2. INDUSTRY STRUCTURE AND DEVELOPMENT:

Your Company is primarily engaged into Specialty "Off Highway Tire segment" which is consisting of Agriculture, Industrial, Construction, Earthmoving, Mining, Port, Lawn and Garden and All-Terrain Vehicle Tires (ATVs) etc;

This segment is highly technical & capital intensive and known as "large varieties low volume segment" where any credible player needs to maintain large number of Stock Keeping Units (SKUs) to meet the diverse requirement of its customers worldwide. The major market for these kind of tyres are the developed countries, more particularly, Europe and USA. While the sub segment (agriculture) is largely known as non-cyclical in nature, the other sub segment (industrial, construction and mining) is generally considered as cyclical and the performance of it is largely linked to overall economic outlook of the world.

The growth rate in "Off Highway Tires Segment" is ranging between 4-5%. The industry is witnessing positive momentum for the last 2 years.

The Hon'ble National Company Law Tribunal (NCLT) Mumbai bench, has sanctioned the Scheme of Amalgamation of BKT EXIM Limited (100% wholly owned Subsidiary Company) with Balkrishna Industries Limited, on 24th January, 2018 and a copy of the NCLT order was received by the Company on 9th February, 2018, which the Board has taken on Record. The financial impact has been considered in the year-end figures of the Company. The appointment date of the scheme was 1st April, 2015.

4. EXPORT HOUSE STATUS:

Your Company enjoys the status of "Four Star Export House".

5. CARBON BLACK PROJECT:

During the year under consideration, the Company started facing lot of challenges in sourcing of one of the raw material i.e. "Carbon Black" due to its shortage. The rising crude prices added fuel to the fire. In order to ensure the uninterrupted supply of the Carbon Black, the Company decided to set up a Carbon Black Project of 60,000 MTs capacity at its Bhuj Plant, mainly for captive use. The capital outlay on this project is estimated at ₹ 15,000 Lakhs and the project is likely to be commissioned by end of current financial year.

6. DIVIDEND:

The Directors have declared and paid Interim Dividends of 325% (₹ 6.50 per equity share) and pleased to recommend Final Dividend of 75% (₹ 1.50 per equity share) of ₹ 2 each for the year 2017-2018.

Pursuant to Regulation 43A of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations, 2015"), the Board has approved and adopted a Dividend Distribution Policy and can be accessed on the Company's website at the link <https://www.bkt-tires.com/en/investors-desk/shareholding-info>.

7. BONUS SHARES:

The Board of Directors at its Meeting held on 8th November, 2017 approved issue of bonus shares, in the ratio of 1:1, i.e. 1 (One) bonus equity share of ₹ 2 each for every 1 (One) existing equity shares of ₹ 2 each fully paid-up held as on the record date, by capitalising a sum not exceeding ₹ 1,933 Lakhs from Reserves, subject to approval by the Shareholders through Postal Ballot. Pursuant to approval by the Shareholders through the Postal ballot on 15th December, 2017, the Company had on 27th December, 2017 allotted 9,66,58,595 equity shares of ₹ 2 each as fully paid up bonus equity shares to the Shareholders whose names appeared on Register of Members on record date. The shares so allotted shall rank pari-passu with existing equity shares of the Company.

Consequent to such allotment of bonus equity shares, the share capital of the Company stands increased to ₹ 3,866 Lakhs divided into 19,33,17,190 equity shares of ₹ 2 each. As on 31st March, 2018, the Company has not issued shares with differential voting rights nor granted stock options nor sweat equity. As on 31st March, 2018 none of the Directors of the Company hold convertible instruments.

9. RESERVES:

The Company proposes to transfer ₹ 30,680 Lakhs to General Reserves.

10. OUTLOOK FOR THE CURRENT YEAR 2018-2019:

The Company's earnings are mainly generated through exports. The overall business environment across the globe has been good in past few years, due to revival in commodity cycle and overall better agricultural activities across the globe. The business environment across the globe looks challenging as some geographies are growing while few have started showing sign of coolingness in their economic activities. Geopolitical situation, protectionism measures by some countries, rising crude prices and rising interest rate have casted shadow on the overall global business environment and therefore the business environment looks more challenging. However, the long term prospects of the Company are good and promising. Your Company continues to explore all the avenues to ensure growth of the business which includes, deeper penetration into existing market within India as well as outside India, extending relationship with OEMs and expanding its product range. With all these measures, your Company is endeavoring to promote reasonable growth in sales during the Current Year.

11. MATERIAL CHANGES AND COMMITMENTS:

In terms of Section 134(3)(l) of the Companies Act, 2013, no material changes and commitments affecting the financial position of your Company have occurred between the end of the financial year of the Company to which the financial statements relate and on the date of this report.

12. OPPORTUNITY & THREATS:

Opportunities:

Your Company operates into a segment predominantly known as "large varieties-low volume segment", which is not only capital intensive but also labour intensive. Your Company is fully geared up to take advantage of the peculiarities of the said segment and has developed a large base of SKUs to meet the diverse needs and applications.

Moreover, this segment is neither exposed to any technological obsolescence nor wild fluctuations in demand for its products.

The Company is continuously marching ahead to explore incremental opportunity in the form of developing "Earthmovers & mining tyres" markets and taking advantage of the shift from bias to radial tyres, which is growing up continuously. In order to take advantage of this opportunity, the Company had set up an all-steel OTR Radial tyre plant and have further added such capacities by setting up a green field tyre plant at Bhuj to produce large size all steel OTR radial tyres besides other categories of tyres. Your Company is proud to be first Company in India to set up such plant. Your Company is continuously expanding its base into various sub-segments like agricultural, industrial, construction, mining, winter and solid tyres under both technologies – bias as well as radials.

Threats:

Like any other Company, your Company is also exposed to various threats like competition from small players, retention of employees, labor unrest, increase in raw material prices and other input costs etc.

Of late, all the tyre Company including your Company is facing the heat of shortage of carbon black not only locally but globally. We are witnessing unfavorable demand supply scenario in carbon black which has led to increase in carbon black prices by more than 20%. The continuous rise in crude prices has added fuel to the fire. Despite all these challenges, your Company is managing the situation to ensure that there is no production loss due to shortage of carbon black.

13. RISKS / CONCERNS AND RISK MITIGATION:

Risk is an integral and unavoidable component of business. In today's challenging and competitive environment, mitigating risks is imperative. Common risks include: regulations, competition, business risk, technology obsolescence, investments, and retention of talent. Business risk, inter-alia, further includes financial risk, political risk and legal risk. For managing risks more efficiently, the Company has identified key risks that can have a critical impact on the Company's performance. The Company has identified inter-alia following risks:

Operational Risk:

Operational risks like equipment obsolescence which can impact production. To mitigate such risks, the Company continuously monitors equipment obsolescence and upgrades equipment from time to time and undertakes preventive maintenance measures. The Company has also made significant investment in equipment modernization.

Fluctuation in Raw Material prices:

The Company's major raw material is Natural Rubber, which is an agricultural commodity and actively traded on the commodities exchanges. The demand supply situation of Natural Rubber has been favorable to the users which has kept its prices under check.

Though we see volatility in its pricing, we do not foresee any major increase in its prices in the near to medium term unless some unforeseen thing happen. The prices of other raw materials which are crude derivatives have been on upswing in the backdrop of rising crude prices. The prices of carbon black have been disproportionately high because of its shortage across the globe.

In order to minimize such risks, the Company not only enters into medium-term contracts but also adopts the policy to "Buy and Stock" large quantities during the lean period. The timely sourcing of carbon black is ensured by procuring it from different geographies.

Since most of the raw materials are imported, the Company is exposed to foreign currency risk. However, it enjoys natural hedge as most of its revenues are in foreign currency.

Market Risk:

Around 85% of the Company revenue is generated through exports which is made to different geographies. Almost 1/3rd of the Company's revenue is generated through a product category which is cyclical in nature and therefore your Company is exposed to market risk.

Your Company manages this risk by expanding its presence in different markets, deeper penetration into existing markets and by launching new products. Furthermore, the Company spends requisite amount on marketing and promotional activities to ensure customer retention and brand-building.

Labour Relations:

Since Company's manufacturing process is that of batch processing, it requires lot of skilled as well as un-skilled workers. Maintaining a huge work force is a big challenge.

In order to mitigate the said risk, the Company follows good HR practices to promote the welfare, safety of its workmen and improve the work environment. All workers are paid more than adequate remuneration for their work.

Retention of skilled manpower:

Like other players in the industry, the Company is also exposed to this risk, more particularly when there is shortage of skilled manpower in the industry.

The Company is able to manage the said risk by good HR practices and rewarding its employees handsomely.

