III. OTHER INFORMATION

The last year and this year have been difficult for the textile industry due to several economic effects, which were beyond control of the management of the Company. Last year, the industry was hit by high inflation and abnormal appreciation of rupee against dollar, which has affected the overall manufacturing costs of the unit and lower realization of finished products. This year has been abnormal in terms of the turnover and profits of the Company due to the sub-prime crisis and global meltdown in the overall industry. The Tea division of the Company has seen a rise in the realization for the finished products, since last year and the good run is expected to continue, even this year. Detailed information is available in the Management & Discussion Analysis annexed to the Director's Report.

The Board of Directors has recommended the proposed resolution set out at Item No. 6 of this Notice for your approval by way of a Special Resolution.

Except Mr. U. Kanoria, none of the Director is concerned or interested in the proposed resolution. This explanatory statement along with the relevant resolution may be treated as an abstract of the terms of contract of appointment of managing Director to be disclosed to the members pursuant to Section 302 of the Companies Act, 1956.

Accordingly, your Directors recommend the resolution set out in Item No. 7 of the convening Notice for your approval. None of the Directors is in any way concerned or interested in the aforesaid resolution.

Item No. 8

As the members are aware, the main business of your Company is manufacturing of tea and textile, which requires high financial resources from time to time. Your Board has been meeting the requirements through borrowings from banks/ Financial Institutions and requisite funding from Promoter Group from time to time. Considering the funding needs and current market conditions, in order to augment the resources available to the Company, it is also proposed to offer, issue and allot, Foreign Currency Convertible Bonds (FCCBs), and/or other equity linked securities and/or securities convertible into equity shares, at a later date, and/or Global Depository Receipts (GDRs) and /or American Depository Receipts (ADRs) and /or Qualified Institutions Placement (QIP), up to a sum not exceeding US\$5 Million (approximately Rs.25 Crores at the current rate of exchange).

DIVIDEND

In view of loss, the Directors do not recommend any dividend for the year under review.

OPERATIONS

Your Company has achieved a turnover of Rs.9393.61 Lakhs for the financial year as against Rs.10038.15 Lakhs last year. Whilst North Indian Tea prices remained buoyant, there was no significant improvement in yarn prices. Your Company has made good progress in creating a niche market for its tea. During the year, exports of the Company's textile unit were adversely affected mainly due to higher input costs, particularly raw material, power costs & interest costs and low demand due to global recession. However, the textile division of the Company is also showing signs of recovery. An increase in demand and efforts by your management are expected to produce improved results in the near future.

Tea Division

Last year witnessed a strong demand for tea in the market and as such prices were buoyant. In line with the industry, your Company's tea division also benefited from the improved prices and better quality of tea produced by it. In spite of loss of crop, the division reported better results due to improved average realization.

During the current year, the market is buoyant and tea prices have scaled new highs. The year shows a drop in production in all tea producing countries. North India too has experienced a drought. This has resulted in a shortage of supply, resulting in escalation of prices. With steps being taken to augment the availability of labour, better field practices, a buoyant market and firm prices, the outlook for the division looks favourable.

DIRECTORS' REPORT (Contd.)

Textile Division

The division went through one of the worst years in recent history. The first half of the year saw cotton prices going through the roof due to unbridled exports of cotton in the 2007-08 season. The country reaped a bountiful crop for the 2008-09 cotton season, for second year in running. This generated optimism amongst spinners, however the increase in MSP (Minimum Support Price) of cotton by the Government resulted in domestic prices ruling higher than international prices. This adversely affected the industry's export competitiveness.

Average sales realisation increased by 7.73 %, the improvement was more than negated by increase in average raw-material cost by 15.52%. The continuously rising raw-material costs forced the division to impose voluntary production cut. About 70 days production was lost due to voluntary production cut and power cuts.

The division & the Industry are working on negative margins. However, in the recent past, there has been a moderate increase in demand and your management is hopeful this trend will continue and curtail the losses.

