# **FUTURE PROSPECTS**

The global environment is likely to continue to be an area of concern, although conditions have improved since the beginning of this Financial Year 2014-15. The market expects the change in the government at the Centre during the Financial Year 2014-15 and a stable & strong government with majority will support the country's exports and increase access to global capital. # PARTICULARS OF EMPLOYEES

# AUDITORS

M/s. Lakhani & Lakhani, Chartered Accountants, Auditors of the company retire at the ensuing Annual General Meeting and are eligible for reappointment.

9

Auditors of the company in their report made an observation that, the company has no internal audit department, commensurate with the size of the company and nature of its business.

Also they have made comment on non provision of gratuity in the accounts in the event of any employee leaving services by reason of death or incapability.

Regarding internal audit system, management is of the opinion that (as the company does not have volume of transaction - other than investments in Equities - which are directly under supervision of the Chairman) the decision to have the internal audit system be deferred and can be considered later.

Regarding non provision of gratuity, the management opines that, gratuity for the period of services rendered by the employees, is being paid to the employees leaving services by reason of resignation, and due to death or incapability, to the legal heirs of the deceased or to the employee disabled and accounted for on cash basis. Hence no provision is made in the books of the company. However the Board of Directors has decided to compute the gratuity payable to all the employees as on 31" March 2014 and to invest the computed amount in appropriate investments schemes to enable the company to pay the gratuity to employees leaving the services by reason of death or incapability or resignation.

Regarding the Non-Provision for Doubtful Debts by the subsidiary, the management is of the opinion that the subsidiary company does not have adequate profits to provide for the doubtful debts. Even if the same has been provided the company does not have adequate Capital and Reserves and thereby the company's Net-worth would have been negative. This is the prime reason for the company to surrender the TRADING MEMBERSHIP OF NSEIL in the month of August 2013. Further the company will now be concentrating in recovering the Trade Receivables of the company during this year. The subsidiary will also undertake other activities such as real estate investments to augment its resources and to improve its profitability which would enable the company to repay the loans obtained from the holding company. Hence the company has not provided for the doubtful debts though it is considered as doubtful debts.

# MANAGEMENT DISCUSSION AND ANALYSIS

# GLOBAL ENVIRONMENT

Since the Mid-Quarter of December 2013, the global recovery is gaining traction, led by the strengthening of the US economy, but it is still uneven and subdued in the Euro area and Japan, and a slowdown in China seems to be underway. Notwithstanding the boost from stronger external demand, uncertainty continues to surround the prospects for some emerging economies, with domestic fragilities getting accentuated. Financal market contagion is a clear potential risk.

# **INDIAN ECONOMY**

The Indian economy recovered in the second quarter (Q2) of 2013-14 recording a growth of 4.8 percent. This follows a growth rate of 4.4 percent in the first Quarter (Q1) of the current financial year - the lowest in 16 quarters. Particularly encouraging is the fact that the recovery in Q2 is noticed on the face of significant fiscal consolidation by the Government and tighter liquidity conditions to moderate aggregate demand. While the Government delivered on the announced fiscal targets in 2012-13, current account deficit (CAD) continued to remain elevated in Q1 of 2013-14 and in tandem with market misperception of an imminence of the rollback of quantitative easing in US, assumed a serious dimension with the sharp depreciation of the rupee. Domestically, some loss of momentum of growth is likely in Q3 of 2013-14, despite a strong pick-up in rabi sowing. Industrial activity remains in contractionary mode, mainly on account of manufacturing, which declined for the second month in succession during Q3. Consumption demand continues to weaken and lackluster capital goods production points to stalled investment demand. Fiscal tightening through Q3 and Q4 is likely to exacerbate the weakness in aggregate demand. Lead indicators of service suggest a subdued outlook, barring some pick-up in transport and communication activity.

While retail inflation measured by the consumer price index (CPI) declined significantly on account of the anticipated disinflation in vegetable and fruit prices, it remanis elevated at close to double digits. Moreover, inflation excluding food and fuel has also been high, especially in respect of services, indicative of wage pressures and other second roung effects. In terms of the wholesale price index (WPI), headline inflation eased to a four-month low with the sharp decline in vegetable and fruit prices. Non-food manufactured products (NFMP) inflation, however, rose in

December on an uptick in prices of chemicals, non-metallic minerals and paper products. Hardening prices of services and key intermediates seen in conjunction with rising bank credit, increase in order books, pick-up in capacity utilisation and the decline in inventories of raw materials and finished goods in relation to sales suggests that aggregate demand pressures are still imparting an upside to overall inflation. It is critical to address these risks to the inflation outlook resolutely in order to stabilise and anchor inflation expectations, even while recognising the economy is weak and substantial fiscal tightening is likely in Q4.

TheGovernment put in place a series of measures and there has been a significant let -up in the challenges on the trade and balance of payments front, particularly in the Q2 2013-14. Domestic impediments like elevated levels of food and retail inflation, high input costs and pressure on profit margins and infrastructural bottlenecks continued, with the Government addressing them through appropriate calibration of fiscal policy, administrative measures and institutional mechanisms like Cabinet Committee on Investment of fast track projects.