Currency Fluctuation:

As stated earlier the Company revenues are mainly generated through exports. The Company also imports lot of its raw materials and capital equipment's. Moreover, all its borrowings are in foreign currency and it is therefore exposed to risks due to currency fluctuations.

The Company follows the system of hedging its receivables (net off payables) well in advance by entering into Forward Contracts, thereby protecting itself from the fluctuations in currencies to a large extent.

14. INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY:

The Company has adequate internal control systems in place, and also has reasonable assurance on authorizing, recording and reporting transactions of its operations. The Company has a well-placed, proper and adequate internal controls environment, commensurate with its size, scale and complexities of its operations. The Company had already developed and implemented a framework for ensuring internal controls over financial reporting. This framework includes entity level policies, processes and operating level standard operating procedures. Internal control systems are an integral part of your Company's Corporate Governance structure. These have been designed to provide reasonable assurance with regard to inter-alia a. recording and providing reliable financial and operational information; b. complying with the applicable statutes; c. safeguarding assets from unauthorized use; d. executing transactions with proper authorization, and ensuring compliance with corporate policies e. Prevention and detection of Frauds / errors; f. Continuous updating of IT systems. The Company's management has assessed the effectiveness of the Company's internal control over financial reporting as of 31st March, 2018.

Your Company has appointed M/s KPMG to assess the effectiveness of internal financial controls of the Company. Their assessment was based on an internal audit plan, which was reviewed in consultation with the Audit Committee.

The Audit Committee reviewed the reports submitted by the Management, KPMG, Internal Auditors and Statutory Auditors. Based on their evaluation (as defined in section 177 of the Companies Act, 2013 and Regulation 18 of Listing Regulations, 2015), the Company's Audit Committee has concluded that, as of 31st March, 2018, the Company's internal financial controls were adequate and operating effectively.

15. HUMAN RESOURCES:

The Company's human resources continue to be its biggest asset. The team has remained as committed as ever and produced results that are considered significant. Quality, quick delivery and focus on resolving customer issues are the hallmark of the team performance. There is a strong focus on TEAM spirit, during the year, many events/training programs were conducted to develop personality and outlook of its employees. Employee relations continue to be cordial.

16. SUBSIDIARY COMPANIES:

The Board of Directors of the Company, on 18th May, 2016, have approved the Scheme of Amalgamation of its wholly owned subsidiary Company M/s. INDEPENDENT AUDITOR'S REPORT To the Members of BALKRISHNA INDUSTRIES LIMITED

Report on the Standalone Financial Statements

We have audited the accompanying standalone financial statements of Balkrishna Industries Limited ('the Company'), which comprise the balance sheet as at 31st March 2018, the statement of profit and loss (including other comprehensive income), the statement of cash flows and the statement of changes in equity for the year then ended and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone financial statements based on our audit. In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder and the Order issued under section 143(11) of the Act.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the standalone financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the standalone financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the standalone financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the standalone financial statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2018, and its profit, total comprehensive income, the changes in equity and its cash flows for the year ended on that date.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of section 143(11) of the Act, we give in the Annexure A, a statement on the matters specified in the paragraph 3 and 4 of the order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
 - (a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - (b) in our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
 - (c) the balance sheet, the statement of profit and loss (including other comprehensive income), the statement of cash flows and the statement of changes in equity dealt with by this Report are in agreement with the books of account;
 - (d) in our opinion, the aforesaid standalone financial statements comply with the Indian Accounting Standards specified under Section 133 of the Act;
 - (e) on the basis of the written representations received from the directors as on 31st March 2018 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March 2018 from being appointed as a director in terms of Section 164 (2) of the Act;
 - (f) with respect to the internal financial controls, with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure B"; and

- (g) with respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
- the Company has disclosed the impact, if any, of pending litigations on its financial position in its standalone financial statements;
 - the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses; and
 - there has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

- In our opinion, the Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.
 - As explained to us, physical verification of these fixed assets is being conducted in a phased programme by the management designed to cover all the assets over a period of three to four years, which in our opinion is reasonable having regard to the size of the Company and the nature of assets. According to the information and explanations given to us no material discrepancies were noticed on such verification.
 - According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.
- As explained to us physical verification of inventory has been conducted at reasonable intervals by the management and discrepancies noticed on such physical verification between physical stocks and book records were not material considering the operations of the Company and the same have been properly dealt with in the books of account.
- In our opinion and according to the information and explanations given to us, the Company has not granted any loans, secured or unsecured, to any companies, firms, Limited Liability Partnerships or other parties as covered in the register maintained under Section 189 of the Act. Accordingly, the provisions of clause 3(iii) (a), (b) and (c) of the order are not applicable.
- In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of section 185 and 186 of the Act, with respect to loans, investments and guarantees made.
- In our opinion and according to the information and explanations given to us, the Company has not accepted any deposit within the meaning of Section 73 to 76 of the Act, and the rules framed thereunder.
- We have broadly reviewed the books of account maintained by the Company in respect of products where, pursuant to the Rules made by the Central Government, the maintenance of cost records have been prescribed under Section 148 (1) of the Act, and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. We have not, however, made a detailed examination of the records with a view to determining whether they are accurate or complete.
- According to the records of the Company and the information and explanations given to us, the Company has generally been regularly depositing with the appropriate authorities undisputed statutory dues including Provident Fund, Employees' State Insurance, Income tax, Sales-Tax, Service tax, Duty of Customs, Duty of Excise, Value added Tax, Goods and Service Tax, Cess and any other statutory dues applicable to it. There are no undisputed statutory dues as referred to above as at 31st March, 2018 outstanding for a period of more than six months from the date they become payable.

- (b) According to the information and explanations given to us, the dues in respect of Income Tax, Sales Tax, Duty of Customs, Excise Duty and Service Tax that have not been deposited with the appropriate authorities on account of dispute and the forum where the disputes are pending are given below :-

Name of Statute	Nature of Dues	Amount (₹ in lakhs)	Period to which the Amount Relates	Forum where dispute is pending

ANNEXURE - B TO THE INDEPENDENT AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Balkrishna Industries Limited ("the Company") as of 31st March 2018 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an internal financial controls, with reference to financial statements as at 31st March, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

1. (a) General information

Balkrishna Industries Limited ('the Company') is engaged in the business of manufacturing and selling of "Off-Highway Tyres" (OHT) in the specialist segments such as Agricultural, Industrial & Construction, Earthmovers & Port, Mining, Forestry, Lawn & Garden and All Terrain Vehicles (ATV).

The company is a public limited company incorporated and domiciled in India and has its registered office at Waluj MIDC, Aurangabad, Maharashtra, India.

(b) Significant Accounting policies

(a) Basis of preparation

- (i) The financial statements have been prepared in compliance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.
- (ii) The financial statements have been prepared on the historical cost basis except for the following assets and liabilities which have been measured at fair value:
 1. Financial instruments measured at fair value through profit and loss
 2. Financial instruments measured at fair value through other comprehensive income
 3. Defined benefit plans – plan assets measured at fair value

(b) Foreign currency translation

- (i) Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The standalone financial statements are presented in Indian rupee (₹), which is the company's functional and presentation currency.

- (ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates(except for long term monetary items outstanding as of 31st March 2016) are generally recognised in profit and loss.

In case of long term monetary items outstanding as of 31st March 2016, foreign exchange differences arising on settlement or translation of long-term foreign currency monetary items relating to acquisition of depreciable assets are adjusted to the carrying cost of the assets and depreciated over the balance life of the asset

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit and loss are also recognised in OCI or profit and loss, respectively).

(c) Revenue recognition

Sale of goods

Revenue is measured at the fair value of the consideration received or receivable. Revenue from sale of goods is recognised when the significant risks and rewards in respect of ownership of products are transferred by the Company, the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold and no significant uncertainty exist regarding the amount of consideration that will be derived from the sale of goods as well as regarding its ultimate collection. Amounts disclosed as revenue are inclusive of excise duty and net of returns, Trade Discounts, Rebates, incentives, Value added taxes/Central Sales Tax and amounts collected on behalf of third parties.

The Company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity.

Export Benefits

Consumption of Raw Materials is arrived at after adjusting the difference between the cost of indigenous/duty paid imported raw materials and international cost of raw materials entitled to be imported/imported under Duty Exemption Scheme of the Government of India against direct/indirect exports made/to be made by the Company during the year. Export Incentives under prevalent schemes under EXIM policy/ Foreign Trade Policy are accounted for once received by Company from the Government.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to Profit and Loss on a systematic basis as and when export obligation are fulfilled.

Dividend income

Dividend is recognized as revenue when the right to receive payment has been established.

Interest income

For all interest bearing financial assets measured at amortised cost, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset.

