MANAGEMENT DISCUSSION AND ANALYSIS REPORT

COMPANY OVERVIEW:

The Company which was established in the year 1962, has a state of the art manufacturing facility spread over a 20 acre plot of land located at Karamsad in Gujarat State, about 45 km from Vadodara. The Company enjoys the leadership position in design, manufacture and marketing of glass-lined reactor vessels, storage tanks, valves and pipe & fittings. The Company also undertakes design and fabrication of specialized chemical process equipment in Alloy steel. It has created for itself a niche position in the chemical process equipment market for proprietary products manufactured by it such as Agitated Nutsche Filters & Filter Dryers, Wiped Film Evaporators, EconoMix Mixing Systems, Thermal Control Units and PTFE lined pipes & fittings. Its access to the Mavag's high end technology for top driven Spherical Dryers, Agitated Nutsche Filters & Filter Dryers for sterile applications and Magnetic Drive Agitators has complemented the Company's position as a complete process solution provider for pharmaceuticals, bio pharmaceuticals, chemicals and allied segments.

INDUSTRY STRUCTURE AND DEVELOPMENT:

While the chemical industry in India grew as a whole at more than 11% in 2011, the Pharmaceutical industry grew by over 18% during the year and it is expected to grow at a CAGR of 15% till 2015. The continued focus on India as a base for bulk drugs, both of a generic nature and increasingly for specialty patent protected drugs and chemicals, the industry is expected to continue its growth momentum in the near term.

With investments by established Companies, both Indian and multi nationals, as well as from new Companies, your Company expects to see broadening of its customer base as well as increasing revenues from its existing customers.

OPPORTUNITIES & THREATS:

New markets due to migration of chemical business into India from the western world continue to be an opportunity for your Company's products. In addition to the inclusion of Mavag products your Company has potential for greater share of the customer spend. In addition to the growth in the chemical industry, the capital spend in fertilizer, petrochemical, power, bio technology is expected to offer opportunities for growth.

With multiple code accreditations that allows our products to be sold overseas in markets in USA, Europe and China, your Company is poised to exploit the export markets as well.

Commodities price fluctuations, especially in steel, high rate of inflation and interest rates could hamper the industry growth.

FINANCIAL PERFORMANCE:

The market environment had picked up during the year. Rise in raw material input cost, increased cost of out sourcing due to inflationary pressure and increase in borrowing cost have impacted profitability.

Sales of the Company increased by 35% in the second half of the year. Lower sales in first half of the year, however, had an adverse impact upon the overall performance of the Company. The growth witnessed by the Pharmaceutical and Specialty Chemicals during the year helped the Company in sustaining the strong build up of order backlog which is expected to show better performance in the next year.

SEGMENT WISE OPERATIONAL PERFORMANCE:

Chemical Process Equipment

This Division of the Company designs, manufactures and markets GMM Pfaudler Reactor Systems product line which primarily includes glass-lined corrosion resistant reactors, storage vessels and alloy steel equipment.

This Division reported sales of ₹ 1,220.17 million, 4.6% lower than that of previous year due to lower sale of alloy steel equipment. This division contributes to 85% of the total sales of the Company. This Division of the Company continues to enjoy the number one position in manufacturer of glass-lined equipment in India. The profit from this segment was ₹ 177.4 million, a decrease of about 4.5% over the previous year due to higher cost of raw materials of alloy steel equipment. The capital employed for this division was ₹ 625.9 million increased by over 29% from the previous year level, due to built up of inventory driven by higher order backlog.

Mixing System

This Division designs, manufactures and markets EconoMix Agitators which provide solutions to customer's mixing requirements. In addition to serving the CPI this Division also caters to the bio-technology, mining and waste water treatment industry. Sales of this Division of the Company decreased by over 32% to ₹ 110.54 million from 162.90 million in the previous financial year. The profit from this segment was ₹ 10.83 million, a decrease of more than 41% over the previous year. This segment was most affected by the rise in input cost of the drive systems. Capital employed for this Division was ₹ 30.34 million decreased by over 27% from the previous year.

Filtration & Separation

This Division's primary business is design, manufacture and marketing of Agitated Nutsche Filter & Filter Dryers for separation of solids & liquid and Wiped Film Evaporators for separation of liquids & liquids. Mavag's high end technology and products have greatly benefited this Division. This Division of the Company reported a sales of ₹ 109.50 million, an increase of 6% over previous year in this Division. Profits however were lower by 11% at ₹ 6.30 million. Capital employed for this Division was ₹ 36.72 million decreased marginally by 0.4% from the previous year.

OUTLOOK:

Demand for Company's product and services have shown encouraging signs as reflected by the increase in order intake during first quarter of the financial year 2011-12. The backlog as at end June 2011 increased by 48% to ₹ 1,258 million as compared to the same time in the year 2010-11. Additional focus is being given on the Non Glassline business which includes Tailor Made products, Proprietary Products and Mavag's high end products. With customers increasing investment in new projects and capacity enhancement, the Non Glassline Alloy products is expected to improve the business environment of the Company.

