The Indian pharmaceuticals market, along with the market of China, Brazil & Russia, spearhead growth within these markets.

Indian pharmaceutical sector industry supplies over 50 % of global demand for various vaccines, 40 % of generic demand in the US and 25 % of all medicine in UK. India contributes the second largest share of pharmaceutical and biotech workforce in the world. The pharmaceutical sector in India was valued at US\$ 33 billion in 2017. Indian drugs are exported to more than 195 countries in the world, with the US as the key market. Generic drugs account for 20 % of global exports in terms of volume, making the country the largest provider of generic medicines globally and expected to expand even further in coming years. Significant Accounting Policies

1. Basis of Preparation of Financial Statements

The financial statements are prepared under the historical cost convention, except for certain fixed assets which are revalued, in accordance with the generally accepted accounting principles in India and the provisions of the Companies Act, 2013.

2. Use of Estimates

(i) The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognised in the period in which the results are known/ materialised.

(ii) Fixed Assets

On transition to Ind AS, the Company has elected to continue with the carrying value of all of its property. Plant and equipment recognised as at April 1 2017 measured as per the previous GAPP (Indian GAPP) and use that carrying value as the deemed cost of the property, plant and equipment.

(iii) CAPITAL WORK IN PROGRESS

On transition to Ind AS, the Company has elected to continue with the carrying value of all of its capital work in progress recognised as at April 1, 2017 measured as per the previous GAAP (Indian GAPP) and use that carrying value as the deemed cost of the capital work in progress.

Intangible Assets are stated at cost of acquisition and development.

(iv) Depreciation and Amortisation

Depreciation on fixed assets is provided as per schedule II of the companies act, 2013.Land is not amortised.

(v) Impairment of Assets

An asset is treated as impaired when the carrying cost of asset exceeds its recoverable value. An impairment loss is charged to the Profit and Loss Account in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount. On transition to Ind AS the company has elected to continue with the carrying value of all of its intangible assets recognised as at 1 April 2017 measured as per the previous GAPP (Indian GAPP) and use that carrying value as the deemed cost of the intangible assets.

(vi) Foreign Currency Transactions

- (a) Transactions denominated in foreign currencies are recorded at the exchange rate prevailing on the date of the transaction or that approximates the actual rate at the date of the transaction.
- (b) Monetary items denominated in foreign currencies at the year end are restated at year end rates. In case of items which are covered by forward exchange contracts, the difference between the year end rate and rate on the date of the contract is recognised as exchange difference and the premium paid on forward contracts is recognised over the life of the contract.
- (c) Any income or expense on account of exchange difference either on settlement or on translation is recognised in the Profit and Loss account except in case of long term liabilities, where they relate to acquisition of fixed assets, in which case they are adjusted to the carrying cost of such assets.

(vii) Investments

Long Term Investments are stated at cost. Provision for diminution in the value of long-term investments is made only if such a decline is other than temporary.

(viii) Inventories

Items of inventories are measured at lower of cost and net realisable value after providing for obsolescence, if any. Cost of inventories comprises of cost of purchase, cost of conversion and other costs including manufacturing overheads incurred in bringing them to their respective present location and condition. Cost of raw materials, process chemicals, packing materials, trading and other products are determined on weighted average basis.

The expense is recognised at the present value of the amounts payable determined using actuarial valuation techniques. Actuarial gains and losses in respect of post employment and other long term benefits are charged to the Profit and Loss account.

(xii) Borrowing Costs

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to Profit and Loss account.

(xiii) Provision for Current and Deferred Tax