(d) Property, Plant and Equipment (PPE)

i. Recognition and measurement

Freehold land is carried at historical cost. All other items of PPE are measured at cost less accumulated depreciation and any accumulated impairment losses, if any.

The cost of an item of PPE comprises:

- a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
- b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Income and expenses related to the incidental operations, not necessary to bring the item to the location and condition necessary for it to be capable of operating in the manner intended by management, are recognised in profit or loss.

The Company has elected to continue with the carrying value of all its property, plant and equipment as recognized in the consolidated financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as the deemed cost as at the transition date pursuant to the exemption under Ind AS 101.

Any gain or loss on disposal of an item of PPE is recognised in profit and loss.

ii. Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

iii. Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Depreciation on PPE (other than leasehold land) has been provided based on useful life of the assets in accordance with Schedule II to the Companies Act, 2013, on Straight Line Method except in respect of Plant and Equipment where the useful life is considered differently based on an independent technical evaluation as 10 to 15 years.

Leasehold land are amortised over the lease period.

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

Profit and loss on disposals are determined by comparing proceeds with carrying amount. These are included in statement of profit and loss.

(e) Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Investment properties are depreciated using the straight-line method over their estimated useful lives.

Investment properties generally have a useful life of 30 years for factory building and 60 years for residential and office premises.

(f) Intangible assets

Intangible assets comprise application software purchased, which are not an integral part of the related hardware, and are amortized on a straight line basis over a period of 6 years, which in Management's estimate represents the period during which the economic benefits will be derived from their use.

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific to which it relates.

The Company has elected to continue with the carrying value of all its intangible assets as recognized in the standalone financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as the deemed cost as at the transition date pursuant to the exemption under Ind AS 101

(g) Impairment of non-financial assets

Assets that have a definite useful life are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Management periodically assesses using, external and internal sources, whether there is an indication that an asset may be impaired.

The recoverable amount is higher of the asset's net selling price or value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

(h) Borrowing cost

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

(i) Operating lease

Assets taken/given on lease under which substantially all risks and rewards of ownership are effectively retained by the lessor are classified as operating lease. Lease payments/receipts under operating leases are recognised as expenses/income on straight line basis over the primary period of lease only if lease rentals are not linked to inflation in accordance with the respective lease agreements.

(j) Income Tax

Income tax expense comprises current and deferred tax. It is recognised in profit and loss except to the extent that it relates to items recognised directly in equity or in OCI.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Current tax assets and liabilities are offset only if:

- a) there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority; and
- b) there is intention either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss).

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences (if any) to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax liabilities are not recognised for temporary differences between the carrying amount and tax bases of investments in subsidiaries where the Company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset only if they relate to income taxes levied by the same taxation authority on the same taxable entity.

(k) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, call deposits and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(l) Inventories

Raw materials, packing materials and stores, work in progress, traded and finished goods are stated at the lower of cost and net realisable value, cost is calculated on moving weighted average basis.

In respect of finished goods, cost includes materials, appropriate share of utilities, other overheads and applicable excise duty. Cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

(m) Research and development

Revenue expenditure on Research and Development is charged to Profit and Loss Account as incurred. Capital expenditure on assets acquired for Research and Development is added to PPE.

(n) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments also include derivative contracts such as foreign currency foreign exchange forward contracts, interest rate swaps and currency options; and embedded derivatives in the host contract.

i. Financial assets

Classification

The Company shall classify financial assets as subsequently measured at amortised cost, fair value through other comprehensive income (FVOCI) or fair value through profit and loss (FVTPL) on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Debt instruments

- A 'debt instrument' is measured at the amortised cost if both the following conditions are met:
 - a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
 - b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.
- After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit and loss.
- Debt instruments included within the fair value through profit and loss (FVTPL) category are measured at fair value with all changes recognized in the statement of profit and loss.

Equity instruments

- The Company subsequently measures all equity investments in companies other than equity investments in subsidiaries, at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognised in profit and loss as other income when the Company's right to receive payments is established.

De-recognition

- A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:
 - The rights to receive cash flows from the asset have expired, or
 - The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

- When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.
- Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

In accordance with Ind-AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance
- Trade receivables - The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

ii. Financial liabilities

Classification

The Company classifies all financial liabilities as subsequently measured at amortised cost, except for financial liabilities at fair value through profit and loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

Financial liabilities at fair value through profit and loss

Financial liabilities at fair value through profit and loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit and loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind-AS 109.

Gains or losses on liabilities held for trading are recognised in the profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit and loss are designated at the initial date of recognition, and only if the criteria in Ind-AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/loss are not subsequently transferred to profit and loss. However, the Company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss. The Company has not designated any financial liability as at fair value through profit and loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit and loss when the liabilities are derecognized.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to interest-bearing loans and borrowings.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the

liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

Derivative financial instruments

The Company uses derivative financial instruments, such as foreign exchange forward contracts to manage its exposure to foreign exchange risks. For contracts where hedge accounting is not followed, such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value through profit and loss. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

iii. Hedge accounting

Forward exchange contracts entered to hedge highly probable forecast revenues are recorded using the principles of hedge accounting as per Ind AS 109. Such forward exchange contracts which qualify for cash flow hedge accounting and where the conditions of Ind AS 109 have been met are initially measured at fair value and are re-measured at subsequent reporting dates. Changes in the fair value of these derivatives that are designated and effective as hedges of the future cash flows are recognised directly under shareholder's funds in the cash flow hedging reserve and the ineffective portion is recognized immediately in the statement of profit and loss.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Company's risk management objective and strategy for undertaking hedge, the hedging/economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedge accounting is discontinued when the hedging instrument expires or is sold or terminated or exercised or no longer qualifies for hedge accounting. Cumulative gain or loss on the hedging instrument recognised in shareholders' funds is transferred to statement of profit and loss when the forecasted transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in shareholders' funds is transferred to the statement of profit and loss.

(o) Employee benefits

i. Short term employee benefits

Short term employee benefits consisting of wages, salaries, social security contributions, ex-gratia and accrued leave, are benefits payable and recognised in twelve months. Short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised undiscounted during the year as the related service are rendered by the employee.

ii. Defined contribution plans

Company's contribution for the year paid/payable to defined contribution retirement benefit schemes are charged to Statement of Profit and Loss

The Company's contribution towards provident fund, superannuation fund and employee state insurance scheme for certain eligible employees are considered to be defined contribution plan for which the Company made contribution on monthly basis.

iii. Defined benefit plans

Company's liabilities towards defined benefit plans and other long term benefits viz. gratuity and compensated absences expected to occur after twelve months, are determined using the Projected Unit Credit Method. Actuarial valuations under the Projected Unit Credit Method are carried out at the balance sheet date. Actuarial gains and losses are recognised in the Statement of other comprehensive income in the period of occurrence of such gains and losses. The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets, if any.

(p) Provisions, Contingent Liabilities and Contingent Assets

A provision is recognised if as a result of a past event, the Company has a present obligation (legal or constructive) that can be estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are recognised at the best estimate of the expenditure required to settle the present obligation at the balance sheet date. If the effect of time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability.

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognised nor disclosed in the financial statements. However, when the realisation of income is virtually certain, then the related asset is not a contingent asset and its recognition is appropriate.

(q) Earnings per share (EPS)

Basic EPS is computed using the weighted average number of equity shares outstanding during the period. Diluted EPS is computed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the period except where the results would be anti-dilutive.

(r) Current vs non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

(s) Key estimates and assumptions

The preparation of financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the balance sheet and statement of profit and loss. The actual amounts realised may differ from these estimates.

Estimates and assumptions are required in particular for:

- Determination of the estimated useful lives of tangible assets and intangible assets and the assessment as to which components of the cost may be capitalized.

Useful lives of tangible assets and intangible assets are based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful lives are different from that prescribed in Schedule II, they are based on management estimate, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support. Assumptions also need to be made, when the Company assesses, whether an asset may be capitalized and which components of the cost of the asset may be capitalised.

- Recognition and measurement of defined benefit obligations

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and vested future benefits and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations.

- Provisions and contingent liabilities

The Company exercises judgment in measuring and recognising provisions and the exposures to contingent liabilities related to pending litigation or other outstanding claims subject to negotiated settlement, mediation, arbitration or government regulation, as well as other contingent liabilities. Judgment is necessary in assessing the likelihood that a pending claim will succeed, or a liability will arise, and to quantify the possible range of the financial settlement. Because of the inherent uncertainty in this evaluation process, actual losses may be different from the originally estimated provision.

- Measurement of fair values

The Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has an established control framework with respect to the measurement of fair values. The finance team has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the CFO.

They regularly review significant unobservable inputs and valuation adjustments. If third party information is used to measure fair values then the finance team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

(t) Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest Lakhs as per the requirement of Schedule III, unless otherwise stated.

