MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Industry Structure and Development

The all India cement consumption grew by 7.4 percent from around 208 million tonnes to 223 million tonnes during the year under review. At the same time, around 15 million tonnes additional capacity has been added during the year. In the State of Gujarat, there has been an increase in the capacity in the last two years by 2.4 million tonnes as well as there is an increase in the capacity by 1.39 million tonnes in the State of Rajasthan. This increase in capacity coupled with lower exports has resulted in a surplus of supply over demand putting pressure on the profitability of the cement companies in Gujarat.

Future Outlook

The continued economic growth, the emphasis on infrastructure building and the housing needs of the population will continue to fuel cement consumption in the country. The long-term future of the cement industry continues to be positive. However, due to additional of new plants with large capacities, the capacity utilization would continue to be low in the short term. Particularly in Gujarat, there is likely to be a large surplus of capacity over demand for the near future.

Opportunities & Threats

With high economic growth in Maharashtra and Gujarat, the cement consumption in these states is likely to continue at a healthy rate and would therefore give opportunities for growth in the cement industry.

Substantial increase in the prices of fuel mainly coal and petcoke has affected the profitability of the cement companies and the uncertain global situation for energy supplies would continue to pose a threat to the profitability of the industry. The infrastructural constraints in the form of congestion in the rail network, availability of wagons and high cost of handling of cement at public ports continue to pose threats to a long term stability in the industry in Gujarat.

Although, Gujarat state is likely to continue to be surplus in cement production, the company can access coastal markets economically being close to the sea.

Segment Review and Analysis

During the year, the company has produced and sold mainly cement of different varieties like Ordinary Portland Cement (OPC) and Portland Pozzolana Cement (PPC). The company also sold clinker, which is intermediate product for the manufacture of cement. The bulk of the revenue and profitability comes from the sale of cement.

Risks and Concerns

Over capacity of cement versus the demand coupled with the continued fragmentation of the industry results in the cyclical highs and lows in the profitability of cement business. The major inputs mainly fuels as well as high rates of taxation (excise, VAT, octroi and other miscellaneous levies) continue to be a major concern for our company. A draft scheme of rehabilitation of the sick company has been circulated for comments and suggestions in the last quarter. The scheme provides for restructuring of debts and reliefs and concessions from the Government of Gujarat in respect of waiver of interests and penal interests. Till the sanction of the rehabilitation scheme, the short tenure of a large part of debt and the company's operations in these conditions expose the company to a default in servicing of its debts.

Internal Control systems and their adequacy

The company has adequate systems of internal controls commensurate with the size and nature of its operations. The internal audit team continuously monitors the effectiveness of internal control systems. The management periodically reviews the reports of the internal audit highlighting suggested improvements, cost control measures and need of policy modification and assuring its adherence. The audit committee reviews the financial results, adequacy of disclosures and adherence of accounting principles. The corrective steps and suggestions of the audit committee are implemented

and the internal auditor reviews the same and reports of any deviations and other recommendations to formulate management policies, risk management procedures.

NOTES FORMING PART OF FINANCIAL STATEMENTS

1 SIGNIFICANT ACCOUNTING POLICIES

1.1 Basis Of Preparation :

- i. The financial statements are prepared in accordance with the generally accepted principles under the historical cost convention (except to include revaluation of land, buildings, plant and machinery situated at Ranavav) on accrual basis under the going concern assumption. These financial statements have been prepared to comply with the Accounting Standards notified under Section 211 (3C) of the Companies Act, 1956 as the Companies (Accounting Standards) Rules, 2006, and in accordance with the other relevant provisions of the Companies Act, 1956.
- ii. The financial statements for the year ended March 31, 2011 had been prepared as per the then applicable, pre-revised Schedule VI to the Companies Act, 1956. Consequent to the notification of Revised Schedule VI under the Companies Act, 1956, the financial statements for the year ended March 31, 2012 are prepared as per Revised Schedule VI. Accordingly, the previous year figures have also been reclassified to conform to this year's classification. The adoption of Revised Schedule VI for previous year figures does not impact recognition and measurement principles followed for preparation of financial statements.

