Item No. 16: Enhancement of Borrowing Powers

Section 180(1)(c) of the Companies Act, 2013, provides for power to the Board of Directors of the Company to borrow money up to an amount, which is equivalent to the aggregate of paid-up capital of the Company and its free reserves. In a situation where the borrowings are likely to exceed the said limit, a prior consent is required from the Company in General Meeting. Accordingly, the shareholders by way of postal ballot held in March, 2014 had authorized the Board to borrow money up to an amount of ₹350 Crores. Keeping in view the substantially increased orders in hand as well as orders likely to be bagged in near future, there would be a substantial increase in requirement of funds for meeting not only the future growth plans to cater to the increased demand for Company's products but also for expansion of existing facilities. Such heavy requirements would entail raising of long term funds.

In view of the reasons stated above, the shareholders are requested to accord their approval for enhancing the borrowing powers of the Board of Directors up to aggregate amount of ₹500 Crores (Rupees Five Hundred Crores only).

The Board of Directors recommends the resolution for shareholders' approval at Item No. 16.

No Director, Key Managerial Person (KMP) and relative of any Director or KMP is in any way concerned or interested in the said resolution.

Item No. 17: Creation of Charge

As explained in Item No. 16 above, the Company requires substantial amount of additional funds in order to meet the growing business demands. To avail the funds from the lenders, the Company would be required to secure the loans from time to time either by way of mortgage over immovable property/(ies) and/or by way of charges/lien/hypothecation or otherwise on the Company's assets in favour of lenders/security trustees.

In view of the said reasons the shareholders are requested to accord their approval in compliance of Section 180(1)(a) of the Companies Act, 2013, authorizing the Board of Directors to mortgage and/or create charges, liens or hypothecation over the properties/assets of the Company up to a maximum ceiling as permitted under Section 180(1)(c) of the Companies Act, 2013, for borrowing by the Company, i.e. up to an amount of ₹500 Crores.

The Board of Directors recommends the resolution for shareholders' approval at Item No. 17.

No Director, Key Managerial Person (KMP) and relative of any Director or KMP is in any way concerned or interested in the said resolution.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE & DEVELOPMENT

Globally India is the fourth largest producer of agrochemicals after United States, Japan & China. In India, agrochemical manufacturing companies can be categorized into three types - Multinational, Indian including the public sector companies and small sector units. Agrochemicals are manufactured as technical grades and converted into formulations for agricultural use. Technical grade manufacturers, formulators producing the end products, distributors and end users (farmers) constitute the Indian Agrochemical market. According to Pesticide Monitoring Unit, Government of India, there are about 125 technical grade manufacturers including about 10 multinationals, more than 800 formulators and over 145,000 distributors in India. Technical grade manufacturers sell high purity chemicals to formulators. Formulators prepare the ready to use formulations by adding inert carriers, solvents, surface active agents etc. These formulations are then packed for retail sale, supplied to the distributors and finally sold to the end users (farmers).

In accordance with the reports released by various surveys, the domestic agrochemical industry stood at USD 2.1 billion in 2013 and has grown at 8% CAGR over the last five years. Whereas, the exports stood at USD 2 billion and have grown at 17% CAGR over the last five years which accounts for almost 50% of the total production. India due to its inherent strength of low-cost manufacturing and qualified cost advantaged manpower is a net exporter of pesticides to countries such as USA and some European & African countries.

OPPORTUNITIES AND THREATS

Currently the world's population stands at 7 billion and is expected to reach 9.3 billion by 2050. This will require 100% increase in global food production to meet the growing demand. However with increasing urbanization, there is reduction in per capita farmland availability and agricultural workforce. It is expected that the agricultural workforce in developing economies such as India would reduce from 70% in 1980 to 50% in 2020s. In addition to this about 20-40% of production is lost due to pests, weeds and diseases. All these aspects are increasing the pressure on agriculture sector to improve productivity resulting in increased opportunities for agrochemical products.

a) OPPORTUNITIES

Based on various studies, it can be rightly said that proper usage of agrochemical products can increase crop productivity by 20-50% which helps mitigate the 20-40% of crop losses from insect pests, weeds and disease attacks to a certain extent. This in turn helps the farmers to get back a certain % of their investments in agrochemicals, which allows them to invest in seeds and on other farm inputs to grow more and better crops.