(u) Standards issued or modified but not yet effective up to the date of issuance of the company's financial statements:

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration: On 28th March, 2018, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency. The amendment will come into force from 1st April 2018. The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 21 is expected to be insignificant."

Ind AS 115

In March 2018, the Ministry of Corporate Affairs has notified the Companies (Indian Accounting Standards) Amended Rules, 2018 ("amended rules"). As per the amended rules, Ind AS 115 "Revenue from contracts with customers" supersedes Ind AS 11, "Construction contracts" and Ind AS 18, "Revenue" and is applicable for all accounting periods commencing on or after 1st April 2018.

Ind AS 115 introduces a new framework of five step model for the analysis of revenue transactions. The model specifies that revenue should be recognized when (or as) an entity transfer control of goods or services to a customer at the amount to which the entity expects to be entitled. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers. The new revenue standard is applicable to the Company from 1st April 2018.

The standard permits two possible methods of transition: Retrospective approach - Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (Cumulative catch - up approach) The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect, if any, on adoption of Ind AS 115 is expected to be insignificant"

Securities premium reserve

The amounts received in excess of the par value of Equity shares issued have been classified as Securities premium. In accordance with the provisions of Section 52 of the Indian Companies Act, 2013, the securities premium account can only be utilised for the purposes of issuing bonus shares, repurchasing the Company's shares, redemption of preference shares and debentures, and offsetting direct issue costs and discount allowed for the issue of shares or debentures.

General reserve

The General reserve is used from time to time to transfer profits from retained earnings for appropriation purposes. As the General reserve is created by a transfer from one component of equity to another and is not an item of other comprehensive income, items included in the General reserve will not be reclassified subsequently to the statement of profit and loss.

Retained earnings

Retained earnings includes the Company's cumulative earnings and losses respectively

Remeasurements of the net defined benefit Plans

Remeasurements of defined benefit liability comprises actuarial gains and losses and return on plan assets (excluding interest income)

Cash flow hedging reserve

The company uses hedging instruments as part of its management of foreign currency risk associated with its highly probable forecast sale. For hedging foreign currency risk, the company uses foreign currency forward contracts which are designated as cash flow hedges. To the extent these hedges are effective; the change in fair value of the hedging instrument is recognised in the cash flow hedging reserve. Amounts recognised in the cash flow hedging reserve is reclassified to profit or loss when the hedge item affects profit/(loss) i.e., when the designated sale occurs.

The company offsets Deferred tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

Significant management judgement is required in determining provision for income tax, deferred income tax assets and liabilities and recoverability of deferred income tax assets. The recoverability of deferred income tax assets is based on estimates of taxable income in which the relevant entity operates and the period over which deferred income tax assets will be recovered.

Fair values for financial instruments carried at amortised cost approximates the carrying amount, accordingly the fair values of such financial assets and financial liabilities have not been disclosed separately.

B. Measurement of fair values

Ind AS 107, 'Financial Instrument - Disclosure' requires classification of the valuation method of financial instruments measured at fair value in the Balance Sheet, using a three level fair-value-hierarchy (which reflects the significance of inputs used in the measurements). The hierarchy gives the highest priority to un-adjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and lowest priority to un-observable inputs (Level 3 measurements). Fair value of derivative financial assets and liabilities are estimated by discounting expected future contractual cash flows using prevailing market interest rate curves. The three levels of the fair-value-hierarchy under Ind AS 107 are described below:

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Transfers between Levels

There have been no transfers between Levels during the reporting periods

The following tables show the valuation techniques used in measuring Level 2 fair values, as well as the significant unobservable inputs used.

C. Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- Credit risk ;
- Liquidity risk ; and
- Market risk

i. Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the Company risk management framework. The board of directors is responsible for developing and monitoring the Company risk management policies.

The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The audit committee oversees how management monitors compliance with the company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

ii. Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investments in debt securities, cash and cash equivalents, mutual funds, bonds etc.

The carrying amount of financial assets represents the maximum credit exposure.

Trade receivables

Around 85% of the sales are export sales. For major part of the sales, customer credit risk is managed by requiring domestic and export customers to pay advances before transfer of ownership, therefore substantially eliminating the Company's credit risk in this respect.

Based on prior experience and an assessment of the current economic environment, management believes that no provision is required for credit risk wherever credit is extended to customers.

Impairment

The ageing of trade receivables that were not impaired was as follows:

Particulars	(₹ in Lakhs)	
	As at 31st March, 2018	As at 31st March, 2017
Neither past due nor impaired	29,020	34,435
Past due but not impaired		
Past due 1–90 days	20,829	6,603
Past due 91–180 days	271	150
Past due 181–270 days	22	17
Past due 271–365 days	41	1
Past due more than 365 days	10	13
	50,193	41,219

Other than trade receivables, the Company has no other financial assets that are past due but not impaired.

Management believes that the unimpaired amounts that are past due by more than 6 months are still collectible in full, based on historical payment behaviour.

Concentration of credit risk

At 31st March 2018, the carrying amount of the Company's most significant customer is ₹ 14,264 lakhs (previous Year ₹ 8,855 lakhs)

Loans to others

The credit worthiness of the counter party is evaluated by the management on an ongoing basis and necessary provisions are made wherever needed. The company has made provisions of ₹ 660 Lakhs as at 31st march 2018 in respect of such doubtful loans. The Company has no collateral securities in respect of said loans.

Investment in Debentures

The Company does not perceive any risk as these are issued by reputed financial institution.

Investment in mutual funds and bonds

The investment in mutual funds, Government bonds are entered into with credit worthy fund houses, Government of India and financial institution. The credit worthiness of these counter parties are evaluated by the management on an ongoing basis and is considered to be good. The Company does not expect any losses from non-performance by these counter-parties.

Derivatives

The derivatives are entered into with the banks with good credit ratings.

Cash and cash equivalents

Credit risk from balances with banks is managed by the Company's treasury department in accordance with the company's policy. Investment in surplus funds are made mainly in mutual funds with good returns and within approved credit ratings.

iii. Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

The Company has obtained fund and non-fund based working capital lines from various banks. The Company also constantly monitors funding options available in the debt and capital markets with a view to maintaining financial flexibility.

As at 31st March, 2018, the Company had working capital of ₹ 58,715 lakhs, including cash and cash equivalents of ₹ 1,761 lakhs, and highly marketable current investments of ₹ 48,318 lakhs.

As at 31st March, 2017, the Company had working capital of ₹ 10,720 lakhs, including cash and cash equivalents of ₹ 1,149 lakhs, and highly marketable current investments of ₹ 46,180 lakhs.

Exposure to liquidity risk

The table below analyses the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for:

- * all non derivative financial liabilities
- * net and gross settled derivative financial instruments for which the contractual maturities are essential for the understanding of the timing of the cash flows.

*Guarantees issued by the company on behalf of subsidiaries are with respect to borrowings raised by the respective entities. These amounts will be payable on default by the concerned entity. As of the reporting date, none of the subsidiaries have defaulted and hence, the company does not have any present obligation to third parties in relation to such guarantees.

The inflows/(outflows) disclosed in the above table represent the contractual undiscounted cash flows relating to derivative financial liabilities held for risk management purposes and which are not usually closed out before contractual maturity. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross cash settlement.

iv. Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from adverse changes in market rates and prices (such as interest rates, foreign currency exchange rates) or in the price of market risk-sensitive instruments as a result of such adverse changes in market rates and prices. Market risk is attributable to all market risk-sensitive financial instruments, all foreign currency receivables and payables and all short term and long-term debt. The Company is exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of its investments. Thus, the Company's exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currencies.

a) Currency risk

The company is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchase, other expenses and borrowings are denominated and the functional currency of the company. The function-

al currency of the company is Indian Rupees (₹). The currencies in which these transactions are primarily denominated are EURO and USD.

At any point in time, the Company generally hedges its estimated foreign currency exposure in respect of forecast sales over the following 12 to 18 months. The Company uses forward exchange contracts to hedge its currency risk, most with a maturity of less than one year from the reporting date. Such contracts are generally designated as cash flow hedges.

Hedge accounting is followed from 1st April 2016.

The Company, as per its risk management policy, uses foreign exchange forward contract and cross currency forward contracts primarily to hedge foreign exchange. The Company does not use derivative financial instruments for trading or speculative purposes.

