CHAIRMAN & MG. DIRECTOR'S MESSAGE

Dear Shareholders,

I have great pleasure in presenting the Twenty Fourth Annual Report and Audited Financial Statements for the financial year ended 31st March, 2017. Year 2016-17 has been a very interesting year. The U.S. Presidential election and its impact on globalization grabbed political headlines. In India, demonetization was an unexpected shock to an economy preparing for arrival of the biggest tax reform since independence.

In terms of business, the US consumer market continued to remain steady with soaring housing prices and low interest rates. EU has been grappling with multiple years of slowdown. The Chinese economy also has clearly cooled down. Apparel exports from India remained flat, although overall textiles exports from India fell during the year on account lower yarn and fabric exports. India textile exports have fallen by 5% in FY16-17 also due to fall in cotton textile. While the medium term outlook for Indian textile remains strong, there are many near term challenges that can impact the growth of the sector. Despite the impact of demonetization in parts of Q3 and Q4, the domestic market grew by about 10% during the year. It is expected that in the current year, Implementation of GST will bring few fundamental shifts in the textile and apparel market.

The Indian textile industry market share presently is USD 120 billion and is expected to reach US\$ 230 billion by 2020. The apparel market in India is estimated to grow at a Compound Annual Growth Rate (CAGR) of 11.8 per cent to reach US\$ 180 billion by 2025. The Government and industry is taking all steps to promote textile exports, which is the need of the hour. The Indian economy grew at 7.1 per cent in 2016-17 and seemed to have affected by demonetization and other factors.

Despite challenging global and Indian scenario, the Company recorded a very good performance in terms of increased turnover as well as increased profitability. Your Company recorded a very good performance in terms of increased turnover as well as increased profitability. During the year 2016-17, your Company was able to achieve turnover of Rs. 21381.21 Lacs as against Rs. 19868.75 Lacs in the previous year, showing an increase of 7.61 over the previous year. The Profits after Tax of the Company for the year ended 31.03.2017 has been Rs.420.37 Lacs as against Rs. 406.81 Lacs in the previous year showing an increase of 3.33% over the previous year. The Exports of the Company for the financial year ended 31st March, 2017 were to the tune of Rs. 1282.34 lacs as against Rs. 798.76 Lacs in the previous year, showing an increase of 60% over the previous year

During the year under review, the Company undertook its second phase of expansion in dyeing and fabric processing unit by installing imported high technology fabric dyeing machines, fabric stenter, circular knitting machines, automatic colour mixing and dispenser machine, collar knitting machines, high power brushing machines and heat recovery unit. The Company also undertook implementation of RO/ZLD Plant with a view to save water and make industry more environment friendly.

The Company is planning further to widen its markets both at domestic levels and at international levels. The long term prospects of the company are good along the growth path.

Alongwith the impressive strides in business, we are eagerly working towards playing a committed role in the area of Corporate Social Responsibility. We proudly state that your Company is a **W.R.A.P, B.S.C.I and C-TPAT Certified Company**.

Our success and growth greatly depends on the skills and dedication of our employees, co-operation of our Bankers, and other business constituents, whom I would like to thank sincerely. I am looking forward to another exciting year ahead.

Finally, I take this opportunity to thank all the Company's stakeholders for their confidence in Bhandari Hosiery and I look forward for their continued support in the years to come.

Warm Regards

The Company undertakes no obligation to publicly update or revise any forward looking statements whether as a result of new information, future events or otherwise. Actual results, performance or achievements and risks and opportunities could differ materially from those expressed or implied in these statements. The following discussion and analysis should be read in conjunction with the Company's financial statement included herein and notes thereto.

a. INDUSTRY STRUCTURE AND FUTURE OUTLOOK/ DEVELOPMENTS

The Indian Textile Industry is one of the leading textile industries in the world. The textiles and apparels sector is a major contributor to the Indian economy in terms of gross domestic product (GDP), industrial production and the country's total export earnings. India earns about 27 per cent of its total foreign exchange through textile exports. Besides, the Indian Textile industry contributes 14 per cent of the total industrial production of the Country. This sector provides employment to over 35 million people and it is expected that the textile industry will generate new jobs during the ensuing years. The industry went through a challenging year with the global sluggishness in world economies.

