Weaving Machinery and Spares

The sale of Accessories and Spares of Weaving Machines during the year was Rs.129.75 lakhs against Rs.148.15 lakhs in the previous year.

The continuous import of large number of shuttleless weaving machines, particularly used weaving machines available on affordable prices affected the demand for the 'C' type shuttle weaving machines manufactured by the company. In view of lack of orders, there was no production of weaving machines during the year.

It was not possible to take up production of shuttleless weaving machines considering the techno economic viability by paying high technical know fee demanded by the foreign machinery manufacturers vis-a-vis the price competition of both new and used machines being imported.

Other Engineering Services

The sale of parts for Machine Tools including Tool Holders during the year was Rs.173.07 lakhs

against Rs.175.99 lakhs in the previous year. The export market being highly competitive, the inflow of orders for parts for Machine Tools including Tool Holders during the year was not encouraging.

Outlook

The Company's net worth though has become positive, the carried forward losses of Rs.1130.64 lakhs are yet to be wiped out. Being a reputed manufacturer of high speed automatic 'C' type shuttle weaving machines and is well-known in the Textile Industry, the company is exploring the possibilities for a tie up with any of the reputed foreign machinery manufacturers to manufacture Rapier and Airjet Weaving Machines.

Dividend

The Directors have recommended arrears of dividend on the 6% Cumulative Redeemable Preference Shares for the year ended 31-03-2013 absorbing a sum of Rs.59,66,745/- and the dividend for the year is deferred to maintain financial liquidity. Management Discussion and Analysis Report

I. Industry Structure and developments:

India has the largest installed weaving capacity and it needs to fillup the wide technology gap by developing suitable indigenous shuttleless weaving machines at competitive prices for the indigenization / expansion of the Industry. The Shuttleless looms have been developed in Europe, Japan and later by China to overcome the problems created by the dynamics of the picking mechanism on the conventional Fly shuttle looms and make use of entirely different methods of weft insertion. Airjet, Waterjet, Rapier, Gripper (Projectile) and multiphase are the various types of shuttleless weaving machines.

The weft insertion rates achieved are higher in shuttleless weaving machines and use of electronics has eased the operation of weavers. The quality of cloth obtained in shuttleless weaving machines is far superior and acceptable in the international market. To meet the additional requirement of cloth as well as provide for replacement of aged looms, the demand for shuttleless weaving machines is increasing.

A. Weaving Machinery and Accessories and Spares

The demand for high speed automatic 'C' type shuttle weaving machines manufactured by the Company was affected due to advent of shuttleless technology. While the organized sector is choosing new shuttleless looms, the power loom sector is opting for used looms which are available at affordable prices. Thereby the market for the Company's 'C' type shuttle loom is extinct and only accessories and spares were manufactured during the year.

B. Other Engineering Services

The orders received for Parts for machine tools including tool holders are based on the international demand and is highly price competitive.

II. Opportunities and threats:

A. Weaving Machinery and Accessories and Spares

To encourage the Textile Industry the government has made available the Textile Up-gradation Fund Scheme (TUFS) and thereby the buyers are eligible for both capital subsidy and/or reimbursement of a portion of interest on term loans availed by them. The extension of the scheme for both new and used shuttleless weaving machines has affected the demand for Company's shuttle weaving machines.

The manufacture of shuttleless weaving machines requires import of technology on payment of high technical know-how fee and heavy investment on Machinery and Equipment. Added to the techno economic viability, the threat of import of used machinery is a factor to be reckoned with.

B. Other Engineering Services :

The orders received from the EOU for supply of Parts for machine tools including tool holders depend on the export orders bagged by it. As the international market for parts and tool holders is fluctuating the inflow of orders for the Company are not even and adequate.

III. Segmentwise or Productwise performance

A. Weaving Machinery, Accessories and Spares:

Due to lack of orders for 'C' type shuttle weaving machines, there was no production of weaving machines during the year. Only

Accessories and spares for weaving machines were manufactured and the sales amounted to Rs.129.75 lakhs for the year ended 31-03-2014. Income earned on utilization of the idle Assets of the Company was Rs.300.17 lakhs.

B. Other Engineering Services :

The deemed export of Parts for Machine Tools including Tool holders during the year was Rs.173.07 lakhs. The income earned by undertaking job work was Rs.3.22 lakhs.

IV. Outlook:

The income on utilisation of the idle Assets of the Company will continue to be earned. The manufacture of shuttleless weaving machines depends on having a tie up with a suitable Joint Venture Partner being explored.

V. Risks and Concerns:

The domestic demand of shuttleless weaving machines is growing steadily. The manufacture of shuttleless weaving machines requires heavy investment in capital equipment as well as acquiring technology. This could be possible only by having a tie-up with a joint venture partner / associate. The modalities are being worked out and appropriate decisions will be taken in the best interests of the Company.

VI. Internal Control System and the adequacy:

The company has adequate internal control system commensurate with its size and nature of its business. The Management has overall responsibility for the company's internal control systems to safeguard the assets and to ensure reliability of financial records. The Audit Committee reviews the Financial Statements and ensures adequacy of internal control systems.

VII. Discussion of Financial Performance with respect to Operational Performance:

The Company has achieved revenue from operations including utilization of the idle Assets of the Company, of Rs.812.61 lakhs and net profit of Rs.310.98 lakhs during the year. The limitation in taking up production of Rapier and Airjet weaving machines is inhibiting the growth of revenue.

VIII. Material development in Human Resources / Industrial relations front, including number of people employed:

The number of people employed were reduced to operational level. The relations with labour was cordial during the year. The permanent employees on Roll as on 31-03-2014 were 34.

We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's Internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
