In view of the above, your Directors have not recommended any dividend for the year 2013-14.

WORKING OF THE DIVISIONS

Sugar Division

The crushing for the season 2013-14 started on 07.12.2013 i.e. 12 days later as compared to 25.11.2012 in the previous season and ended on 26.03.2014 as against 15.04.2013, 20 days earlier than the previous season. During the season, the plant crushed 58.91 lac quintals of sugarcane in 109 days as against 85.80 lac quintals in 141 days in the previous season. The crushing was lower by 26.89 lac quintals during this season due to a short period of crushing for lack of availability of sugarcane. The sugar recovery overall was lower at 8.96% as against

Annual Report 2013-2014 (18 Months)

9.14% in the previous season. The production of sugar was lower at 5.51 lac quintals, as against 7.81 lac quintals in the previous season.

The crushing for the season 2014-15 started on 02.12.2014 i.e. 5 days earlier as compared to 07.12.2013 in the previous season. During the period from 02.12.2014 to 31.01.2015, the plant crushed 18.70 lac quintals of sugarcane, the sugar recovery was at 9.60% and the production of sugar was 1.80 lac quintals.

For the season 2013-14, on 20.02.2013, the Central Government had hiked the Fair & Reasonable Price [FRP] of sugarcane from Rs.170/- a quintal to Rs.210/- a quintal at a base recovery of 9.5%.

For the season 2014-15, on 14.02.2014, the Central Government had hiked FRP of sugarcane from Rs.210/- a quintal to Rs.220/- a quintal at a base recovery of 9.50%.

For the season 2013-14, the U P Government had announced State Advised Price (SAP) of sugarcane of Rs.280/- a quintal same as that in the previous season, much beyond the paying capacity of the Sugar Mills, which resulted into substantial cane price arrears.

For the season 2014-15, the U P Government had announced a State Advised Price (SAP) of sugarcane of Rs.280/- a quintal same as that in the previous season. The said price would be paid to farmers in two instalments. The 1st instalment would be paid within 14 days @ Rs.240/- a quintal and if the payment is not made in 14 days, it would attract interest. The 2nd instalment of Rs.40/- a quintal has to be made within 3 months after crushing comes to an end. The State Government also announced a reimbursement and subsidy of Rs.20/- a quintal with a break-up of society commission @ Rs.6.60 a quintal; purchase tax @ Rs.2/- a quintal; entry tax on sugar @ Rs.2.80 a quintal; & an additional support @ Rs.8.60 a quintal on payment of entire cane price. In addition to this, the U P Government has linked its additional support of Rs.8.60 a quintal to market forces and has decided that if the price of sugar and its by-products viz. Molasses, bagasse, Press Mud go below or above the benchmark prices viz. Rs. 3,100/-; Rs. 390/-; Rs. 167/- & Rs. 26/- per tonne respectively, during 01.10.2014 to 31.05.2015, it would either reduce the support or increase it in proportion.

The cost of production in U.P. became the highest in the country, which rendered the U. P. Sugar Industry unviable, cash-starved and uncompetitive. There is an urgent need to rationalize the cane pricing policy in U.P. and adopt a 'linkage formula' recommended by the Rangarajan Committee. The two major sugar producing States i.e. Maharashtra and Karnataka, who together contribute for almost 50% of the country's sugar production, have adopted and implemented the 'linkage formula' as recommended by the Rangarajan Committee for determining the cane price automatically. It is understood that a team of senior officials from U.P. had visited Maharashtra and Karnataka to study their cane pricing system and have submitted their report to the State Government but no decision is taken till date in the matter. The U P Government had announced to form a high level committee to determine a fair Sugarcane Pricing Policy.

Recently, the Supreme Court upheld the Allahabad High Court Order that the Sugar Mills must sell the sugar stocks, given as security to the Banks, to clear the sugarcane arrears to farmers.

The Banks have therefore become quite apprehensive due to seizure and forced auction of sugar stocks of several Companies by the State authorities, ignoring the first charge of Banks. The Banks have refused to renew credit facilities for the current season as they want clarity and transparency on the cane pricing policy to take further exposures on U.P. Sugar Mills.

In February 2014, the Central Government had extended sugar export incentives by way of subsidy @ Rs.3,300/- a tonne for export upto 4 million tonnes of raw sugar, which was increased to Rs.3,371/- a tonne for August & September 2014, to improve domestic sugar price and in turn the profitability of the Company.