The focus of the management is on cost reduction and optimizing product mix to bring the operations back on rail.

FINANCE

During the year under review, the Company repaid the installment of Term Loans amounting to Rs.552.69 lakhs, falling due during the current year. The Company has also made fresh borrowings of Rs.1125.84 lakhs for funding capital expenditure and other working capital requirements. Long term debts of the Company stands at Rs. 3803.52 Lakhs.

DIRECTORS

Mr. P.K. Bhattacharjee and Mr. Pavan Kumar Poddar, Directors of the Company, retire by rotation at the ensuing Annual General Meeting and are eligible for re-election.

CORPORATE GOVERNANCE & MANAGEMENT DISCUSSION AND ANALYSIS

A separate report on Corporate Governance along with Auditors' Certificate on its compliance is enclosed and forms part of this Report. Management Discussion and Analysis Report forms a part of the Annexure to the Directors' Report.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

OVERVIEW

The overall performance of the Company for the year 2008-09 has been adversely affected by the prevailing slump in the Indian Textile Industry. The recession in the world wide economy along with declining demand and steep increase in operating costs due to rise in raw materials, power and fuel costs has resulted in a negative profit margins for the division and the Company as a whole. However, the Tea division of the Company, in spite of a decline in crop in the last quarter, showed improved performance. The Company's strategy revolved around :

- Creating and maintaining niche markets while exploring new horizons simultaneously.
- Improvement in utilisation of assets to achieve productivity gains.
- Improvement of Working capital management.
- Measures to consistently reduce costs and improvement in productivity of factors of production.

SEGMENT ANALYSIS & REVIEW

The key business segments of the Company are beverages (Tea) and textile. The Company's business is mainly based out of two tea estates in Assam and a Textile division in Gujarat.

A. TEXTILE DIVISION

Industry Conditions : Outlook for the Industry at present appears to be gloomy. In spite of a bumper crop during the year under review, prices ruled at exorbitant levels, due to export of large quantity of cotton, coupled with a decline in production in China, Pakistan and USA. Appreciation of Rupee by almost 11% has significantly eroded the profit margins of the Industry. Steep increase in international prices of crude oil resulted in substantial increases in power cost. The problem has been aggravated further due to inability of the manufacturers to pass on the increased production cost, due to over capacity. A weak US economy and a drop in global demand have resulted in a decline in export orders, which has significantly played on the revenue projections of the current year.

Opportunities & Threats : Small to marginal growth is expected in the domestic demand for Yarn. Large quantities of cotton stocks with CCI and NAFED coupled with increase in imports of cotton will exert downward pressure on prices. The growth in domestic industry needs to be exploited for improving the decline in export margins.

Cotton Yarn spinning industry is suffering from overcapacity. Cotton prices are expected to soften, however margins will continue to remain under pressure due to over supply.

Textile Division Overview : The division and industry faced one of the worst years in history. Unbridled exports of cotton resulted in cotton prices reaching historic highs, making the operations unviable. The division opted for voluntary production cut to contain losses. A total of 70 days production was lost due to voluntary lay-off and power cuts.

The immediate outlook is not encouraging. Cotton prices continue to be a cause of concern. The depreciating Rupee and fall in crude oil prices are welcome developments which will mitigate the industry's woes. The division has made inroads in the markets of Europe and Latin America. An increase in DEPB rate for export incentives will help improve the division's bottom line.

The division is focusing on productivity, quality and exercising tight control on manufacturing and finance costs to tide over the difficult times.

