YEAR IN PROSPECT

World Economy

Year 2011-12 has been a year of turbulence. Negative developments in Eurozone caused by the sovereign debt crisis and its resultant impact, was the major area of concern, in the year gone by Large scale liquidity injection by the European Central Bank since December 2011, could stabilize the downslide. A positive political signal in favour of ECB bailout package in the recent Greek elections has also helped in stabilizing the eurozone. But there are still concerns about the economic health of countries like Greece. Italy and Spain and future of Eurozone as an economic unit.

In the United states, the economy has been on the mend although recovery has been much weaker than projected. Unemployment is ruling beyond expected levels. The Presidential election this year, may mark a turning point. There has been a slowdown in other major economies like China, Japan, Korea etc., with exception of Australia.

Overall the global economy is expected to remain under pressure.

Indian Economy

Indian economic scenario has been marked by consistent high rates of inflation, absence of Government action on the reform front which has come to be known as Policy Paralysis, and a ballooning of fiscal deficit. Provision of high subsidy in Government finances, for Government welfare schemes and in support of regulated petro products pricing, have contributed to the widening fiscal deficit. The Reserve Bank has followed a very tight monetary policy, hiking key rates thirteen times since March 2010 in its bid to check rising inflation and refusing to bring down bench mark interest rates, unless there is an improvement in Government finances.

The Government tried to move in the direction of long term economic reforms when the Union Budget 2012-13 maintained the standard rate of central excise duty at 12% with reduction in exemptions as a prelude to implementation of the

Uniform Goods and Service Tax, but lack of political consensus has led to an indefinite delay in implementation of any focused approach to economic reforms.

India's exports increased by 21% in US dollar terms during April-March 2011-12, while imports registered a growth of 32%. Fils invested a net amount of US\$ 18.26 billion in Indian equity and Debt markets during April-March 2011-12 compared to an inflow of US\$ 32.20 billion in the same period of previous year. This, together with reduction in foreign direct investment inflow, has resulted in India's foreign exchange reserves decreasing to US\$ 294.40 billion as at the end of March 2012. The adverse forex trade has led to weakening of the Indian currency against the US dollar further aggravating pressures in economy. All this has led to a downgrading of country's risk rating and GDP growth forecasts by almost all the leading global rating agencies.

Despite un-certainties in the overall economic scenario, your company has not only been able to retain its export markets but in fact has been able to improve performance. It expects to do even better this year as compared to the year in prospect.

MANAGEMENT DISCUSSION & ANALYSIS

Industry Structure and Development

The Indian Decorative Laminate industry is dominated by unorganized sector with a few players in the organized sector. The organized sector has been able to capture a majority share in the export market driven by sustained quality consciousness. Current market trends show a slow but steady recovery in European and American economies which are the main overseas markets for the Company's products.

Opportunities and Threats

Sustained demand in the Indian economy shall help the domestic sector come out of recession, but if the overseas markets do not recover in the near future it shall be a big challenge for the industry.

Segment-wise and Product-wise Performance

The Company is engaged primarily in manufacturing of Laminate Sheets and

there are no separate reportable segments as per the Accounting Standard 17.

Outlook

٠٠/٠٠

Exports shall remain the core growth area and a lot depends on overseas economic recovery, in the domestic sector, the outlook seems to be stable in long term, with the economy expected to perform better in the years to come. Though inflation is a worry which may dampen real spends in the economy, but an emphasis on infrastructure and housing shall push the demand for company's products.

Risk and Concerns

At the core of the company's risk-mitigating initiatives, there is a comprehensive and integrated risk management approach, which comprises stringent norms and regulations along with a prudent control mechanism. The risk management approach conforms to the company's strategic direction, which is in line with a desire to enhance value for all the stakeholders with a balanced risk appetite.

Internal Control Systems and their Adequacy

The company has a proper, independent and adequate system of internal controls to ensure that all the assets are protected against loss from unauthorized use of disposition and those transactions are properly authorized, recorded and reported correctly. The internal controls systems are designed in such a way to ensure that financial and other records are reliable for reporting financial statements and other data and for maintaining accountability of assets.

Discussion on Financial Performance with respect to Operational Performance

The global economic meltdown has affected your Company also, with recession in Europe inducing a decline in exports, which contribute to a major share in revenue. But stringent cost controls have helped in maintaining profitability of operations. The management feels that the worst is over with better inquiries from the overseas markets during the current financial year.

Material Developments in Human Resources/Industrial Relations front, including number of people employed

The company maintained cordial industrial relations during the year. The number of employees in the company are 24.