Also the export of pesticides from India has seen a strong growth over the last few years. India's capability in low cost manufacturing, availability of technically trained manpower, seasonal domestic demand, over capacity (production capacity of 1,50,000 MT against production of 85,000 MT in f/y 2013), better price realization globally & strong presence in generic pesticide manufacturing are the reasons for growing exports of agrochemical products from India. The major exports from India happen to be in America, Asia (excluding Middle East) & Europe which resulted into emergence of India as the thirteenth largest exporter of pesticides.

In addition to that, the increase in demand for herbicides and fungicides owing to labor shortage and rising labor costs are the principal driver for Industry. Currently the fungicides and herbicides account for 18% and 16% respectively, of the total Indian Agrochemical Market.

b) THREATS

Despite the strong growth drivers, Indian agrochemical Industry face challenges in terms of low awareness among farmers about the pesticides, dosage and quality etc., seasonal nature of demand, unpredictability of pest attacks & high dependence on monsoons which results in month end skews and high inventory across the channel is a unceasing problem for the industry. Also rising sale of spurious pesticides is another major threat to the growth of Agrochemical Industry.

OUTLOOK

Regarding the Company's outlook, it can confidently claim that the State of the art manufacturing plant set up in Dahej (Gujarat), spread over 30 acres with a capacity of 15000 MTs of tech grade material per annum would enable the Company to upgrade its manufacturing technology and add new molecules to its portfolio to further consolidate its position in the industry in future.

Apart from loyal customer base that the Company is enjoying since last several years now, many more new domestic as well as overseas customers are added to the portfolio of the Company during the year & same is expecting to increase in near future due to Company's commitment of supplying high quality product in a time bound manner. Your Company has a Govt. approved In-house Research & Development Center duly recognized by Ministry of Science & Technology, Government of India, Department of Scientific & Industrial Research, New Delhi located at Bahadurgarh (Haryana), focusing on process development for acquiring technology for manufacturing off patented products, process Improvement for higher productivity, formulation improvement for domestic and overseas customers & quality assurance.

The outlook on domestic front for the Industry as a whole is also encouraging as Govt. of India has taken an initiative to provide credit facilities to farmers in the rural areas which will give boost to the agriculture industry. Access to finance will encourage them to use more pesticides in order to improve the crop yield.

RISKS AND CONCERNS

India loses several thousands of crore of rupees worth of agricultural produce annually due to pests and diseases. The key reason for this huge loss every year is low consumption of pesticides in India which brings India's per capita consumption of pesticides amongst the lowest in the world. Low purchasing power of farmers, lack of awareness amongst them and limited reach are major reasons for low consumption of pesticides in India.

Another concern for Agrochemical Industry is high inventory owing to seasonal and irregular demand on account of monsoons and long credit period. This is one of continual risk faced by the companies in Agrochemical Industry.

As explained above, the nature of Company's business is such that these risks have to be confronted which not only exist in the said business but even grow at a respectable pace. In order to minimize the risk, a comprehensive and integrated risk management framework is followed by the Company.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The Company has a robust audit process comprising both internal and external audits to ensure adequacy and effectiveness of controls. The internal controls are formulated and implemented by the management with an objective to achieve efficiency in operations, optimum utilization of resources and effective monitoring and compliance with applicable laws. The qualified, experienced and independent Audit Committee of the Board of Directors regularly reviews plans, significant audit findings, compliance with accounting standards and other legal requirements relating to financial statements.

FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

With the network of Plants of the Company across the northern part of the Country, it is important that apart from achievement of good performance of the various production facilities, excellent financial performance of each Unit/Plant is also achieved. While adequate decentralization of powers at Plants level has been resorted to, all crucial decisions pertaining to operation as well as finance are taken at Company's Head Office in Delhi. The centralized purchase of the major raw-materials and the centralized fund raising exercise at Head Office level has indeed proved beneficial to the Company as both these areas are fairly sensitive keeping in view the peculiar nature of Company's operations. As an ongoing exercise continuous planning by senior personnel based at Head Office in Delhi with respect to crucial operational matters goes a long way in exercising strict cost controls eventually resulting into profit maximization. The highlights of Company's performance during the year under review are as follows:

- ❖ Increase in Gross Sales from ₹20127.38 lacs to ₹38595.86 lacs, thereby registering a growth of 91.76%.
- ❖ Increase in Exports from ₹5830.45 lacs to ₹11716.12 lacs, thereby registering a growth of 100.95%.
- ❖ Increase in Profit before Tax from ₹1411.08 lacs to ₹3006.46 lacs, thereby registering a growth of 113.06%.