Performance Highlights : The Performance highlights for the year ended 31st March, 2009 as against 31st March, 2008 are as follows :

	Units	2008-09	2007-08	% Change
Production of Cotton Yarn/Fabrics	Kgs	49,46,513	65,82,661	(24.86)
Sales of Cotton Yarn/Fabrics	Kgs	50,95,823	64,60,813	(21.13)
Average Realisation	Rs./Kg	117.83	109.38	7.73
Average Cost of Cotton	Rs./Ton	64,247	55,614	15.52
Profit / (Loss) Before Interest but after Depreciation	Rs. in Lacs	(813.34)	(291.79)	(186.54)

Risks & Concerns : The steep increase in the MSP of cotton has eroded the industry's competitiveness. Yarn demand has weakened due to global economic crisis and world wide recession. The industry is expected to under perform till the demand catches up with prevailing over supply.

In respect of its fixed assets, the Company has taken out insurance policies to cover against the risks they might be exposed to and suitable steps are taken whenever required to overcome the impact of fluctuating Rupee-value on exports.

B. TEA DIVISION

Industry Conditions : Tea industry in India has over the last few years have been suffering from low prices as a result of excessive supply. However, in the last twelve months, as a result of growth in demand of tea in the Indian market,

MANAGEMENT DISCUSSION AND ANALYSIS REPORT (Contd.)

the excess supplies has been absorbed and has provided much needed relief to the industry. Adverse weather conditions and disparity in demand and supply has created a shortage of teas, resulting in buoyant prices for all varieties of tea. The scenario is expected to continue, which augurs well for the industry.

Opportunities and Threats : The outlook for the industry looks bright with growth in demand outstripping the growth of supply as a result of which carryover stocks have declined. Rising domestic demand coupled with lower production due to adverse weather conditions in major tea producing countries, augurs well for the Industry and the Company.

A study by Operations Research Group (ORG), indicates that domestic tea consumption has grown at 3.4 per cent last year, up from 2.5 per cent growth witnessed in 2007-08. This indicates that domestic demand is strong and there's a shortage in supply and as such Tea prices will remain firm and the Company and the industry is expected to do well. Rising Costs of operations and shortage of labour is a major area of concern for the industry.

Tea Division Overview : During the year under review, the crops recorded a decline, due to adverse weather conditions. However, strong demand coupled with shortage of quality teas has improved the average sales realization for the division. Better quality of tea produced, superior marketing strategies and quality adopted by your Company has resulted in improved results. Severe cost control measures helped your Company to keep production costs under control. The Company is currently planning increased irrigation facilities at your estates to reduce the impact of adverse weather conditions. The Company regularly brings more area under cultivation to increase productivity. These developments will have a positive impact on the bottom line of the division. With the thrust on manufacture of quality teas expected to yield higher sales realisations, steps having been taken to mitigate shortage of labour, improved field practices and cost control measures make the outlook for the current year positive.

Performance Highlights

The performance highlights for the year ended 31st March, 2009 as against 31st March, 2008 are as follows :

	Units	2008-09	2007-08	% Change
Production of Black Tea				
– Own	Kgs	15,42,335	16,90,724	8.77
– From Purchased Green Leaves		4,52,963	5,42,143	16.44
Average Realisation	Rs./Kg	111.77	89.48	25.71
Profit after Tax	Rs. in Lacs	264.35	182.54	46.71

Risks & Concerns : Tea being an agricultural commodity is affected by vagaries of weather. The planned irrigation facilities at your estates will help it to reduce the impact of adverse weather conditions in future. Further, there is a risk of supply of cheap teas made available by bought tea leaf factories and from imports affecting the average realisation of teas in the domestic market. It is the endeavour of the Company to minimize such risks by being a consistent manufacturer of quality teas so as to create a niche market for its produce.

INTERNAL CONTROL SYSTEM AND ADEQUACY

The Company has adequate system of Internal controls and necessary checks and balances are introduced/strengthened so as to ensure

- that its assets are safeguarded.
- that transactions are authorised, recorded and reported properly; and
- that the accounting records are properly maintained and its financial statements are reliable.

The Company appoints external firm of Chartered Accountants to conduct internal audit from time to time and their reports are reviewed by the management and audit committee.