India has been able to face the global economic downturn better than most other countries. India's textile industry has a pervasive effect on its economic life. The Indian textile industry uses a large and diverse range of fibres and yarn, however, cotton is its major input material. Therefore, cotton availability and prices are a major determinant of production efficiency and profitability of textile units. Though the global economy seems to be coming out of the crisis, recovery may be unsteady for a while. The continuous improvement and investment in weaving and processing will help to meet the demand of quality textiles, which will give an edge to the Indian textile industry over competitors. Upgrading technology and infrastructure is an ongoing process and, with the added support of Government bodies it should boost the Indian textile further.

The Textile industry holds a significant position in India by catering to the most basic needs – clothing. The Indian textiles industry is integrated in terms of being extensively engaged in the procurement of raw materials right up to the final production of the actual textile product.

The Indian textile industry market share presently is USD 120 billion and is expected to reach US\$ 230 billion by 2020. The apparel market in India is estimated to grow at a Compound Annual Growth Rate (CAGR) of 11.8 per cent to reach US\$ 180 billion by 2025. Ready-made garments (RMG) exports from India stood at US\$ 17.357 billion in FY 2016-17. India's overall textile exports of India were \$38.60 in year 2016-17, a result of sluggish economic conditions and several other factors globally. The industry is taking all steps to promote textile exports, which is the need of the hour. Costs are increasing due to rising input costs, including labour and power. The fall in the Rupee against the US dollar should act positively for promotion of exports. Focus on new product development and value added products is continuing in this segment.

As regards Indian economy, the Indian economy grew at 7.1 per cent in 2016-17 and seemed to have been affected by demonetization and other factors.

Readymade garments were amongst the largest contributor to total textile and apparel exports from India. The Ministry of Textiles is encouraging investments through increasing focus on schemes such as Technology Up-gradation Fund Scheme (TUFs).

As the Indian Government too, has over the last few months taken some action to revive industrial growth, encourage fresh investment and committed to reforms for industry, our economy in the coming years should regain a trajectory of high growth.

Concerns and Threats

The unfavorable fluctuations in cotton prices and other input costs make it difficult for Indian exporters to compete in the international market. The unfavorable foreign exchange fluctuations and non-availability of skilled workers also are hurdles faced by the exporters including the Company.

We are trying to focus on cost cutting strategies, development of new markets and maintain the quality of our products to satisfy and exceed the expectations of the market and look forward to a better market sentiment for textiles.

The primary raw material is cotton and cotton yarn, which are being sourced from the domestic market. Cotton is an agricultural product and its supply and quality are subject to forces of nature. Any material shortage or interruption in the domestic supply or deterioration in the quality of cotton due to natural causes or other factors could result in increased production costs, which the industry may not successfully be able to pass on to customers, which in turn would have a material adverse effect on business. There can be no assurance that the price levels of cotton will remain favorable. Any increase in cotton prices would have a material adverse effect on the industry.

However, the Company has over the years developed considerable expertise in responding to the changes in prices & demand. Due to company's integration & order based pricing, the company is generally able to pass on the increase in raw material prices to its customers.

Opportunities

The good thing about Indian economy and textile industry is that both are more insulated from the effects of world recessions or financial crisis. Around 70 percent of India's garment exports are towards its traditional markets of the US and the EU. However, apparel exporters are currently on the look out for new markets. To reduce dependence on traditional markets like the US and Europe, apparel exporters are exploring new markets in Japan, West Asia, Africa, Middle East and Australia.

Retail boom in India is credited more to domestic consumers and it is not export driven. Internal consumption of India is very strong, compared to China which depends largely on exports, which has the potential danger of turning into a threat. 60 percent of retail sales in India catering to the domestic market, in fact acts as a shield to the Indian retailer at large.