In a move to bail out the ailing Sugar industry struggling with lower prices and higher stocks, in August 2014, the Food Ministry had hiked import duty on sugar from 15% to 25%; and raised the limit of Ethanol blending with Petrol to 10%.

On 14.8.2014, the U P Government had notified the Molasses Policy for 2013-14 (November-October) with retrospective effect. According to the new policy, 34% of the total molasses produced in U P were reserved for production of liquor, up from 20% earlier. The Policy made it mandatory for Sugar mills to sell molasses to country-liquor manufacturers at prices lower than the market rates.

During the season 2013-14, Molasses produced was 2.71 lac quintals as against 3.98 lac quintals. Bagasse produced was 18.23 lac quintals as against 26.07 lac quintals in the previous season.

The U P Government had announced its Molasses Policy for 2014-15 (November-October), wherein the molasses reservation rate to the country-liquor manufacturers had been reduced from 34% to 15%. The Policy had been

specifically formulated to help the sick driven Sugar industry, which was required to reserve a part of their total molasses production for the country-liquor manufacturers at a rate which is much lower than the market specified prices.

For the season 2014-15, during the period 02.12.2014 to 31.12.2014, Molasses produced was 0.84 lac quintals. Bagasse produced was 5.36 lac quintals.

Power Division

During the sugar season 2013-14, the Plant started on 05.12.2013 as against 01.10.2012 and operated for 131 days as against 250 days in the previous sugar season. The Plant consumed 1.78 lac MT of bagasse as fuel to generate 1.01 lac MW as against 3.95 lac MT of bagasse as fuel to generate 1.89 lac MW in the previous sugar season. The total power exported to the grid was 0.73 lac MW amounting to Rs. 34.31 crore as against 1.47 lac MW amounting to Rs.70.22 crore in the previous sugar season.

For the sugar season 2014-15, the Plant started on 30.11.2014 as against 05.12.2013. During the period 30.11.2014 to 31.12.2014, the Plant consumed 0.50 lac MT of bagasse as fuel to generate 0.25 lac MW. The total power exported to the grid was 0.18 lac MW amounting to Rs. 10.25 crore.

Spirits Division

During the 18 months period under review, the production of Rectified Spirit (RS) was 129.54 lac bulk litres as against 83.88 lac bulk litres in 12 months period of the previous year. The production of Extra Neutral Alcohol (ENA) was 59.72 lac bulk litres as against 39.97 lac bulk litres in 12 months period of the previous year. The quantity of Country Liquor supplied was 14.85 lac cases as against 7.57 lac cases in 12 months period of the previous year. The sale of IMFL was lower at 1.93 lac cases as against 2.94 lac cases in 12 months period of the previous year.

Agrotech Division:

Seed Division

With effect from 1.7.2013, the Company has merged its Seed Division into Agrotech Division, in view of surrender of the farm lands by the Company in June 2013, which were declared as surplus under the U.P. Imposition of Ceiling on Land Holding Act, 1960.

SUBSEQUENT FINANCIAL YEAR 2015-16 (15 Months)

Sugar Division

The crushing season 2014-15 is already started from 02.12.2014 and is expected to continue up to end of March 2015.

The Central Government is likely to announce export incentives for the year 2014-15 (October/ September) by way of subsidy of Rs.4,000/- a quintal for export of about 1.4 million tonnes raw sugar to enable the Sugar Mills to export raw sugar at a competitive global prices and to trim inventory piled-up due to the 5th straight year of surplus output, before the end of the season, which may result into increase in the domestic price of Sugar.

Power Division

The Cogen Power Plant is already started from 30.11.2014 and is expected to run up to 2nd week of April 2015.

Recently in December 2014, UP Electricity Regulatory Commission has revised the tariff rate for sell of power from Rs.4.81 per unit to Rs.5.50 per unit w.e.f. 01.4.2014, which will result into additional revenue. The Company has applied for Renewable Energy Certificate for 5,271 units, which will generate additional revenue.

Spirits Division

The sugar cane crushing is expected to be the same as in the previous season. Therefore, the total molasses availability will also be almost the same.

Report of the Board of Directors as to such erosion, causes for such erosion

As per the audited Accounts of the Company for the 18 months period ended 31.12.2014, the Loss of the Company is Rs.120.02 crore. The Accumulated Loss is Rs.150.59 crore. The Net Worth is Rs.(114.53) crore as calculated on the basis of book value of the Assets of the Company (without considering Revaluation of its Assets amounting to Rs.232.06 crore).

