MANAGEMENT DISCUSSION AND ANALYSIS

Business Overview

Indian gross domestic product registered a moderate growth after a few years of steep decline. Index of Industrial Production relating to the manufacturing sector showed a marginal growth. Volatility in foreign exchange rates due to erratic US economic data and Euro zone crisis, large current account deficits, high inflation rates, volatile crude oil prices, high interest rates and low consumption growth marked yet another difficult year.

US economy showed reasonable growth while European economies in general showed a negative growth. The stress in Euro zone economies caused by the financial crisis continued to simmer and full scale recovery is nowhere in sight. Emerging and developing economies other than India also slowed down considerably.

During 2014-15, the automotive sector in India showed a weak growth with some important segments posting a negative growth. The following table shows the production trend of the industry: The domestic market continued to be affected by macro economic problems, high inflation, high petroleum product prices, high interest rates and poor consumer sentiment.

There was an improvement in the sales of passenger cars during 2014 in the US. In the overseas markets, the CV industry has continued to struggle, with sales recorded at much lower than peak levels. Growth level in sales of passenger cars is expected to improve further during 2015 due to reduction in gasoline prices.

Domestic Sales

Domestic sales increased by 17% to ₹ 1430 crores from ₹ 1220 crores in the light of increase in sales of heavy and medium commercial vehicles, passenger vehicles and two / three wheelers. There was a steep drop in production of light commercial vehicles and tractors. Demand from major automotive OEMs oscillated throughout the year with production planning and inventory management becoming a challenge.

Aftermarket sales grew moderately.

Exports

The US market recovered modestly though not uniformly across all customers of the Company. European markets continued to be hit by recession and negative sentiments. Exports were at ₹ 899 crores as against ₹ 761 crores in the previous year, an increase of 18%. Export sales remained around 38% of the overall sales revenues.

The Company's investments for manufacture of new products are expected to result in further improvement in exports in the near future.

Financial Performance

Automotive component industry leans very heavily on commercial vehicle segment for high volume sales and profits. Increase in production of heavy and medium commercial vehicles and passenger vehicles resulted in improved domestic sales. Raw material prices were steady during the year. Other input costs rose across the board. Spend on wages and salaries increased as new factory at SEZ completed its first full year of operations. Man power costs increased due to general hike in a competitive environment besides increase in dearness allowance in line with the cost of living index linked to inflation. The Company continued to be under pressure due to rising manufacturing costs. Power availability and costs remained a cause concern throughout the year, despite measures taken by the Company over the years to mitigate impact of non-availability of power.

During the year, PBIDT (Profit before interest, foreign exchange fluctuation, depreciation, exceptional income and tax) was at ₹ 356.79 crores as against ₹ 304.84 crores in the previous year.

The Company made sizable investments in creation of capacities for new products and additional capacities for manufacture of existing products to meet projected demand from domestic and international customers. Financing costs, including premiums on forward cover and adverse foreign exchange variations of ₹ 60.01 crores (₹ 27.83 crores) on foreign currency borrowings were at ₹ 81.39 crores as against ₹ 58.58 crores in the previous year. The Company has been able to limit increase in interest costs through reduction in working capital requirements across its major divisions.

In line with the Accounting Standard AS-11 (dealing with the effects of change in foreign exchange rates) and to ensure the principles of consistency, the Company recognises the exchange differences arising out foreign currency denominated items as expense or income in the profit and loss statements.

Depreciation was higher at ₹ 88.32 crores (₹ 76.37 crores).

Profit before tax was higher at ₹ 187.09 crores (₹ 169.89 crores). Investment Allowance admissible under Sec. 32AC of the Income Tax Act resulted in lower net tax rate. Profit after tax after providing for exceptional items increased to ₹ 135.32 crores (₹ 120.89 crores).

Reduction in inflation spurred by downward trend in crude oil prices has kindled hopes for reduction in interest rates leading to higher consumer demand and investment. Barring a poor monsoon, the pace of growth in domestic market is expected to improve during 2015-16, as the government addresses various problems faced by the economy and more particularly the automotive sector. Prospects for increasing exports appear to be bright. Long term prospects for the auto-component industry appear to be good.
