MANAGEMENT DISCUSSION AND ANALYSIS

Sunflag Iron and Steel Company Limited (*SUNFLAG STEEL*) had set up a 'state of the art' integrated Steel plant at Warthi, Bhandara Road to produce high quality Special Steel with manufacturing facilities like Sponge Iron Plant, Mini Blast Furnace, Sinter Plant, Captive Power Plant and Rolling Mills.

SUNFLAG STEEL has established itself as a major global force. With the modern complex pulsating with world class technology, expert human resources and a commitment to excellence, *SUNFLAG STEEL* has become a reputed supplier in Flat Bars, Round Bars, Bright Bars and Wire Rods of Alloy Steel, Spring Steel and Stainless Steel and captured better position in these market segments. *SUNFLAG STEEL* is also embarking on an export thrust and is regularly supplying to various customers in South East Asian, African, Middle East and South American countries.

Further, due to implementation of Blooming Mill, *SUNFLAG STEEL* can cater to foreign as well as indigenous customers of their needs of Rolled Products for higher sections and thus offering a better product mix. The Blooming Mill will yield better quality of higher size rolled products and Bloom/Ingots due to better compression ratio and more specifically used in the critical applications like crank shaft quality and it can be supplied to Original Equipment Manufactures (**OEM**).

ECONOMIC SCENARIO AND OUTLOOK

I) GLOBAL ECONOMIC SCENARIO & OUTLOOK

A) ECONOMIC SCENARIO

The world economic growth remained modest at 3.4% in year under review, amidst divergent growth trend in advanced and emerging economies. Although, the developed economies led by the US & UK continued to strengthen, however the growth in most emerging economies slowed down during the year under review with majority of oil exporting economies were under slowdown due to a sharp drop in oil prices. Despite their slower growth, emerging markets and developing economies still accounted for three-fourths of global growth in year under review.

During year under review, slowing demand in some of the major developing economies led to the softening in crude and other global commodity prices. Though the price correction created financial stress in oil exporting countries and also resulted in disinflationary environment in many oil importing economies, it is expected to be a net positive to world economy in the short to medium term – especially for oil/commodity importing economies like India.

B) OUTLOOK

The global steel demand during the year under review is expected to increase by 0.5% to 1,544 Million Tonnes, while in year 2016-2017 it is projected to grow by 1.4% to 1,566 Million Tonnes. Steel demand in the developed economies is projected to grow by 0.2% in year 2015-2016 and by 1.8% in year 2016-2017. Chinese steel demand is projected to record a negative growth of 0.5% in year 2015-2016 as well as in 2016-2017.

II) INDIAN ECONOMIC SCENARIO & OUTLOOK

A) ECONOMIC SCENARIO

The Indian economy, supported by lower oil prices, improved FDI inflows and pro-growth economic reforms initiated by new Government saw a moderate improvement in growth momentum during Financial Year 2014-2015; some of the key macroeconomic indicators also strengthened over the year.

Highlights

- The Indian economic growth improved to 7.3% in Financial Year 2014-2015 as compared to 6.9% in Financial Year 2013-2014. While the agriculture sector grew at 0.2%, it is manufacturing that leads the growth at 7.1% during Financial Year 2014-2015.
- Several policy measures taken by the Reserve Bank of India (RBI) and the Government, supported by lower global crude oil prices, resulted in:
 - Decline in inflation during the year; consumer price inflation is expected to be between 5.0-5.5% range during 2015-2016.
 - The Current Account Deficit (CAD) narrowed to 1.3% of GDP during Financial Year 2014-2015 compared to 1.7% in Financial Year 2013-2014.
- The Government had strong focus on fiscal consolidation. As a result, the Gross Fiscal Deficit (GFD) declined to 4.1% in Financial Year 2014-2015 and is budgeted to decline further to 3.9% in Financial Year 2015-2016.

B) OUTLOOK

The Indian economy is on a path of gradual recovery. The government has undertaken several steps to unplug the bottlenecks and to revive the business confidence. The Indian economy stands to benefit from the correction in global crude oil prices, will have positive impact on the macro economy in form of lower inflation, reduced current account deficit, healthier fiscal accounts, increased consumption and a stable INR. Indian economy is among a few economies globally for which economic growth forecast has been raised by the IMF. The IMF has raised its India GDP growth estimates for Financial Year 2015-2016 to 7.5%.

