OPERATIONS

Despite sluggish trend in the domestic market during the year, the turnover for the year was higher by 15%, compared to the previous year thanks to the rise in exports by 46%. The profit after tax for the year under review is ₹ 7.11 Crs as against ₹ 7.91 Crs of the previous year. The decline in profits was mainly on account of price pressures coupled with rising power costs.

PROSPECTS

The current scenario in the domestic market continues to be sluggish. The industrial segments we cater to are experiencing a demand crunch and the new projects are also getting deferred. The Company is trying to overcome the impact of slowdown in its traditional market segment by exploring new geographies, new products and new segments. A beginning has been made by establishing contacts with some new overseas potential customers.

NEW PROJECT

In view of the company's plan to enter into high integrity static castings and to improve the current capabilities, work on the execution of the Greenfield Project at Dharwad was expedited. The project however, has got slightly delayed due to the Court's restrictions on stone quarrying and crushing and delay in getting electric power from the dedicated 33 KV electricity line. The Project with expected capital outlay of approximately ₹ 44 Crs. is in advance stages and is expected to be operational soon after the power is charged to our substation.

QUALITY MANAGEMENT

The Company's commitment to high standards of quality continues against competitive price pressures. The Quality Management System of the company was recertified to ISO 9001:2008 in this year.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The slowdown, the worst experienced over last two decades according to many, has adversely impacted the markets and the economy. In times like these, the mettle of the Company's Management gets severely tested. It is a matter of immense satisfaction that by its insightful management of processes and systems, backed by the commitment and unsparing efforts of its human resources at all levels, the Company has not only emerged unscathed by the slowdown but even bettered its turnover by about 15 % compared to the year preceding. This was possible due to substantial increase in exports despite drop in sale to domestic market.

In the domestic market there was a slowdown in our traditional segments however; Company's performance in other segments improved through sustained marketing efforts and competitive pricing resulting in pressure on margins.

In the Petro segment the Company has made a comeback by garnering orders for replacement market and also making an entry in overseas market for Reformer Tubes.

THREATS AND OPPORTUNITES

The slow down continuing unabated, inflationary cost spiral, intense competition for market share and the ageing of the Company's productive assets are threats that loom large.

These very threats, when viewed positively, create a heightened sense of fast forward initiatives. The Company is responding proactively by (i) developing overseas new customers (ii) working with project consultants in the steel segment (iii) pursuing orders for Reformer Tubes to cater to the new as well as replacement requirements and (iv) augmenting its capacities and capabilities not only for its traditional segments but also for high integrity critical static castings by putting on stream a new manufacturing facility at Dharwad.

With resilient and diversified measures for innovation and cost containment and focus on building customer base with quality and timely delivery, the outlook for the year 2013-14 is positive.

RISK & CONCERNS

The Company, like all business entities in the country, is exposed to business and economic risks arising out of slow down, and inflationary cost spiral, especially in prices of power & fuel and other inputs. The repeat of inadequate monsoon of last year could further hurt the economy.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
