to the pesticides industry is yet to be fully studied and understood but it has already started to reduce the Cotton Insecticides sales. Non availability of key raw materials, regulatory changes in Pesticide Registration system in India & world over, non availability of credit insurance & wild currency fluctuation also remains major risks.