HUMAN RESOURCES DEVELOPMENT

It has been recognized time and again by the senior management of the Company that Human Resources of the Company are great asset. Adequate attention is paid to motivational factors with a view to retain the quality personnel in the Company in spite of their high cost as it is strongly felt that recruitment and training of new personnel eventually cause a big drain on Company's finances without producing adequate productivity.

Training of individuals at Plant level directly results into betterment of individual traits eventually translated into quality production. By adoption of all such methods not only for induction of quality manpower but even for retaining such quality manpower has benefited the Company in creating a clear edge over its competitors as far as human resources is concerned.

CAUTIONARY STATEMENT

Certain Statements made in this report relating to Company's objectives, outlook, future plans etc. may constitute "forward looking statement" within the meaning of applicable laws and regulations. Actual performance may differ materially from such estimates or projections, whether express or implied. Important factors that could make a difference to the Company's operations; include Government Regulations, Tax regimes, Economic developments within India and countries in which the Company conducts business and other allied factors.

NOTE NO. 1: SIGNIFICANT ACCOUNTING POLICIES

The Management has followed appropriate accounting policies consistently. Judgments and estimates are prudently and reasonably used so as to give a true and fair view of the state of affairs of the Company as at 31.03.2014 and of the profit of the Company for the year ended on that date.

1.1 Basis of Preparation of Financial Statements

The financial statements are prepared under the historical cost convention in accordance with the generally accepted accounting principles in India and the provisions of the Companies Act, 1956. The previous year figures have been reworked, regrouped, rearranged and reclassified wherever necessary and also to comply with the requirement of Revised Schedule-VI under Section-211 of the Companies Act, 1956.

1.2 Use of Estimates

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/materialized.

1.3 Own Fixed Assets

Fixed Assets are stated at cost net of recoverable taxes, less accumulated depreciation and impairment loss, if any. Net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the fixed assets are capitalized.

1.4 Depreciation and Amortization

Depreciation on fixed assets is provided to the extent of depreciable amount on Written Down Value method (WDV) at the rates and in the manner prescribed in Schedule-XIV to the Companies Act, 1956.

1.5 Impairment of Assets

The Management periodically assess using, external and internal sources, whether there is an indication of impairment of any assets. The Company foresee no such impairment indication as on the balance sheet date.

1.6 Foreign Currency Transactions

Export/Import Invoices in foreign currencies are recorded at the rate of exchange in force at the time of transactions. Provisions have been made as per Accounting Standard AS-11 issued by the Institute of Chartered Accountants of India for overseas debtors/creditors and other foreign currency commitments / foreign currency in hand for exchange rate difference at the end of the year.

1.7 Investments

All Investments are stated at cost and the same is consistently being followed. Investments in gratuity funds held with Life Insurance Corporation of India and Reliance Life Insurance Co. Excess of fund value ₹17,66,148/- as on 31.03.2014 over its total liability towards Gratuity Provision as per actuarial valuation is shown as long term Investment. The preceding year figures without such netting also regrouped accordingly.

1.8 Inventories

As per practice consistently followed, the consumption of raw materials is net of Cenvat Credit availed. Items of inventories are measured after providing for obsolescence, if any. Inventory has been valued at lower of cost or net realizable value. All Materials are valued on the basis of FIFO. In the case of finished goods cost comprises material, labour and factory overheads. Goods in process have been valued at raw material cost incurred up to the stage of production plus conversion cost apportioned. All stocks have been certified by the management.

The Company's manufacturing units are continuous processing units and are located at a remote areas i.e. far away from local markets. It needs uninterrupted 24 hours operations of its plants and hence all major spare parts, accessories, components for its huge plants has to be kept in reserve/stock to ensure the uninterrupted 24 hours operation of the plant. With the passage of time and due to fast changing technology, some very old/obsolete Engineering stores and other spares out of it has rare possibility of its use and has a market price at almost scrap value. Keeping in view the above, Engineering stores and other spares are valued at cost or market price whichever is less. This practice is consistently being followed from year after year.

1.9 Revenue Recognition

Sales have been accounted for exclusive of sales tax and are net of returns and discounts. Exports benefits have been accounted for separately. The Export benefits are accrued on the date of export.
