MANAGEMENT DISCUSSION AND ANALYSIS REPORT

1. INDUSTRY STRUCTURE AND DEVELOPMENTS

The current wave of economic development in India is being seen from all over the world. As Infrastructure, manufacturing and services are growing at high rates, the Packaging Industry is also showing great variety and depth in its growth. Asia is the largest regional market with 29.1% of global market volume, followed by Western Europe and North America. Asia is also the fastest growing market for consumer flexible packaging, with a forecast CAGR for 2011-16 of 7.9%.

The region is forecast to represent 55.0% of total world flexible Packaging consumption growth during the period 2011-16. India and China are the fastest-growing national markets for consumer flexible packaging, together accounting for 44.0% of world flexible packaging consumption growth during the forecast period.

India represents a US\$ 3 billion market of Flexible Packaging that is expected to continue growing at around 18-20% a year until 2015.

2. OPPORTUNITIES

Growth in consumer spend, growing rural demand, changing demographics, emergence of a fast growing market for convenience goods, retail trade and quest for quality products are expected to sustain increase in the demand for packaging in the medium to long term.

Flexible Packaging has been one of the fastest growing sectors of the packaging market over the past decade. Annual growth rate of 15-18% shows very broad perspective of Indian Flexible Packaging Industry and its promising growth which is expected to be 25%.

3. THREATS

The industry is very dynamic and very fragmented at the same time. Unorganized sector is still a very large part of the market. However, growing awareness for hygiene and growing health consciousness and also rapidly expanding organized retail sector help the Flexible Packaging Companies in the organized sector to grow.

The Company faces competition from other domestic manufacturers. However, since the market is growing at a high rate and because of the Company's inherent strength, this factor is not worrisome.

The Company faces stiff competition both from the international as well as domestic manufacturers. The competition is increasing with the addition of new capacities. Increased competition leads to reduced price, decreased sales, lower profit margins thus adversely affecting the business and financial conditions of the Company; however Company's plan is to mitigate these by focusing on better efficiency, improvement of productivity, introduction of innovative products and proximity to customers etc

4. Segment-wise performance

i. Carton Manufacturing Division

The Division has registered total revenue of Rs. 57.00 Crores during the financial year under review

ii. Machinery Division

The Division has registered total revenue of Rs. 3.93 Crores during the financial year under review

5. OUTLOOK

In the view of the Company, the future trends in the Packaging Industry in the packaging segment are:

- The per capita consumption of packaging in India will grow to meet the world average.
- In the next five years, the sector is expected to triple to around \$ 60 Billion.
- There might be volatility in the prices of draft paper
- Affiliated industries will support the growth.
- Increasing demand and high volumes will trigger consolidation and setting up to large automatic plants.

6. RISK & CONCERNS

In the near term, political uncertainties, inflation, high interest rates, rising commodity prices and perceived slowdown on policy matters are management's major concerns.

Input Costs : Input costs have risen over the year and resulted in higher input costs. While the Company continues to pursue cost reduction initiatives, increases in commodity prices and other costs resulting from inflationary pressures could impact the Company's profitability to the extent that the same are not absorbed by the market through price increases and/or could have a negative impact on the demand.

Competition in the Industry

Company operates in a competitive scenario comprising of Indian registered, unregistered and small business players and also multinational players resulting in a stiff competition from all these players.

Changes in Government policies

Changes in Government policy, changes in interest rates, revision of duty structure, changes in environmental regulations etc. may have an adverse impact on the profitability of Company. Due to the competitive nature of the market, the cost increases as a result of these changes may not be easily passed on to the customers.

Legal and Compliance Risk

We will be subject to extensive regulation by SEBI, Stock Exchanges, RBI and other market regulators in India. New laws / rules and changes in any law and application of current laws / rules could affect the manner of operations and profitability.

Sensitivity to economy and extraneous factors

Company's performance is highly correlated with the economy. The macro economic variables such as consumer spending, unemployment levels affect the business performance of the Company. Any adverse development on economic front may affect the profitability of Company.

Changes in tax, tariff or fiscal policies: Imposition of additional taxes and levies designed to limit the use of automobiles could adversely affect the demand for the Company's products. Changes in corporate and other taxation policies, as well as changes in export and other incentives given by various governments, or import or tariff policies could also adversely affect the Company's financial results.

Political instability, natural disasters, fuel shortages/prices, epidemics, labour strikes: The Company's products are exported to a number of different geographic markets. Consequently, the Company is subject to various risks associated with conducting the business both within and outside the domestic market and the operations may be subject to political instability, regional conflicts, natural disasters, fuel shortages, epidemics and labor strikes.

7. Opportunities / Strengths

Cost effectiveness: India's cost effective manufacturing base helps in giving more opportunities for the industry in terms of cheap labour, raw materials etc which delivers growth for the industry.

Relatively low-penetration levels: In terms of current market size, the Indian packaging market is relatively small as compared to the other emerging markets like China, South Korea and Brazil.

Export Potential: Sourcing from low-cost countries has increased, which in turn, has enhanced India's potential as an packaging hub.

Proximity to Emerging Markets: India's proximity to emerging markets such as Asia and Africa is another advantage. Shipments to Europe from India are more cost-effective as compared to those from Brazil and Thailand.

8. INTERNAL CONTROL SYSTEM AND OTHER ADEQUACY

The Company has a good system of internal control considering the size and nature of operations.

The internal control system covers following aspects of business process and reporting systems:

- Financial propriety of business transactions.

- Accurate financial reporting of transactions as per applicable Accounting Standards and Policies.
- Safeguarding assets of the Company.
- Compliance with prevalent statutes, Listing Agreement provisions, management authorisations, policies and procedures.
- Review of information technology and other business process systems so as to suggest ways and means of cost optimisation.

An independent internal audit function is an important element of the Company's internal control system. The management and the internal auditors continuously monitor the operation of the internal control system. Internal audit reports are regularly discussed and corrective measures, where required, are taken.

Further, the Audit Committee meets the internal and statutory auditors to be assured of the operations of the internal controls. The audit Committee also reviews the internal audit findings.

9. DISCUSSION ON FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

During the year under review, due to pressure of inadequate working capital, Company's turnover continued to be adversely affected.

During the year under review, the Company has recorded total income of Rs. 55.12 crores as against the total income of Rs. 50.37 crores in the corresponding previous year, thus recording an increase of 9.42% over the previous year. The Loss for the year stands at Rs. 4.03 crores as against the corresponding figure of Rs. 20.79 crores.

A brief review of the performance of different divisions of the Company during the period is given herein below:

ii. Machinery Division

10. MATERIAL DEVELOPMENTS IN HUMAN RESOURCES/INDUSTRIAL RELATION FRONT

A cordial industrial relations environment prevailed at all the manufacturing units of the Company during the year. There was constant focus on all round organizational development. A well defined Performance Management System has been introduced to monitor the progress made by all members. Regular promotions are granted and succession plans are effectively implemented. Our system of compensation is as per the market trends and job requirements. Other benefits to employees are provided for motivation

11. CAUTION STATEMENT

Statements in the Management discussion and Analysis describing the Company's objectives, projections, expectations and estimates regarding future performance may be "forward-looking statements" within the meaning of applicable securities laws and regulations and are based on currently available information.