Following is the derivative financial instruments to hedge the foreign exchange rate risk as of 31st March 2018:

Category	Instrument	Currency	Cross Currency	Amounts	Buy/Sell
Hedges of highly probable forecasted sales transactions	Forward contract	USD	INR	USD 221.16 million	Sell
Hedges of highly probable forecasted sales transactions	Forward contract	EURO	INR	EURO 1 MILLION	Sell
Hedges of highly probable forecasted sales transactions	Forward contract	EURO	USD	EURO 11.08 MILLION	Sell

Following is the derivative financial instruments to hedge the foreign exchange rate risk as of 31st March 2017:

Category	Instrument	Currency	Cross Currency	Amounts	Buy/Sell
Hedges of highly probable forecasted sales transactions	Forward contract	USD	INR	USD 354.43 million	Sell

Exposure to currency risk

The summary quantitative data about the Company's exposure to currency risk as reported to the management of the Company is as follows:

(₹ in Lakhs)

Sensitivity analysis

The strengthening / weakening of the respective foreign currencies with respect to functional currency of Company would result in increase or decrease in profit or (loss) and equity as shown in table below. This analysis assumes that all other variables, in particular interest rates, remain constant. The following analysis has been worked out based on the exposures as of the Balance Sheet date.

(₹ in Lakhs)

Effect in ₹ As at 31st March, 2018	Profit / (loss)		
	Strengthening / Weakening %	Strengthening	Weakening
EURO	2%	(464)	464

USD	3%	(2,683)	2,683
Others	10%	(7)	7

(Note: The impact is indicated on the profit/(loss) before tax basis)

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in interest rates.

For details of the Company's short-term and long term loans and borrowings, including interest rate profiles, refer to Note 50 of these financial statements.

Variable-rate instruments		
Financial liabilities	(24,828)	(82,505)
	(24,828)	(82,505)

Interest rate sensitivity - fixed rate instruments

The company's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in IND AS 107, since neither the carrying amount nor the future cash flow will fluctuate because of a change in market interest rates.

Interest rate sensitivity - variable rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased / decreased equity and profit or (loss) by amounts shown below. This analysis assumes that all other variables, in particular, foreign currency exchange rates, remain constant. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The period end balances are not necessarily representative of the average debt outstanding during the period.

NOTE NO.40

Hedge accounting

As part of its risk management strategy, the company endeavors to hedge its net foreign currency exposure of highly forecasted sale transactions for the next 12 to 18 months in advance. The company uses forward contracts to hedge its currency exposure. Such contracts are designated as cash flow hedges.

The forward contracts are generally denominated in the same currency in which the sales realization is likely to take place. The hedge ratio is 1:1.

For derivative contracts designated as hedge, the Company documents, at inception, the economic relationship between the hedging instrument and the hedged item, the hedge ratio, the risk management objective for undertaking the hedge and the methods used to assess the hedge effectiveness.

Financial contracts designated as hedges are accounted for in accordance with the requirements of Ind AS 109 depending upon the type of hedge.

The Company applies cash flow hedge accounting to hedge the variability in the future cash flows attributable to foreign exchange risk.

Hedge effectiveness is ascertained at the time of inception of the hedge and periodically thereafter. The Company assesses hedge effectiveness both on prospective and retrospective basis. The prospective hedge effectiveness test is a forward looking evaluation of whether or not the changes in the fair value or cash flows of the hedging position are expected to be highly effective on offsetting the changes in the fair value or cash flows of the hedged position over the term of the relationship. On the other hand, the retrospective hedge effectiveness test is a backward-looking evaluation of whether the changes in the fair value or cash flows of the hedging position have been highly effective in offsetting changes in the fair value or cash flows of the hedged position since the date of designation of the hedge.

Hedge effectiveness is assessed through the application of critical terms match method. Any ineffectiveness in a hedging relationship is accounted for in the statement of profit and loss.

The company has formally designated and documented hedge relationship from 1st April 2016.

(B) Defined Benefit Plan

In accordance with the provisions of the Payment of Gratuity Act, 1972, the Company has a defined benefit plan which provides for gratuity payments. The plan provides a lump sum gratuity payment to eligible employees at retirement or termination of their employment. The amounts are based on the respective employee's last drawn salary and the years of employment with the Company. Liabilities in respect of the gratuity plan are determined by an actuarial valuation, based upon which the Company makes annual contributions to the Group Gratuity cum Life Assurance Schemes administered by the LIC of India, a funded defined benefit plan for qualifying employees.

The most recent actuarial valuation of the defined benefit obligation along with the fair valuation of the plan assets in relation to the gratuity scheme was carried out as at 31st March, 2018. The present value of the defined benefit obligations and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

Based on the actuarial valuation obtained in this respect, the following table sets out the details of the employee benefit obligation and the plan assets as at balance sheet date:

(vi) Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below.

		(₹ in Lakhs)			
Particulars		As at 31st March, 2018		As at 31st March, 2017	
		Increase	Decrease	Increase	Decrease
Discount rate (0.5% movement) - Gratuity		(159)	173	(151)	166
Employee turnover (0.5% movement) - Gratuity		6	(6)	(5)	5
Future salary growth (0.5% movement) - Gratuity		166	(154)	165	(151)

The above sensitivity analyses have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the reporting date. In practice, generally it does not occur. When we change one variable, it affects to others. In calculating the sensitivity, project unit credit method at the end of the reporting period has been applied.

INDEPENDENT AUDITORS' REPORT To the Members of BALKRISHNA INDUSTRIES LIMITED

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of Balkrishna Industries Limited (hereinafter referred to as "the Company") and its subsidiaries (the Company and its subsidiaries together referred to as "the Group"), comprising the Consolidated Balance Sheet as at 31st March, 2018, the Consolidated Statement of Profit and Loss (including other comprehensive income), the Consolidated Statement of Changes in Equity, the Consolidated Statement of Cash Flows for the year then ended, and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

The Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 (hereinafter referred to as "the Act") that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated statement of changes in equity and consolidated cash flows of the Group in accordance with the Indian Accounting Standards (Ind AS) prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Company, as aforesaid.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. In conducting our audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence obtained by us, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the Ind AS and other accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at 31st March, 2018, and its consolidated profit, consolidated total comprehensive income, consolidated statement of changes in equity and its consolidated cash flows for the year ended on that date.

Other Matters

- (a) We did not audit the financial statements of the 5 foreign subsidiaries, whose financial statements reflect total assets of ₹ 9941 lakhs as at 31st March, 2018, total revenues of ₹ 8568 lakhs and net cash outflows amounting to ₹ 225 lakhs for the year ended on that date, as considered in the consolidated financial statements. These financial statements have been audited/ reviewed by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, and our report in terms of sub-sections (3) and (11) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries, is based solely on the reports of the other auditors.
- (b) Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

As required by Section 143(3) of the Act, we report, to the extent applicable, that:

ANNEXURE - A TO THE INDEPENDENT AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended 31 March 2018, we have audited the internal financial controls over financial reporting of Balkrishna Industries Limited ("the Company") and its subsidiary companies which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The Board of Directors of the Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("the ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company and its subsidiary companies, which are companies incorporated in India.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the Company and its subsidiary companies, which are companies incorporated in India, have, in all material respects, an internal financial controls, with reference to financial statements as at 31st March, 2018, based on the internal control over financial reporting criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS

1(a) General information

Balkrishna Industries Limited ('the Company') is a public limited company incorporated and domiciled in India and has its registered office at Waluj MIDC, Aurangabad, Maharashtra, India.

These consolidated financial statements comprise the Company and its subsidiaries (collectively the 'Group' and individually 'Group companies').

The Group is primarily engaged in the business of manufacturing and selling of "Off-Highway Tyres" (OHT) in the specialist segments such as Agricultural, Industrial & Construction, Earthmovers & Port, Mining, Forestry, Lawn & Garden and All Terrain Vehicles (ATV).

(b) Significant Accounting policies

(a) Basis of preparation

- (i) The consolidated financial statements have been prepared in compliance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.
- (ii) The consolidated financial statements have been prepared on the historical cost basis except for the following assets and liabilities which have been measured at fair value:
 1. Financial instruments measured at fair value through profit and loss
 2. Financial instruments measured at fair value through other comprehensive income
 3. Defined benefit plans – plan assets measured at fair value

(b) Basis of consolidation

Subsidiaries are all entities over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit and loss, consolidated statement of changes in equity and balance sheet respectively.

Name of the Subsidiary Company	Country of Incorporation	Proportion of ownership interest either directly or through subsidiary
Direct Subsidiaries		
BKT Tyres Limited	India	100%
Thristha Synthetics Limited	India	100%
BKT EUROPE S.R.L.	Italy	100%
BKT TIRES (CANADA) INC.	Canada	100%
BKT USA INC.	USA	100%
BKT EXIM US, INC.	USA	100%
Step down Subsidiary		
BKT TIRES INC.	USA	100%

(c) Foreign currency translation

(i) Functional and presentation currency

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Indian rupee (₹), which is the Group's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates (except for long term monetary items outstanding as of 31st March 2016) are generally recognised in profit and loss.

