MANAGEMENT DISCUSSION AND ANALYSIS:-

(a) Industry Structure and Development:

The growth in the product markets have shifted from the traditional focus on oil and petrochemical sector to the power sector. This shift stands to become more prominent in the next few years as the installation of nuclear power plants becomes more critical for the growth of the economy. The Stainless steel tube and pipe industry can be classified in the organized sector, in which the Company operates has witnessed a sharp growth in capacity over the past few years. There has been a revival in demand in the Fertilizer sector owing to the governments focus on increasing the agricultural produce.

(b) Opportunities and Threats:

With the new government coming in, we are hopeful that the economic environment will improve, customer sentiment will turn positive and the industry will see better growth. The growth in the power, both thermal & nuclear, fertilizer, oil and petroleum sector offer opportunities for the Company's products. However, the pricing volatility of key raw material ingredients (such as nickel) can affect demand and usage patterns of user industry as well as affect the viability of major project investments. Apart from this, installation of LNG terminals can have a substantial contribution in the usage of stainless steel tubular products. The threat of dumping of secondary quality products and imposition of antidumping duties by the government on major raw materials can have adverse effect on the demand.

(c) Outlook:

The Stainless Steel Tubular industry has strong fundamentals and the management firmly believes that this is an essential product required during the further industrialization of the country. Its expansion programme which is catered to meeting the demand for value added products is going to give the Company a chance to participate in the specialized markets which are currently dominated with few manufacturers. The approvals received from users abroad will help in redevelopment of an export market which is currently negligible in the Company's portfolio.

(d) Risk and Concerns:

The global environment continues to be marked by economic volatility. The uncertainty in the international

and domestic markets may affect demand. It may also have a further impact on the Indian Rupee, which would make imports more expensive. The Company, however, is taking suitable steps to ensure protection of its margins as and when required. The high rate of interest and lower monsoons may continue to dampen the investment scenario in India.

(e) Internal Control Systems and their adequacy:

The Company has adequate internal control systems in technical and financial fields.

(f) Financial Performance:

The Financial Performance of the Company was under pressure during the year due to slow down in Indian economy in general and capital goods industry in particular.

(g) Human Resources/ Industrial Relations:

The Company has maintained good industrial relations and is continuously adding to the human resources of the Company.

(h) Cautionary Statement:

Statements in this report on Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations may be "forward looking statements" within the meaning of applicable securities laws or regulations. These statements are based on certain assumptions and expectations of future events. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include economic conditions affecting global and domestic demand and supply, finished goods prices in the domestic and overseas markets in which the Company operates, raw-materials cost and availability, changes in Government regulations, tax regimes, economic developments within or outside India and other factors such as litigation and industrial relations. The Company assumes no responsibility to publicly amend, modify or revive any forward looking statements on the basis of any subsequent developments, information or events.