1.2 Use of Estimates :

The preparation of the financial statements in conformity with the generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses during the reporting year, the reported amounts of assets and liabilities and the disclosures of contingent liabilities as on the date of the financial statements. Examples of such estimates include useful life of Fixed Assets, provision for doubtful debts/ advances, deferred tax, etc. Actual results could differ from those estimates. Such difference is recognised in the year/s in which the results are known / materialised.

1.3 Fixed Assets :

- i. Fixed Assets are stated at cost and includes amounts added on revaluation, less accumulated depreciation and impairment loss, if any.

Each lease / hire purchase rental paid is allocated between the liability and the interest cost, so as to obtain a constant periodic rate of interest on the outstanding liability for each period.
- ii. Assets acquired under leases where a significant portion of the risks and rewards of ownership are retained

by the lessor are classified as operating leases. Lease rentals are charged to the Statement of Profit and Loss on accrual basis.

1.6 Impairment of Assets :

- i. As on each Balance Sheet date, if internal / external indicators suggest that an asset may be impaired, the carrying amount of the asset is tested for impairment so as to determine, the provision for impairment loss required, if any.

The recoverable amount is determined as the higher of its net selling price (net of material disposal expenses) and the value in use. Value in use is determined as the present value of estimated future cash flows from the continuing use of an asset/CGU as stated above and from its disposal at the end of its useful life.

13 ACCOUNTING FOR TAXES ON INCOME

In terms of paragraph 26 of Accounting Standard 22 on "Accounting for Taxes on Income", the Company has reviewed its Deferred Tax Asset (DTA) recognised till last year, and has also, in terms of paragraph 15 to 18 of AS 22, examined the issue of recognising DTA arising during the year on account of unabsorbed depreciation and carried forward business losses.

Based on the expected waivers on one time settlement scheme with the Government of Gujarat (as referred to in Note to the financial statements), and also considering legal advice from an expert, with regard to the recognition of DTA in terms of AS 22, the Company recognised DTA on the basis of prudence only to the extent it will have sufficient future taxable income (by way of reduction in unabsorbed depreciation and / or carried forward business losses) against which the aggregate DTA recognised as on the Balance Sheet date would be realised. The DTA Company has also been advised that DTA in respect of the unabsorbed depreciation to the extent of deferred tax liability for timing difference for depreciation may be recognised. Accordingly, the Company has not recognised any further DTA than what was recognised upto March 31, 2011. DTA of ₹ 203.49 lacs (Previous year ₹ 765.63 lacs) is reversed due to reduction in DTL for timing difference for depreciation for the like amount. Details of deferred tax is as under:

13 ACCOUNTING FOR TAXES ON INCOME

In terms of paragraph 26 of Accounting Standard 22 on "Accounting for Taxes on Income", the Holding Company has reviewed its Deferred Tax Asset (DTA) recognised till last year, and has also, in terms of paragraph 15 to 18 of AS 22, examined the issue of recognising DTA arising during the year on account of unabsorbed depreciation and carried forward business losses.

Based on the expected waivers on one time settlement scheme with the Government of Gujarat (as referred to in Note to the financial statements), and also considering legal advice from an expert, with regard to the recognition of DTA in terms of AS 22, the Holding Company recognised DTA on the basis of prudence only to the extent it will have sufficient future taxable income (by way of reduction in unabsorbed depreciation and / or carried forward business losses) against which the aggregate DTA recognised as on the Balance Sheet date would be realised. The Company has also been advised that DTA in respect of the unabsorbed depreciation to the extent of deferred tax liability (DTL) for timing difference for depreciation may be recognised. Accordingly, the Company has not recognised any further DTA than what was recognised upto March 31, 2011. DTA of Rs. 203.49 lacs (Previous year Rs. 765.63 lacs) is reversed due to reduction in DTL for timing difference for depreciation for the like amount. Details of deferred tax is as under