In case of long term monetary items outstanding as of 31st March 2016, foreign exchange differences arising on settlement or translation of long-term foreign currency monetary items relating to acquisition of depreciable assets are adjusted to the carrying cost of the assets and depreciated over the balance life of the asset.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported

as part of the fair value gain or loss. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit and loss are also recognised in OCI or profit and loss, respectively).

(d) Revenue recognition

Sale of goods

Revenue is measured at the fair value of the consideration received or receivable. Revenue from sale of goods is recognised when the significant risks and rewards in respect of ownership of products are transferred by the Group, the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold and no significant uncertainty exist regarding the amount of consideration that will be derived from the sale of goods as well as regarding its ultimate collection. Amounts disclosed as revenue are inclusive of excise duty and net of returns, Discounts, Rebates, incentives, Value added taxes/Central Sales Tax and amounts collected on behalf of third parties.

The Group recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity.

Export Benefits

Consumption of Raw Materials is arrived at after adjusting the difference between the cost of indigenous/duty paid imported raw materials and international cost of raw materials entitled to be imported/imported under Duty Exemption Scheme of the Government of India against direct/indirect exports made/to be made by the Group during the year. Export Incentives under prevalent Schemes under EXIM policy/ Foreign Trade Policy are accounted once received by Company from the Government.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to Profit and Loss on a systematic basis as and when export obligation are fulfilled.

Dividend income

Dividend is recognized as revenue when the right to receive payment has been established.

Interest income

For all interest bearing financial assets measured at amortised cost, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset.

(e) Property, Plant and Equipment (PPE)

i. Recognition and measurement

Freehold land is carried at historical cost. All other items of PPE are measured at cost less accumulated depreciation and any accumulated impairment losses, if any.

The cost of an item of PPE comprises:

- a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
- b) any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Income and expenses related to the incidental operations, not necessary to bring the item to the location and condition necessary for it to be capable of operating in the manner intended by management, are recognised in profit or loss.

The Group has elected to continue with the carrying value of all its property, plant and equipment as recognized in the consolidated financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as the deemed cost as at the transition date pursuant to the exemption under Ind AS 101.

Any gain or loss on disposal of an item of PPE is recognised in profit and loss.

ii. Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

iii. Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Depreciation on PPE (other than leasehold land) has been provided based on useful life of the assets in accordance with Schedule II to the Companies Act, 2013, on Straight Line Method except in respect of Plant and Equipment where the useful life is considered differently based on an independent technical evaluation as 10 to 15 years.

Leasehold land are amortised over the lease period.

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

Profit and loss on disposals are determined by comparing proceeds with carrying amount. These are included in statement of profit and loss.

(f) Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Investment properties are depreciated using the straight-line method over their estimated useful lives.

Investment properties generally have a useful life of 30 years for factory building and 60 years for residential and office premises.

(g) Intangible assets

Intangible assets comprise application software purchased, which are not an integral part of the related hardware, and are amortized on a straight line basis over a period of 6 years, which in Management's estimate represents the period during which the economic benefits will be derived from their use.

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific to which it relates.

The Group has elected to continue with the carrying value of all its intangible assets as recognized in the standalone financial statements as at the date of transition to Ind AS, measured as per the previous GAAP and use that as the deemed cost as at the transition date pursuant to the exemption under Ind AS 101

(h) Impairment of non-financial assets

Assets that have a definite useful life are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Management periodically assesses using, external and internal sources, whether there is an indication that an asset may be impaired.

The recoverable amount is higher of the asset's net selling price or value in use, which means the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if, and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

(i) Borrowing cost

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

(j) Operating lease

Assets taken/given on lease under which substantially all risks and rewards of ownership are effectively retained by the lessor are classified as operating lease. Lease payments/receipts under operating leases are recognised as expenses/income on straight line basis over the primary period of lease only if lease rentals are not linked to inflation in accordance with the respective lease agreements.

(k) Income Tax

Income tax expense comprises current and deferred tax. It is recognised in profit and loss except to the extent that it relates to items recognised directly in equity or in OCI.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Current tax assets and liabilities are offset only if:

- a) there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority; and
- b) there is intention either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss).

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences (if any) to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax liabilities are not recognised for temporary differences between the carrying amount and tax bases of invest-

ments in subsidiaries where the Group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset only if they relate to income taxes levied by the same taxation authority on the same taxable entity.

(l) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, call deposits and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(m) Inventories

Raw materials, packing materials and stores, work in progress, traded and finished goods are stated at the lower of cost and net realisable value, cost is calculated on moving weighted average basis.

In respect of finished goods, cost includes materials, appropriate share of utilities, other overheads and applicable excise duty. Cost of inventories comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Research and development

Revenue expenditure on Research and Development is charged to Profit and Loss Account as incurred. Capital expenditure on assets acquired for Research and Development is added to PPE.

(n) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments also include derivative contracts such as foreign currency foreign exchange forward contracts, interest rate swaps and currency options; and embedded derivatives in the host contract.

i. Financial assets

Classification

The Group shall classify financial assets as subsequently measured at amortised cost, fair value through other comprehensive income (FVOCI) or fair value through profit and loss (FVTPL) on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Debt instruments

- A 'debt instrument' is measured at the amortised cost if both the following conditions are met:
 - a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
 - b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.
- After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit and loss.
- Debt instruments included within the fair value through profit and loss (FVTPL) category are measured at fair value with all changes recognized in the statement of profit and loss.

Equity instruments

- The Group subsequently measures all equity investments in companies other than equity investments in subsidiaries, at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss. Dividends from such investments are recognised in profit and loss as other income when the Group's right to receive payments is established.

De-recognition

- A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Group's balance sheet) when:
 - The rights to receive cash flows from the asset have expired, or
 - The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.
- When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the

asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

- Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

In accordance with Ind-AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance
- Trade receivables - The application of simplified approach does not require the Group to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

ii. Financial liabilities

Classification

The Group classifies all financial liabilities as subsequently measured at amortised cost, except for financial liabilities at fair value through profit and loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

Financial liabilities at fair value through profit and loss

Financial liabilities at fair value through profit and loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit and loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by Ind-AS 109.

Gains or losses on liabilities held for trading are recognised in the profit and loss.

Financial liabilities designated upon initial recognition at fair value through profit and loss are designated at the initial date of recognition, and only if the criteria in Ind-AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/losses attributable to changes in own credit risk are recognized in OCI. These gains/loss are not subsequently transferred to profit and loss. However, the Group may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit and loss. The Group has not designated any financial liability as at fair value through profit and loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit and loss when the liabilities are derecognised.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to interest-bearing loans and borrowings.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

Derivative financial instruments

The Group uses derivative financial instruments, such as foreign exchange forward contracts to manage its exposure to foreign exchange risks. For contracts where hedge accounting is not followed, such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value through profit and loss. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

iii. Hedge accounting

Forward exchange contracts entered to hedge highly probable forecast revenues are recorded using the principles of hedge accounting as per Ind AS 109. Such forward exchange contracts which qualify for cash flow hedge accounting and where the conditions of Ind AS 109 have been met are initially measured at fair value and are re-measured at subsequent reporting dates. Changes in the fair value of these derivatives that are designated and effective as hedges of the future cash flows are recognized directly under shareholder's funds in the cash flow hedging reserve and the ineffective portion is recognized immediately in the statement of profit and loss.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Group's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedge accounting is discontinued when the hedging instrument expires or is sold or terminated or exercised or no longer qualifies for hedge accounting. Cumulative gain or loss on the hedging instrument recognised in shareholders' funds is transferred to statement of profit and loss when the forecasted transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in shareholders' funds is transferred to the statement of profit and loss.

(o) Employee benefits**i. Short term employee benefits**

Short term employee benefits consisting of wages, salaries, social security contributions, ex-gratia and accrued leave, are benefits payable and recognised in 12 months. Short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised undiscounted during the year as the related service are rendered by the employee.

ii. Defined contribution plans

Company's contribution for the year paid/payable to defined contribution retirement benefit schemes are charged to Statement of Profit and Loss

The Group's contribution towards provident fund, superannuation fund and employee state insurance scheme for certain eligible employees are considered to be defined contribution plan for which the Group made contribution on monthly basis.

iii. Defined benefit plans

Company's liabilities towards defined benefit plans and other long term benefits viz. gratuity and compensated absences expected to occur after twelve months, are determined using the Projected Unit Credit Method. Actuarial valuations under the Projected Unit Credit Method are carried out at the balance sheet date. Actuarial gains and losses are recognised in the Statement of other comprehensive income in the period of occurrence of such gains and losses. The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets, if any.