#### CAPITAL MARKET

Indian equity markets, in line with global trends were affected by the expectation of market Participants in May, 2013 regarding the "tapering" of the monthy bond purchase program of US. The US Fed as a part of its policy stance has beeb buying US \$ 85 billion of bonds every month. However, with the US Federal Reserve deciding to wait for more evidence on the progress to be sustainable before adjusting its bond buying programme and a slew of investor-friendly measures taken by RBI and the government over the last six months, the investors' have got a fillip. As a result, Indian markets have emerged as one of the better performing markets in the world in the year 2013-2014, Indian markets have been the best performing markets vis-a-vis other major markets in the world, next only to Nikkei (Japan), DAX (Germany) and CAC (France). On a longer horizon, the Indian equity market has given a compounded annual growth rate of 15.8 per cent over the 10 year period which may be regarded as a comparable return vis-a-vis other global markets.

This being the election year, the market is poised to grow strongly on the expectation of a stable and strong government led by a major political party with clear and absolute majority.

### **Opportunities and Threats**

#### **Opportunities**

- Economy is growing at healthy rate leading to investment/capital requirement.
- Growing Financial Services industry's share of wallet for disposable income.
- Huge market opportunity for wealth management service providers as Indian wealth management business is transforming from mere wealth safeguarding to growing wealth.
- \* Regulatory reforms would aid greater participation by all class of investors.
- \* Leveraging technology to enable best practices and processes.
- Corporates looking at consolidation/ acquisitions/ restructuring opens out opportunities for the corporate advisory business.

#### Threats

- \* Rising inflationary expectations on account of increase in fuel prices and supply concerns.
- \* Cautiously optimistic approach due to global slowdown .
- \* Increased intensity of competition from local and global players.

### Our Business Streams and Outlook:

Your company is an Investment Company and the standalone operations have two critical elements:

- (i) Build on a sound portfolio with deeper analysis and a constant churning of the same to adapt to the changing dynamics of the prevalent Indian Capital Market.
- (ii) Your company continues to rely heavily on capital market operations, which accounts for bulk of the consolidated revenues. As such, the performance and results of your company have a direct correlation to the conditions prevailing in the Indian capital market.
- (iii)We recognize the fact the retail investors are still hesitant and averse to investment in the capital market. Based on our recent experience we have decided to withdraw the broking services offered by our wholly owned subsidiary - Twentyfirst Century Shares and Securities Limited and surrendered the Trading Membership of National Stock Exchange of India Limited in the month of August 2013.

#### 2. Significant Accounting Policies

a) Basis of preparation of financial Statements

The financial statements are prepared under the historical cost convention on an accrual basis and in accordance with the generally accepted accounting principles in India, the applicable Accounting Standards and the relevant provisions of the Companies Act 1956 of India.

# b) Use of Estimates

The preparation of financial statements requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities on the date of financial statements and the reported amount of revenues and expenses during the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ. Differences between the actual results and estimates are recognized in the period in which the results are known or materialized.

# c) Revenue Recognition

Revenue Income and Expenditure are generally accounted on accrual or as they are earned or incurred except in case of significant uncertainty. Profit/Loss from trading activity is recognized on trade dates on first in first out basis. In respect of completed transactions pending settlement process, necessary treatment is given in the accounts for the Profits/Losses arising from these transactions. Dividend income is recognized when right to receive the payment is established.

# d) Fixed Assets

Fixed asset is stated at cost less depreciation and impairment losses.

# e) Depreciation

Assets are depreciated under the written down value method at the rates prescribed in Schedule XIV to the companies Act and on the revised carrying amount of the asset, identified as impaired on which depreciation has been provided over the residual life of the respective assets.

# f) Investments

Current and Long term investments are stated at cost. Provision for diminution in the value of long term investments is made only if such decline is other than temporary.

### g) Current and Deferred Tax

Provision for current income tax is made in accordance with the Income Tax Act 1961. Deferred Tax Liabilities and assets are recognized at substantively enacted tax rates, subject to the consideration of prudence on timing difference, being the difference between taxable incomes and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. No deferred tax asset has been created on carried forward losses as per income tax, as there is no reasonable certainty of reversal of the same in one or more subsequent year.

#### h) Employment Benefits

No provision for gratuity has been made in accounts, however in the event of any employee leaving the services by reason of death / incapability / retirement or resignation, gratuity for the period of the services shall be paid and accounted for on cash basis.

No provision for leave encashment has been made in the accounts. However encashment of leave can be availed by the employee for balance in the earned account as of preceding financial year. All carry forward earned leaves with maximum limit of 10 days are available for availment but not for encashment.

Provident fund is a defined contribution scheme and the company has no further obligation beyond the contribution made to the fund. Contributions are charged to profit and loss account in the year in which they accrue.

#### i) Contingent Liabilities

Provision is recognized when there is a present obligation as a result of past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. Disclosure for contingent liability is made when there is a possible obligation or present obligation that may, but probably will not require an outflow of resources. No provision is recognized or disclosure for contingent liability is made when there is a possible obligation or a present obligation and the likelihood of outflow of resources is remote.

#### j) Impairment of assets

The carrying amount of assets is reviewed at each Balance Sheet date for indication of any impairment based on internal/ external factors. An asset is treated as impaired when the carrying cost of an asset exceeds its recoverable value and impairment loss is charged to the Profit & Loss account. The impairment of loss recognized in the prior accounting period is reversed if there has been a change in estimates of recoverable amount.

#### k) Current assets, loans & advances

The current assets, Loans and Advances have a value on realization at least equal to the amount at which they are stated in the balance sheet.

#### I) Borrowing costs

Borrowing costs that are attributable to the acquisition of assets are capitalized as part of cost of the asset. All other borrowing costs are charged to statement of Profit and Loss.

#### m) segment reporting

The Company operates in only one segment i.e., Capital Market operations, hence segment reporting in accordance with Accounting Standard-17 is not applicable.