RISKS AND CONCERNS:

The Company's export business in the current year has been impacted by the global recession. Some of the global economies are yet to recover from the slowdown and uncertainty still persists due to inflation, withdrawal of the stimulus packages and rising interest rates. This may also have an impact on Company's future exports business.

We have market risk exposure to foreign exchange rates mainly on account of exports and investments in foreign subsidiary Companies. Due to unprecedented volatility in almost all major foreign currencies the export realizations are subjected to the exchange fluctuation risk.

The Company's surplus funds are invested in fixed deposits with banks and in different mutual funds. Income from these investments has market risk exposure to the extent of interest rates fluctuations, short term debt and the equity market.

The Company is impacted during summer period by Gujarat State's difficult power supply situation leading to cuts and load shedding. Further, the power tariffs in Gujarat State are one of the highest in India. Continuous rise in the oil price in India and abroad has the effect of increasing the cost of electricity. All these factors affect output and profitability. Company's investment in the natural gas furnace will help overcome the bottleneck caused by the power supply situation.

Finally, the Company's primary raw material is steel. It had shown some signs of rise, especially stainless and other alloy steels. Certain orders with long manufacturing cycle time may be exposed to the risk of material price volatility.

The Company has a Risk Management Policy framework in place for continuous identification, assessment and measurement of all significant risks. These are reviewed at periodical intervals and the management takes specific action towards minimization and control of areas of risk considering various parameters.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY:

The Company works with an established framework of internal controls. Policies have been laid down for operation, approval and control of expenditure. Investment decisions involving capital expenditure are subject to formal detailed appraisal and review by approved levels of authority. Capital and Revenue expenditure are monitored and controlled with reference to pre-approved budgets and forecasts.

A firm of Chartered Accountants that has established reputation in the country ensures adequacy of the internal control systems, adherence to Company's policies and procedures, ensure statutory and other compliances through periodical checks and internal audit.

The Audit Committee and the Board of the Company periodically review the reports submitted by the Internal Auditors and corrective steps taken by the Company.

The Company had carried out a review of its internal control procedures and developed a frame work with the help of an outside Consultant. This is being regularly reviewed to strengthen the control in various business processes.

As the Company manufactures certain equipment which are classified as 'Dual Use' equipment, the Company has put in place 'Know Your Customer' procedure and a system of controls to ensure that the entire process from handling of enquiries to dispatch and service is carefully monitored and controlled to prevent unauthorized use or diversion of our product.

HUMAN RESOURCES & INDUSTRIAL RELATIONS:

The Company firmly believes that its employees are key to driving performance and developing competitive advantage. The emphasis has been on proper recruitment of talent and empowerment while devoting resources for their continuous development. The Company nurtures the strong performance driven culture and maintains its focus on development of human resources with insight into areas of performance Management System, Talent Planning and Reward & Recognition with an objective of maintaining harmonious relations with employees. Training workshops and seminars are regularly conducted for workers, staff and managers of the Company with a view to attract and retain talent. b) Use of Estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles requires the management to make estimates and assumptions that affect the reported balances of assets and liabilities as of the date of the financial statements and reported amounts of income and expense during the period. Management believes that the estimates used in preparation of financial statements are prudent and reasonable. Actual results could differ from the estimates.

c) Fixed assets and depreciation

Fixed assets are stated at cost less accumulated depreciation. Cost includes all expenses related to the acquisition and installation of fixed assets.

Assets acquired under finance lease are capitalized at the lower of the fair value of the leased assets and the present value of the minimum lease payments as at the inception of the lease.

Depreciation is provided pro rata to the period of use, on the straight line method at the rates specified in Schedule XIV to the Companies Act, 1956.

Leasehold land and lease improvements are amortised equally over the period of lease.

d) Asset Impairment

The Company reviews the carrying values of tangible and intangible assets for any possible impairment at each balance sheet date. An impairment loss is recognized when the carrying amount of an asset exceeds its recoverable amount. In assessing the recoverable amount, the estimated future cash flows are discounted to their present value based on appropriate discount rates.

(ii) Long-term investments including strategic investments are carried at cost. Provision for diminution, if any, in the value of each long-term investment is made to recognise a decline, other than of a temporary nature.

(iii) Current investments are stated at lower of cost and fair value and the resultant decline, if any, is charged to revenue.

f) Inventories

Inventories are stated at lower of cost and net realizable value. Cost is determined on the weighted average method and is net of CENVAT credits. Cost of work-in-progress and finished goods includes conversion cost and appropriate production overheads. Excise duty is provided on finished goods held in stock at the end of the year.

Sales are recorded net of trade discounts, sales tax and excise duties.

Dividend income is recognized when the right to receive the same is established.

Interest income is recognized on the time proportion method.