(p) Provisions , Contingent Liabilities and Contingent Assets

A provision is recognised if as a result of a past event, the Group has a present obligation (legal or constructive) that can be estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are recognised at the best estimate of the expenditure required to settle the present obligation at the balance sheet date. If the effect of time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability.

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions but are disclosed unless the possibility of outflow of resources is remote. Contingent assets are neither recognised nor disclosed in the consolidated financial statements. However, when the realisation of income is virtually certain, then the related asset is not a contingent asset and its recognition is appropriate.

(q) Earnings per share (EPS)

Basic EPS is computed using the weighted average number of equity shares outstanding during the period. Diluted EPS is computed using the weighted average number of equity and dilutive equity equivalent shares outstanding during the period except where the results would be anti-dilutive.

(r) Current vs non-current classification

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle.

(s) Key estimates and assumptions

The preparation of consolidated financial statements in accordance with Ind AS requires use of estimates and assumptions for some items, which might have an effect on their recognition and measurement in the balance sheet and statement of profit and loss. The actual amounts realised may differ from these estimates.

Estimates and assumptions are required in particular for:

- Determination of the estimated useful lives of tangible assets and intangible assets and the assessment as to which components of the cost may be capitalized.

Useful lives of tangible assets and intangible assets are based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful lives are different from that prescribed in Schedule II, they are based on management estimate, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support. Assumptions also need to be made, when the Group assesses, whether an asset may be capitalized and which components of the cost of the asset may be capitalised.

- Recognition and measurement of defined benefit obligations

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and vested future benefits and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations.

- Provisions and contingent liabilities

The Group exercises judgment in measuring and recognising provisions and the exposures to contingent liabilities related to pending litigation or other outstanding claims subject to negotiated settlement, mediation, arbitration or government regulation, as well as other contingent liabilities. Judgment is necessary in assessing the likelihood that a pending claim will succeed, or a liability will arise, and to quantify the possible range of the financial settlement. Because of the inherent uncertainty in this evaluation process, actual losses may be different from the originally estimated provision.

- Measurement of fair values

The Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Group has an established control framework with respect to the measurement of fair values. The finance team has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, and reports directly to the CFO.

They regularly review significant unobservable inputs and valuation adjustments. If third party information is used to measure fair values then the finance team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

(t) Rounding of amounts

All amounts disclosed in the consolidated financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

(u) Standards issued or modified but not yet effective up to the date of issuance of the Group's consolidated financial statements:

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration: On 28th March, 2018, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency. The amendment will come into force from 1st April 2018. The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 21 is expected to be insignificant."

Ind AS 115

In March 2018, the Ministry of Corporate Affairs has notified the Companies (Indian Accounting Standards) Amended Rules, 2018 ("amended rules"). As per the amended rules, Ind AS 115 "Revenue from contracts with customers" supersedes Ind AS 11, "Construction contracts" and Ind AS 18, "Revenue" and is applicable for all accounting periods commencing on or after 1st April 2018.

Ind AS 115 introduces a new framework of five step model for the analysis of revenue transactions. The model specifies that revenue should be recognized when (or as) an entity transfer control of goods or services to a customer at the amount to which the entity expects to be entitled. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers. The new revenue standard is applicable to the Company from 1st April 2018.

The standard permits two possible methods of transition: Retrospective approach - Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (Cumulative catch - up approach) The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect, if any, on adoption of Ind AS 115 is expected to be insignificant"

Securities Premium Reserve

The amounts received in excess of the par value of Equity shares issued have been classified as Securities premium. In accordance with the provisions of Section 52 of the Indian Companies Act, 2013, the securities premium account can only be utilised for the purposes of issuing bonus shares, repurchasing the Company's shares, redemption of preference shares and debentures, and offsetting direct issue costs and discount allowed for the issue of shares or debentures.

General reserve

The General reserve is used from time to time to transfer profits from retained earnings for appropriation purposes. As the General reserve is created by a transfer from one component of equity to another and is not an item of other comprehensive income, items included in the General reserve will not be reclassified subsequently to the statement of profit and loss.

Retained earnings

Retained earnings includes the Group's cumulative earnings and losses respectively

Remeasurements of the net defined benefit Plans

Remeasurements of defined benefit liability comprises actuarial gains and losses and return on plan assets (excluding interest income)

Cash flow hedging reserve

The Group uses hedging instruments as part of its management of foreign currency risk associated with its highly probable forecast sale. For hedging foreign currency risk, the Group uses foreign currency forward contracts which are designated as cash flow hedges. To the extent these hedges are effective; the change in fair value of the hedging instrument is recognised in the cash flow hedging reserve. Amounts recognised in the cash flow hedging reserve is reclassified to profit or loss when the hedge item affects profit/(loss) i.e., when the designated sale occurs.

The group offsets Deferred tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

Significant management judgement is required in determining provision for income tax, deferred income tax assets and liabilities and recoverability of deferred income tax assets. The recoverability of deferred income tax assets is based on estimates of taxable income in which the relevant entity operates and the period over which deferred income tax assets will be recovered.

Financial instruments – Fair values and risk management
A. Accounting classification and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

Fair values for financial instruments carried at amortised cost approximates the carrying amount, accordingly the fair values of such financial assets and financial liabilities have not been disclosed separately.

B. Measurement of fair values

Ind AS 107, 'Financial Instrument - Disclosure' requires classification of the valuation method of financial instruments measured at fair value in the Balance Sheet, using a three level fair-value-hierarchy (which reflects the significance of inputs used in the measurements). The hierarchy gives the highest priority to un-adjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and lowest priority to un-observable inputs (Level 3 measurements). Fair value of derivative financial assets and liabilities are estimated by discounting expected future contractual cash flows using prevailing market interest rate curves. The three levels of the fair-value-hierarchy under Ind AS 107 are described below:

Level 1: Level 1 Hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market are determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs are not based on observable market data, the instrument is included in level 3.

Transfers between Levels

There have been no transfers between Levels during the reporting periods

The following tables show the valuation techniques used in measuring Level 2 fair values, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Mutual Fund	Net Asset Value	Not applicable	Not applicable

C. Financial risk management

The group has exposure to the following risks arising from financial instruments:

- Credit risk ;
- Liquidity risk ; and
- Market risk

i. Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the group risk management framework. The board of directors is responsible for developing and monitoring the Company risk management policies.

The groups risk management policies are established to identify and analyses the risks faced by the group to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the groups activities. The group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The audit committee oversees how management monitors compliance with the company's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The audit committee is assisted in its oversight role by internal audit. Internal audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

ii. Credit risk

Credit risk is the risk of financial loss to the group if a customer or counter party to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investments in debt securities, cash and cash equivalents, mutual funds, bonds etc.

The carrying amount of financial assets represents the maximum credit exposure.

Trade receivables

Around 85% of the sales are export sales. For major part of the sales, customer credit risk is managed by requiring domestic and export customers to pay advances before transfer of ownership, therefore substantially eliminating the Company's credit risk in this respect.

Based on prior experience and an assessment of the current economic environment, management believes that no provision is required for credit risk wherever credit is extended to customers.

Impairment

The ageing of trade and other receivables that were not impaired was as follows:

Particulars	(₹ in Lakhs)	
	As at 31st March, 2018	As at 31st March, 2017
Neither past due nor impaired	25,366	32,463

Past due 271–365 days	41	1
Past due more than 365 days	2	13
	47,963	41,167

Other than trade receivables, the group has no other financial assets that are past due but not impaired.

Management believes that the unimpaired amounts that are past due by more than 6 months are still collectible in full, based on historical payment behaviour.

Concentration of credit risk

At 31st March 2018, the carrying amount of the group's most significant customer is ₹ 14,264 lakhs (31st March, 2017 : ₹ 8,855 lakhs)

Loan to others

The credit worthiness of the counter party is evaluated by the management on an ongoing basis and necessary provisions are made wherever needed. The Group has made provisions of ₹ 660 Lakhs as at 31st March 2018 in respect of such doubtful loans. The Company has no collateral securities in respect of said loans.

Investment in debentures

The Group does not perceive any risk as these are issued by reputed financial institution.

Investment in mutual funds and bonds

The investment in mutual funds, Government bonds are entered into with credit worthy fund houses, Government of India and financial institution respectively. The credit worthiness of these counter parties are evaluated by the management on an ongoing basis and is considered to be good. The group does not expect any losses from non-performance by these counter-parties.

Derivatives

The derivatives are entered into with the banks with good credit ratings.

Cash and cash equivalents

Credit risk from balances with banks is managed by the group's treasury department in accordance with the group's policy. Investment of surplus funds are made in mainly in mutual funds with good returns and within approved credit ratings.

iii. Liquidity risk

Liquidity risk is the risk that the group will not be able to meet its financial obligations as they become due. The group manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the group's reputation.