Causes for erosion:

The performance of the Company was adversely affected during the years 2011-12; 2012-13 & 2013-14 (18 months) on account of the following reasons:

1. In the year 2011-12, there was a loss of Rs.1998.50 lac, which included a onetime Exceptional Item relating to the payment of differential cane price of Rs.1281.54 lac pertaining to the Sugar Season 2007-08 as per the Hon'ble Supreme Court Order dated 17.12.2012.
2. In the year 2011-12 the Company had to sell 10% of its total production of sugar at levy price.
3. In the years 2011-12 and 2012-13, the State Advise Price (SAP) of sugarcane was increased substantially by UP Government by Rs.40/- per quintal in both the years, increasing it from Rs.200/- per quintal in the year 2010-11 to Rs.240/- and further to Rs.280/- per quintal for the years 2012-13 respectively and thereafter for 2013-14 also the same SAP was fixed, which substantially affected the cost of production of sugar in all the years. As compared to that the market price of sugar remained lower at about Rs.2,650/- per quintal than the cost of production during the years ranging between Rs.2,800/- per quintal and Rs.3,600/- per quintal. The above resulted into huge losses in the Sugar Division.
4. Sugarcane production went down due to excessive early rainfall affecting yield & recovery.
5. The sugar recovery was lower in all the years as compared to that in the year 2010-11.
6. Distillery was forced to shutdown for a while in the year 2012-13 due to the Kumbhmela.

Steps & Measures

1. Uttar Pradesh Power Corporation Limited (UPPCL) has revised the power tariff upward, which will result into additional profit.
2. In view of the expectation of announcement for incentive on export of raw sugar by the Central Government, the average realization of sugar sale rate may improve.
3. In the year 2013-14, the promoters have brought in fresh capital amounting to Rs.306.50 lac to improve the Net Worth.
4. Recovery is better this season due to wide spread rainfall and better cane varieties planted.

With respect to para (xvii) of the annexure to Auditors' Report, the Directors would like to clarify that the necessary steps will be taken to raise long term funds in due course.

CONSERVATION OF ENERGY:

- We have replaced steam driven drives with electric drives with the latest technology with VFDs along with automation through Distributed Control System (DCS). The electric drives consume much less energy to drive the mills and thereby results in additional saving of bagasse ultimately benefiting by an increase in power sales.
- After reviewing the benefits of Mono Magnetic System installed in the previous year, we have added few more such systems in our process.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

SCENARIO IN INDIA

Sugar

India is the second largest producer of sugar in the world. The sugar industry is the largest agro-processing sector in India. It is dominated by the co-operative sector in terms of number of units. However, with private players going in for major expansions, the gap between the private and co-operative sector is expected to narrow down in the future in terms of installed capacity as well as production. The industry is regulated by the Central and State Governments by way of cane growing area, sugarcane pricing, import-export policy, government policy etc. Sugar cane is cultivated in around 5 million hectares in India. The major sugarcane producers are Uttar Pradesh, Maharashtra, Tamilnadu and Karnataka. Uttar Pradesh alone contributes about 47% of the total acreage and has 38% share in the total domestic production. Sugar cane is the only source of sugar production in India unlike many other countries, which produce sugar from sugar beat.

Power

Bagasse based cogeneration in sugar factories in India has an established potential capacity of 7000 MW. The installed capacity is 2250 MW in 190 plants in India today. Most plants are set up with cogeneration plant power cycle at pressures of 45, 67 and 87 kg/cm². About 750 MW capacity is in various stages of construction at 50 plants in India. Therefore, from among 550 sugar factories, cogeneration has been set up in about 240 factories and the remaining operational factories are selling bagasse in the market as is the usual practice.

Spirits

The alcohol industry is segregated into five major segments i.e. beer, wine, IMFL, bottled in origin alcoholic products and country liquor. IMFL consists of whisky, rum, brandy, gin and vodka. The increase in per capita income of the middle class led by growing young population force, urbanization and change in lifestyles are factors which will keep the demand for IMFL & country liquor robust. Though the per capita consumption for alcohol beverages in India is comparatively lower as against developed countries, the sector has a promising growth.

COMPANY STRUCTURE & DEVELOPMENT

Sugar

The sugar factory is located at Baheri, Dist. Bareilly, Uttar Pradesh, one of the largest producers of sugarcane in the country. The plant started with an initial crushing capacity of 800 tons of cane crushed per day (tcd), which had been gradually increased to 7,200 tcd over time. The Company has one of the most modern and efficient sugar factories in the country. Through constant investment in Cane Research & Development, the Company has successfully developed high yielding and early maturing varieties of sugarcane.