Financial Year	2012 - 2013	2013 - 2014	2014 - 2015	2015 - 2016
India GDP Growth Rate (in %)	5.1	6.9	7.3	7.5(Projected)

(Source: IMF)

In 2015 - 2016, steel demand is expected to grow by 6% to 7%. However, a much sharper than expected increase in inflation and higher than budgeted fiscal consolidation are the key downside risks to the outlook, highlights World Steel Association.

INDIAN STEEL, AUTOMOBILE AND AUTO COMPONENT INDUSTRY

Indian steel industry faced several challenges during the year. On the other hand, the finished steel imports surge by 71% specially from the surplus economies of China, Korea, Japan and Russia. Korea & Japan enjoys reduced import tariffs under the Free Trade Agreement (FTA) with India. At the same time finished steel exports from India also decreased by 8.1% y-o-y to 5.5 Million Tonnes. Despite a sharp 50% fall in global iron ore prices, between April, 2014 and March, 2015 (Average CFR North China Index), prices in the domestic market experienced a milder correction of 15% due to shortages that arise due to restriction / ban on mining operations in the key producing states of Goa, Karnataka, Odisha and Jharkhand.

STEEL SECTOR – THREATS AND CHALLENGES

- Surging imports in absence of adequate tariff and non-tariff barriers against the dumping of steel and FTAs providing very low duty protection
- The shutting down of mining operations has resulted in scarcity of iron ore and affected prices. Further, the quality of the available iron ore also remained a challenge
- Non-satisfactory Infrastructure development resulted in curtailing growth prospects
- Due to addition of capacities, there was a supply-demand imbalance, while the demand remained subdued, which had negative impact on the plant utilisation and steel prices
- Anti-social movements, Geopolitical tensions, disruptions in the global trade and investments
- Surplus installed capacities and low capacity utilisations
- Slowing demand growth across geographies
- Subdued growth of the manufacturing sector impacting demand
- Increased threat of higher trade barriers

OPPORTUNITIES

SUNFLAG STEEL see better opportunities in the years to come due to continuous developments of new grades of high alloy steel as well wire rod. Further, venturing into the self dependency of raw material will help in decreasing in the cost of production and enhancing the profitability. This has even proved advantageous during the recessionary period which is very good sign for the Company.

MATERIAL DEVELOPMENT

SUNFLAG STEEL was not able to maintain its profitability mainly due to marginal rise in selling prices of its products versus abnormal rise in the cost of inputs such as iron ore, pig iron and coke and largely due to overall decelerated global and Indian economic growth.

In order to achieve effective cost reduction and improvement in productivity, activity of total productive maintenance (TPM) continued to be implemented by the Company during the year under review.

COSTS – STEEL BUSINESS

During the year under review, the economy witnessed an upward movement in overall cost structure and the Company continued to focus on cost improvements through Total Productive Maintenance (TPM) and strict cost reduction policies, wherever applicable.

The significant accounting policies have been predominantly presented below in the order of the Accounting Standards specified under Section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014.

2.1 Basis of accounting and preparation of financial statements

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014. The financial statements have been prepared on accrual basis under the historical cost convention.

2.2 Use of estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

2.6 Tangible fixed assets

Fixed assets are carried at cost less accumulated depreciation and impairment losses, if any. The cost of fixed assets includes interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use and other incidental expenses incurred up to that date. Subsequent expenditure relating to fixed assets is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance. Assets are valued net of CENVAT claimed.

Capital work-in-progress :

Projects under which assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

Subsequent expenditure on an intangible asset after its purchase / completion is recognised as an expense when incurred unless it is probable that such expenditure will enable the asset to generate future economic benefits in excess of its originally assessed standards of performance and such expenditure can be measured and attributed to the asset reliably, in which case such expenditure is added to the cost of the asset.

2.16 Taxes on income

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets in respect of unabsorbed depreciation and carry forward of losses are recognised only if there is virtual certainty that there will be sufficient future taxable income available to realise such assets. Deferred tax assets are recognised for timing differences of other items only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

2.20 Impairment of assets

The carrying values of assets / cash generating units at each Balance Sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, except in case of revalued assets.

2.21 Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.
