The Company has manufacturing plants at Coimbatore, Hosur, Chennai (Sembium and Thoraipakkam). The company is a public listed company and listed on The Bombay Stock Exchange.

2. Summary of significant accounting policies

2.1 Basis of preparation of Financial statements

These financial statements have been prepared in accordance with the generally accepted accounting principles in India under the historical cost convention on accrual basis, except for certain tangible assets which are being carried at revalued amounts. Pursuant to section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014, till the standards of accounting or any addendum thereto are prescribed by Central Government in consultation and recommendation of the National Financial Reporting Authority, the existing Accounting Standards notified under the Companies Act, 1956 shall continue to apply.

Consequently, these financial statements have been prepared to comply in all material aspects with the accounting standards notified under Section 211(3C) [Companies (Accounting Standards) Rules, 2006, as amended] and other relevant provisions of the Companies Act, 2013.

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current – non current classification of assets and liabilities.

2.2 Use of estimates

The preparation of financial statements in conformity with the generally accepted accounting principles requires the management to make estimates and assumptions that affect the reported amount of assets, liabilities, revenue and expenses and disclosure of contingent liabilities as of the date of the financial statements. The estimates and assumptions used in the accompanying financial statements are based upon the management's evaluations of the relevant facts and circumstances as of the date of the financial statements. Actual results could differ from these estimates.

2.3 Tangible assets

Tangible Assets are stated at acquisition cost, net of accumulated depreciation and accumulated impairment losses, if any, except in case of plant and machineries which were revalued in 1991. Cost includes related duties, freight etc. and interest on borrowed funds, if any, attributable to acquisition/construction of qualifying fixed assets and is net of CENVAT and VAT credits.

Subsequent expenditures related to an item of fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance

Items of fixed assets that have been retired from active use and are held for disposal are stated at the lower of their net book value and net realisable value and are shown separately in the financial statements. Any expected loss is recognised immediately in the Statement of Profit and Loss.

Losses arising from the retirement of, and gains or losses arising from disposal of fixed assets which are carried at cost are recognised in the Statement of Profit and Loss.

Depreciation on tangible assets (other than revalued assets which have been fully depreciated) is provided on a pro-rata basis on the straight-line method over the estimated useful lives of the assets which are generally in accordance with those specified in Schedule II to the Companies Act, 2013. However, the estimates of useful lives of certain assets, based on a technical evaluation, are different from those specified in Schedule II which are set out below:

Assets	Useful Life
Plant and Machinery	20 years

Assets costing individually upto ₹. 5,000/- are fully depreciated in the year of purchase.

Pursuant to the enactment of the Companies Act, 2013 (the 'Act'), the Company has, effective 1st April 2014, reviewed and revised the estimated useful lives of its fixed assets, generally in accordance with the provisions of Schedule II to the Act and in certain cases based on technical evaluation, longer lives than those indicated in Schedule II consequently,

- the depreciation charge and profit before tax for the year ended March 31, 2015 is lower by ₹. 2,99,356.
 - In case of fixed assets where there is no remaining useful life, as determined above, the Company has adjusted the written down value (net of residual value) as at April 01, 2014 aggregating to ₹. 22,74,723 (net of tax) to the Retained Earnings, as allowed by the Act.

BIMETAL BEARINGS LIMITED

Notes to the financial statements

2.4 Intangible assets

Intangible assets are stated at acquisition cost, net of accumulated amortization and accumulated impairment losses, if any. Intangible assets are amortised on a straight line basis over their estimated useful lives. A rebuttable presumption that the useful life of an intangible asset will not exceed ten years from the date when the asset is available for use is considered by the management.

Gains or losses arising from the retirement or disposal of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognised as income or expense in the Statement of Profit and Loss. The amortization rates used are:

Assets	Useful Life
Technical Know-how	5 years
Computer Software	6 years

2.5 Impairment

Assessment is done at each balance sheet date as to whether there is any indication that an asset (tangible and intangible) may be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets, is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the asset/cash generating unit is made. Assets whose carrying value exceeds their recoverable amount are written down to the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is also done at each balance sheet date as to whether there is any indication that an impairment loss recognised for an asset in prior accounting periods may no longer exist or may have decreased.

2.6 Investments

Investments that are readily realisable and are intended to be held for not more than one year from the date, on which such investments are made, are classified as current investments. All other investments are classified as long term investments. Current investments are carried at cost or fair value, whichever is lower. Long-term investments are carried at cost. However, provision for diminution is made to recognise a decline, other than temporary, in the value of the investments, such reduction being determined and made for each investment individually.

2.7 Inventories

Inventories are valued at cost or net realisable value, whichever is low. Costs is determined using weighted average method. Cost includes cost of purchase excluding credits availed under CENVAT and VAT scheme, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Provision is made for slow moving and obsolete items of inventories.

2.8 Revenue recognition

Revenue from sale of goods is recognised when the significant risks and rewards of ownership in the goods are transferred to the buyer as per the terms of the contract and are recognised net of trade discounts, rebates, sales taxes and excise duties.

Income from duty drawback is recognised on an accrual basis.

2.9 Other Income

Interest: Interest income is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

Dividend: Dividend income is recognised when the right to receive dividend is established.

Insurance claim: Insurance claims are recognised when the claims are assessed to be receivable.

2.10 Foreign currency transactions

Foreign Currency transactions are recorded at the exchange rates prevailing on the date of the transactions. At the year end all monetary assets and liabilities denominated in foreign currency are restated at the closing exchange rate. Exchange differences arising out of actual payments / realisations and from the year end restatement are recognised in the Statement of Profit and Loss.

Forward Exchange Contracts

The premium or discount arising at the inception of forward exchange contracts entered into to hedge an existing asset/liability, is amortised as expense or income over the life of the contract. Exchange differences on such a contract are recognised in the Statement of Profit and Loss in the reporting period in which the exchange rates change. Any profit or loss arising on cancellation or renewal of such a forward exchange contract are recognised as income or as expense for the period. 2.12 Current and Deferred Tax

Tax expense for the year, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the taxation laws prevailing in the respective jurisdictions.

Deferred tax is recognised for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognised and carried forward only to the extent that there is a reasonable / virtual certainty, as applicable, that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date. At each Balance Sheet date, the Company reassesses unrecognised deferred tax assets, if any.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

2.13 Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period attributable to equity shareholders.

The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is termed as a contingent liability.