Power

The Company has commissioned its 44mw Bagasse based Cogeneration Power Plant at Baheri. It is the most efficient and largest capacity single plant in the sugar Cogeneration Sector in U.P. & perhaps the country, a world class plant having a state-of-the-art Process Control system with performance monitoring software. The Company exported majority of power produced to the grid and will benefit from the well established government policies related to renewable energy and also perhaps get benefit of carbon trading rights or renewable energy certificate.

Spirits

The Company had set up a Distillation Plant in order to effectively harness molasses, a by-product generated by its sugar factory. Its capacity has been increased to 50,000 klp over a period of time. It has a modern and sophisticated process of continuous fermentation of molasses, which gives higher yields and produces good quality spirit. The Company manufactures Rectified Spirit, Extra Neutral Alcohol, Country Liquor, IMFL like whisky, rum, gin, vodka etc.

The Company has an Effluent Treatment Plant to treat the distillery waste water, which is based on the state-of-the-art technology developed by Bacardi Corporation, USA. In the process, it generates methane rich Bio-gas, which is

Annual Report 2013-2014 (18 Months)

burnt in the boilers generating steam and the effluent from the Bio-reactor is further treated in a reverse osmosis plant and is further used to manufacture bio-compost. This bio-compost is then mixed with other nutrients to produce bio fertilizers, which is then sold.

OPPORTUNITIES & THREATS

Sugar

The Company expects a similar crushing period this season as that of the previous season. Untimely change in government policy and upward pricing in terms of Fair Remunerative Price (FRP) and State Advised Price (SAP) can prove a threat to the Company.

Power

The Company has set up a state of the art cogeneration plant operating at very high pressure of 115 kg/cm². Therefore, it is very efficient when compared to majority of the cogeneration plants having power cycle at pressures of 45, 67 and 87 kg/cm². This will therefore translate into producing more power from same bagasse. Besides, as our boiling house is also very efficient, there will be more savings of bagasse per ton of sugar produced and this saved bagasse will also enable us to produce more power.

Spirits

The demand for spirits is likely to be promising in the years to come. The Company's products have a strong hold in the North and has been able to sustain competition. The alcohol beverage industry being under the domain of the respective State government policies, rapid and unexpected changes may prove a threat to the Company. As also, the slow process to penetrate our brands in new markets, competition from existing peers, levy of various duties have an impact on the division of the Company.

OUTLOOK

Sugar

The sugar industry will be a major player in producing cost effective energy and fuel from its by-products bagasse and molasses. Bagasse can be processed for co-generation of power. Also, ethanol produced from molasses can be used as motor fuel by blending it with petrol.

Power

The season ahead should see the proper utilization of the cogeneration plant and therefore the exportable power will give rise to more revenues. Also due to the rate hike, the income / profits will rise over previous season.

Spirits

The consumption of liquor has been at a steady rise.

RISKS AND CONCERNS

Sugar Division being agro based is vulnerable to various risks enumerated below:

Raw Material Risk:

Sugarcane is the principal raw material for manufacture of Sugar, Spirits and Power and its shortages could be on account of pest attacks, crop diseases, diversion of land by farmers. Shortage of the basic raw materials would severely impact the working of the divisions of the Company. To mitigate these risks, the Company has adopted sound agronomic practice and improvement in basic infrastructure facilities.

Price Risk:

Sugar price is susceptible to fluctuations on account of international demand and supply, government pricing for cane as well as sugar, variance in production capacities of peers. Any change may affect the margins of the Company.

Regulatory Risk:

The policies of the Central and State Governments in terms of Fair Remunerative Price (FRP) and State Advised Price (SAP) for sugarcane have an impact on the operations of the Company. Increase in duties on liquor products has an impact on the margins of the Company.

INTERNAL CONTROL SYSTEM

The Company has an appropriate internal control system for its various functions with the ultimate objective of improving efficiency in its operations, better financial management and compliance with regulations and applicable laws. The Company has appointed an Internal Auditor [External]. All operating parameters are well defined and monitored periodically. The detail internal audit reports are discussed at length at various levels and thereafter the said reports are also placed before the Audit Committee for review and discussion.

SEGMENT-WISE FINANCIAL PERFORMANCE

The information relating to the financial performance of the Company is provided in the Directors' Report.

MATERIAL DEVELOPMENTS IN HUMAN RESOURCES/INDUSTRIAL RELATIONS FRONT
