Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit

opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that :
 - (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company.
 - (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
 - (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting.

7. Because of the Inherent Limitations of Internal Financial Controls Over Financial Reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error of fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions or that the degree of compliance with the policies of procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the institute of Chartered Accountants of India.

SIGNIFICANT ACCOUNTING POLICIES

1. Basis of preparation of Financial Statements

The financial statements of the Company have been prepared on accrual basis under the historical cost convention & ongoing concern basis in accordance with Generally Accepted Accounting Principles in India ('Indian GAAP') to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ('the Act') / the Companies Act, 1956, as applicable.

2. Use of Estimates

The preparation of Financial Statements in conformity with Generally Accepted Accounting Principles (GAAP) in India requires management to make estimates and assumptions that affect the reported balances of assets and liabilities, revenues and expenses and the disclosures relating to contingent liabilities as at the date of Financial Statements. Changes and estimates are recognised in the year they arise.

3. Fixed Assets

(a) Tangible Assets

Tangible fixed Assets are carried at cost less accumulated depreciation and impairment, if any. Cost comprises the purchase price or construction cost including any attributable cost of bringing the asset to its working condition for its intended use.

(b) Intangible Assets

Intangible fixed assets are carried at cost less accumulated amortisation and impairment, if any. Cost comprises the purchase consideration paid for software and such other items and any attributable cost of bringing internally generated asset to its working condition for its intended use.

(c) Capital Work in Progress

Capital work in progress includes the acquisition/commissioning cost of assets under expansion/ acquisition and pending commissioning. Projects under which tangible fixed assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable borrowing costs. Expenditure of revenue nature related to such acquisition/expansion is also treated as Capital work-in-progress and capitalised along with the asset on completion of the expansion project or otherwise on commencement of commercial use of the asset.

4. Depreciation and Amortization

a) Tangible Assets

Depreciation has been provided under the Straight Line Method on Buildings & Flats, Plants & Machinery and Furnace and on other assets under the Written Down Value Method at the rates specified as per Schedule II of the Companies Act, 2013. Depreciation on Additions to assets or where any asset has been sold or discarded, is calculated on a Pro-rata basis from the date of such addition or upto the date of such sale or discard as the case may be,

b) Intangible Assets

Software is amortised over a period of three years from the date of its purchase or acquisition.

c) Leasehold Land

Premium on leasehold land is amortised over the balance period of lease.

d) Impairment of Assets

The Company assesses at each Balance Sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount is the greater of the net selling price and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value based on an appropriate discount factor. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the Statement of Profit and Loss. If at the Balance Sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to maximum of depreciable historical cost.

5. Current / Non - Current Classification

All assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013.

An asset is classified as current when it satisfies any of the following criteria :

- i) it is expected to be realized in, or is intended for sale or consumption in, the entity's normal operating cycle;
- ii) it is held primarily for the purpose of being traded;
- iii) it is expected to be realized within twelve months after the balance sheet date;

- iv) it is cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the balance sheet date.

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria :

- i) it is expected to be settled in the entity's normal operating cycle;
- ii) it is held primarily for the purpose of being traded;
- iii) it is due to be settled within twelve months after the balance sheet date;
- iv) the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the balance sheet date.

All other liabilities are classified as non-current.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out above which are in accordance with the revised Schedule III to the Act.

Based on the nature of services and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycles as ranging from 12 months to 36 months depending upon each activity for the purpose of current and non-current classification of assets and liabilities.

6. Valuation of Stock

Stock of raw materials, packing materials and stores & spares are valued at weighted average cost.

Cost comprises purchase cost, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition. Damaged, unserviceable and inert stocks are suitably written down.

Work-in-Progress is valued at lower of cost and net realisable value. Cost comprises cost of land, materials, services, overheads related to projects under construction and apportioned borrowing costs.

Traded goods and finished goods are valued at lower of cost or market value / contracted price.

7. Investments

Investments which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments.

All other investments are classified as non-current investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties.

Current investments are carried in the financial statements at lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the Statement of Profit and Loss.

8. Lease accounting

a) Where the company is lessee

Leases which effectively transfer to the company, substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in the Statement of Profit and Loss. Lease management fees, legal charges and other initial direct costs of lease are capitalised.

A leased asset is depreciated on a straight-line basis over the useful life of the asset or the useful life envisaged in Schedule II to the Companies Act, 2013, whichever is lower.

Where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, such leases are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

b) Where the company is lessor

Leases in which the company does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets subject to operating leases are included in fixed assets. Lease income on an operating lease is recognized in the Statement of Profit and Loss on a straight-line basis over the lease term. Costs, including depreciation, are recognized as an expense in the Statement of Profit and Loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognized immediately in the Statement of Profit and Loss.

9. Borrowing costs

Borrowing cost includes interest, amortization of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

10. Provisions and Contingencies

A provision is recognised when there is a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on management best estimates of the expenditure required to settle the obligation as at the balance sheet date. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate for each such obligation.

A contingent liability is disclosed when there is a possible or present obligation that may, but probably will not, require an outflow of resources unless the possibility of such outflow is remote.

11. Revenue Recognition

- a) Revenues from sales and services are recognised on transfer of all significant risks and rewards of ownerships to the customers and are net of sales returns and taxes. Scrap sale is accounted upon sale.
- b) Foreign commission is recognised on shipment of goods by foreign principals. Local commission is accounted on accrual basis.
- c) Rent, Interest, export benefits and other income are accounted on accrual basis.
- d) Dividend income is accounted as and when right to receive dividend is established.

12. Staff Retirement Benefits

Defined benefit plan :

The Company accounts for the defined benefit plans such as gratuity and leave encashment on accrual basis. Gratuity and leave encashment liability has been determined by an actuarial valuation report based on AS - 15 (revised) obtained as at the year end.

13. Taxes on Income

Current tax provision is determined as amount of tax payable in respect of taxable income for the current accounting year in accordance with the Income Tax Act.

The Deferred tax for all timing differences between the book and tax profits for the year is accounted for, using the tax rates and laws that have been substantively enacted as of the balance sheet date.

Deferred tax assets arising from timing differences are recognised to the extent there is reasonable certainty that these would be realised in future.

14. Foreign Currency Transactions

Transactions in foreign currency are recorded at the exchange rate prevailing on the date of transaction. Exchange differences arising on foreign exchange transactions settled during the year are recognised in the Statement of Profit and Loss of the year.

Monetary assets and liabilities denominated in foreign currencies, which are outstanding as at the year-end are translated at the closing exchange rate and the resultant exchange differences are recognised in the Statement of Profit and Loss.

15. Earnings Per Share :

Basic earnings per share is calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than conversion and potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.