As at 31st March, 2018, the Group had working capital of ₹ 57,491 lakhs, including cash and cash equivalents of ₹ 2,646 lakhs, and highly marketable current investments of ₹ 48,318 lakhs.

As at 31st March, 2017, the Group had working capital of ₹ 9,904 lakhs, including cash and cash equivalents of ₹ 2,260 lakhs, and highly marketable current investments of ₹ 46,180 lakhs.

Exposure to liquidity risk

The table below analyses the group's financial liabilities into relevant maturity groupings based on their contractual maturities for:

* all non derivative financial liabilities

* net and gross settled derivative financial instruments for which the contractual maturities are essential for the understanding of the timing of the cash flows.

The inflows/(outflows) disclosed in the above table represent the contractual undiscounted cash flows relating to derivative financial liabilities held for risk management purposes and which are not usually closed out before contractual maturity. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross cash settlement.

iv. Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from adverse changes in market rates and prices (such as interest rates, foreign currency exchange rates) or in the price of market risk-sensitive instruments as a result of such adverse changes in market rates and prices. Market risk is attributable to all market risk-sensitive financial instruments, all foreign currency receivables and payables and all short term and long-term debt. The group is exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of its investments. Thus, the group's exposure to market risk is a function of investing and borrowing activities and revenue generating and operating activities in foreign currencies.

a) Currency risk

The group is exposed to currency risk to the extent that there is a mismatch between the currencies in which sales, purchase, other expenses and borrowings are denominated and the functional currency of the group. The functional currency of the group is Indian Rupees (₹). The currencies in which these transactions are primarily denominated are EURO and USD.

At any point in time, the group generally hedges its estimated foreign currency exposure in respect of its forecast sales over the following 12 to 18 months. The group uses forward exchange contracts to hedge its currency risk. Such contracts are generally designated as cash flow hedges.

Hedge accounting is followed from 1st April, 2016.

The group, as per its risk management policy, uses foreign exchange forward contract and cross currency forward contracts primarily to hedge foreign exchange. The group does not use derivative financial instruments for trading or speculative purposes.

Following is the derivative financial instruments to hedge the foreign exchange rate risk as at 31st March, 2018:

Category	Instrument	Currency	Cross Currency	Amounts	Buy/Sell
Hedges of highly probable forecasted sales transactions	Forward contract	USD	INR	USD 221.16 million	Sell
Hedges of highly probable forecasted sales transactions	Forward contract	EURO	INR	EURO 1 million	Sell
Hedges of highly probable forecasted sales transactions	Forward contract	EURO	USD	EURO 11.08 MILLION	Sell

Following is the derivative financial instruments to hedge the foreign exchange rate risk as at 31st March , 2017:

Category	Instrument	Currency	Cross Currency	Amounts	Buy/Sell
Hedges of highly probable forecasted sales transactions	Forward contract	USD	INR	USD 354.43 million	Sell

Exposure to currency risk

The summary quantitative data about the Group's exposure to currency risk as reported to the management of the group is as follows: (₹ in Lakhs)

Sensitivity analysis

The strengthening / weakening of the respective foreign currencies with respect to functional currency of group would result in increase or decrease in profit or loss and equity as shown in table below. This analysis assumes that all other variables, in particular interest rates, remain constant. The following analysis has been worked out based on the exposures as of the Balance Sheet date.

(₹ in Lakhs)

Effect in ₹ Lakhs As at 31st March, 2018	Profit / (loss)		
	Strengthening / Weakening %	Strengthening	Weakening
EURO	2%	(540)	540
USD	3%	(670)	670
Others	10%	(34)	34

USD	3%	(2,726)	2,726
Others	10%	(3)	3

(Note: The impact is indicated on the profit/(loss) before tax basis)

b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in interest rates.

For details of the group's short-term and long term loans and borrowings, including interest rate profiles, refer to Note 50 of these financial statements.

(₹ in Lakhs)

Particulars	As at 31st March, 2018	As at 31st March, 2017

Variable-rate instruments		
Financial liabilities	(28,030)	(85,476)
	(28,030)	(85,476)

Interest rate sensitivity - fixed rate instruments

The group's fixed rate borrowings are carried at amortised cost. They are therefore not subject to interest rate risk as defined in IND AS 107, since neither the carrying amount nor the future cash flow will fluctuate because of a change in market interest rates.

Interest rate sensitivity - variable rate instruments

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased / decreased equity and profit or (loss) by amounts shown below. This analysis assumes that all other variables, in particular, foreign currency exchange rates, remain constant. This calculation also assumes that the change occurs at the balance sheet date and has been calculated based on risk exposures outstanding as at that date. The period end balances are not necessarily representative of the average debt outstanding during the period.

NOTE NO.40

Hedge accounting

As part of its risk management strategy, the group generally hedges its net foreign currency exposure of highly forecasted sale transactions for the next 12 to 18 months in advance. The group uses forward contracts to hedge its currency exposure. Such contracts are designated as cash flow hedges.

The forward contracts are generally denominated in the same currency in which the sales realization is likely to take place. The hedge ratio is 1:1.

For derivative contracts designated as hedge, the group documents, at inception, the economic relationship between the hedging instrument and the hedged item, the hedge ratio, the risk management objective for undertaking the hedge and the methods used to assess the hedge effectiveness.

Financial contracts designated as hedges are accounted for in accordance with the requirements of Ind AS 109 depending upon the type of hedge.

The group applies cash flow hedge accounting to hedge the variability in the future cash flows attributable to foreign exchange risk.

Hedge effectiveness is ascertained at the time of inception of the hedge and periodically thereafter. The group assesses hedge effectiveness both on prospective and retrospective basis. The prospective hedge effectiveness test is a forward looking evaluation of whether or not the changes in the fair value or cash flows of the hedging position are expected to be highly effective on offsetting the changes in the fair value or cash flows of the hedged position over the term of the relationship. On the other hand, the retrospective hedge effectiveness test is a backward-looking evaluation of whether the changes in the fair value or cash flows of the hedging position have been highly effective in offsetting changes in the fair value or cash flows of the hedged position since the date of designation of the hedge.

Hedge effectiveness is assessed through the application of critical terms match method. Any ineffectiveness in a hedging relationship is accounted for in the statement of profit and loss.

The group has formally designated and documented hedge relationship from 1st April 2016.

Capital Management

The group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Management monitors the return on capital as well as the level of dividends to ordinary shareholders.

The group monitors capital using a ratio of 'net debt' to 'equity'. For this purpose, net debt is defined as total debt, comprising loans and borrowings less cash and cash equivalents and current investments.

The group's net debt to equity ratio as at 31st March 2018 and 31st March 2017 was as follows.

NOTE NO.46**Employee Benefit obligations****(A) Defined Contribution Plan**

The group has various schemes for long-term benefits such as provident fund and superannuation. In case of funded schemes, the funds are recognised by the Income tax authorities and administered by appropriate authorities. The group's defined contribution plans are superannuation and employees' pension scheme (under the provisions of the Employees' Provident Funds and Miscellaneous Provisions Act, 1952) since the group has no further obligation beyond making the contributions. The liability of the Group on the exempt Provident Fund is restricted to the interest shortfall if any.

(B) Defined Benefit Plan

In accordance with the provisions of the Payment of Gratuity Act, 1972, the group has a defined benefit plan which provides for gratuity payments. The plan provides a lump sum gratuity payment to eligible employees at retirement or termination of their employment. The amounts are based on the respective employee's last drawn salary and the years of employment with the group.

Liabilities in respect of the gratuity plan are determined by an actuarial valuation, based upon which the group makes annual contributions to the Group Gratuity cum Life Assurance Schemes administered by the LIC of India, a funded defined benefit plan for qualifying employees.

The most recent actuarial valuation of the defined benefit obligation along with the fair valuation of the plan assets in relation to the gratuity scheme was carried out as at March 31st March, 2018. The present value of the defined benefit obligations and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

Based on the actuarial valuation obtained in this respect, the following table sets out the details of the employee benefit obligation and the plan assets as at balance sheet date:

(vi) Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below. (₹ in Lakhs)

Particulars	As at 31st March, 2018		As at 31st March, 2017	
	Increase	Decrease	Increase	Decrease
Discount rate (0.5% movement) - Gratuity	(159)	173	(151)	166
Employee turnover (0.5% movement) - Gratuity	6	(6)	(5)	5
Future salary growth (0.5% movement) - Gratuity	166	(154)	165	(151)

The above sensitivity analyses have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the reporting date. In practice, generally it does not occur. When we change one variable, it affects to others. In calculating the sensitivity, project unit credit method at the end of the reporting period has been applied.