The need is now that the Government should support in terms of higher duty draw back rates to offset cost disadvantages in India. Side by side it should go for a faster formulation and implementation of sound policies for supporting textile sector. It is expected that the Govt. of India will take suitable steps and adopt suitable policies to boost the Indian textile industry. The apparel industry provides employment to about seven million people, out of which almost half of them are engaged in the export sector. Still there are wide opportunities available to Indian industry not only to grow in international markets but also domestically.

The Government proposes to increase the investment in this sector to generate more employment through various schemes viz. Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS), Integrated Skill Development Scheme (ISDS), Technology Mission on Technical Textiles (TMTT).

India's textiles and clothing industry is one of the mainstays of the national economy. It is also one of the largest contributing sectors of India's exports worldwide. It is expected that the production as well as exports of textile products will increase in the coming years.

b. COMPANY'S GROWTH PROSPECTS AND NEAR TERM OUTLOOK

The future seems to be good for the Indian Textile Industry both at domestic and international levels as India is still maintaining itself as an attractive destination for retail industry and foreign investments. While it is not possible to fully escape the impact of the global uncertainties, the Indian economy is better placed than many to withstand the shock.

During the year under review, the business and economic environment in India and other emerging countries remained challenging. The year witnessed several volatile events like demonetization, burgeoning current account deficit, weakening and uncertain demand, elevated inflation all of which lead to declining business confidence.

f. RISKS, THREATS AND RISK MANAGEMENT

The exports of the company are subject to set legal procedures and Govt. Rules, approvals and regulations and any change in them may affect the business of the Company. Raw material prices also affect the financial performance of the company.

RISKS AND THREATS

The opening of the international markets has thrown a host of opportunities with unique set of challenges. Today we can take justifiable pride in having joined the ranks of the US\$ trillion economies of the world. The change being witnessed can be attributed to several factors including increasing purchasing power of the masses, shifts in the buying behavior, demography dynamics, and growing urbanisation, opening up of the retail segment to private and foreign players and changing trends/lifestyle. Investments in the textile sector have increased significantly over the last three to four years.

The Indian textile sector faces a number of challenges, foremost being fluctuating cotton and raw material prices, infrastructure and inflexible labour laws. Inflow into India of spurious fabric material, counterfeit, fake and misleading selvedge descriptions continues. However, recognizing the threat these spurious imports poses, if continued unchecked, the government has taken a number of steps to check the inflow of such products.

International players are seeking manufacturers with vertically integrated product development facilities and ability for managing quality and costs. Though India is being recognized in this regard and sourcing of value-added products from India is increasing, China continues to be a dominant player in the market with better infrastructure facilities. With its currency in an advantageous position, China is a stronger competitor in exports as well as in the domestic market. The Company is experiencing pressure on margins due to severe competition from other low-cost countries.

Textile being a labour intensive industry, rising labor and skilled human resource costs can put pressure on margins. In order to take advantage of quota-free era, textile and apparel industry require huge investments in infrastructure and also Government's support by various incentives, relaxation and promotions etc, to improve efficiencies and productivity and reduce costs.

g. OPPORTUNITIES AVAILABLE TO THE COMPANY

The Indian Textile industry is expected to get momentum in the coming times. The Company is committed to increase its productivity and bring overall modernization in the manufacturing process. “ANNEXURE B” TO THE INDEPENDENT AUDITOR’S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF BHANDARI HOSIERY EXPORTS LTD

(Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”))

We have audited the internal financial controls over financial reporting of Bhandari Hosiery Exports Limited as of March 31, 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”

Explanatory paragraph

We also have audited, in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act, the financial statements of Company, which comprise the Balance Sheet as at March 31, 2017, and the related Statement of Profit and Loss and Cash Flow Statement for the year then ended, and a summary of significant accounting policies and other explanatory information, and our report dated May 27, 2017 expressed an unqualified opinion thereon.
