MANAGEMENT DISCUSSIONS & ANALYSIS REPORT:

Industry Structure and Development:

The Bio Pharma Industry has registered a growth of 18% during the financial year. Though there is a decline in the growth rate when compared to previous year. Our company has achieved a growth of 5.24% more compare to previous year. We are hoping to get a more turnover.

Opportunities and Threats, Product wise Performance and Outlook:

The growth of the sector has opened a very good opportunity to our company to expand the Product portfolio of it. The company has identified certain products in Nephrology and Oncology segments and having negotiations with reputed manufactures for custom manufacturing exclusively for the Indian market.

The threats perceived by the company are two fold in nature. The growth of Indigenous companies is giving threat to imports of the similar products. Due to this reason the price competition is increasing and to face this problem the company is negotiating further with the custom manufactures to be on par with the market or better. The other threat being perceived by the company is the delays in getting the Government approvals and the costs involved in getting the approvals. The Genetic Engineering Approval Committee (GEAC) and Drug Controller General of India (DCGI) insisting clinical trial in India for almost every product, even though the product is fully approved in other countries for marketing. This is causing delay in implementing the projects and involving higher costs.

We are Importing and marketing 'Recombinant Human Erythropoietin' with brand names EPOVIN, EPOSINO, TRANSFER & NEPHRODIL, EPOREC. We hope to have a good turnover for this product in the year 2010-11.

The approval for higher potencies is still awaited from DCGI for the above product, which are used for the treatment of Leukemia and we are trying to obtain licenses for other Recombinant & Oncology Products.

Risks and Concerns:

Now many Chinese manufacturer have registered and registering Erythropoietin in India because of this the competition is very high there are 15 companies offering this product in India this has become a major threat to us apart from the

time required to get the approval is increasing due to the fact that the number of additional conditions are growing. Before applying for registration a lot of work is to be done, like market potential estimation, competition, cost verses availability etc. To complete all these activities requires a lot of spending in addition to time. There is no guarantee of getting the approvals even after completing all these things. There is a risk of rejection from regulatory bodies, which will result in loss of time and money. That is the reason the company is treading cautiously. Internal Control systems and their adequacy:

The internal control systems are adequate to the size and nature of operations of the company.

Discussion on financial performance with respect to operational performance:

During the year the company has revenue of Rs.393.79 Lakhs as against last year revenue of Rs.374.18 lakhs. The management is expecting that the revenues will increase during this year as we have four brands now in the market.
